Mo/Cr metallisation for Si device interconnection 87−25174
Mo/$MoSi_x$/poly-Si polycide gate technology for MOS VLSI technologies 86−28500
Mo/Si_3N_4/poly-Si gate electrode struct. for MOS VLSI, fabrication and characts. 86−41982
Mo/Ti double layer contact for VLSI 88−13483
Mo/TiW contact for VLSI applications 85−55737
Mo-Al metallisation system for VLSI, ohmic contact props. 87−45823
Mo-Cr metallisation for Si device interconnection 87−74216
Mo-O reactively sputtered films, diffusion barrier props. in Al-Si couples 88−24790
metallisation continued
Mo-Pd-Si, thin film metallisation system, interdiffusion, cpd. formation 87−11701
Mo-Si films produced by plasma deposition, structure and elec. props. *(German)* 85−34884
Mo-Si system metallisation, ion implantation effect on silicidation *(German)* 87−32447
Mo-TiW interconnects, reactive ion etching 87−60348
Mo-gate/clad-moat/clad-W interconnect for VLSI fabrication process 87−6626
$MoSi_2$, IC metallisation appls. *(German)* 87−32446
$MoSi_2$ films produced by electron-beam deposition, characts. *(German)* 85−34883
$MoSi_2$ formation from B-doped glass coated Mo-Si interaction 86−35619
$MoSi_2$ ohmic contact and shallow p^+-n junction form. by ion beam mixing and rapid thermal annealing 85−45544
$MoSi_2$, silicide formation by ion beam mixing and rapid thermal annealing 86−8870
$MoSi_2$ siliciding in conventional diffusion furnace by rapid thermal annealing *(German)* 86−28238
$MoSi_2$ thin films for VLSI cct. interconnection *(German)* 88−33084
$MoSi_x$ formation by ion beam mixing and rapid thermal annealing 86−21866
$MoSi_2$:As-poly Si struct., redistribution of As by silicidation tempering 87−24963
$MoSi_2$/Si polycide structure, rapid thermal annealing 85−55740
$MoSi_2$/poly-Si metallisation, electromigration in microelectronic conducting paths of metallic silicides *(German)* 88−64695
$MoSi_x$/polysilicon bilayers, rapid thermal processing to control dopant redistrib. 85−45618
Nb Josephson IC multilevel interconnections, lift-off planarisation process 88−20318
$NbSi_2$, coevaporated film, structure and props. 86−26895
$NbSi_2$ film form. by scanning electron beam annealing 87−11524
$NbSi_2$ sputtered films, rapid thermal annealing 87−11523
Ni MBE on Si (100) and (111) surfaces, study by RHEED *(Chinese)* 88−19850
Ni lines on polyimide films, pyrolytic laser direct writing, microelectronic fabrication 88−39265
Ni plating on steel and Ni-Co alloy for discrete semiconductor production *(German)* 85−40653
Ni/Au metallisation layers, porosity 87−60361
Ni-Au-Ge ohmic contact system with SiO_2 overlayer for GaAs ion implanted MESFET technology 85−45456
NiGa on GaAs, epitaxial thermodynamically stabilised metal/III-V semiconductor interface 87−74103
NiGeAuAgAu alloyed ohmic contacts to AlInAs-GaInAs heterostruct., charact. 87−11440
NiGeAuAgAu ohmic contacts to modulation-doped AlInAs/GaInAs for HEMT 86−28312
Ni_2P sputtered film as ohmic contact and diffusion barrier 87−53274
$NiSi_2$, MBE growth, struct. props. and device appls. 87−10453
$NiSi_2$ formation by reaction of filament evaporated Ni with Si substrate 87−24933
$NiSi_2$, silicide formation by deposit anneal etch anneal method 87−74218
PLZT, ferroelec. ceramic, laser-induced surface metallisation 87−25686
PZT ceramic, metallisation by Ni-Cu alloy vacuum plasma-arc deposition 85−449
Pb alloy Josephson devices, fabrication technology for high density ICs 86−42165
Pb-In solder interconnections, thermal fatigue damage 86−15096
Pb-Sn alloy microstructure: potential reliability indicator for interconnects 87−53426
Pd, direct write features by laser or ion beam irrad. of palladium acetate films 88−39267
Pd, fine line patterning by focused ion beam induced decomposition of palladium acetate films 88−39268
Pd, metallisation using decomposition of palladium acetate films with microfocused ion beam 87−25155
Pd/Ag multilayer interconnections for hybrid cct. appls. 87−24643
Pd-Ag conductors for MLC ccts., expt. study 87−37752
Pd-Ge ohmic contacts to InGaAsP-InP, solid-phase epitaxial growth 87−1281
Pd-Zn system for ohmic contacts to *p*-type GaP 88−19851
Pd-based ohmic contacts to GaAs and AlGaAs-GaAs, SIMS study 88−13005
Pd_2Si contact process develop. for VLSI 88−7367
Pt metals, electronics manufacturing appls. 85−45332
Pt pattern features by laser-induced thermal decomposition of platinum metallo-organic films, IC appls. 88−39266
Pt silicide formation, defects study by scanning Auger microscopy 87−11438
Pt/Si rapid thermal annealing for self-aligned bipolar ICs 87−1724
Pt-Al_2O_3 cermet resistive synaptic interconnects for electronic neural networks 88−7518
Pt-Si reactively sputtered films, struct. and elec. charact. 86−21446
PtSi contact metallurgy, three temp. annealing sequences, short annealing time 87−25407
PtSi contact metallurgy using electron-beam evaporatedPt films and different annealing processes 86−53452
PtSi defective metallisation, removal technique for semicond. wafer reclamation 85−6838
PtSi thin film Schottky-barrier IR detector 87−29141
Pt_xSi_{1-x} silicide gate electrodes, submicron, fabrication 86−9058
PtSi/Si Schottky barrier, two-step Al/Si metallisation 85−6855
PtSi-Al based structs., use of V as diffusion barrier 87−11435
RuO_2 films, reactively sputtered, VLSI metallisation appl. 87−60353
RuO_2, reactively sputtered diffusion barriers in Si-RuO_2-Al structs., thermal stability 87−60352
RuO_2 reactively sputtered films, diffusion barrier props. in Al-Si couples 88−24790
p-RuS_2-aqueous electrolyte interface, impedance and photoelectrochem. props., effect of metal deposition 87−60215
Si (111) metallisation effect of K adsorption 87−60362
Si ICs, laser customization 87−53659
Si Schottky barrier diode formation by E-beam deposition of metals, defect introduction 85−40668
Si, UV laser induced metal deposition from electroplating solns. 88−39272
Si, adsorpt. of K, interactions, bonding nature and metallisation study 88−57510

metallisation continued
Si, by Al, pre-annealing of TiN barriers 86−28240
Si device metallisation, RF ion plating technique for ohmic contact formation *(Japanese)* 88−39258
Si devices, refractory silicide form. by ion beam mixing and annealing 85−12225
Si, direct writing of Al by laser CVD, prior UV exposure activation 88−39270
p-Si, electron beam and RF sputter metallisation, elec. defects introduction and characteris. 85−34887
Si, growth and processing technology for ICs *(Dutch)* 87−6501
Si materials science issues in IC processing 87−16298
Si, metallisation by mass-analysed ion beams 85−34875
Si, metallisation by photochem. deposition, surface science 86−53568
Si, metallisation with Pd using mass analysed ion beam deposition 85−12224
Si, oxide-covered surface, Au-Pd vapour deposited films, contact form., temp. depend. study 86−1822
Si p^+/n junction, $CoSi_2$ self-aligned silicided contacts 88−50650
Si, polycrystalline interconnection etching, fine line patterning, DC self bias voltage effects 85−6829
Si, porous, Ni plating 86−21438
Si, porous, W deposition for buried conductor formation 87−1441
Si, self-aligned silicide technology, rapid thermal processing 88−44877
Si solar cell contact/interconnector system Intercontact 87−78934
Si solar cell manufacture using thick film technology, review 86−13052
a-Si solar cell modules, design considerations 87−9833
Si, solar cell, penetration levels of metallic impurities, SIMS 85−44197
Si solar cells, Cu contacts 86−7085
Si solar cells, Schottky barrier type, critical anal. 85−5387
Si solar cells fabrication using glow-discharge implantation, thermal annealing and oxide passivation 87−43415
Si solar cells, improved metallisation techniques for high efficiency 88−31033
Si substrate, Cu deposition from a supported film using an excimer laser 86−63206
Si substrates, laser-induced metal and alloy plating, silicide form. 87−23701
Si, surface alloying by laser aluminothermy 87−60355
Si wafer, adhesion of electroless Ni. plating rel. to etching *(Japanese)* 87−38165
Si wafers, thin film chem. growth processes, integrated system 87−73137
Si:As surface, $TiSi_2$ formation 87−6614
Si:B/Ti interface, silicide formation 86−1802
a-Si:H solar cells and modules, long term stability 87−72433
a-Si:H solar cells, screen printing for backside metallisation 88−37542
poly-Si:P in-situ CVD process optimised for production 87−1709
Si:P/Al contact, contact resistance improvement by implantation through Al mask 85−1476
n-Si:Sb, ion beam contacting, contact resist. and RBS studies 85−40517
Si/Al contact, charact. of Al adhesion to amorphised Si surface, electrical props. 86−28232
Si/Al-Ge metallisation system, Al solubility in Si 86−21437
Si/Au/Ni bilayer system, metallurgical and elec. behaviour 86−63109
Si/Au-Si/Ni attached die on their film modules, Ni_xSi_y intermetallic formation 88−7519
Si/$CoSi_2$ ($TiSi_2$), self-aligned silicide processes, elec. props. 88−25974
Si/PtSi/V/Al Schottky barrier diode metallisation system 87−1287
Si/SiO_2 interface trap annealing, kinetics and chemistry, two-reaction model 88−64333
Si/$TiSi_2$ interfaces, struct. and elec. props., CMOS appls. 88−25973
Si/$TiSi_2$/TiN/Al struct., N_2^+ implanted TiN diffusion barrier, VLSI appls. 86−63215
Si/W/$CrSi_2$, contacts for 1 μm CMOS, processing and elec. props. 88−25975
Si-Al contacts, resist. meas. following metal deposition 88−50664
Si-Al metallisation contact, $TaSi_x$ barrier to shallow diffusion 85−23722
Si-Al, metallisation, electron beam lithography, radiation damage 88−33111
Si-Co interface, $CoSi_2$ films, solid-phase epitaxial growth by patterning method 86−437
Si-$Co_{50}Mo_{50}$-Au, amorphous $Co_{50}Ta_{50}$ alloys as diffusion barriers 87−25157
Si-$Co_{50}Ta_{50}$-Al, amorphous $Co_{50}Ta_{50}$ alloys as diffusion barriers 87−25157
Si-$CoSi_2$:B(As), shallow junction formation, redistribution of implanted impurity in $CoSi_2$ 88−39278
Si-Mo direct contacts for metallisation 85−34872
Si-Mo interface, $MoSi_2$ silicide formation, N^+ implantation effects 86−8879
Si-$NiSi_2$ formation by filament evaporation for VLSI, process and meas. 87−67349
Si-Pd_2Si-Mo ohmic contacts to shallow semicond. junctions, contact resist. meas. 87−17785
Si-Ti-WN-Al, metallisation scheme, thermal stability, N redistribution 87−25158
Si-$TiSi_2$, C49 phase $TiSi_2$ films formed by rapid thermal processing, resistivity 88−39275
Si-$TiSi_2$, $TiSi_2$ local epitaxial growth on Si (111), rapid thermal annealing, annealing ambient 87−18037
Si-$TiSi_x$-TiN_x-Al, contact metallisation, effects on shallow junction related props. 88−39274
Si-W, buried conductor formation, low press. CVD W deposition on porous Si 87−18044
Si-W interface, WSi_x silicide formation 85−55573
Si-metal contacts rel. to interconnects for VLSI ccts. 87−53432
Si-metal system, silicide form. for VLSI, impurity effects 86−63214
Si(100)-Ni interface, ion beam mixing, silicide formation 85−50273
n-SiC, UV laser induced metal deposition from electroplating solns. 88−39272
a-SiGe:H,F/Pd(Au)(Ni), Schottky barrier height, internal photoemission meas. 87−24944
Si_3N_4 insulation/passivation films between two or more metallization layers, pin hole filling 85−29167
Si_3N_4-Ti, reaction under rapid thermal annealing 87−18031
SiO_2, bias-sputtered deposition for damage-free planarisation 87−45787
SiO_2 by HiPox processes as interlevel dielec. and contact hole formation 85−40646
SiO_2 low-permitt. porous thick films for high-speed IC packaging 88−39561
SiO_2 planarisation technology, high aspect ratio and high throughput, with bias-ECR plasma deposition 88−7510
SiO_2 planarisation technology with biasing and electron cyclotron reson. plasma deposition for submicron interconnections 87−1421

metallisation continued
SiO_2, reactive facet tapering for multilevel interconnect appls. 87−67131
SiO_xN_y, plasma-enhanced deposited oxynitride films, IR and UV transmission, appl. for electronic devices 87−18045
TCN, RF reactively sputtered thin films, growth, struct., elec. props., appl. for metallisation 88−1478
Ta-Cu amorphous sputtered films as diffusion barriers between Au and GaAs 88−57506
TaN DC magnetron reactively sputtered film as diffusion barrier in CMOS interconnect technology 88−26100
$TaSi_2$, IC metallisation appls. *(German)* 87−32446
$TaSi_2$, LPCVD process 87−31568
$TaSi_2$ and Ta_2Si surfaces, oxidation oxide stability 87−17949
$TaSi_2$ cosputtered on poly-Si, rapid thermal annealing for polycide struct. form. 85−29170
$TaSi_2$ film form. by scanning electron beam annealing 87−11524
$TaSi_2$ films, low press. CVD on n^+-type polycrystalline Si 86−52528
$TaSi_2$ formation by ion bombardment, implant and impurity redistribution 87−38166
$TaSi_2$ gate level interconnects, tensile stresses 87−25176
$TaSi_2$ growth in rapidly thermal annealed Ta/Si multilayers 86−28236
$TaSi_2$ in contact with Al-metallisation, barrier props. 85−34886
$TaSi_2$, selective CVD for submicron IC structs. 87−58997
$TaSi_2$ silicide, sputtering and CVD for VLSI appls. 86−62264
$TaSi_x$ sputtered film on Al, optical coatings for IC metallisation layers 88−33303
$TaSi_2$:As(B)(P), ion implanted, dopant diffusion into Si, SIMS anal. and elec. charactn. 87−74111
$TaSi_2/n^+$ poly-Si layers electromigration phenomena 86−28242
$TaSi_2$/poly-Si polycide films, sputter deposition, ion implantation and thermal oxidation 86−28235
$TaSi_2$/polySi interconnection etching, fine line patterning, DC self bias voltage effects 85−6829
$TaSi_2$/polycrystalline Si structures, oxidation, dopant effects 87−17950
$TaSi_x$/polysilicon bilayers, rapid thermal processing to control dopant redistrib. 85−45618
$TaSi_2$-Si interface, ion implanted, dopant diffusion, SIMS anal. 87−17799
$TaSi_2$-poly-Si contacts, Si loss near 900°C in low-partial press. of O_2 87−25172
$TaSi_2$-polycide/Al, bilevel conductor composites, high current and thermal shock testing 86−9059
$TaSi_2$-polysilicon interconnections, electromigration of Si and P 87−38157
Ti interlayered Al films for VLSI metallisation, eval. 86−28446
Ti layered Al-Si metallisation, contact spiking and electromigration passivation cracking 86−28453
Ti, oxidation, Rutherford backscattering spectrometry, AES, X-ray diffr., elec. resist. meas. 87−11674
Ti stress temp. depend. 86−28452
Ti:Pb, Cu films for salicide and polycide 87−1442
Ti/Al-Si metallisation for ICs, electromigration testing 88−1572
Ti/Au and Ti/Pd/Au gate metallisation structs. in GaAs MESFETs, degradation mechanism 87−53427
Ti/Cu bilayer couple, cpd. form., glancing angle X-ray anal. and Rutherford backscatt. 86−15097
Ti/Pt/Au beam lead metal systems, TiN diffusion barrier 86−2082
Ti/Pt/Au for IC chip preamplifier hybrid IC, reliability eval. 88−20160
Ti/Si interfacial reaction, ambient gas effects 85−23563
Ti/Ti-Au/Au/Cr metallic contacts, resist-marked pattern formation using etching technique 86−28187
Ti/W/Al-Si/Ti/Al-Si 1 micron design rule double metallisation CMOS process 87−1785
Ti/polyimide interface, reaction mechanism and chem. bonding, XPS and UPS studies 86−63211
Ti-Al(AlSi) layered structs. for VLSI metallisation 88−57507
Ti-AlSi, multilayer interconnect, Ti diffusion barrier, contact degradation 88−44707
Ti-Au-InGaAs, very low resistance ohmic contact fabrication 88−50667
Ti-Au-InP, very low resistance ohmic contact fabrication 88−50667
Ti-W, DC magnetron sputtered, diffusion barrier props. on GaAs and Si 87−6476
Ti-W on n-Si, DC magnetron sputter deposition induced defects charactn. 87−11697
Ti-$W_{60}N_{40}$ bilayer, thermal stability and N redistrib. 87−60377
Ti-W/Al CMOS logic array family, design methodology for E-beam customisation 86−47875
Ti-W/Au/Cu metallisation system for TAB assembly 85−61870
Ti-W-AlSi multilayer metallisation, electromigration performance, effects of annealing temp. 88−50753
Ti-W-AlSi multilayer metallisation, electromigration, kinetic variations with stress duration 88−50754
Ti-silica (sapphire) metallisation system, Ti interactions, XPS studies 88−1560
TiB_2, diffusion barrier appls. in Si and GaAs technology 87−25164
TiB_x plasma-enhanced CVD films on Si, furnace annealing, metallisation appls. 87−24946
TiN and $TiSi_2$ simultaneous formation by rapid processing using large area electron beam 87−18032
TiN as a diffusion barrier for III-V metallization 85−34885
TiN barrier metal, 1-μm rule interconnection, high reliability 86−47496
TiN, diffusion barrier props., effect of O incorporation 87−67163
TiN, diffusion barrier, role of O_2 in barrier performance between Si and Al, VLSI metallisation 85−61948
TiN diffusion barriers in Al-Ti metallisation schemes for ICs, performance 86−21440
TiN films as diffusion barriers in high temp. metallisation *(Japanese)* 87−23715
TiN films, ion implanted, as diffusion barriers in Si device technology 86−15075
TiN films, ion implanted, electron beam annealed, as diffusion barriers for Al on Si shallow junction 86−21441
TiN formation on Si and SiO_2 by rapid nitridation using large area electron beam 88−13181
TiN formation on top of SiO_2, in situ RBS, AES, and TEM study 88−39254
TiN local interconnect technology for CMOS VLSI 87−38160
TiN, plasma nitridation technology for VLSI interconnections 87−67603
TiN produced by rapid thermal annealing in first level metallisation for VLSI devices 87−67524
TiN, reactive sputter deposition, incorporation of N, O, and Ar 88−24787
TiN reactively sputtered films, deposition, contact, and electromigration props. 87−60376

metallisation continued
TiN reactively sputtered films for VLSI metallisation 88−71467
TiN sputter deposited films, struct. and elec. charactn., diffusion barrier appls. 88−24789
TiN sputtered films, diffusion barrier appls. 87−25161
TiN thin film as diffusion barrier for VLSI metallisation 87−60375
TiN thin film diffusion barriers, diffusion of Ni 86−21442
TiN thin film sputtering techniques 88−57509
TiN:O films, DC reactive sputtered, metallisation diffusion barrier appl. 88−43932
TiN-Si, N profiles of implanted TiN films, electron energy loss spectra, application for VLSI, metallisation 87−1449
TiN-$TiSi_2$ bilayer form. by Ti lamp annealing on Si in NH_3, diffusion barrier appls. 88−33079
TiN-$TiSi_2$ bilayer system for VLSI contacts, form. by rapid lamp annealing in NH_3 ambient 87−25167
TiN-$TiSi_2$, contact structure, self-aligned nitridation of $TiSi_2$ 86−28239
TiN-$TiSi_2$ multilayer metallisation structures, multipulse laser irradiation prep. 88−39250
$TiN_xO_y/TiSi_2$ self-aligned contact formation, submicron device appl. 87−53423
TiN_xO_{1-x}-$TiSi_x$, bilayer, formation by rapid thermal anneal in N_2 87−11713
TiN_xO_y-$TiSi_2$ ohmic contacts for self-aligned technology, shallow junction form. 88−13183
TiS_2 self-aligned gates for submicron-channel CMOS devices using deep-trench isolation 85−35166
$TiSi_2$, MOSFET metallisation, gas purity requirements 88−13187
$TiSi_2$, MOSFET metallization silicide films, inert gas purity effects 88−71576
$TiSi_2$ contact form. using rapid thermal annealing 87−24938
$TiSi_2$ contact resist., impact on 1-μm CMOS cct. performance 87−45817
$TiSi_2$ film, surface segregation and initial oxidation 85−50456
$TiSi_2$ films, CO_2 laser induced CVD, VLSI interconnect 85−61950
$TiSi_2$ films, laser-induced CVD 86−20087
$TiSi_2$ films on polysilicon, elec. resist., implications for low temp. appls. 87−32440
$TiSi_2$ films, resistivity and growth study for different VLSI process parameters 86−28459
$TiSi_2$ for self-aligned silicide technology 88−7522
$TiSi_2$ formation by As^+ ion beam mixing and rapid thermal annealing 87−24926
$TiSi_2$ formation by ion beam mixing and rapid thermal annealing 87−24927
$TiSi_2$ formation by ion beam mixing, effect of implant and rapid thermal annealing temps. *(French)* 87−66996
$TiSi_2$ formation by rapid thermal annealing 86−2392
$TiSi_2$ formation by rapid thermal annealing 86−67813
$TiSi_2$ formation effect on shallow n^+ and p^+ junctions, rel. to VLSI technology 86−47495
$TiSi_2$ formation from Si-Mo-Ti trilayer struct. 87−18038
$TiSi_2$ formation kinetics on Si (100) and Si (111) 87−24945
$TiSi_2$ formation on Si process control using rapid thermal processing 87−53430
$TiSi_2$ gate metal for GaAs self-aligned gate FETs 86−41852
$TiSi_2$ growth by rapid thermal processing of Ti films deposited on doped Si substrates 88−26098
$TiSi_2$, high temp. process limitation 87−32443
$TiSi_2$, morphology degradation under high temp. rapid annealing 87−67152
$TiSi_2$, oxidation, Rutherford backscattering spectrometry, AES, X-ray diffr., elec. resist. meas. 87−11674
$TiSi_2$ plasma enhanced CVD for VLSI gate level interconnect 85−45622
$TiSi_2$ plasma-enhanced CVD films for interconnect appls. 87−23714
$TiSi_2$ reliable self-aligned contact form. 87−25173
$TiSi_2$ salicide CMOS submicron twin-tub V technology for high-performance custom VLSI appls. 88−64773
$TiSi_2$ salicide ion-beam mixing effects on performance and reliability of devices 88−57645
$TiSi_2$ self aligned silicide interconnection technology for CMOSICs 87−1797
$TiSi_2$ self-aligned 1 micron channel CMOS technology with retrograde n-well and thin epitaxy 85−35168
$TiSi_2$ self-aligned device technology by NH_3 plasma assisted thermal annealing 88−26097
$TiSi_2$, self-aligned, metallisation for submicrometer VLSI ccts. 86−58517
$TiSi_2$ self-aligned metallisation using RTA for shallow source-drains in 1μm CMOS 88−64784
$TiSi_2$ self-aligned process using a-Si on Ti 87−18034
$TiSi_2$, self-aligned silicidation by lamp annealing 85−34890
$TiSi_2$ self-aligned silicide devices, junction leakage 87−6610
$TiSi_2$ self-aligned silicide for VLSI bipolar ICs 86−28473
$TiSi_2$ self-aligned silicide process for VLSI NMOS and CMOS technologies 86−28498
$TiSi_2$ silicided shallow junctions for submicron CMOS 87−25586
$TiSi_2$, thermal stress reduction using impurity effect 88−19859
$TiSi_2$ thickness limitations for shallow p^+ and n^+ junction form. in Si 87−6656
$TiSi_2$ thin film interconnects, thermal stability 87−67174
$TiSi_2$ thin films, fast radiatively processed, elec. characts. 86−21248
$TiSi_2$ thin-film formation from Ti-Si reaction couples, reaction kinetics 85−40667
$TiSi_2$ to p^+ and n^+ junctions, specific contact resistivity 86−2377
$TiSi_x$ form. by halogen lamp annealing, Rutherford backscatt., X-ray diffr. and sheet resist. meas. 85−50272
$TiSi_2$:As(Sb) layers, dopant redistribution during silicidation by rapid thermal annealing, ion scatt. spectra study 87−11624
$TiSi_2$:O films, plasma etching 85−29169
$TiSi_2/n^+$ polysilicon bilayers, rapid thermal processing, P dopant redistribution 85−23723
$TiSi_2$/polysilicon double layer for MOS ccts., dry etching 86−58415
$TiSi_2$/polysilicon gate MOS device low-energy X-ray dose enhancement obs. 88−25996
$TiSi_2$/polysilicon gates, thermal stability 87−11705
$TiSi_2$/polysilicon struct., control of $TiSi_2$ penetration during oxidation 85−45586
$TiSi_x/n^+$ polysilicon gate and interconnect form., rapid thermal anneal 86−21462
$TiSi_2$-Si, self-aligned silicide formation by rapid thermal processing, characts. 88−39276
$TiSi_2$-Si shallow diodes, leakage current rel. to Ti diffusion during $TiSi_2$ form. 87−25224

W film, selective low press. CVD on Si, interfacial struct. 85−39798
W films, CVD, WF_6 purity, Fourier transform mass spectrometry 88−49867
W films, CVD for metallisation of VLSI circuits 85−40658
W films, CVD from WF_6 on Si substrates 88−63359
W films, LPCVD deposition kinetics in single wafer vacuum reactor 87−31566
W films, LPCVD growth for VLSI appls. 86−20103
W films, UV photon assisted CVD, microelectronic metallisation appl. 88−38250
W films by selective LPCVD, struct. charactn., diffusion barrier appls. 87−5502
W films, deposition techniques for VLSI technology 88−18739
W films, excimer laser initiated CVD growth on SiO_2 and Si substrates, phys. props. 87−58966
W films for IC appls., deposition technologies 87−59015
W films for self-aligned gate MESFET technology 87−32565
W films in multilayer conductor systems, props. and LPCVD techniques 85−40854
W films, ion beam enhanced etching with XeF_2 87−25156
W films, localised laser CVD 88−12049
W films, magnetron sputtering prep., elec. and mech. props. 87−5494
W films, plasma CVD, X-ray diffr., SEM, Auger spectra 88−39273

metallisation continued
W films, selective deposition on self-aligned $CoSi_2$ by low pressure CVD 87−23704
W for 1 μm CMOS technology for next-generation channelless gate arrays 88−51010
W gate approach for CMOS technology 87−60370
W gate devices for MOS VLSI 87−6620
W gate process for MOS VLSI 85−1533
W gate technology, reliability aspects 87−60369
W gate technology using wet H_2 oxidation 85−50461
W high-aspect ratio via-hole filling by selective W deposition and etch back 88−20102
W high-rate deposition for via filling, low-pressure reactor design, VLSI process appl. 86−28456
W interconnect, blanket CVD for VLSI devices 87−1462
W interconnection layer form. by CVD 87−38162
W interconnects in VLSI 87−6618
W ion-enhanced evaporated films for VLSI appls. 88−7521
W, laser direct writing, self-resistive heating, selective amplification 88−63353
W, laser photochemical etching by surface halogenation 87−25154
W lines, laser direct, writing for VLSI appls. 87−6617
W, low press. CVD grown, contact barrier appl. 87−11695
W, low press. selective CVD for VLSI technology 85−22547
W, low-temperature selective CVD technology for VLSI multilevel interconnection 88−71460
W metallisation, nonselective CVD technology for gate electrode and interconnections 87−1793
W metallisation, submicron wiring technology with tungsten and planarization 88−39263
W, microwave plasma etching, side wall protection technique using chopping method 87−32434
W multilevel IC metallisation with Cr nonerodible mask and etch stop layers 87−67604
W multilevel high-density high-reliability interconnection by filled interconnect groove metallisation 88−64429
W nonselective CVD films, adhesion to SiO_2 87−5511
W nonselective CVD technology for gate electrodes and interconnections 87−31588
W, photochemical CVD for VLSI metallisation appls. 87−23730
W photochemical deposition on InP, (Ga,In)As and GaAs for ohmic contacts 87−45814
W planar multi-level interconnect technology 87−45834
W, plasma enhanced CVD on Si and SiO_2 substrates 88−43921
W, plasma-enhanced CVD on Si substrate 87−65546
W, refractory metal thin films, interaction with SiO_2 88−19853
W, selective CVD, flow config. effect on deposition props. 87−58998
W, selective CVD for VLSI appls. 87−5485
W, selective CVD for VLSI device appls. 87−5483
W, selective CVD for shallow junctions, contact-hole filling technology 88−7524
W, selective CVD, interfacial tunnel structs. in CMOS source/drain regions 87−18354
W, selective CVD on Al for multilevel interconnect appls. 87−65574
W, selective CVD on Si, use of $TiSi_2$ as encroachment barrier 88−24788
W, selective CVD on $TiSi_2$ for two-level metallisation 87−67153
W selective CVD planarised multilevel interconnection with implanted WSi_x-TiN-Si contact 88−64433
W selective CVD process for VLSI, creep-up phenomena 86−47749
W selective CVD processes development for improved via reliability 88−39251
W, selective CVD, shunt and contact appls. in CMOS LSI ccts. 87−6925
W selective CVD via plugs for multilevel metallisation 87−45832
W selective LPCVD films as diffusion barrier for metallisation of shallow junctions 87−11704
W selective LPCVD films on Si substrate, characts. 87−16704
W, selective LPCVD for CMOS VSLI, appls. 87−5505
W, selective LPCVD for MOS VLSI appls. 87−5484
W, selective LPCVD for contact fill appls. in CMOS technology 87−67156
W, selective LPCVD method for bipolar multilevel interconnection 87−60374
W, selective LPCVD on Si substrate, elec. and struct. props. 87−5501
W, selective LPCVD on self-aligned Ti and PtNi silicides 87−5486
W selective LPCVD plugs for advanced CMOS devices, appl. to SRAM fabrication 88−39704
W selective LPCVD via plugs, elec. characts. 87−67155
W, selective and blanket deposition by atm. press. CVD 87−58999
W, selective deposition by APCVD 87−5488
W, selective deposition by hot-wall LPCVD, importance of HF partial press. 87−59009
W, selective deposition in Varian/Torrex 5101 cold wall CVD reactor 87−59001
W, selective deposition in batch cold wall CVD system 87−59000
W selective deposition, influence on shallow junction leakage 87−60371
W, selective deposition on $CoSi_2$ by LPCVD 87−58996
W, selective dry etching, VLSI metallisation appl. 87−11849
W, selective low press. CVD on silicides, metallisation method for VLSI 88−26104
W selective self-aligned CVD, submicron VLSI ICs appl. 88−19852
W, selectively deposited, VLSI interconnect for CMOS technology 86−41720
W self-aligned growth of microstructures 87−23691
W silicide film, plasma-enhanced CVD, struct. and elec. props. 86−7845
W thick CVD films, two-step RIE process 88−71440
W thin filament form. by LPCVD, VLSI interconnect appls. 87−5508
W thin films, reactive ion etching of micron-sized features 87−60350
W two-layer interconnect for NMOS III technology 87−6625
W two-step selective CVD technique for CMOS VLSI appls. 88−71805
W via plugs for multilevel metallisation, selective CVD 87−38155
$W/TiSi_2/Si$ low resist. contact for submicron VLSI 88−19858
W/polysilicon gate MOS device low-energy X-ray dose enhancement obs. 88−25996
W-Al bilayer metallisation, interconnect encapsulation with CVD coating 88−71450
W-Al interconnection scheme for VLSI multilevel metallisation 87−67522
W-N thin films, reactively sputtered, thermal stability, appl. as diffusion barriers in Si contact metallisations 86−21443
W-Si deposition, micromachining techniques, for string/loop/pyramid microstructures, appls. 88−39279
metallisation continued
W-Si films on GaAs, optical furnace annealing for self-aligned gate FETs 85−18212
W-Si interface, thermal behaviour rel. to silicide form. 87−6477
W-Si low resistance interconnect by selective W deposition on laser-direct-written poly-Si 87−1444
W-Si, selective W LPCVD, metallisation, VLSI circuit appls. 88−57502
W-Si, sputter deposition on Si (100), rapid thermal annealing 87−11714
W-Si system, selective deposition of W films on Si wafers, WSi_2 formation 87−11702
W-Si system, silicidation reaction suppression up to 1100°C 87−6473
W-TaN high-temperature interconnect system 88−71465

hot strip mills, tension-regulating electric drives *(Hungarian)* 85−60595
hybrid gas/induction furnace with microprocessor control for steel tube reheating 86−19623
IEEE Industry Applications Soc. 20th Annual Meeting, Toronto, Ont., Canada (Oct. 1985) 86−40375
in-service training course in power and microelectronics for electrical technician engineers of metallurgical industry 88−11664
induction billet heater, work coil design 86−71125
induction furnaces with cold crucible, technical and economic indexes 85−65651
induction heater utilisation, flexible automated production facility 87−9947
induction heating and melting, equipment and develop. results *(Hungarian)* 87−51659
induction heating at Surahammars Bruk, environmental and operational aspects 86−26412
induction heating efficiency in forges and metallurgy *(French)* 86−66484
induction heating generators, efficiency *(Spanish)* 86−26420
induction heating of metal strip, energy efficient TFX method 86−19622
induction heating principles and benefits for South African industry 86−52051
induction heating process control, computer aided software elaboration 86−71127
induction heating technology, status and trends 86−13198
induction heating unit control algorithms and systems using microprocessor devices 88−18215
induction melting equipment and application trends 86−57056
induction mixing appl. to elaboration metallurgy and setting *(French)* 87−51663
inspection and quality control instrumentation for metal strip 88−31879
instrumentation in mining and metallurgical industries, conf., Vancouver, Canada (May 1984) 85−39443
iron ore grinding ball mill drives power consumption determ. *(Russian)* 85−49218
iron works dynamic compensation of reactive power by thyristor system *(Croatian)* 87−72625
ironworks agglomerate cooling, waste heat utilisation *(Slovak)* 87−72622
Krupp 3-phase AC plasma technology for melting scrap and heating molten steel 88−37760
Lamb waves, high frequency, ultrasonic, for plates and foils thickness measurement 88−61703
laser Doppler technique for contactless meas. of speed of hot strips *(French)* 88−14323
laser machining for flexible sheet metal production *(German)* 86−29280
laser processing, fully automated, of elec. steel 88−2436
LF synchronous motor as blower drive for blast furnace 86−33748
liquid metal EM transport and confinement 88−31228
liquid metal industry applications of MHD technologies 86−45848
machines appl. w.r.t. CSN 33 2200 standard *(Czech)* 88−31225
magnetic pulse action systems, modelling of dynamic processes effects on solidifying metal *(Russian)* 85−32837
magnetic vortex field, 2D, with boundary conditions of 3rd kind, numerical determ. for tube drawing, inductive heating *(German)* 87−19137
maintenance and technological evolution investig. by French GIM *(French)* 88−31422
mass-thermal dependences computing for NHKG power plant *(Czech)* 85−53241
medium frequency induction melting of nonferrous metals, Al and Cu 87−16175
medium temp. furnaces, ceramic heating elements and fibre insulation *(German)* 86−40297
metal bath with mains-frequency induction side-wall heating for hot-dip galvanising *(German)* 85−16470
metals heat treatment rationalisation for energy consumption reduction *(Polish)* 85−32840
mill DC motor protection, armature to excitation circuit transfer *(Polish)* 86−12846
milling machine control, sculptured surface digitization *(German)* 88−24288
moisture content meas. of bulk materials, pulsed neutron method 86−26954
moisture meter for raw materials *(Japanese)* 86−31157
molten metal inductive mixers, influence of construction parameters and supply current pulsation on electrodynamic force *(Polish)* 88−37774
monitoring, targeting and control of energy in the nonferrous sector 87−16194
mould inspection for Si pellets by 3D vision system 88−31533
non-contact size meas. of steel products, microcomputer-based system 85−15040
non-contact surface flaw detection by fiber optic reflection sensors 87−46540
nondestructive determ. of properties and passing of information, for metallurgical components 88−219
nonferrous metals heating using INM-500P-40/80N-II induction unit 87−58481

metallurgical industries continued
nonsalient pole induction motor drives for metal cutting mills *(Russian)* 88−49310
online on-line electro-optical instrumentation for continuous quality control of manufactured sheets 88−60689
optical instrumentation in iron and steel manufacture *(Japanese)* 87−41312
optical techniques for the surface evaluation of bright aluminum sheet 87−49928
optical transducers, relevance to process industries 85−3940
ore moisture meas. at grinding mill input 85−15092
ore smelting furnace productivity improvement by LF power sources *(Russian)* 86−19650
plasma carbonitriding furnace design and performance 88−18243
plasma heat treatment, industrial processes, applics. and benefits 88−18244
plasma heat treatment, scientific and technological challenges for industry 88−18247
plasma heat treatment using pulsed DC glow discharge technology 88−18245
plasma nitriding developments and industrial appls. 88−18246
plasma torch for industrial implementation *(French)* 87−79238
plasma torch operation and appls. to iron and steel industry *(French)* 86−19643
pouring system, continuous small-batch for ferrous alloys *(Japanese)* 88−18239
power source, variable frequency, for electromagnetic molten Al stirrer *(Japanese)* 86−26155
power supplies in metallurgical industries, effects of harmonic sources *(French)* 85−39361
power supply scheduling for metallurgical production plant *(Russian)* 85−27841
power supply system supplied by Siemens for Tomago aluminium smelter 85−60592
power system control using intelligent terminals *(Czech)* 85−26951
power system economics *(Czech)* 85−15486
power transducer controlled electromagnetic channel for continuous casting plants *(German)* 85−10252
presses using thyristor convertor DC drives for distribution network loss reduction *(German)* 85−5555
primary energy demand of industrial heat generation procedures *(Hungarian)* 85−39352
production costs reduction through excess power demand controls 86−7355
pyrometer, double differential, with fibre optic coupling, appl. in smelting and casting industry *(Chinese)* 85−58920
quality instrumentation, conference, Tokyo, Japan (Sept. 1984) *(Japanese)* 86−5018
resistance bale out furnace introduction at Quality Castings, economics 87−22944
resistance heating technology and practice in six countries 86−13197
rotating cylinder electrode technology, design and appl. to continuous production of metal 85−32841
S-NET use in ironworks *(Japanese)* 87−2885
seamless tube mill's flexible QC system with automatic inspection 88−225
semiconductor convertor circuits for metal treatment appls., electromagnetic processes anal. *(Russian)* 88−18240
Shlobin (USSR) compact smelting plant power supply facilities 88−6063
Skodaexport's contribution to development of Indian metallurgical and power engineering manufacturing industry 85−92
slabbing mill main drive motor supply capacity improvement *(Russian)* 86−19649
smelting electrodes, three-dimensional calculations 88−18236
spare power capacity, optimal control under power supply limitations, Cu smelting plant appl. *(Russian)* 88−11514
static convertors quality and reliability, failure analysis, NHKG experiences *(Czech)* 85−60301
steel, special, billets continuous casting metallurgical/process engineering fundamental principles *(German)* 85−10273
steel industry, electrolytic Zn coating, deposition on steel sheets, on ELSA electrogalvanising line *(French)* 85−21992
steel melting arc furnaces, optimal energy regime calc. algorithm 88−37776
steel mill renovation project, power apparatus requirements 88−55746
submerged-arc furnace hearth energy transfer model and computer program 85−49222
telecommunication cableways, MARS ducts design for metallurgical industry *(Czech)* 86−23642
temperature meas. of steel billet in reheating furnace, controlled trials results 86−5569
tensile testing machine in metallurgical industries, microcomputer controlled *(Czech)* 86−17784
thermal hardening of metallurgical products, energy consumption reduction using elec. heating 87−43647
thermoelectric NDT instruments *(Polish)* 87−73208
thyristor controlled drives for Brandenburg rod mill *(German)* 85−5554
tube US testing, with graphic display and data processing facilities 85−21043
UHP furnace, of Krupp Stahl AG, plant-operational experience *(German)* 85−10222
vacuum melting, status and trends 86−13199
vacuum process technology 85−5551
water solution electrolysis plant, nonferrous metal prod. under limited power supply conditions *(Russian)* 88−11517
weighing of torpedo car under tapping 86−11752
Al extrusion billet induction heater for 5.5 to 6m lengths *(Japanese)* 87−43679
Al, liquid state, purification from nonmetallic inclusions by electromagnetic methods 85−44327
Al production from 280 kA electrolytic cells *(French, English)* 86−66513
Al smelter at Holyhead, nuclear power station for electricity supply 87−79237
Al smelting plants, magnetic transducers for fine current adjustment *(Romanian)* 88−62809
Fe oxide, direct reduction using plasma reforming process *(German)* 85−32832
Pb production in Malaysia, smelting 88−55745
V, overview of industrial capacity 87−31089

AFMS-2, microcomputer-based automatic remote transmitting meteorological station *(German)* 87−4139
agrometeorological network with soil analysis laboratory *(Italian)* 85−31985
Aitken nucleus counter instrument, improved design for airborne use 87−71343
anemometer instrumentation on free-drifting ocean buoy 85−31999
ARGOS drifting buoy, new low-cost version 85−32030
automatic weather station instrumentation in operation in Scotland 87−71361
automatic weather stations, errors checking errors estimation *(Russian)* 88−16914
beta radiation gauge, MMP-1, low-add-on impregnation meas. *(Polish)* 86−60935
book 85−4455
buoy station for meteorological observations on a lake *(Japanese)* 88−5119
CLASS radiosonde system, appl. of adaptive polynomials for real-time data editing 87−63945
compact automatic measuring system for meteorological parameters with one-board micro-computer *(Japanese)* 87−42232
computerised instrument, smart low-power meteorological system 88−5155
data acquisition system for atmospheric propagation studies 88−74970
data analysis of NOAA satellite data by personal computer *(Japanese)* 88−36662
dew detector for use with astronomical telescopes, design and appl 87−71355
Doppler acoustic radar, long-term tests at nuclear power station *(German)* 86−12592
Doppler radar and radar networks use in mesoscale anal. and forecasting 86−12167
electric wave and IR apparatus for weather observations *(Japanese)* 86−38952
electrolytical dew point sensors, long-term comparison *(German)* 87−77868
Grundig Sono Clock 1000 Clima Meter, review *(German)* 85−38341
helicopter-deployed buoy for ocean surface meteorological meas. 88−74969
high-altitude outdoor HV laboratory for rarefied air insulation expts. 86−49935
Histos network for hydrological and meteorological measurement for East-Scheldt storm surge barrier construction 87−29947
humidity sensor based on thin film Al_2O_3 88−30170
humidity sensor with digital display *(German)* 85−21014
humidity sensors, commercial, use at automatic weather stations 88−61644

meteorological instruments continued
imaging radiometer, prediction of temperature differences in background scenery 88−30166
injection locked magnetron, phase noise meas., Doppler weather radar system appl. 87−17621
IR satellite, optical design of imaging system 87−29851
Japan meteorological observation *(Japanese)* 85−4444
Japanese JMA-82 meteorological data acquisition system *(Japanese)* 86−6108
KRAMS airport automatic weather stations, error checking *(Russian)* 88−16915
laser radar image enhancement by piecewise linear grey-scale transformations 86−25436
lasers, spaceborne, atmospheric science appls. 86−54232
lidar on spacecraft for atmospheric monitoring 88−61651
loss-compensated radiometer 85−14815
low PRF radar for windspeed gradient meas. 88−54745
Meteorological Recorder, data acquisition, recording and telemetering package for moored buoys 88−61645
METEOSAT weather video movies 85−4456
microcomputer-based weather station monitoring system 85−38337
MM-wave radiometer, airborne, for atmospheric water vapour sounding and rain detection 86−38955
mobile stations for monitoring atm. surface layer characts. 85−4447
Multimet meteorological system for research appls. 87−57380
multiwavelength scanning radiometer, appl. to airborne meas. of scattered radiation within clouds 87−63946
ocean surface helicopter-deployed buoy for meteorological meas. 88−48327
optical rain gauge based on forward scattering, operating principle and data processing algorithm 85−38344
radar, dual polarisation, for clutter analysis 85−58187
radar clutter suppressor, for rain measurement radar *(French)* 86−50745
radar rainfall estimate, clutter rejection and calibration 86−32549
radar system, spaceborne, for global rainfall mapping, conceptual design 88−5173
radiosonde intercomparison experiment organised by WMO 86−50747
rain gauge system, autonomous real-time data logging config. 86−60931
rainfall research field station, instrumentation and data acquisition 86−32539
real-time multisensor processing instrumentation system and software 88−53568
rotating shadowband radiometer, microprocessor-based, 86−50109
SALARGOS oceanographic and meteorological data buoy for Arctic deployment 88−48336
scanning radar for meteorological target, time to independence 86−17493
software packages for digitizing meteorological data 88−54744
solar radiation measurement using bimetal strip pyranographs, accuracy of method 88−23180
spectral solar irradiance measurement system, development and checking 86−25418
sunphotometer for use on aircraft, instrument with tracking and data gathering facilities 88−10543
temperature and humidity of boundary layer, fast-response instrumentation 88−54732
temperature probe, using Si n-p-n transistor, atmospheric studies and meteorological appls. 88−10545
thermocouple thermometer, appl. to temp. meas. in clouds 88−16908
thermometers used in Czechoslovakia, thermocouple and pyroelectric devices *(Slovak)* 88−30162
three-axial fibre-film system for meteorological turbulence meas., calibration 88−5154
turbulence measurement instrument, design of micro-flowmeter *(French)* 87−57367
turbulence measurement system, design and appl. 86−38957
Valvo I^2C bus family, description and weather-station appl. *(German)* 85−28428
visibility distance measurement and telemetering instrumentation *(German)* 86−18575
weather monitoring station, using CMOS microcomputer 86−50742
weather station with digital display, air pressure and temperature meas. circuits *(German)* 85−21013
well logging, appl. of EM similitude principle 85−15424
wind measurement using M63M-1 anemorhumbometer with new panel 86−18573
wind-measuring station for hobby meteorologists *(German)* 85−9373
WOTAN underwater wind recording instruments 85−32009
CO, laser of semiconductor diode type of atmos. monitoring 88−68631

power distrib. networks *(Japanese)* 86−32745
power systems real-power requirements, effects of temperature and daylight *(Russian)* 86−25498
precipitation augmentation, appl. of radar data for planning and evaluation of effectiveness of expt. 87−77865
precipitation zones, effect on satellite radar images of Earth's surface 87−35482
prediction of temperature differences in background scenery 88−30166
primary surveillance radar, hazardous weather conditions detection and recognition 86−17449
program production technique on early morning and night weather forecast *(Japanese)* 88−35684
pulse Doppler weather radars, ambiguity resolution methods 86−17451
radar, meteorological appls. 87−29929
radar detection of hazardous weather, using primary surveillance radar 86−17449
radar for air terminal navigation, traffic control and safety 86−17504
radar for general aviation 88−47208
radar for weather determ., ambiguity resolution methods for Doppler radar 85−59472
radar meteorology, invention and history 86−43889
radar meteorology for satellite communications and Earth sensing *(German)* 85−20134
radar reflectivity images, spatial and temporal anal. 87−62256
radar system at manned space station 86−32532
radar weather clutter, coherent model 88−60234
Radio Shack Colour Computer for SSTV reception 85−26016
radio wave propagation parameters prediction, comprehensive meteorologically oriented methodology, appls. beyond 10 GHz 87−61382
radiometeorological parameters distrib. in South Baltic area 86−29397
radioreceiver for reception of weather pictures from satellites, WES-3/1 receiver *(German)* 86−70531
radiosonde data processing system 86−18574
rain, functional box-counting and multiple elliptical dimensions in radar data anal. 87−63960
rain, microstruct. determ. from multiwave radar attenuation meas. 86−25419
rain cells, horizontal structure, data and theory for new model for propagation appls. 87−61383
rain intensities, point distribs. extrapolation rel. to microwave signal attenuation *(Polish)* 88−52214
rain rate measurement, appl. of lognormal raindrop size distrib. to differential reflectivity radar meas. 88−16907
rainfall data processing using FATEC 3520 system *(Japanese)* 85−32000
real-time geophysical data products for the oceanographic community 85−32026
refractivity, gradient and microwave fading obs. in northern Indiana 86−55192
remote sensing *(Spanish)* 86−59821
remote sensing, digital satellite imagery acquisition and processing 87−57375
remote sensing, scintillation meas. 87−77900
remote sensing, sparse-aperture microwave radiometers 88−54743
remote sensing by satellites, policies of industrial countries 87−35458
remote sensing from space, commercial directions for 1985 to 2000 85−9364
remote sensing of global weather and climate 88−10550
remote sensing of parameters, radio scintillation meas. method 87−50578
remote sensing with the JINDALEE skywave radar 86−65525
RTTY, weather data transmission codes 86−69338
S-band signal reception from meteorological satellites, receiving equipment 86−18576
sandstorm effect on radiowave propag., system design for Riyadh, Saudi Arabia 87−2303
satellite broadcasting of weather pictures *(German)* 87−62893
satellite data access in Australia, requirements and technical infrastructure 87−3152
satellite data receiving station and information processing *(Russian)* 88−10547
satellite for meteorological monitoring, Defense Meteorological Satellite Program 85−26904
satellite image data types and Earth station processing equipment 86−12171
satellite image reception and anal. facility, image preprocessing techniques 87−50560
satellite operation, new support tools 87−77873
satellite picture processing 86−18577
satellite receiver, design *(German)* 87−69880
satellite receiver, design *(German)* 87−69882
satellite receiver for amateurs *(German)* 87−62894
satellite remote sensing, Defense Meteorology Satellite Program of USA 87−57418
satellite water vapour imagery for weather anal. and forecasting, research developments 87−29942
satellite weather images processing using Apple II microcomputer 85−58560
satellite-derived meteorological and oceanographic data, naval operations, practical appls. 85−26891
satellite-Earth links, attenuation prediction in European region 87−76641
sea level and water circulation forecasting, appl. of real-time data systems 87−50570
security information networks for local government *(Japanese)* 86−37260
shipboard environmental data acquisition system SEAS 88−48370
sky and ground radiance measurement, sphere-scanning radiometer for rapid directional meas. 86−38945
solar activity increase in 21st century, and terrestrial consequences 87−61387
space observations for climate studies, COSPAR symposium, Graz, Austria (June-July 1984) 86−2
spaceborne Earth observation, evolution and trends 86−18533
storm activity early warning system using meteorological techniques for electric utilities 85−32092
surface pressure, temp. and humidity meas., appl. to model for water vapour error in satellite microwave ranging 88−5122
surface synoptic meteorological data, subrefraction statistics estimation 87−76563
surface synoptic meteorological data of subrefractive fading model of microwave paths 87−76562
synoptic meteorology, relation to atmosphere integral water vapour and liq. water content from meteorological satellite meas. 85−48476
system for meteorology broadcast reception 86−69337
telecommunication equipment for automatic weather stations, lightning protection *(German)* 86−54751
telecommunications, impact on meteorology 88−16878
temperature measurement in clouds, appl. of new thermocouple thermometer 88−16908
temperature measurement in meteorology *(Japanese)* 86−55876
textural features classification of meteorological imagery 87−4140
thermal inversions in planetary boundary layer acoustic sounding in plains of India 87−54545
thunderstorm activity, remote sensing by means of VLF sferics 86−12174
thunderstorms, high-latitude, effects of unintentional man-made modification 86−25594
UK Meteorological Office archive for marine enquiries 85−4439
UNIDATA project, network design 86−17011
United Kingdom, PARAGON system for archiving and adjustment of daily radar rainfall totals 88−42661
VHF Compact Direction Finder PA 022 on Nordsee research platform 85−25947
visible, IR and MM waves in clouds, intensity attenuation anal. using meteorological models 85−7630
weather forecasting for civil aviation current practice 86−38922
weather pictures from space using Meteosat *(German)* 87−13641
weather-sensitive load forecasting model for dispatch scheduling appls. 88−68855
WEFAX 859 decoder for weather facsimile reception 87−13314
wind estimation algorithms for spaceborne scatterometers, comparative study 88−10552
wind measurement, appl. of errors in sodar-estimated second moments to field meas. 87−63948
wind measurement, errors in second moments estimated from monostatic Doppler sodar winds 87−63947
wind measurements for nonuniform wind fields, appl. of spaceborne scatterometer meas. 88−10551
wind remote sensing, on-ground verification and in-orbit performance prediction of ERS-1 wind scatterometer 87−57373
wind remote sensing, removal of ambiguous wind directions of Ku-band scatterometer 85−38343
wind shear measurements, results from laser remote sensing 87−71358
wind speed extraction with pulse-limited radar altimeter, effect of whitecaps and foam 87−21782
wind turbine meteorological data recording and performance meas. 85−5036
wind turbine siting considerations overview 85−32419
windspeed gradient meas. using low PRF radar 88−54745
Winter Marginal Ice Zone Expt. 1987 operations 88−48340
SO_2 pollution forecasting around thermal power stations 87−30102

meteors
see also meteorites; meteoroids
45-104 MHz band high latitude meteor scatter propagation parameters, characts. 86−59087
automatic meteor track radar system and station design *(Russian)* 87−42234
burst communication channel, high latitude, Doppler spreads and multipath 88−9517
burst communication channels, performance 87−34342
bursts for communication links, database anal. approach 87−34528
communication channel capacity estimation 85−2712
communication systems, dimensioning technique 86−4470
data collection systems via meteor burst 85−36547
drifts, simultaneous CW radio meas. 86−49701
Grahamstown all-sky meteor radar, system and obs. of meteors and thermospheric wind 88−60248
Leonid meteor shower effects on LF propagation in D-region 85−41596
mass distribution index, determ. from radar obs. 85−3547
millimeter and optical waves attenuation and depolarisation, hydrometeors, incoherent scattering effects 86−68706
monostatic pulse-Doppler HF radar, meteor trail detection rates 85−42658

meteors continued
observation system using SIT TV camera *(Japanese)* 87−41267
Quadrantid meteor shower, mass distrib. index determ. from radar obs. 85−3547
radar observations, detect. rates at different freq. 87−63098
radio communication at high latitudes 86−59086
radio echoes from meteors, amplitude-time selector of reflections *(Russian)* 85−3354
radio scatter meteor studies, BMS handbook 86−45962
radio waves reflection, polarisation rot. in meteor burst communication systems 86−59878
radio-meteor systems for time-scale synchronisation, accuracy criteria 87−29312
radiowave scattering off meteor trails, theory 86−3514
surveillance high latitude meteor burst communication system, simulation model 88−3818
survey of meteor-burst communication *(Chinese)* 85−7995
time and frequency standards comparison along radiometeoric channel, instruments design 87−34897

metering
see also meters; standing wave meters; volt-ampere meters; watthour meters; wattmeters
60 HZ electric field exposure meter static and dynamic tests 85−64649
AC voltage metering coupling capacitor voltage transformer calibration requirements 85−59832
acoustic frequency control signal meter, for investigation of signal propagation in acoustic frequency controlled power systems *(Polish)* 85−43659
Anglo-French interconnection, tariff metering 87−50894
arc furnaces power delivery and melting, effects of scrap conditions and charge composition 87−51637
autocompensation meter mathematical model for multiphase network symmetrical components *(Russian)* 85−31490
automatic hierarchical system of metering, monitoring and controlling energy consumers *(Russian)* 86−61201
automatic meter reading system by power-line-carrier communications 87−50902
automatic metering and monitoring of energy flows in power systems *(Russian)* 86−12520
automatic metering system for buildings *(Japanese)* 88−42905
automatic power distribution system, La Grange Park design 85−53304
Brown Boveri M2050 Digital Scope Multimeter for metering appls. 85−26174
CEGB CETAS-D microprocessor metering data collection and processing system 86−32875
CETAS-D bulk supply point metering data acquisition system 87−50892
commercial end-use metering workshop, Seattle, WA, USA (Jan. 1985) 86−39260
computerised telephone metering system 88−41481
consumer prepayment system using encoded magnetic stripe card 87−30281
consumers point of view metering and tariffs formulation 87−50701
credit and load management system for remote meter reading and billing 87−50907
data collection system for industrial tariff metering 87−50890
demand metering facilitated by electronic registers 86−45032
demand monitoring and reduction techniques *(Danish)* 86−12517
direct metering projects, end-use load data validation 88−69077
district heating steam metering with electronic transfer to low-flow lines 86−33081
Duke Power Co. automated metering system to meet sales agreement 87−78218
electric load metering/monitoring/control instrumentation, microprocessor-based, new technology 85−21271
electrical energy consumption, multimicrocomputer device for metering and billing 88−5413
electrical systems installation, repair and maintenance test instruments, selection criteria 85−43021
electrical utility industry, solid-state metering technology 88−61817
electricity charging and metering methods in early years 86−25505
electricity consumer group influence of tariff differentiation, expt. *(Dutch)* 86−70577
electricity meter reading and billing by hand-held microcomputers 87−42379
electricity meter reading and billing with portable microcomputers, financial benefits 87−50899
electricity metering using communicating customer electronic terminal, management requirements 87−50898
electricity meters, installation in open air in boxes, test results *(German)* 85−48626
electricity meters, random tests for widescale extension of standardisation validity *(German)* 85−48625
electricity meters metering charact., anal. of fault influences and measurement inaccuracies *(German)* 85−48630
electricity spot pricing, communication and metering equipment costs 85−59595
electricity supply tariffs and metering apparatus conf., Edinburgh, Scotland (Apr. 1987) 87−43804
electronic gas meter for use with central heating 85−26364
electronic heat meter for space heating appl. *(German)* 85−8755
electronic metering devices, communications protocol for reading and programming 87−50900
electronic time of use metering system, develop. 87−50891
ENEL electronic metering systems for HV, MV and LV customers 88−17227
energy cost allocation among users of large facility 87−76
energy management in UK, domestic metering and load control 88−17088
energy transfer agent, heat and elec. flows metering using microprocessor system *(Russian)* 88−29576
fault indicators, for utility systems, types, strengths and applications 85−27136
Ferraris meters, impulse units, standardisation requirements 87−49830
Finnish load management and distribution automation systems 85−64832
floating meas. and guard connections *(Spanish)* 88−29567
HV feeder and substation protection, microprocessor-based package 86−56485
induction meters, 3-phase, active couple moment calc. using finite element anal. *(Rumanian)* 85−43008
induction meters, service accuracy and lifespan, past, present and future status *(German)* 85−48629
induction meters, short-circuit stability *(German)* 85−48627

metering continued
instrument transformer specification for protection and metering 86−45031
Jordan Electricity Authority, improved metering and national regulations 87−50897
kilowatthour meter accuracy rel. to thyristor and rectifier harmonics *(Italian)* 86−65788
load management and tariff control system using radio teleswitching of meters 87−50905
load management system with remote electricity meter reading using power line carrier communications 87−50903
LV network load measurements, using REMAG-2 statistical recording instruments *(Hungarian)* 85−4706
maximum-demand meter electronics and error limits *(German)* 86−61198
measurement accuracy testing of meter transformers, using automatic electronic equipment *(German)* 85−47999
microprocessor-based metering and control system, innovation design 85−5285
microprocessor-based system, data acquisition and automatic calibration/error correction facilities *(German)* 85−14603
mobile data recording for consumption accounting *(German)* 85−37498
modular tariff instruments, new generation *(German)* 85−48633
multi-rate tariffs and metering for industry and commerce 87−50711
multifunction meters using microprocessors for data sampling and print-out 87−50901
New Zealand Electricity Division, metering review 87−50895
phase indicators, VDE regulations, affects on users *(German)* 85−43019
phase shifting devices, American national standard for marking and arrangement of terminals 88−30427
placement in power system static-state estimation 87−71759
portable measuring instruments for the electrical technician *(German)* 85−8859
power meters, class 0.5, verification set-up 85−9556
power station natural gas consumption, meas. accuracy improvement using error anal. *(Russian)* 87−78478
power system microprocessor based metering and protection devices, waveform sampling methods 88−30419
power utility global control monitoring using Digital Scope Multimeter M 2050 *(German)* 85−43658
Princeton Scorekeeping Method for energy savings in electrically heated houses 86−40307
remote meter reading and load management system using power network for communication 87−50904
remote meter reading using low-powered communication module 88−42906
residential end-use load shape estimation by whole-house metered data disaggregation 86−56391
RLC elements parameters measurement method, anal., accuracy and application range *(Polish)* 85−52826
semi-automatic meter reading for improved cost efficiency 87−71754
Series 90 Metering for industrial consumers of Electronic de France 87−50893
single-phase AC meters, for household use in France, construction and operation *(German)* 85−48631
solid state metering apparatus for electricity billing in Brazil 87−50896
solid-state metering data recorder standardisation for intercommunication and interchangeability 87−50885
sound level meter, design and construction, octave analyser appl. 85−14842
standing charge tariffs, of commercial/agricultural consumers, possibilities of conversion to electrical assessment parameters *(German)* 85−26949
state-of-the-art metering technology exam. 88−47399
static impedance relays, metering charact. for maintaining impedance of power transmission lines *(Spanish)* 85−43662
substation maintenance needs, in-house and contract alternatives 85−65304
Swiss homes power supply, connection to distribution lines, various methods, metering and safety *(German)* 85−27042
SZBT-20 load admission degree flagging device functions, block diagram and operational principles *(Polish)* 85−43660
SZDA data acquisition system, for analogue data collection from metering of convertors and transducers *(Polish)* 85−8747
tariffs, dynamic pricing and communicating metering 87−50705
TARIGYR 400 tariff and control modules for load management and meter reading 88−17228
telecounting system for power system metering and data acquisition 88−17229
transducers and data-processing power placement *(Russian)* 85−43537
transformer substation operations enhancement, by solid-state equipment teamed with SCADA system 85−39075
ultrasonic heat metering, microcomputer-based, for energy savings 85−15065
utility meter reading efficiency improvement with hand-held microcomputer 85−59831

meters
see also individual types of meters
AC electric field meter, 50 Hz, develop. *(French)* 88−60848
AC field strength meters, calibration arrangements 85−37695
arc furnace flicker meter, microprocessor-based system for voltage variation meas. 85−64004
audible signal strength meter for mobile transmitter hunters 88−67916
audio distortion meter, Philips PM6309, design and charact. *(French)* 85−14877
bipolar voltage meters, operational features and safety aspects *(German)* 85−48001
bit error rate metering equipment for investigating optical fibre shortdistance measuring systems *(German)* 86−44351
breakdown voltage meas. apparatus 86−70170
capacitance meter with PLL chip VCO 86−18016
capacitor leakage tester unit 86−55772
capacitor power meas., block diagrams of meters *(Polish)* 87−73816
computerised single phase meter testing by the Eastern Electricity Board 87−49502
core-magnet type, moving coil, flat, indicating errors caused by external mag. field *(Japanese)* 87−3644
counter C-meter using NE555 IC *(Polish)* 88−67947
DC electric field, biological effects evaluation, instrumentation 86−6004
developments *(German)* 87−8504
dielectric water-content meter, quasibalancing, for powdery building materials 85−58953
digital capacitance meter with nulling cct. and LED display, design and construction 86−31465
digital instruments, market survey *(German)* 86−24577

meters continued
dynamic electricity pricing technology 86−44872
electric field meter, multiple-source and frequency error anal. 85−26432
electric field pulse amplitudes, digital meter with automatic sensitivity calibration 88−16246
electric vehicle battery energy meter 85−65569
electrical industries in Iran, meters, overhead line and transformer manufacture 85−16758
electrical installations insulation, systematic gauging *(German)* 85−48028
electrostatic fieldmeters, calibration 88−36138
exposure time meter, bridge cct.-based with four-digit display *(Spanish)* 86−11632
gasmeter calibration system, automatic 85−8689
heat meter for water-based heat supply systems 85−58923
heat meters for water heating systems *(Russian)* 86−70237
Hewlett-Packard 4274/75A LCR meters, modification for admittance meas. under heavy forward bias conditions 85−58839
HF errors of electric field meter in complicated EM environments 86−31134
ideality factor meter with direct readout for testing Schottky-barrier diodes 85−34921
IMS-2 interface for meters *(German)* 86−70000
inductance meter design 85−64232
induction meter for velocity meas. of electrically conducting bodies, charact. eval. *(Russian)* 87−29307
inverse transformer circuits for error-sensing meters, operating props. *(Russian)* 85−55207
LC meter. II , design 88−74512
LCR-meters, microprocessor controlled *(German)* 87−70360
LED bar graph meter, construction 86−49912
mean pressure meter and medical ventilator control appl. *(Italian)* 87−63295
measurement accuracy testing of meter transformers, using automatic electronic equipment *(German)* 85−47999
microprocessor based digital Mach meter, design 86−11424
microwave oven survey instruments eval. 85−60558
Minato flutter meter for R&D on production line 87−49838
Mk 12 LED VU meter, design *(German)* 85−8686
modulated meter for strength of weak quasistatic electricfields 86−60299
modulation meter for CB transceiver, design and construction *(Spanish)* 85−58015
Moire electro-optical displacement meter *(Russian)* 85−29650
moisture control in tobacco drying process *(Japanese)* 88−16563
moisture gauge for powder processes, inductive-capacity type *(Japanese)* 87−63362
moisture gauge for powder processes, IR type *(Japanese)* 87−63572
moisture meter for raw materials, in steel and cast iron manufacture *(Japanese)* 86−31157
Monoprint printing meter for telephone charge recording *(German, French)* 86−23568
multipurpose digital meter for the measurement ofelectrical quantities 86−5181
multisecondary isolating voltage transformers in automatic meter testing systems 87−51331
neutron moisture meter, data retrieval using portable microcomputer 88−16550
noise-factor meter checking apparatus 87−35109
noncontacting pulse current meter *(Russian)* 88−53743
numerical meter for hysteresis and eddy current losses, reversible counter control system *(Polish)* 87−77322
optical dust deposition meter, dust density meas. 88−67929
optical dust deposition meter in coal mines 87−63324
optical fiber based turbine eccentricity meter 87−56664
optical wavelength meter, design and charact. *(Japanese)* 86−31689
panel meters, buyer's guide 88−53749
paper moisture and thickness meas. using cavity resonator *(Japanese)* 86−31611
peak-value meter using high-speed ICs 88−67943
phase trajectories of electrical analogue measuring instruments *(Polish)* 87−41535
PHESS meter, microprocessor-based online performance recorder for slip-ring induction motor 87−42933
position meter, design *(Spanish)* 85−20726
precision distortion meter, design and charact. *(Spanish)* 87−70697
pressure gages how they work and review of product 85−58722
pulse rate meter with visual display, cct. design using photocell/counter config. *(Spanish)* 85−15306
RCL meter with automatic graphic and numeric display *(German)* 85−20645
relative humidity meas. *(Spanish)* 87−50012
RF test equipment, features and capabilities 88−29469
rock thermal conductivity meters, programmed digital design 87−57330
SHF moisture meters effectiveness evaluation 86−38432
shop-built tools increase meter-shop efficiency 87−41565
signal analysis meters, review 87−77346
single-electrode electric-field meters 88−10062
soil height profile meter, optoelectronic 88−15911
sound level meter, Bruel & Kjaer 2231 *(German)* 85−58507
sound level meter, design *(German)* 85−58951
state-of-the-art metering technology exam. 88−47399
telecounting system for power system metering and data acquisition 88−17229
temperature difference meter using integrating ccts., design and calibration for domestic heat loss monitoring *(Spanish)* 85−14875
temperature meter with LED display and rise/fall indication *(Spanish)* 85−48018
test meter inaccuracies 87−41560
tribometer based test complex for friction couples investig. 88−22446
UIE flickermeter, lighting flicker level control 88−17226
ultrasonic thickness meas. without ref. standards *(Russian)* 88−36219
Wayne-Kerr LCR bridge type 4210 impedance meter *(German)* 85−14852

extracellular neural recording with multichannelmicroelectrodes 87−4004
glass microelectrode tip, modelling 87−57067
glass microelectrodes, open tip: cond. through wall at tip 87−35377
glass-coated metal microelectrode for depth recording in awakeanimals 86−50567
implantable stimulating electrodes in longit. and transverse direction to skeletal muscle, long-term threshold behaviour 88−16784
ion-selective electrodes for intracellular recording in vertebrate cells, simple method for making 86−32323
linear electrode impedance in physiological buffer, mapping using Pourbaix's diagrams 88−10311
monolithic impedance buffer, with a compatibleJFET-CMOS technology 85−62103
multi-site stimulation and recording from rat hippocampalslices using a microelectrode array 86−60709
multichannel multidepth extracellular, fabrication by laser drilling 86−60791
multimicroelectrode fabrication by Si dry etching *(Japanese)* 87−14904
multimicroelectrode for neural impulse meas., fabricated by Si dry etching 87−63775
multiple floating microelectrode for chronic implantation and long-term single unit recording in the cat 85−4332
nerve and muscle stimulation and recording appl. *(Japanese)* 85−15326
neural prosthesis microelectrode arrays, 2D, design 88−54631
neural signal recording and anal. from many neurons simultaneously, using multichannel silicon-based microelectrodes 88−36487
neural signal transducers, electrode spacing considerations 88−48166
organic molecules and polymers, electronic applications in molecular electronics 88−1288
Parylene-C coated microelectrodes as long-term implants, monkey obs., neuroprostheses appl. 88−23117
patch electrodes, glass composition, effects on ion channel currents 88−30005
planar microelectrode array for recording from the Aplysia abdominal ganglion 86−44658
positioner with μm accuracy, for microelectrode placement *(German)* 85−26741
resistance meter for microelectrodes, improved, neuroscience appl. 87−14372
semiconductor microprobes, recording/biocompatibility props., cortical neurons extracellular recording appl. 87−63796
single-unit pH-sensitive double-barreled microelectrodes for extracellular use 85−15266
solid-state electrodes for multichannel multiplexedintracortical neuronal recording 86−44660
sputtered Au microelectrode with multibarrelled micropipette: extracellular recording/iontophoresis appl. 88−10358
static charge distrib., real-time visualisation method 88−58781
stepper motor-driven microelectrode positioner, neuroscience appl. 87−63719
thin-film multiple electrode probes: possibilities andlimitations 86−44659
third-generation implanted pacemaker design *(Polish)* 87−77689
tip geometric area definition by plasma etching of Parylene, intracortical stimulation appl. 87−21624
transsubstrate microelectrode array, laser-induced fabrication and neurophysiological performance 85−64527
voltage clamp using a single microelectrode, theory and operation 85−4340

microelectrodes continued
Cu ball bonds to Al electrodes, reliability study *(German)* 87−73946
O_2, double-barrelled recessed cathode, improved fabrication method 88−54468
Pt-Ir electrodes, chronically implanted, elec. characts., cat obs. 88−10303
Sb pH microelectrodes, recessed and unrecessed, O_2 sensitivity 88−74796
Si microelectrode impedance, geometry, and neural cell recording ability 86−50600
Zn porous electrodes, polarisation behaviour of plain and polymer bonded microelectrodes in KOH solns. 86−13020

2nd-order toroidal characts. 85−47735
acoustic field anal., coherent-optical processing method 86−16537
acoustic guitar sound reproduction using synthesizers and sampling 88−4246
acoustic recording noise elimination expts. *(Japanese)* 88−29174
acoustic-wave speed measurement, detector cct. 87−50008
acoustical distance meas. between intensity probe microphones 87−41643
acoustoelectric transducers, technological developments and types *(Czech)* 86−24197
active loudspeakers with microphone attached to woofer cone *(German)* 85−20411
active noise control using adaptive digital signal processing 88−73101
active systems for sound attenuation in ducts 88−74179
adaptive microphone array implemented on the signal processor TMS 32010 88−10614
adaptive microphone-array system for noise reduction 87−20761
adjustable notch filter for acoustic feedback reduction *(German)* 87−66303
aircraft noise level meas., ground-plane and 1.2 m microphone discrepancies 88−68095
amateur radio, speaker/microphone addition 86−37742
arc-arrayed microphone systems, spatial distribution of sensitivity, expts. *(Japanese)* 88−30192
array with adaptive post-filtering for reverberant rooms noise reduction 88−74178
arrays, adaptive optimisation under nonlinear constraint 87−20778
arrays, computer-steered for sound transduction in large rooms 86−12215
arrays for speech data acquisition anal. 88−15850
automatic mixing, direction-sensitive gating principle 85−3795
Azden PCM-463 microphone, lockout switch design 88−41544
base station microphone unit for amateur radio 85−30853
bidirectional microphone design 88−23195
bidirectional microphone for the measurement ofduct noise 86−12217
boiler tube leak detection by filtered microphones 86−12684
capacitor, developments in last 40 years *(Dutch)* 86−17684
capacitor microphone module *(German)* 86−44063
capacitor microphones, developments, development history *(Dutch)* 86−17683
capacitor microphones, free-field reciprocity calibration, 316.2 Hz to 19.95 kHz 85−31237

microphones continued
capacitor microphones, wide-band calibration, 39.8 Hz to 19.95 kHz 85−31238
capacitor-type, upper limit of dynamic range as linearity criterion 85−47743
CB radio microphone 85−47432
CMOS preamplifier for electret microphone appl., design and operation 86−57694
coloured flashing light system using microphone control, 1 kW cct. design with triac switching *(Spanish)* 85−60543
condenser, for extremely low sound levels 85−37336
condenser, freq. response charact. 88−53479
condenser microphone, electronic noise calcs. 87−63176
condenser microphone in high press. N_2, freq. response *(Japanese)* 88−4225
condenser microphone simulation using boundary element method 88−23197
delay-steered microphone arrays, beamwidth and useable bandwidth anal. 85−52573
design trade offs for microphone selection 88−22348
design tradeoff studies 88−74173
digital audio recording technology developments *(Czech)* 85−20421
distortion autocorrection system for digital telephone network using vocoders 85−47285
diver voice communications, adaptive noise cancelling appl. 87−62502
dummy head microphone, electroacoustic equipment meas. appl. *(Japanese)* 86−31068
dynamic microphone membranes subject to transients, transduction props. 88−5215
electret, circular backplate, theoretical and experimental studies 85−47736
electret microphone *(Dutch)* 86−38129
electretic microphone, hybrid system of preamplifier, construction and parameters *(Polish)* 87−41270
electroacoustic polymer microphones and earpieces *(German)* 87−29979
EM algorithm, noise cancellation methods 87−61647
engineering principles and basic contributions over a century 87−63177
fibre optic acoustic sensors, physical principles 87−74775
fibre optic instrumentation devices, review *(Polish)* 85−2001
fibre optic microphone *(German)* 86−70543
fibre optic probe microphone stability improvement, by frequency control of light source 88−16125
flash actuating switch with monostable multivibrator *(Spanish)* 87−45345
FM test transmitter with microphone *(German)* 85−8542
foil electret acoustic antenna design 85−20399
free-field calibration 85−20397
ham radio desk microphone with AGC 88−35362
hand-induced noises compensation *(German)* 86−11333
handsfree mobile microphone 88−9441
hearing aid, FM auditory training equipment using press. zone microphones to improve SNR 88−61461
hearing aid, noise reduction techniques 88−54651
hearing aid microphone cascade parameter det. using 2-load method 88−68660
hearing aids, multimicrophone monaural 88−54646
hearing aids, noise cancellation 87−21668
Hi-Fi transmission weakest link *(German)* 88−9818
high static pres. effect on freq. response of condenser microphones *(Japanese)* 88−53481
highly directional microphones, off-axis comb-filter effects reduction 87−77038
home studio microphones selection, and cost-performance ratio *(German)* 87−14007
howling canceller of an adaptive filter *(Japanese)* 86−31060
howling suppression between microphones and monitoring loudspeakers, adaptive filter appl. 86−44047

CAB real-time programmable processor for digital processing and high-speed data acquisition *(French)* 85−840
cache control memory management units, standalone chips 88−44165
cache memory, design and implementation 88−32190
cache memory design of Intel 80386 microprocessor *(French)* 88−6840
cache memory requirements in RISC computers, MIPS, R2000 88−821
CAD, microprocessor datapath synthesized with atranslator from schematics to silicon 86−52886
CAD conf. Santa Clara, CA, USA (Nov. 1986) 87−36322
CAD global accelerators: a closer look 87−38484
CAD of ICs *(Russian)* 86−46044
CAD of microcontrollers 86−34869
CAD system for prolog based machine design 87−37363
CAD tools for dedicated signal processing chips 85−35203
canonical digraphs for processor data paths 85−28578
capability-based microprocessor system architecture 87−66221
cascadable digital signal processor 87−10913
cascadable NMOS VLSI cct. for fast convolver/correlator implementation using Fermat number transform 87−37329
Casimir effect in microchips, measurability 88−793
CATHEDRAL-II: computer aided synthesis of digital signal processing systems 87−59588
CC33 digital video image filtering chip, cascadable, real-time, features *(French)* 88−19290
CCD line camera with single chip microcomputer *(German)* 86−49829
CCITT 32 kbit/s ADPCM algorithm, DSP implementation 86−64315
CCITT V.32 modem, implementation on a general purpose DSP chip 88−799
CCITT wideband coder implementation using high performance fixed point DSP 88−67147
CDP6805 family of CMOS microcontrollers *(German)* 86−53796
CDP68HC05D2 microcontroller, serial peripheral interface bus 85−17595
CDP 1802 microprocessor, cct. appls *(Dutch)* 85−61300
CELLSOS fast Fourier transform chip set 85−33988
cellular array parallel processor chip, transistor-level simulation using a hardwareaccelerator 86−41153
cellular array processor for discrete Fourier transform computation 85−45065
cellular rotator array CAD , VLSI implementation 88−70831
cellular VLSI processing architecture using CORDIC elements for image processing 87−44946
cepstrum calc. using digital signal processing algorithms, VLSI architecture 87−52659
chained reference address comparator VLSI-chip for multi-microcomputer systems *(German)* 86−57864
character, string search engine with CAM, CMOS VLSI device, rapid text retrieval appl. 88−6902
characteristics meas. *(Russian)* 86−34862
chess move generator, single-chip implementation in CMOS, design and architecture 87−66260
chess-move generator, CMOS single-chip unit 87−59621
chip card significance in cryptographic systems *(German)* 88−25242
CHiP computer appl., book contrib. 85−46813
chip design tools 86−8308
chip for Graphical Kernel System (GKS) 85−6329
CHMOS Intel 80387: high performance, single chip numerics coprocessor for the 80386 88−12434
CHMOS low power chips *(German)* 85−55949
choosing microprocessors, Swedish industry study *(Swedish)* 85−61310
cipher chip design, exponential equation solution 87−27217
clamped PWM invertor, neutral point, microprocessor based area sampling technique 86−12944
CLAP-4 cellular logic array processor, implementation 86−34824
CLIP4S 2D processor array for picture processing 87−37352
CLIP7A image processor chip, implementation 88−50181
CLIP parallel image processor chip 86−57848
Clipper, 32-bit microprocessor for CAD/CAM applications *(German)* 88−44179
Clipper, Fairchild CMOS microprocessor, internal architecture *(German)* 87−24225
Clipper, Fairchild CMOS processor, architecture and features *(German)* 87−24224
CLIPPER 32-bit microprocessor, new performance standard 87−10926
CLIPPER CAD system integrated hierarchical VLSIdesign 86−52630
Clipper microprocessor 87−66231
CLIPPER microprocessor architecture overview 86−52890
CLIPPER microprocessor combines RISC and CISC 88−818
CLIPPER microprocessor mainframe-style caching 88−820
Clipper processor, memory management aspects *(German)* 87−37312
clock chips with display multiplexer *(French)* 85−6404
clock generator for Micro-270 32-bit microprocessor 87−44926
clock generator/driver μPD71611 for V60 microprocessor *(Japanese)* 87−37419
CMOS, dynamic control of MCU current usage 86−52859
CMOS 16-bit microcomputer, integrated modular and standard cell VLSI design approach 85−35176
CMOS 16-bit microprocessor, MN1617, high-speed operation, design and characts. *(Japanese)* 86−52873
CMOS 16-bit MPU and direct memory access controller 87−37328
CMOS 2-μm technology appl. to adaptive array processor 86−46882
CMOS 32 b microprocessor with on-chip cache and transmission lookahead buffer *(German)* 87−59606
CMOS 32 bit processor design, DIPS-V30 and -V20 and DEX 87−59535
CMOS 4 bit slice microprocessor, CY7C901C, architecture and features *(French)* 85−54918
CMOS 4-bit microcomputers, M50430- and M50431-XXXSP, design and appls. *(Japanese)* 85−20374
CMOS 4-bit single-chip microcomputer, MN1700 series, design, architecture and charact. *(Japanese)* 86−52874
CMOS 4-bit single-chip microcomputer with dual-crystal oscillator system *(Japanese)* 86−52876
CMOS 4-bit single-chip microcomputers, MN15834 and MN158341, design for telephone equipment appls. *(Japanese)* 86−52877
CMOS 6502-family microprocessors, Hong Kong source 85−22921

microprocessor chips continued
CMOS 8 bit single-chip microcomputers, M50740-XXXSP series *(Japanese)* 85−17467
CMOS 8b microcomputer for implantable biomedicalapplications 86−14294
CMOS adaptive line equalizer VLSI using digital signal processing, subscriber loop transmission appl. 88−59948
CMOS advanced design for compact and powerful ICs 86−53790
CMOS advanced single-chip signal processor 87−17141
CMOS arithmetic processor chip for robot control architecture and appl. 86−20632
CMOS associative memory chip 88−56700
CMOS bit-slice microcode driven computing engines 88−807
CMOS bit-slice microprocessors 86−20582
CMOS bit-slice processors, design and development *(German)* 87−37311
CMOS cell library for digital signal processing 87−6895
CMOS chip pair for digital TV 87−59618
CMOS chip set, self-testing 2 μm, for high-speed radix-2 FFT appls. 86−34872
CMOS chip set for 32-bit RISC CPU engine 87−44866
CMOS chips, 32-bit CPU, MMU-cache and floating point accelerator, AT&T 87−18314
CMOS custom microprocessor, loss-of-clock monitor and on-chip RAM power multiplex switch 85−11282
CMOS developments in bit slice microcode driven computing engines 87−783
CMOS devices, ADSP-1401 microprogram sequencer, ADSP-1410 address generator 86−14279
CMOS DFT processor, 16 point, 1.2 μm technology 87−59590
CMOS digital signal mixer for video signal processing 86−34877
CMOS digital signal processing ICs, characts. and performance *(German)* 85−11375
CMOS digital signal processor, 8-MIPS, with parallel processing capability 87−5912
CMOS digital signal processor building blocks 86−8288
CMOS digital signal processor chips for military appls. 86−57847
CMOS digital signal processor status 88−38582
CMOS digital signal processor units *(Italian)* 86−1099
CMOS digital signal processor with on-chip instruction cache 87−59612
CMOS DSP, 8 MIPS execution rate, design with highly parallel architecture 87−17156
CMOS DSP, LM32900, 2 μm technology, 32 bit ALU, config. and flexible addressing capability 88−813
CMOS DSP, MB8764, config. and digital filter appl. *(German)* 86−1094
CMOS DSP, open architecture, review 87−27469
CMOS e3400 modular microcomputer chip, autonomous systems and intelligent networks *(German)* 87−37349
CMOS floating point chip, 32-bit math accelerator unit 86−34871
CMOS floating point signal processor for sonar/radar appls. 85−49935
CMOS fully static processor chip, 80C88, design appls. 85−17468
CMOS hard disc controller with data buffer and error correction 85−22965
CMOS high-speed gate array incorporating static RAMs, TC17GM61, design and characts. 85−22784
CMOS ICs production testing, quiescent power supply current meas. 88−20127
CMOS image processing address generator chip, design 86−16563
CMOS integrated graphics system chip 88−50176
CMOS integrated systolic processors for image treatment *(Italian)* 87−763
CMOS LISP processor chip with 114 K on-chip RAM, architecture and self-test feature 88−6901
CMOS LSI data stream processor for digital filtering, serial architecture and implementation 85−22941
CMOS mainframe chip set 87−59608
CMOS memory access controller, architectural perspective 87−60694
CMOS microcomputer, 4-bit, Hitachi HD61827, design and features for telephone set appl. 86−43614
CMOS microcomputer, CDP68HC05D2, architecture and operation, intelligent telephones appl. *(Italian)* 86−41145
CMOS microcomputer, single-chip 8/16 bit high-performance device *(Japanese)* 88−44206
CMOS microcomputer units 85−12435
CMOS microcomputers and single chip computers *(German)* 85−11284
CMOS microcontroller, dual-metal, design technique based on semicustom CAD 86−15270
CMOS microcontroller, Thomson Semiconductors ETC 9410, config. and LF function generator appl. *(German)* 86−27143
CMOS microcontroller LSI, 8-bit, M50734SP, design and characts. for OA appls. *(Japanese)* 87−10908
CMOS microcontroller with 16 MHz *(German)* 86−27341
CMOS microcontrollers, Mitsubishi Series 740 85−6347
CMOS microcontrollers, μCOM78K family, 8/16 bit architecture, robotics and industrial motor appls. *(French)* 88−19173
CMOS microprocessor, 32 bit, design with on-chip cache and translation lookaside buffer 88−6900
CMOS microprocessor, 8-bit, Hitachi HD64180, design and features 86−41146
CMOS microprocessor, Clipper, programming model *(German)* 87−31924
CMOS microprocessor, operation in liq. N_2 86−67236
CMOS microprocessor, operational characteristics at cryogenic temps. 88−44185
CMOS microprocessor with instruction-controlledregister file and ROM 86−14293
CMOS microprocessors, chip set selection 86−14235
CMOS microprocessors, general-purpose, 8-, 16- and 32-bit devices, NEC's V-series 85−33956
CMOS microprocessors, NEC V-series, charact. and performance *(German)* 85−11311
CMOS microprocessors and single-chip microcomputers, standards 85−17457
CMOS microprocessors and single-chip microcomputers 87−10895
CMOS microprogrammable 32-bit microprocessor 86−8296
CMOS microprogrammable realtime video signal processor (VSP) LSI for motion compensation and vector quantization 87−59594
CMOS monolithic image edge detection filter 87−59595
CMOS multimode PCM transceiver chip for 1.544-Mbit/s digital telecommunications 88−51001
CMOS multiprocessor chip for image processing, 50 MIPS , TV image transforms appl. 88−70833
CMOS pipelined image processor, 32-bit, design for medical diagnosis and remote sensing appls. 87−17159

microprocessor chips continued
CMOS pipelined processor, fourier transform algorithm and VLSI implementation 87−24247
CMOS pipelined video signal processor for decoding composite TV signals 87−8413
CMOS power-saving logic cct. for microprocessors employing power-down/save feature 87−59305
CMOS process reliability, 8-bit and 16-bit microcomputers appl. 85−23950
CMOS processor modules for signal processing appls. *(German)* 86−20583
CMOS real-time signal processor for audio range *(German)* 87−37347
CMOS signal processor chip, Fujitsu MB8764, design and performance *(German)* 85−49912
CMOS signal processor for genuine parallel processing in a multiprocessor system *(German)* 87−8564
CMOS signal processors for telecommunication *(German)* 86−58605
CMOS single chip 80b floating point processor 86−14295
CMOS single chip graphic system 87−59592
CMOS single event upset immune integrated circuits for ProjectGalileo 86−35884
CMOS single-chip 80-bit floating point processor 86−20596
CMOS single-chip digital signal processor, HD61810, pipeline struct. 85−6368
CMOS single-chip edge detector for real-time image processing 86−34875
CMOS single-chip microcomputer, μPD78312, for real time automotive control 86−20625
CMOS single-chip microcomputer, Suwa Seikosha SMC 4151, config. and characts. *(German)* 85−54922
CMOS single-chip microcomputers, functional integration, low power 87−5915
CMOS SOS technology 87−46241
CMOS sub-micron echo canceller VLSI using DSP cell *(German)* 87−59611
CMOS subscriber digital signal processor LSI for PCM applications 88−59872
CMOS systolic digital filter processor 88−25270
CMOS technology, memory techniques, advances *(German)* 86−34839
CMOS technology trends and new products 85−23939
CMOS universal digital signal processor chip and appls. *(Dutch)* 86−46870
CMOS USLI system models 88−64769
CMOS V60 microprocessor, NEC 32 bit device with pipeline struct. *(Japanese)* 87−37335
CMOS versatile data string-search VLSI 88−51003
CMOS video and synchronous processor chips for digital TV appls. 88−9716
CMOS VLSI, logic failure anal. using laser probe. 85−7103
CMOS VLSI building blocks for high performance digitalsystems 86−46887
CMOS VLSI chip, on-chip parallelism, empirical study 88−71788
CMOS VLSI chip for executing Prolog programs 88−25280
CMOS VLSI chip for high-performance graphic control using multiprocessor architecture 86−20601
CMOS VLSI chip for real-time centroid calculation, digital image processing 87−59593
CMOS VLSI chip implementation of neural network model 87−67609
CMOS VLSI chip set for a small mainframe processor 88−64772
CMOS VLSI convolver for robot vision system, design using 5 μm technology 87−44938
CMOS VLSI fuzzy logic chip and fuzzy inference accelerator 87−52664
CMOS VLSI graphics co-processor for high resolution workstations, Am95C60/QPDM, config. and appls. *(German)* 87−44941
CMOS VLSI image processor chip, parallel Hough transform approach 88−50208
CMOS VLSI low cost custom chip for real-time image median filtering 87−776
CMOS VLSI microchips for employment in switching system processing units 87−13515
CMOS VLSI processor chips, hierarchical design methodology and performance characts. 88−6898
CMOS wake up systems for industrial control applications 86−41907
CMOS Z8-SM 803 one-chip microcomputer *(Japanese)* 86−27363
CMOS-CCD signal processor for skew compensation of home-use VCRs 87−63172
CMOS-IC technology of the future *(German)* 85−12418
CMOS-RAM and EPROM-modules for K1520 microcomputer *(German)* 85−33912
CMOS-SOI 1.4 μm technology on annealed SIMOX substrates 88−64779
CMOSIC digital signal processor for Hi-Fi appls. 88−19180
colloquium on new microprocessors, London, England (Nov. 1984) 85−16588
colour palette chip EF 9369, function and application *(German)* 86−67233
colour TV receiver digital signal processing chips 85−52493
combat vehicle electrical systems, implementation of microprocessors 87−24271
combinational word-parallel and bit-parallel associative processor 87−52628
combined video/audio processor chip, custom CMOS VLSI device for 32-bit PC appls. 87−24261
communicating state machines: a design methodology forVLSI microprocessors 86−46911
communication protocol for single chip processors 86−49281
compact markov models for random test length calc. 88−827
compact micro-store for VLSI computers 85−45084
COMPCON 87 conf. San Francisco, CA, USA (Feb. 1987) 87−43790
compiler chip, rumours of Japanese blueprint 85−35071
complex digital signal processing, VLSI modular architectures 87−62011
complex DSP appls., quadratic residue processor 87−59568
composite CMOS gate array with 4K RAM and 128KROM 86−47804
computer controlled microprocessor board for educational purposes 88−12445
computer performance, limitations, array processors *(Japanese)* 86−34861
computer simulation and synthesis of tests for microprocessors using microprograms *(Russian)*, 85−45077
computer system based on algorithm of variation-difference circuit 87−44861
computer vision, VLSI convolvers 87−69350
computers and digital electronics 86−52870
computing speed comparison *(German)* 87−10903
concurrency and communication hardware simulators 87−24232
concurrent DSP processors, aerospace simulation application 87−63876
concurrent error correction in unidirectional linear arrays 87−59540

microprocessor chips continued
concurrent fault detection in microprogrammed controllers, optimising checking codes 88−27821
concurrent VLSI architecture for covariance-lattice computations in maximum entropy spectrum estimation 85−51633
concurrently totally self-checking microprogram control unit with duplication of microprogram sequencer 87−44902
configurable core 80C51 microcontroller, implementation using Datapath Modules from COMPILE CMOS library 87−73492
configurable core 80C51 microcontroller using datapath modules 87−59636
configurable ROM circuit for use in gate arrays 87−37283
configurations of microprocessors and mainframe computers *(German)* 87−768
connectionist architecture 88−56699
control appl. 85−49928
control electronics, state of the art overview 88−56672
control logic generation from software 87−37365
control-oriented microprocessors and microcontrollers 85−28551
controllers, fault and error insertion 88−828
controllers, microprogrammed, automated synthesis procedure 88−49946
controllers, signal processing device appls. 85−61311
convolver chip appl. to anti-aliasing computer-generated images 87−70516
cooperating microprocessor based networking devices 87−8021
COP 1430 chips, car electronics appls. 88−25263
COP 800 microcontroller family with EEPROM, characts. and programming aspects *(Italian)* 88−776
COP 800 series 8-bit microcontroller *(German)* 87−44881
coprocessor implementation using silicon generators 88−12442
coprocessors enhance IBM PC 85−28573
coprocessors enhance IBM PC, Microcard 85−28572
COPS424C microcontroller for vacuum fluorescent dot-matrix displays 86−60158
copyright law and the Semiconductor Chip Protection Act 87−65125
CORDIC array processor, doubly pipelined, for digital signal processing 87−19795
Cordic processor, logical operators, appls. *(Dutch)* 88−12425
CORDIC processor for real-time signal processing 88−63736
CORDIC silicon algorithm, pipelined, optimization 87−44933
CORDIC singular value decomposition processor architectures 87−52637
CORDIC-based coprocessor for parameter estimation 86−67264
core microcomputers as components of custom ICs 85−11283
core microprocessor, silicon compilation technique 87−779
core microprocessor help develop customised ICs dedicated to your appl. 87−73462
core microprocessors for semicustom IC cell libraries 87−59553
core-based custom processors 86−1114
core-microcomputer computers, CAE environment 86−46486
Cornell University Signal Processor (CUSP): a VLSIhigh-speed DSP CMOS chip exceeding VHSIC phase Iperformance 85−61316
Cornell University Signal Processor DSP chip, filtering appls. 87−59584
CORP−a new recovery procedure for VLSI processor arrays 88−63732
correlation, digital ICs and methods *(German)* 85−31414
correlator, bipolar VLSI implementation, 16 stage config. with redundancy feature 88−19179
cosine transform processor, 100 ns 16-pt CCD IC 87−59622
CPU 68000 microprocessor, function and programming *(German)* 85−804
CPU and accessory functions in one single component *(Italian)* 86−46874
CPU architectures, evolution 88−44178
CPU clusters functional testing, using DIP software tools package 86−49945
CPU core architecture of a 4-bit microcomputer 86−1115
CPU operation and architecture 85−49930
CRISP, 32-bit RISC microprocessor design using CAD tools 87−59533
CRISP, CMOS pipelined 32-bit microprocessor with 13 kbit cache memory 88−6897
CRISP instruction set architecture 87−44939
CRISP microprocessor, architectural innovations 87−44940
CRISP microprocessor, branch folding 87−59628
CRISP microprocessor, functional simulation 88−25282
CRISP single chip digital signal processor. III. Input/output methods 85−33938
CRT controller LSI device, Mitsubishi Electric M58992P *(Japanese)* 86−34849
CRT controller with high-speed area transfer fn., MN8355 LSI device *(Japanese)* 86−52878
CRT display circuit eliminates need for controllerchip 86−57739
CRT processor chip, mask-programmable 86−8281
CSI: a processor for image synthesis 88−56698
CSMA/CD Ethernet and token-passing access LAN interfacing, LSI controller 85−19797
current approaches affecting future 88−70855
custom floating point chip design with cohesive structured methodology 87−52647
custom floating point chip designed with a cohesive structured method 87−44919
custom NMOS and CMOS VLSI chips for numeric operations signal processing appls. 86−1121
custom VLSI processors, design methodology 87−24258
customized MOS circuits, VLSI design for digital signal processing 85−6373
customized real-time VLSI data processor, NASA Earth observing system class missions 88−25268
CVAX 78034 chip, a 32-bit second-generation VAX microprocessor 88−70785
CVAX CMCTL−a CMOS memory controller chip 88−19160
CVAX CPU−a CMOS VAX microprocessor chip 88−19205
CVAX floating point chip, development 88−70786
CVAX FPU, CMOS VAX floating point unit 88−20132

Philips PM 3470 logic analyser and cross-software provide comprehensive support of development projects with 32-bit microprocessors *(German)* 88−9905
Philips PM 3551 logic analyser, application the 80186 microprocessors *(German)* 86−17877
phonetic speech synthesis using custom ICs 86−36981
PIER: A VLSI Prolog inference engine on a RISC 87−66252
PIPE VLSI processor architecture 87−59541
pipeline interleaved programmable DSPs: architecture 87−73475
pipeline interleaved programmable DSPs: synchronous data flow programming 87−73476
pipeline merge sorter organisation *(Japanese)* 85−33928
pipeline sorting chip 87−59620
pipeline VLSI array architectures for device/cct./process simulation appls. 86−62620
pipelined 32 b microprocessor with 13 Kb of cache memory *(German)* 87−59605
pipelined digital signal processor based on pulse-train residue arithmetic ccts. 86−62633
pipelined FFT processors, architecture and VLSI implementation aspects 85−862
pipelined VLSI circuits for high-speed signal processing 87−17149
pipelined VLSI systolic array and algorithm for digital filtering 87−59538
pipelined-architecture processor design, logic synthesis algorithm 86−58563
PLA microcontroller using horizontal firmware 85−22901
plasma display, terminal management processor controller *(Italian)* 87−41575
plastic card with embedded single-chip microcomputer to protect against fraudulent use, Micro Card 85−17451
Point Classifier, VLSI processor for complex two-dimensional object images 86−8303
POLLUX 16 bit specialised coprocessor, design and NMOS implementation, controller appls. 88−50185
polyphase-network filter bank, micro-DSP and silicon compiler comparison 87−24365
power electronics, historical review, present status and future prospects *(Korean)* 85−55746
power electronics, microcomputer instrumentation and control, conf., London, UK, (Apr. 1988) 88−55516
power electronics and microprocessor technology, overlapping disciplines *(German)* 85−55883
PP4, NMOS peripheral processor architecture 86−34885
PPPE, parallel pipelined projection engine, for real-time image processing in random space, VLSI implementation 88−25300
Prehilo preprocessor for pinskew fault detection application specific ICs design *(German)* 87−25384
present state and appls. 85−835
preventing malfunctions of microprocessor-based equipment 88−38565
printer controller ICs take on PDL bottlenecks 88−63691
prioritized resets for microprocessors in automotive engine control 85−60503
procedure flow processor with aloof executionunits 86−46908
product directory of microprocessor/microcomputer chips 87−24215
product testing, course for technician training 85−27995
PROFI digital signal processor IC, design from modular macrocells *(German)* 85−49924
program development system for U882D microprocessor *(German)* 85−40124
program flow, effects of single event upsets, hardware description language simulation 85−17465
programmable analog neural network chip 88−70839
programmable automotive microcontroller (PAM) for body electronic applications 88−5994
programmable controllers custom design considerations 86−19808
programmable DSP with 32-bit floating-point arithmetic 86−8306
programmable floating point signal processor for telecommunications *(German)* 87−37348
programmable graphics chip 88−12421
programmable graphics processor with reconfigurableimage memory 86−8298
programmable interrupt register, 8259 model *(Czech)* 87−44907
programmable medical data acquisition system chip , using BiMOS technology 88−74853
programmable microprocessor peripheral IC for realtime signal generation and system test applications 86−8300
programmable processor for real-time feature extraction 88−44210
programmable protection relay for distribution switchgear design 88−17205
programmable remote control LSI series from NEC, μPD6125G/CA and μPD6126G processors *(Japanese)* 87−31939

microprocessor chips continued
programmable signal processor for array applications *(German)* 87−62136
programmable signal processors, regular form of Durbin's recursion 88−14674
programmable systolic array for advanced signal processing 88−823
programmable systolic chip, CMU, experiences 85−28553
programmable VLSI digital signal processor TS 68930 87−52649
programmed logic and microprocessors, book 87−51720
programmer for the μPD77P20 signal processors *(Czech)* 88−44213
programming techniques for microcontrollers and microcomputers for automated control environments 87−10921
programming techniques for single-chip microcontrollers 87−10922
PROLOG machine design, behaviour description based CAD system eval. *(Japanese)* 88−19172
PROLOG processor with stack oriented architecture, CMOS VLSI implementation 87−66259
protection of semiconductor chip design 88−38573
prototype WASP machine, design 87−31950
prototyping of 32-bit microprocessor case study 86−46909
PS/2 compatible chip sets from Adaptec and Chips and Technologies 88−38562
pseudorandom self-testing of microprocessors 87−32182
pseudorandom self-testing of microprocessors by signature anal. *(Bulgarian)* 86−1101
PSI programmable signal processor using HMOS technology 87−17136
public key encryption algorithm, RSA, implementation on standard DSP 88−40837
public-key cryptography, Business Simulations FAP4 serial arithmetic processor 87−13416
Q-p data driven processor, design philosophy 88−44199
Q-v1 one-chip data driven processor design 88−32258
quadratic residue number system/systolic arrays combination for VLSI-based DFT implementation 87−66253
R65F11 and R65F12 single chip microcomputers using FORTH 86−62607
R&D macroproject in Socialist Republic of Bosnia and Herzegovina *(Slovenian)* 87−44883
R&D spending by Japanese companies highest in the industry 85−10370
rad-hardened microprocessor and board level microcomputer 85−28561
radar signal processing, high-speed VLSI devices, architectures and implementation 86−59944
radar signal processing using a VLSI processor array 86−65026
radiation hardening problems and advances 85−33952
radio using digital signal processing with CMOS microprocessor chips 87−51592
railway signalling safety systems, LSI circuits appl. 87−37200
random testing of microprocessors 85−17488
ray casting parallel synchronous machine, custom IC design and implementation 87−777
ray-casting machine architecture 85−33976
RCA CDP68HC05D2 microcontroller, intelligent telephone system application 85−17534
RCA CDP-1802 microprocessor, TTL MSI hardware model for microprocessor education 85−33041
RCA Solid State CMOS microcontroller, features and system applications 85−11336
real time image processing, custom chip set 87−17145
real time robotics control, application of microcontroller 86−46861
real-time 2 level systolic 2 D convolution chip *(French)* 85−49931
real-time CMOS processor for a 1000 word speech recognition system 87−59596
real-time digital image processing chips, custom design, automatic layout generation 87−775
real-time emulation 88−38560
real-time histogram equalization processor for dynamic range compression of IR images 85−6377
real-time image processing chip set with pipelined and parallel dedicated architectures 87−17164
real-time image processing ICs in NMOS technology, architectures, design techniques and appl. 87−44894
real-time image signal processor in 1.5 μm bipolar technology, microprogrammable and expansible architecture 87−24259
real-time programming in C for dedicated microcontrollers 88−36007
real-time signal processing, conf., San Diego, USA (Aug. 1986) 87−51708
real-time signal processor using Wigner-Ville distribution 87−52479
real-time speech coding, VLSI vector quantisation processor appl. 86−43196
real-time video signal processor 88−25264
real-time VLSI array processors, fault tolerance design 87−52651
realtime microprogrammable video signal LSI using 2.5 μm CMOS technology 87−62392
rebuild a military processor to test itself for faults 88−25229
reconfigurable 64-tap transversal filter with 8-bit multiplier accumulators 88−70838
reconfigurable massively-parallel processor 88−38579
reconfigurable systolic array processor 87−52661
reconfigurable WSI microprocessor 87−1670
reconfiguration for the architecture of a defect-tolerant general purpose microprocessor 87−17166
reconfiguration scheme for yield improvement in 2D logic arrays, image processor appl. 88−25273
reduced instruction set computers using Am29300 components 85−54907
reduced processing element architecture for parallel local image processing 88−25250
Reed-Solomon decoder, VLSI pipeline structure 85−49915
Reed-Solomon decoders, hardware implementation 85−61352
Reed-Solomon encoder with interleaver, VLSI implementation 87−69048
register-transfer structure synthesis using instruction set translator translator 85−861
regular VLSI architectures for high speed signal processing 87−37386
Regulus processor, high perform. VLSI architecture 88−44233
Rekursiv computer for object oriented programming 88−25244
RESCUE: a comprehensive control logic layout synthesis system 87−37364
reset circuit for microprocessors 86−57622
residue arithmetic, customised modules for real-time appls. 85−34023
residue number system chips, models 85−22942
RESO concurrent error correction in bit-sliced systems with redundancy in time 88−32251
reverse engineering for standard cell design, rel. to fast arithmetic processors 87−24147

microprocessor chips continued
RISAC-M2/Mini remote supervisory control equipment *(Japanese)* 87−63240

speech coding at 16 and 32 kbit/s, single board hardware 88−72869
speech compression algorithm, develop. and implementation with DSP chip 88−72863
speech processing, digital signal processing chips evaluation *(Portuguese)* 87−73494
speech processing, parallel cellular structures for linear predictive coding 85−26136
speech processing, real time VQ codebook generation hardware 88−66430
speech processing unit, high speed, microprocessor appl. 86−59240
speech processor, multiple, function, architecture 86−27365
speech recognition, digital filterbank appl., microprocessor implemented 87−12945
speech recognition, dynamic time warping LSI design 87−17132
speech recognition, μPD 7764 single-chip processor, multiprocessor architecture using dynamic processing *(German)* 85−61299
speech recognition appl. 85−46712
microprocessor chips continued
speech recognition processor using fuzzy pattern matching 88−70843
speech synthesizer IC implemented in NMOS 85−34026
speech system, low cost using TMS320C17 88−66436
SPEED−a highly flexible slice structure and datapath generator 88−70847
speed control, microprocessor based digital controller 87−30603
Sperry 36/72 bit CMOS micromainframe chip set testing 87−24020
SPUR VLSI multiprocessor workstation, design methodology 87−32716
standard microprocessor programming cards 85−54928
standard-cell core microprocessors 85−6349
standby power supplies for MOS digital ICs using electrolytic capacitors *(Czech)* 88−70516
state-space digital filter structs. using block-floating point arithmetic, implementation 87−59763
static electricity damage control for microprocessors, US military standards 85−16772
static NMOS 32-bit microprocessor chip set from Honeywell 85−6345
static-RAM cache memory for 32-bit microprocessor design 87−59444
STC Components DSP128 integrated signal processor 85−808
STC Semiconductors' DSP128, digital single-chip signal processor *(German)* 86−20591
stepping motor controller μPD78C11, single-chip microcomputer-based 87−58118
stochastic learning networks, VLSI implementation 88−32259
stress generation for microprocessors 88−44200
subnanosecond Josephson 16-bit ALU 88−50177
subnanosecond Josephson data processor model 88−12446
Sun Microsystems' Scalable Processor Architecture, design considerations 88−44225
super chips for artificial intelligence 86−14297
Super micro 80386, the processor for multitask operating systems *(German)* 87−24236
super-chips, comparison and effect on PC performance *(German)* 88−44181
superchip architecture for implementing large integrated systems 88−44197
supernode supercomputer development and prototype production based on the transputer 88−70788
support chips directory 85−33740
support tools for 32-bit environment 87−44925
supporting C in MPU architectures 88−25235
susceptibility characterization of microprocessor and LSI technology 88−66104
switched memory decoding circuits for microprocessor systems 87−44903
SYCO silicon compiler, principles 87−5622
symbolic design of VLSI circuits 88−70472
Symbolics I-machine architecture, symbolic processor architecture for VLSI implementation 88−25274
Symbolics Ivory design and verification strategy 88−25275
Symbolics Ivory processor: a 40 bit tagged architecture Lisp microprocessor 88−25276
synthetic instruction mix for evaluating microprocessor performance 87−66222
SYSIM: a simulation tool for systolic processors 87−44897
system bus controller μPD71613 for V60 microprocessor *(Japanese)* 87−37420
System Support Chip, a multifunction chip for CVAX systems 88−70787
system troubleshooting, short intensive sources 85−27997
systolic architecture for fuzzy clustering, VLSI implementation 88−70817
systolic architecture for solution of linear systems over GF(p), CMOS design appl. 87−52491
systolic architectures for connected speech recognition 87−7687
systolic architectures in VLSI, implementation methodology for optimal design 86−20627
systolic array evaluation of polynomials with application to nonlinear spectrum estimation 87−19643
systolic array for spelling correction 88−38583
systolic array processor, 2D local state-space digital filter implementation for real-time image processing 88−56663
systolic array processor chip, NCR GAPP 85−11293
systolic array technique for adaptive antenna beamforming 86−57878
systolic array type convolvers, config. and evaluation 87−66250
systolic arrays, CMU programmable systolic chip 86−34888
systolic arrays, integration into a supersystem 87−66210
systolic arrays for dynamic time warping algorithm, architectures for memory minimisation 86−62621
systolic device for image transformation 87−1682
systolic device for image transformation 87−31949
systolic discrete Fourier transform using residue number systems over ring of Gaussian integers 87−17148
systolic linear algebra processor, one-third gigaflop 85−28555
systolic programmable chip, architecture 85−11309
systolic signal processor for signal-processing applications 87−66206
systolic signed binary number representation adaptive signal processor 86−34843
systolic solution of linear systems over GF(p) with partial pivoting 87−58865
systolic structs., probabilistic algorithms implementation on VLSI architectures 88−50183
systolic/cellular system for signal processing 87−66208
T414 transputer−the end of the beginning 86−8271
T424, INMOS transputer, architecture for concurrency 86−41161
T800: a 32 bit, 10 MIPS transputer with on chip floating point hardware 88−816
T800 transputer 87−52608
T800 transputer board, NEC2 EM moment code execution 88−65938
T9506, 32-bit CMOS VLSI image processor 87−52645
TA-1 transputer module *(German)* 88−44203
table-driven system controller with multi-way branching 88−38558
tabular mechanisation for flexible testing of microprocessors 87−24255
tasks for laser range finding 87−75275
TDA 8432 microprocessor, appl. to TV servicing *(German)* 88−50172
teaching dedicated micros 14 years from now 88−24481
technological aspects of microprocessors *(German)* 86−67245
technological developments 88−38348
technological forecast for year 2001 87−17161
technology trends, review 87−24244
telephone analogue line interfaces IC with adaptive transmission and extra facilities 87−34223
telephone environment, voice-excited predictive coder (VEPC) implementation on a high-performance signal processor 85−47277

microprocessor chips continued
telephone exchanges, digital multifrequency detector for PCM systems 86−4441
telephone line modems, microprocessor implementation *(Polish)* 88−50064
terminal controller IC, National Semiconductor NS405 *(French)* 87−59678
terminal management processor chip for monitor/control fns., National Semiconductor NS 455 *(German)* 86−27337
Terminal Management Processor for colour display systems 86−49975
terminal management processor from National Semiconductor *(German)* 86−14250
test aids for 16-bit microcomputer *(German)* 85−52648
test design, using graph theory 85−40112
test generation for LSI: a case study 85−1680
test pattern generation, T-classifying method *(Chinese)* 85−49902
test sequences generation status *(Slovak)* 86−2293
test tools for single chip microcomputer U881/882 *(German)* 86−46881
testability design for Micro/370, a System/370 single-chip microprocessor 87−24256
testability of circuits containing microprocessor components 85−28043
testable NMOS microprocessor for process control 85−33970
testing *(Italian)* 85−45072
testing, high-speed ASIC design, problem solving 87−37197
testing, microprocessors functional testing 85−42880
testing, techniques, skills and training 85−27956
testing and control systems, book *(Russian)* 88−9887
testing for functional failures *(Chinese)* 88−56639
testing method 86−63419
testing of microprocessors, GAPT system *(French)* 86−24317
testing using automatic pattern generator *(Polish)* 85−814
testing using GAPT system 88−795
Texas Instruments Graphics System Processor 86−34825
Texas Instruments microcomputers, TMS1000/7000 families, book contrib. 85−848
Texas Instruments TMS370 modular 8-bit microcontroller, design concepts 88−50212
Texas Instruments TMS 7000 monolithic microcomputer, programming *(Spanish)* 85−17473
Texas Instruments VHSIC 1750A computer, for tactical aircraft and vehicles 86−67265
text-to-speech convertor for Spanish hardware and software implementation 86−29827
THOMAS, complete single chip RSA device 88−40846
Thomson Efcis EF 9369 for colour graphics *(French)* 85−49920
Thomson Semiconductors TS 68930/31 signal processing chip *(German)* 87−37313
three-phase converter, single chip microcomputer based adaptive current controller 88−69612
TI 16-bit SBR9000 microprocessor, radiation-hardened using 2 μm I^2L technology 86−34823
TI 32020 DSP, disc head positioning error control using embedded DSP chip in Vermont Research model 7030 88−64924
TI 8-bit-slice processor chip set in ECL 86−52853
TI TMS32020 signal processing chip, features for multiprocessor appls. 85−33942
TI TMS32020 signal processor, features for lab. instrumentation appls. 85−42929
TI TMS320 digital signal processing microprocessor family 85−17513
TI TMS320-bit digital signal processor family 85−17493
TI TMS7000 microprogrammable 8-bit microcontrollers 85−11331
TI TMS 32010 DSP microchip, structural considerations for large FFT programs 86−14290
TI TMS 32010 signal processor chip 85−17506
TI TMS 34010 graphic controller *(French)* 87−59677
TI-320 DSP microprocessor, 32 kbps ADPCM/PCM transcoder 86−16439
time signal-controlled clock with one-chip microcomputer, design *(German)* 86−67292
timer circuit for microprocessor failure detection 85−828
timer circuit from counter and PLA 85−55055
timing and state anal., logic analyzer *(Italian)* 87−24231
timing verification for the VLSI-/370 microprocessor 88−70813
TL7700 voltage supervisor for microprocessors 88−18914
TM32020 digital signal processor for fast graphics and image systems 85−33945
TM532020, second-generation digital signal processor 86−34842
TM 34010 graphics processor, architecture, features and bit mapped appls. *(Italian)* 88−50171
TMC2301 image processing chips, use for polar to cartesian co-ordinates transformation *(German)* 88−56651
TMC230 Image Resampling Sequencer for enhanced graphics system design 87−73465
TMC2310 application-specific FFT processor 88−56645
TMS32010, fixed-point implementation of fast Kalman algorithm 87−47842
TMS32010 AF DSP chip, design and appls. 88−44223
TMS32010 digital signal processor, architecture and appls. 85−17481
TMS32010 DSP, educational appls. to digital filter design and construction 86−20602
TMS32010 DSP as alternative to traditional coprocessors *(Italian)* 86−14263
TMS32010 DSP processor, fast square-root algorithm 87−37353
TMS32010 flexible digital simulator for narrowband fading channels 87−56016
TMS32010 high speed processor for TI *(Chinese)* 88−25255
TMS32010 memory system, simplified by EPROMS 86−57816
TMS32010 signal processing microprocessor, use in acoustic noise cancellation system 87−19778
TMS32010 signal processors, simulating data transmission cct. appl. 87−52653
TMS32010-based adaptive noise canceller, real time, performance eval. 88−34348
TMS32020 dig. signal processor chip *(French)* 85−49932
TMS32020 digital signal processor 85−28560
TMS32020 DSP for speech recognition, vector quantisation firmware 87−61765
TMS320, Texas Instruments family of digital signal processors 88−63728
TMS320 based radar echo simulator 86−27387
TMS320 digital signal processor development system 85−40122
TMS320 digital signal processor for image coding system 86−30042
TMS320 DSP, FIR filter implementation 86−1299
TMS320 DSP chip, ADPCM technique implementation 86−3919

microprocessor chips continued
TMS320 family design tools 86−1130
TMS320 family of digital signal processors, architecture, charact. and appls. 88−6911
TMS320 family processors, subband coder implementations 88−72867
TMS320 signal-processing microprocessor for matched filters *(French)* 86−48937
TMS320 software engineering, pitch detector implementation 86−48886
TMS320C25, 10 MIPS CMOS digital signal processor 86−41134
TMS320C25 10-MIP digital signal processor from Texas Instruments 87−59577
TMS320C25 DSP, config. and use in adaptive line enhancer 87−59795
TMS320C30 CMOS DSP chip 87−44867
TMS320C30 DSP, 40 MFLOPS, supercomputer on a chip 87−59571
TMS34010 32-bit graphic processor 87−66228
TMS34010 embedded microprocessor 88−63707
TMS34010 for Sharp graphics processor, appls. *(Japanese)* 88−50197
TMS34010 graphics microprocessor 86−27330
TMS34010 Graphics System Processor, flexible approach to image processing for office documents 87−44949
TMS34010 Graphics System Processor as PC graphics system 87−37341
TMS34010 graphics systems processor, VLSI testability logic scheme 87−59586
TMS34010 in a bit-mapped application 87−73490
TMS34010m Graphics System Processor, Texas Instruments 87−17100
TMS380 token ring adapter with built-in network management 88−28429
TMS 32010 DSP, real-time performance 87−24246
TMS 32010 NMOS signal processor chip, use in multiprocessing environment 85−45103
TMS 32010 signal processing chip, developmental system for special purpose DSP appls. 86−8292
TMS 32020 DSP chip 87−52656
TMS 32020 NMOS digital signal processor with multiprocessingcapability 86−8305
TMS 32030 16-bit signal processor offering multiprocessor capability *(German)* 85−37518
TMS 320 chip, use for Cambridge ring-host computer interface 88−73599
TMS 320 for speech encoding via adaptive transform coding 86−64197
TMS 320 signal processor, appl. as high-speed digital controller and filter *(German)* 85−816
TMS 34010 single-chip video processor/controller, config. and appl. *(French)* 88−44189
TMS 370 8-bit application orientated microcontroller 87−25619
TMS 380 VLSI chipset, IEEE 802.5 token-ring standard implementation 87−37357
TMS-1121 universal timer controller IC, 4-bit microprocessor 85−11290
TMS-32020 DSPs, image processing with multiple DSPs 87−44950
TMS-320 implementation of a 2400 bps V.26 modem 87−55884
token access controller, Western Digital WD2840 VLSI chip 85−19935
token passing LAN controller, Datapoint COM9026 VLSI chip 85−19936
Toshiba T9506 VLSI processor for image processing, architecture and appls. 88−6912
translating DSP functions into ASIC functional blocks 88−25233
transputer, appls. and case studies, conf., London, England (May 1986) 86−57114
Transputer, architecture and features 87−59528
transputer, graphics and parallel processing appls. 88−70821
transputer, main architectural features, MEGAFRAME modular system *(German)* 87−52612
Transputer, massively parallel IC architecture *(French)* 88−32252
transputer, microcomputer based component for multiprocessing networks *(Czech)* 85−17475
transputer, processing, memory and concurrent communications on single chip 85−17470
transputer, single VLSI device 88−70827
transputer and its application 88−794
transputer and its occam programming language, signal processing 85−834
transputer appls. 87−17107
transputer appls. survey 86−57880
transputer control of laser printers 87−31941
transputer developments and appls. *(Czech)* 87−52593
transputer evaluation board hosted by IBM PC 87−5904
transputer family, high performance VLSI devices *(Italian)* 85−6351
transputer family additions *(Spanish)* 87−17553
transputer family architecture *(Spanish)* 88−56681
transputer family from Inmos 85−17494
transputer features 87−66244
transputer features *(Polish)* 88−50192
transputer for Atari Mega ST *(German)* 88−32222
transputer link break-out box 88−787
transputer reference manual, book 88−56694
transputer systems 85−17515
transputer T800, floating point arithmetic champion *(German)* 88−63699
transputer with ocean language, parallel signal processing appl. *(German)* 85−820
Transputer-based accelerator for multilevel digital simulation 88−70815
transputer-based adaptable pipeline, design 87−66243
transputers: Lego for fifth generation machines 85−17452
transputers, no speed limit *(German)* 88−32221
Transputers, use in Project Unison, for interconnection of LANs to ISDN 88−41389
Transputers for communicating process architecture 88−70826
transputers in military applications 88−44240
transputers principle, architecture and appls. *(Czech)* 88−56673
transputers radiation hardness for space appls. 87−44870
trends in 32-bit microprocessors 88−12435
trends in architecture *(German)* 85−22918
trends in bus width and speed of chips 86−1122
trends in computing *(German)* 88−779
TriStar digital signal processor for test and measurement environment, parallel architecture and operation 88−6913
TRON, Hitachi Gmicro/200 microprocessor 88−50178
TRON, NEC V60/V70 microprocessor and functional redundancy monitoring 88−50179
TRON, real-time operating system nucleus, conf., Tokyo, Japan (Nov. 1987) 88−70032
TRON, Toshiba TX1 32-bit microprocessor 88−50180
TRON specification based 32-bit machines *(Japanese)* 88−38566
TRON VLSI CPU: concepts and architecture 88−70856
TRW TMC2301 image resampling sequencer IC *(German)* 88−66614

microprocessor chips continued
TS68493 graphics coprocessor, screen controller chip with DMA interface *(French)* 88−12392
TS68930 and TS68950 families of third-generation signal processors for telecom appls. 87−37382
TS68930 programmable signal processing IC, three-bus structure 86−46863
TS68930-31 DSP, development tool *(French)* 87−61822
TS68930/68931 signal processor chips for high-speed modems *(French)* 88−12394
TSM32010 digital signal processor, design principles, appls. and tradeoffs 85−22943
turbo in PC, 8284 modification as clock generator *(French)* 87−17121
tutorial overview of past, present and future, struct. and operation 85−45081
two clock frequencies controlled sequencer for a processor 86−57859
two-channel digital instrument for real-time analysis 88−60664
TX3 32 bit microprocessor chip, design considerations 88−44229
TX series based on TRONCHIP architecture 88−70861
type T800 transputer card for rapid Unix performance *(German)* 88−44182
U8000 16-bit device, architecture *(German)* 86−27360
U8000 family 16-bit microprocessor system *(German)* 87−52632
U8032C arithmetic processor *(German)* 86−27359
U8047P 4-bit one-chip microcomputer with U8246P RAM-expansion, development *(German)* 87−59551
U880, CSMA realisation with software *(German)* 86−16959
U880, flag register evaluation *(German)* 86−27361
U880 device appl., add-on for speech recognition *(German)* 88−21128
U880 microcomputer, program package for fast and flexible execution of arithmetical operations *(German)* 86−20606
U881 microcomputer controlled line translator converting −60 V to +5 V *(German)* 86−13988
U881/U882 single chip microcomputer, appl. in automation devices *(German)* 85−40121
U882M and U884M single chip microcomputers with external stack memory *(German)* 88−6919
U884 development module, review *(German)* 88−56687
U884M one-chip microcomputer for single-board computer design *(German)* 87−44905
U 8032 C arithmetic processor, processing times *(German)* 86−67243
U 880, flags evaluation *(German)* 86−1108
UC51 microcontroller cell, hints on use 86−41132
ULSI and WSI yield estimation: an empirical approach 88−63742
universal motor speed control using cross-assembler and INTEL 8751 microcontroller 87−58030
UNIX and Series 32000, development 85−45111
US microelectronics R and D review 86−26973
US tomographic imaging, real-time parallel implementation using transputers 88−54808
use of silicon compilation in the design of a Gaussian filter and a template matching processor 88−1747
using a common barrel shifter for operandnormalization, operand alignment and operandunpack and pack in floating point processors 87−5909
using Intel UPI-452 microcontroller for processor coupling *(German)* 87−66290
USS 8000 universal 16-bit system, review *(German)* 85−54935
V20, V30, CMOS enhancements of 8086 and 8088 family 85−33944
V20/30 NEC microprocessor chips compared to Intel 8086/8088 series 87−17101
V.22 bis modem receiver using 7720 digital signal processor 87−62752
V25 and V35 microcomputer with quick interrupt response *(Italian)* 88−63702
V50, V40, 8- and 16-bit CMOS microprocessors 86−27331
V60/V70 32-bit microprocessors, systems support functions 88−44231
V-series 32 bit microprocessors, NEC product families *(Japanese)* 87−37334
V-Series CMOS microprocessors, 16-bit and 32-bit *(German)* 85−11288
v-series microprocessors 88−25238
VAX 32-bit CMOS microprocessor chip, testability strategy 88−19201
VAX 78032 based supermicro with 32 bits *(Italian)* 86−14262
VAX chip set, VLSI, microarchitecture 86−34883
VAX microprocessor using 2 μm CMOS, 32 bit device with on-chip cache and memory management 88−6903
VAX VLSI chipset 86−28415
VAXBI, 32-bit bus from DEC 86−52850
VCR, type Beta HF335, control microcomputers *(Japanese)* 86−38095
vector distance processor design 87−17131
Vector Engine: a VLSI parallel processingsystem, architecture and appls. 86−20633
vector quantised systolic array systems, LSI architecture 87−37374
vector signal processor, VSP, using monolithic DSP IC 87−59570
versatile data string search VLSI in CMOS 87−59597
VHPIC node processor 87−44943
VHS VTRs, multistandard chip set 87−13966
VHSIC chips, realtime image processing 85−33935
VHSIC processor real-time multimode image tracker 88−53369
VHSIC programmable processor for image processing, Ada model 87−13089
video median filter, one chip design 86−16564
video rate 16×16 discrete cosine transform IC with pipelined concurrent architecture 88−70832
video signal processing 20 ns 2 K×8 multi-functional memory *(German)* 87−62139
video signal processing LSI and its application to TV codecs 87−17147
video signal processor, real-time microprogrammable CMOS LSI, config. performance and appls. 88−19178
video signal processor CMOS LSI cct., real-time, microprogrammable for motion compensation in teleconferencing 88−63705
video signal processor module, real-time systems 87−63150
Video System Controller, high performance bit mapped graphics 86−27370
video terminal management processor chip, NS 455, design and features *(German)* 85−22924
videoprocessor IC, digital control for colour TV set 87−13874
videotex use by banks, and smart cards, in France 86−37427
Viditexas chip set, use in world system teletext decoder 87−13352
VIPER: a new microprocessor for safety criticalapplications 86−27382
Viper: the 'formal methods' processor 88−38551
VIPER, 32-bit microprocessor, VLSI implementation 86−14230
VIPER, 32-bit microprocessor for safety, critical systems 87−37389
Viper, 32-bit microprocessor with error free operation for safety critical computing appls. 88−63712

microprocessor chips continued
VIPER, error-free RISC design microprocessor for fly-by-wire military aircraft 88−56638
VIPER 32-bit microprocessor, appl. of formal mathematical methods 87−44892
VIPER microprocessor, application of formal methods 87−10928
Viper microprocessor, hardware proof of correctness, first level 88−38588
Viper microprocessor for safety critical systems, formal hardware validation 88−38587
Viper microprocessor safety critical systems, design using formal techniques 88−32254
VIPER-II inner product parallel processor as a tool insignal processing 86−27386
visual communications signal processors 88−44218
Viterbi processor implementation for digital communication system with time-dispersive channel 86−43108

GaAs:In, microdefects, NDE by photothermal radiation microscope 88−49931
microstrip antennas
1-D microstrip resonator, topside changes and currents effect, geometrical theory 85−62910
10 GHz space power combiner with parasitic injection locking for microstrip antenna array 87−6101
20-30 GHz band microstrip arrays, design *(French)* 85−41774
active antennas and arrays, electronic tuning and injection-locking expts. 88−72708
active microstrip circular patch antenna design for microwave transmitter appl. 87−61484
active microstrip patch antennas, spatial power combining 88−66223
active millimetric conformal array antenna with quasi-optical feedback, resonance 87−47415
airborne phased array antenna for mobile satellite communications 87−27086
with airgaps, theory and expt. 86−29597
altitude tests, K-band 85−2661
annular microstrip antenna radiation characts. 86−42959
annular patch antennas, mode-degeneracy problem reduction 88−14481
annular ring antenna, input impedance determ. using circuit theory approach 85−41693
annular ring as a circularly polarized antenna 88−2794
annular ring microstrip antennas, anal. 85−19265
annular ring microstrip antennas, anal. and design 86−48643
annular ring microstrip resonators, resonance in two coupled resonators 85−19266
microstrip antennas continued
annular sector and circular sector elements anal. 85−7743
annular slots array applicators for induction of hyperthermia at the frequency of 2.45 GHz *(French)* 88−48227
annular-ring antenna, theoretical and experimental results 86−16009
antenna array with parasitic elements, design 88−2866
aperture coupled antenna for monolithic phased arrays 86−48697
aperture coupled dipole antenna, microstrip fed slot and slotline fed dipole, anal. 88−2785
aperture coupled microstrip antenna analysis 87−2347
aperture coupled microstrip antenna with a proximity feed on a perpendicular substrate 87−61513
aperture-coupled, with perpendicular feed 86−29593
aperture-coupled to a microstripline 85−19246
approximate calc., formulae and diagrams 86−36841
approximate conformal transformations appl. to parameters calc. 86−36812
arbitrarily shaped, radiation anal. *(French)* 85−51494
arbitrarily shaped antennas, time domain technique for transient radiation 88−2801
arbitrarily shaped strip-fed microstrip antennas model 88−2792
Archimedes spiral antennas, microstrip balun, design and performance 88−34411
array and feed network anal. 85−41694
array antenna, high-performance design 88−2878
arrays, mutual coupling calcs. 87−26947
arrays, mutual coupling evaluation, generalised method 87−39500
arrays with parasitic elements, radiation characts. 87−75615
arrays with thick substrates, anal. 88−27688
asymptotic extraction technique for evaluating Sommerfeld-type integrals 87−26924
backfire antenna, experimental study *(French)* 85−46643
backfire antenna, theoretical analysis 87−47377
balanced-fed patch radiators in phased array, nonreciprocity and scan blindness 87−39501
Ball Aerospace Airlink, microstrip patch antenna system 88−45787
bandwidth enhancement method 87−47311
bandwidth enhancement method for microstripantennas 86−43033
bandwidth extension techniques in printed conformal antennas 87−39521
bandwidth increase by proximity coupling 87−47331
beam scanning using magnetised ferrite, antenna phased arrays 88−34506
beam shaping microstrip antennas with tunable stub, design and characts. study *(Japanese)* 87−27004
beamtilted SHF planar antenna with microstrip paired-elements *(Japanese)* 88−27604
bidirectional slot antenna in microstrip, realisation aspects for 0.8-2 GHz operation *(French)* 86−16040
bow-tie antennas, superconductor-insulator-superconductor quasiparticle mixers 88−50369
bow-tie antennas on dielectric half-space, theory and experiment 87−61456
broad-band microstrip antennas, nonradiating edges and 4 edges gap coupled resonator, anal. 85−36106
broadband antennas using additional resonators gap-coupled to radiating edges 85−24931
broadband circularly polarised microstrip array antennawith co-planar feed, design and characts *(Japanese)* 85−51508
broadband circularly polarized microstrip array antenna with coplanar feed 87−47383
broadband EM coupled microstrip antenna 88−8609
broadband EM-coupled microstrip antenna, normal and inverted configurations 87−33526
broadband feeding technique for microstrip antenna elements 87−47438
broadband microstrip antenna develop. 87−7599
broadband microstrip resonators 85−7731
broadband printed dipole with integrated balun 87−68869
broadband stripline antenna, design 86−29615
broadband two-layer microstrip antenna 85−11520
broadbands square microstrip antenna 88−8611
CAD and research in Europe 87−6040
CAD of microstrip patches and arrays, multiport network modelling 88−2732
CAD of XC-band microstrip Butler matrix 88−2906
capacitively coupled two-layer microstrip patch antenna element for broadband appls., design 88−2788
cavity volume, stored energies 86−14462
cavity-model theory of the circular-disc microstrip antenna with an air gap 85−11526
characteristics, parameter. anal. *(Chinese)* 86−64090
circuits and antennas on cylindrical substrate, modelling 87−26984
circular, resonant freq. characts. *(Polish)* 87−39481
circular coupling of microstrip line and microstrip patch antenna, network modelling 88−40729
circular disc config. with air gap, resonant freqs. determ. 85−7745
circular disc microstrip antenna, effect of substrate on wall conductance 85−13356
circular disc microstrip antennas, mutual coupling study 87−26916
circular disc with parasitic elements, numerical analysis 87−26919
circular microstrip antenna, probe-fed, input impedance calcs. 86−68875
circular microstrip antenna in ionised medium, radiation props. 86−29600
circular microstrip antennas, characteristics of higher order modes 85−13354
circular microstrip antennas, mode excitation, numerical solution 86−43030
circular microstrip antennas, radiation efficiency and mode excitation 87−2346
circular microstrip disk resonators, coupling anal. 85−13322
circular microstrip patch antennas, two-post transmission characts. 87−27089
circular microstrip ring antenna, probe excited, input impedance anal. 86−3682
circular microstrip two-port higher order dominant mode antennas, design and meas. 88−66186
circular patch antennas, conical patterns generation 86−3677
circular patch antennas, freq. tuning using passive metallic posts within input region 86−10203
circular patch antennas, surface wave coupling study 87−12784
circular-polarized elliptical microstrip patch antenna, single feed point *(Chinese)* 87−68868
circularly polarised array with wide axial ratio bandwidth and single feed linearly polarised elements 86−48698
circularly polarised microstrip antennas, tolerance analysis 88−34458

microstrip antennas continued
circularly polarised microstrip antennas and arrays for MM wave appl. 88−8610
circularly polarised microstrip line planar antenna 86−68922
circularly polarised printed arrays, strip dipoles and slots config., design and characts. 87−54736
circularly polarised rectangular patch antennas, design formulas 88−52285
circularly polarised square ring and crossed-strip patch antennas anal. 87−12792
circularly polarized array antenna composed of linearly polarized elements−experimental results 87−27082
circularly polarized conical patterns from circular microstrip antennas 85−2672
circularly polarized conical patterns from circular microstrip antennas 85−11525
circularly polarized printed planar array composed of strip dipoles and slots 87−27083
circularly-polarized antenna with two operating frequency bands 87−33527
coaxial excitation of microstrip antenna *(French)* 88−40701
coaxially-fed circular microstrip disc antenna, anal. 88−2768
comb array design 85−41781
compact mobile antennas for mobile satellite communications 87−70014
concentric annular rings 85−51505
conformal arrays of double-sided printed dipoles 87−27081
conformal cylindrical microstrip array for producing omnidirectional radiation pattern 87−12835
conformal microstrip antennas, configs., performance and appls. 88−40731
conformal microstrip communication antenna for military missions 87−39475
cross polarization of microstrip patch antennas 87−61458
cylindrical bodies, electric surface current model for anal. 85−41702
cylindrical microstrip patch phased array antenna−CHALSCAN C 87−39519
cylindrical-rectangular microstrip antenna, anal. 88−2795
DBS reception, low-cost flat-plate array with squinted beam design 88−14514
DBS reception, low-profile antenna design 88−2875
desegmentation method for anal. 88−8612
design of class of travelling wave antenna arrays, 85−36134
design rel. to bandwidth 85−13334
dichroic dual-band microstrip array, anal. and characts. study 87−7615
dielectric covered infinite array of rectangular microstrip antennas 87−61514
dielectric image guide leaky-wave antennas loaded by periodic metal strips 88−27642
dielectric resonator antennas , microstrip transmission line excitation, expt. study 88−72676
digital hand-portable 900 MHz radiotelephone with diversity 88−35418
diode-switched microstrip array, anal. 86−64130
dipole antennas on elec. thick substrates, efficiency/gain improvement 86−36835
dipole printed antenna array class 87−19342
dipoles, excitation study 85−24960
dipoles, infinite arrays with superstrate dielectric layer 86−48700
dipoles on cylindrical structures 85−13320
dipoles on electrically thick substrates 86−36824
directivity of linear microstrip arrays 87−75618
directly coupled multiple resonator wideband antennas 85−51479
disc antenna with short-circuited annularring 85−62901
disc antennas, modelling 85−41750
discontinuities 86−36840
displaced multilayer triangular struct. for bandwidth broadening 88−66205
double slot, synthesis *(French)* 87−39472
dual aperture-coupled microstrip antenna for dual or circular polarisation 88−8584
dual band, dual polarisation microstrip antenna for X-band satellite communications 87−39520
dual folded dipole as phased array element, design 88−2877
dual frequency antenna integration using invisible grating structures 87−7617
dual polarized linear microstrip patch array, design 88−2870
dual polarized multilayer microstrip antenna with large bandwidth, design 87−27079
dual-band microstrip antennas with monolithicreactive loading, design and characts. 86−3680
dual-frequency disc microstrip antenna, input impedance/radiation pattern eval. using cavity method 86−42917
dual-frequency operation 85−13350
dual-frequency operation 85−2670
dual-frequency stacked annular-ring microstrip antenna 88−27620
dual-polarised radiating element, high-performance 85−13351
dual-resonance broadband microstrip antenna 86−68862
dyadic Green's functions 85−11528
EHF quasi-optic oscillator with efficient power combining 88−63890
electric surface current model with appl. to rectangular elements 85−41703
electrically thick rectangular microstrip antenna resonant frequency, impedance and radiation pattern meas. 87−33528
electrically thick rectangular microstrip antennas, resonant freq. 88−2743
electrically thick rectangular microstrip antennas, expt. investig. 86−64094
electromagnetically coupled microstrip dipole, feed line radiation minimisation *(French)* 88−34459
electromagnetically coupled microstrip dipole analysisby means of integral equations 86−42970
electromagnetically coupled microstrip electric dipole, experimental and theoretical anal. *(French)* 85−46644
elliptic disc structure, resonance, input impedance and radiation pattern 88−8574
elliptical and circular, analysis using moment method 86−3638
EM coupled microstrip antenna, current and radiation fields anal. 88−2786
EM coupled microstrip dipoles, self-impedance and mutual coupling calc. using exact image method 87−47297
EM propag. in layered lossy media, Green's function, appl. to microstrip antennas 87−47156
EM wave scattering by dipoles in inset dielectric guide 88−27492
EM-coupled transverse microstrip dipoles, anal. 87−75641
engineering model for arbitrarily shaped microstrip antennas, collocation method 87−26959
equilateral triangular patch antenna, cavity model theory 87−27046
equilateral-triangular microstrip antenna, singly fed, circularly polarised radiation study 87−39458

microstrip antennas continued
exact mutual coupling theory for microstrip patches 88−2733
feed inductance, theoretical and experimental anal. 85−13321
feed network on backside of substrate 86−68918
feeder line radiation calcs. 87−47437
feeding techniques for microstrip antennas 88−2902
ferrimagnetic substrates for VHF 88−27639
field patterns of microstrip antenna in two component plasma 87−2366

MSAT vehicular antenna systems, performance 87−27078
multi-port disc, impedance matrix and radiation pattern determination *(French)* 85−51495
multibeam array antenna for data relay satellite system, config. and performance *(Japanese)* 87−27054
multichannel radiometer appl. 85−64154
multidielectric rectangular microstrip antennas, calc. *(French)* 87−47289
multifunctional microstrip antennas 86−43034
multilayer rectangular microstrip antennas, anal. *(French)* 88−34461
multilayered substrates, Green's functions 88−960
multioctave bandwidth log-periodic array 87−7616
multioctave bandwidth microstrip antenna arrays 85−41789
multiple stacked triangular microstrip antenna 87−47376
near-field distribution and far-field patterns solution, moment method 86−3681
NHK high-efficiency flat antenna for satellite broadcast reception 88−66199
nonlinear synthesis methods for nonperiodic antenna arrays, appl. to microstrip antennas *(French)* 88−66204
numerical solutions using method of moments 88−40704
ohmic and dielectric losses 85−7704
open-ring microstrip antenna 86−43036
optically tuned patch antenna, anal. 88−2770
optically tuned patch antenna, theoretical and expt. anal., parameter optimisation 88−2760
oscillatory systems open-resonator solid-state generators, expt. investig. and modelling 87−16923
parasitic elements effect 86−43031
patch antenna, arbitrarily shaped, effect of substrate on efficiency 87−12805
patch antenna, design 88−45769
patch antenna bandwidth increase by means of a director 87−19311
patch antenna fed with microstrip line, rigorous anal. 87−27045
patch antenna loaded by conducting posts, spectrum domain anal. 87−47300
patch antenna microstrip line fed, rigorous anal. 88−40664
patch antenna of arbitrary shape, numerical anal. *(French)* 86−10178
patch antenna on uniaxial substrated, radiation and scattering anal. 87−61455
patch antenna quasioptical mixers 88−66200
patch antenna radiation, surface wave effects, theoretical study 88−40659
patch antennas, accuracy of standard models 88−14469
patch antennas, annular sector and circular sector, analysis 87−37501
patch antennas, arbitrarily shaped, anal. using segmentation technique and cavity model 87−12806
patch antennas, cylindrical-rectangular, input impedance and Q factors 87−45205
patch antennas, effects of dielec. superstrate on resonant freq. and input impedance 88−40650
patch antennas, spectral domain anal. of wall admittance 86−22779
patch antennas on cylindrical structures 88−34464
patch array antenna 85−7754
patch array design, coplanar corporate feed effects 88−52296
patch arrays, plane wave reflection 85−41771
patch arrays, sequentially rotated, feed radiation effects 87−75617
patch arrays, series fed. generalised cavity model and its appl. 87−27090
patch arrays with spherical dielectric overlays 85−41788
patch microstrip, coupling between adjacent antennas, integral eqn. technique 88−7035
patches, generalised transmission line model 85−34157
patches in wire grid config., anal., generalisation for printed dipole arrays 86−29574
PC manufacturing technology appl. to microstrip/stripline antennae 86−29639
pentagonal, radiation field 86−36821
phase array antennas for mobile satellitecommunication 86−48701
phased array, Ku band 3 bits digital phase shifter appl. 88−52309
phased array, X-band computer-controlled 85−13403
phased array antenna for mobile satellite communication service 88−2879
phased array antenna radiation pattern and input impedance, mutual coupling effects 87−33552
phased array modelling 88−2869
phased arrays including mutual coupling, input impedance and radiation characts., MSAT appl. 87−61505
planar arrays of microstrip patch elements, finite ground plane effects 85−13394
planar broadband flared slot antenna 88−8586
planar dual frequency antenna, compact, design 88−27689
planar microstrip Green's function, efficient representations 88−40743
planar strip geometry analysis in substrate-superstrate configuration 87−24416
planar twin dipole microstrip antennas with FET detectors for MM-wave imaging appls. 88−27681
plasma medium, radiation efficiency, electro-acoustic wave generation effect 85−57141
plasma surrounded triangular microstrip antenna, microwave radiation patterns 88−66197
polarization characteristics of microstrip antennas 86−64098
polarization state and input impedance of arbitrarily shaped microstrip antennas 85−11506
post loaded microstrip antenna for pocket sizeequipment at UHF 86−68901
posts for circular polarization 85−36100
prime focus fed-reflector antennas, microstrip feeds; performance characts., radiation patterns 87−39532
printed antenna efficiency meas., comparison of three methods 88−45752
printed antennas, development *(Japanese)* 88−8594
printed antennas of arbitrary configuration, moment method solution 88−2793
printed cct. antennas on cylindrical substrates, Green's function calcs. 87−39453
printed cct. microstrip antennas, gain enhancement 86−3639
printed circuit antenna technology 87−61474
printed circuit antennas, generation of nearly hemispherical and high gain azimuthally symmetric patterns 88−8575
printed circuit antennas, quasi-lumped planar balun design 88−2798
printed circuit antennas modelling, image extraction 87−33514
printed circuit cylindrical array antenna 87−27080
microstrip antennas continued
printed circuit microstrip patch antenna array operating at Ka-band 87−47398
printed circuit patch radiators array, surface wave resonance, scan blindness obs. 88−2868
printed dipole antenna arrays, ground plane backed, synthesis 88−21032
printed dipole antenna arrays, ground plane backed, synthesis 87−75628
printed dipole antennas, coplanar waveguide transmission line feed 86−36860
printed dipole electromagnetically coupled to a microstrip feed line, radiation patterns and anal. *(Japanese)* 87−47290
printed dipoles, moment method calcs. 88−38680
printed dipoles, numerical anal. *(Japanese)* 87−19284
printed planar resonant arrays, design 87−47420
printed strip dipole, modelling of electromagnetically coupled microstrip antennas 85−19249
probe excited rectangular microstrip patch antenna, transmission line model improvement 88−72602
probe-fed microstrip-patch element phased arrays, expt. results 87−27070
probe-fed rectangular microstrip antenna, input impedance definition *(German)* 87−75587
probe-fed rectangular microstrip patch antenna, input impedance anal. 85−13324
Professor Tai to microstrip antennas, development 86−43029
properties anal. 87−75603
proximity Feed microstrip antenna, calcs. 87−39454
proximity feed microstrip antenna, polarisation switching, full-wave anal. *(Japanese)* 86−29562
quadratic patch bandwidth, director size influence 88−2789
radar appls., array design using grid and patch configs. 85−62925
radiating elements with one or two feeds *(French)* 88−34462
radiation control in microstrip patch antennas 88−40745
radiation pattern of microstrip antenna mounted on a cylinder *(French)* 88−34463
radiation props. in warm plasma 88−32392
radiator with lumped linear loads, theoretical experimental anal. 85−13323
radome effects on microstrip antenna parameters 88−27600
reactively loaded 85−11522
reactively steered adaptive array using microstrip patch elements at 4 GHz 85−7758
reciprocity method of analysis for printed slot and slot-coupled microstrip antennas 87−26923
rectangular, groundplane shaping techniques for use with satellite positioning systems 87−63084
rectangular, microstrip patch radiators, two-port transmission characts. 86−42981
rectangular and circular patch type, characts. and design survey *(Polish)* 85−2665
rectangular antenna, accurate transmission line model 85−13219
rectangular element anal., electric surface current model appl. 85−13262
rectangular microstrip antenna for circularpolarization 86−64058
rectangular microstrip antennas, differential radar cross-section evaluation 88−8608
rectangular microstrip antennas, mutual coupling formulas 85−41751
rectangular microstrip antennas, resonant freq. calc. by improved cavity model parameters 88−52283
rectangular microstrip antennas mounted on 2D objects, radiation pattern study 85−19253
rectangular microstrip patches, plane wave scattering 87−54690
rectangular patch antenna, 3 D anal. using Bergeron's method *(Japanese)* 88−58934
rectangular patch antenna, two-layer EM coupled config., characts. study 87−75592
rectangular patch antenna characts., effect of curvature 87−61440
rectangular patch antennas, crosspolarisation characts. 88−45778
rectangular ring and H-shaped 86−3678
rectenna composed of circular microstrip antenna 86−68887
reflection and transmission coefficients of a thin strip grating for antenna application 87−52802
resonant frequency of triangular microstrip patch antenna, formula 88−66189
resonator method using ring magnetic currents, anal. 88−27628
resonators/radiators, double-tuned circular-disc, complex reson. freqs., Hankel transform domain anal. 85−36098
ring patch antennas for dual frequency use 88−2790
Rotman microstrip lens port design 87−33569
S-band multibeam-array antenna for intersatellite data-relay systems 87−56063
satellite broadcast appls. 88−2874
satellite TV aerials: planar vs. parabolic *(German)* 88−52284
satellite-borne microstrip patch array, demonstration model 85−41800
scanning microwave probe, radiating and nonradiating open struct., mode anal. 87−49907
scatterometer antenna composed of microstripsubarrays 86−48702
self-oscillating microstrip antennas, resonance modes study 87−12786
series fed microstrip arrays, synthesis method 87−75626
series-fed microstrip patch arrays, shaped beam synthesis 87−47421
serpent antennas, radiation characts. 85−13226
singly-fed circularly-polarized microstrip antenna, theory 85−36115
slot antenna, behaviour study at resonance and antiresonance *(French)* 87−47345
slot antenna anal. 86−48646
slot antenna in plasma, radiation patterns 85−19216
slot antennae in plasma medium, radiation patterns 86−10207
slot antennas, input impedance, theoretical and expt. study 86−36788
slot applicator radiation into biological media, accurate anal. 88−4932
slot microstrip antenna with large bandwidth, anal. *(French)* 88−27605
slotline fed microstrip antenna array modules, design 88−66224
space power combiner with parasitic injection locking, 10 GHz 87−45173
spectral domain anal. 88−20999
spherical dielectric overlays for microstrip elements and arrays 87−19273
spin volume waves, radiation impedance 88−2710
square microstrip patch antenna, stub-loaded, circular polarisation, anal. 88−20998
square microstrip path antenna elements, capacitively coupled, experimental investigation 87−54716
square patch antenna, operation in simulated plasma conditions 88−56866
stacked triangular microstrip antennas, bandwidth 86−62807
strip antennas and arrays, dielectric substrate with air gap built, radiation characts. 88−66170

microstrip antennas continued
strip conductor antennas for satellite broadcasting reception *(German)* 87−54673
strip lines, linear inductance calcs. for surface magnetostatic waves, approx. soln. 87−39463
stub antennas, current expansion functions, cubic spline appls. 86−3644
substrate effect on current distrib. of feeding probe 88−40680
superimposed dichoric microstrip antennas, investig. 87−47423
superstrate, characts. 86−43006
surface wave effects on microstrip antenna radiation *(French)* 88−40706
surface wave effects on radiation pattern, protective layer effect on resonant frequency 87−75604
surface wave excitation of microstrip disk antennas 85−11530
suspended patch antenna, inverted microstrip line excited, anal. 85−13318
tapered resistive strips, synthesis 88−27618
terminal microstrip dual frequency CP antenna 87−45206
thick multilayer elements using circular patch radiators, bandwidth broadening characts. 85−62908
time domain finite difference method study *(French)* 88−21015
time-domain method anal. *(French)* 88−21016
transient methods of analysis *(French)* 88−40703
transmission line matrix method, microwave line appls. *(French)* 88−66114
transmission line model for mutual coupling 85−7710
trends *(Japanese)* 85−46626
triangular microstrip antenna, experimental study 85−11527
triangular patch antenna 88−8566
triangular patch antenna resonant frequencies 87−47336
triple-frequency stacked microstrip element 85−11521
two-coupled annular ring antennas, impedance parameters and radiation patterns 85−13274
two-element microstrip antenna array controlled with active phase shifter 87−39505
two-layered annular-ring microstrip antenna 86−59145
two-port rectangular microstrip patches with ports at nonradiating edges, transmission line model 87−75557
undulated microstrip line antennas, radiation characts. and polarisation 86−29624
variable delay lines for microstrip phased array antennas 87−54745
vertical currents in microstrip antennas 88−27621
vertically viewing antennas, satellite signals reception for mobile communication 88−8601
VHF communication, miniature antenna design 88−2796
warm plasma, linearly polarised, far field patterns and radiated powers 85−7707
wide bandwidth microstrip antennas for mobile Earth stations 87−54728
wideband flat dipole, quasi TEM mode operation, anal. and synthesis methods *(French)* 88−21017
wideband microstrip reflector feeds, design 86−10193
wideband multilayer coaxial-fed microstrip antenna element 86−10192
wider band, for circular polarisation 88−45762
window array, config. and characts. study 88−21028
wraparound antennas with dielectric truncation, max. surface wave radiation 88−2771
X-band conformal microstrip arrays on cylinders 88−40723
X-band integrated Gunn diode source/microstrip patch antenna with phase/injection locking 85−61463
GaAs microstrip patch antenna with embedded IMPATT diode oscillator 87−26986

microstrip lines *see strip lines*

microtomes *see laboratory apparatus and techniques*

microtrons
6.5 MeV microtron with external injection 86−24931
25 MeV microtron for the establishment of absorbed dose standards 85−58969
Cherenkov free electron laser 87−7387
classical, phase motion near nonlinear resons. 87−41663
CW injector linac for 35 MeV double sided microtron *(Japanese)* 87−14671
CW microtron based FEL, oscillator performance calcs. 88−45482
CW racetrack microtron, disk and washer accelerating struct., RF props., thermal conditions 87−50083
electron beam, coherence factor calc. 88−61039
electron CW linacs for microtrons and pulse stretchers 87−41691
electron gun for continuous-operation sectional microtron, calc. and expt. meas. 87−35257
ENEA free electron laser, use of 20 MeV 120 mA microtron 87−2168
fabrication and tuning techniques for side-coupled electron accelerator structures 87−41669
FEL, radiation generation obs. using microtron 88−58595
FEL driver using NBS CW microtron 88−65753
FEL microtron accelerator 87−2144
flaw detection design for steel component inspection 88−6555
Frascati, current increase from 35 to 120 mA 88−29729
free electron laser appls. 87−75166
free electron laser operation, low energy accelerators 85−56716
free electron lasers, microtron driven, proposal 87−75109
Hexatron, six-sided, 4 GeV, 300 μA CW microtron 85−20768
injection method using TM_{010}-mode cavity 86−5670
Lebedev Physical Institute race-track microtron, design 88−10183
Mainz 180 MeV microtron, tagged photon spectrometer 86−32209
Mainz Microtron MAMI-B, RF section fabrication and testing 87−41783
MAMI B, construction and research program 87−41654
MAMI project, design, experimental facilities 87−3832
microtrons for nuclear physics research 88−16567

NBS Los Alamos Racetrack Microtron, progress report 86−24905
NBS-Los Alamos racetrack microtron, 5 MeV RF linac injector 88−47791
NBS-Los Alamos Racetrack Microtron, end magnets, design 86−25043
NBS-Los Alamos Racetrack Microtron, high power RF system 88−54357
NBS-Los Alamos racetrack microtron, injection chicane, magnets, power supplies 88−54279
NBS-Los Alamos racetrack microtron, orbit reversing magnets, design, field meas. 88−54282
NBS-Los Alamos racetrack microtron, wire scanner beam profile monitors 88−54134
particle dynamics, synchrotron radiation quantum fluctuations effect 88−36331
quadrupole lens for sectional microtron 88−68115
race-track microtron injectors for SR-sources 88−10184
racetrack microtron, high-power RF controls 86−31791
racetrack microtron, RF power system for chopper/buncher system 86−31792
racetrack microtron, short pulse accel. 85−52947
racetrack microtron, two stage facility, design features 85−26521
racetrack microtron at NBS, control system 86−60408
racetrack microtron at NBS/LANL, control system 86−24883
racetrack microtron RF system 86−31997
radiation therapy, 6 yrs. experience using a 10 MeV microtron 85−53090
rebatron, beam dynamics study 86−70291
RF beam monitor on NBS Los Alamos racetrack microtron, performance 86−24861
side-coupled electron accelerator structs., brazing techniques 87−50039
slot-type, 100 keV electron gun and HV supply design 88−36344
split microtron, startup of high current device at Lebedev Physics Institute 87−50096
tagged photon spectrometer, design, operating details, for Mainz microtron 86−18262
thermal emission cathode, design and heating characts. 86−5655
undulator, linear, variable gap permanent magnet, for ENEA free electron laser expt 87−26444
vertical motion with small energy gain per turn calc. 88−61043
X-ray lithography applications 87−50037

microwave acoustic devices *see acoustic microwave devices*

microwave amplifiers
see also masers; microwave parametric amplifiers
0.5 to 4 GHz wideband ultralow noise amps. 86−8469
1.6 GHz bandwidth DC-coupled broadband and gain controllable monolithic amplifier circuits 88−32416
1 kW solid-state amp. for meteor-burst communications 88−7056
2 to 18 GHz monolithic distributed amplifier using GaAs dual-gate FETs 85−17825
2-18 GHz distributed amplifier in hybrid form 85−55134
2-18 GHz high gain, monolithic distributed amplifier usingcascode active elements 86−67502
2-26.5 GHz two-stage two-gate distributed MMIC amplifier 86−67501
2-section matching cct. design 85−40252
4 GHz band limiting amplifier, GaAs monolithic, for optical transmission regeneration cct. 87−16891
4 GHz lineariser for satellite TWT amplifier appl., design, MIC construction and performance 87−17357
4 GHz preamplifier, design using ceramic circuit components, Ka band receiver appl. 86−8515
5.76 GHz YD 1060 power amp. design 88−25032
6 GHz low noise amplifier using NE70083 GaAs FET 85−34187
11 GHz hybrid paraphase amplifier 87−17383
11 GHz low-noise amplifier for satellite TV reception 85−55158
12 GHz 150 W TWT design for broadcasting satellites 86−58212
12 GHz 150 W TWTA for broadcasting satellites 86−62999
12 GHz band TWTA for broadcasting satellites *(Japanese)* 86−1638
12 GHz low noise amp. for enhanced DBS data services receiver 86−11045
12 GHz low-noise FET amplifiers for earth stations radio communication systems *(German)* 85−47469
16 QAM digital radio, IF-predistorter for TWTA-linearization 85−14107
19 GHz FET amplifier 86−27603
20 GHz FET amplifier in an integrated finline/microstrip configuration 88−71096
20-GHz-band low-noise HEMT amplifier 87−6091
30 GHz monolithic receiver 86−67505
35 GHz low noise HEMT amplifier 87−73738
60 and 70 GHz HEMT amplifiers 87−6135
94 GHz transistor amplification using an HEMT 86−62825
C-band low-noise MMIC phased array receive module , design for MLS appls. 88−71115
Q-band monolithic three-stage amplifier 88−63964
a35 GHz monolithic MESFET LNA 88−71047
amplifiers, matching network design computer-aided synthesis tools 87−5692
amplitron, simultaneous amplification of interference and main signal 88−64198
amplitrons, loop type delay structure *(Polish)* 87−66842
annular phased arrays, steerable, with four-channel RF/MW amplifier, for hyperthermia 88−61436
application-specific MMICs 88−63948
ATC radars, klystron amplifiers appl. 85−3509
balanced broadband amplifiers, design parameters for improved performance 88−577
balanced microwave amplifiers for the 2-4 GHz frequency band 85−6535
balanced microwave amps. for antenna arrays, noise props. 87−52823
binary peak power multiplier for pulse compression, klystron amplifiers config., linear accelerator appl. 87−10699
bipolar GHz-band single-chip amplifier, design and packaging 86−35122
bipolar limiting amplifiers, 1 GHz band, using parallel feedback technique 87−59870
bipolar monolithic amp. IC using super-self-aligned technology *(Japanese)* 87−59843
broad band MM TWT amplifier 88−25835
broad-band microwave amplifier design, bilinear transformation appl. 88−50351
broadband, microwave amplifiers, low cost design using CAD technique 88−56992
broadband, noise reduction 88−12235
broadband amplifier, Europe's first foundry GaAs IC 87−45298
broadband amplifiers, multistage, CAD 85−17158
broadband gain package for system designers 85−44900
broadband HEMT and GaAs FET amplifiers for 18-26.5GHz 86−8511
broadband hybrid integrated bipolar transistor amplifier 88−71040
broadband matching problems, modern approaches and real frequency techniques 85−34168
broadband matching using the real frequency technique 85−22609
broadband microwave amps., random search optimisation for CAD 85−28705
broadband microwave amps., single-stage, gain and VSWR performance 85−28706
broadband microwave transistor amplifier design using S-parameters 88−19385

microwave amplifiers continued
broadband monolithic microwave active inductor, appl. to miniaturized wide-band amplifier 88−63969
broadband RF amplifiers, high-power designs, products review 86−8020
burst mode 30 GHz high-power amplifier with helix TWT, QPSK BER performance *(Japanese)* 87−66515
C-band 10W solid-state power amplifier for communication satellite appl. 87−52860
C-band device depicts FET design techniques 86−35091
C-band medium-power active frequency doubler design for radar system 87−76851
C-band microwave power amplifier, design and evaluation 86−67496
C-band TWTA replacement, 10-W solid-state power amplifier design 85−54684
CAD amplifier matching with microstrip lines 88−56943
CAD of lossless two-ports for microwave circuitry 88−50406
CAD of low noise broadband microwave amplifiers 88−50405
CAD through noise figure meas. of GaAs MESFET 85−43089
CAD tool for nonlinear microwave circuits driven by nonharmonically related generators *(French)* 88−66461
CAD using feedback concepts 87−10586
capacitively coupled traveling-wave power amplifier 85−1055
cascade amplifiers using relativistic electron beams with magnetostatic converter 86−67633
cascaded amplifier thin-film hybrid IC, KA series with ceramic packages 86−20843
cascaded amplifiers, narrow and broad-band, impedance matching networks 86−14482
cathode-driven crossed-field amplifier 88−19610
cavity, conversion to microwave amplifier for 23 cm band 88−7256
cavity vircator amplifier, priming and phase locking study 88−50586
circuit analysis and amplifier design, book 87−65112
circularly polarized active antenna array using miniature GaAs FET amplifiers, design and fabrication 85−19269
class C amplifiers with MESFET, SIT and bipolar transistors, UHF performance comparison 86−776
class-B FET power amplifiers of 1,2, and 4 W 87−6132
clustered FET amplifier, 1 W, 28 GHz, monolithic 86−8488
coaxial power amplifier for the 13 cm band using tubeTH 6885 86−53302
coaxial TWT, high power, for wideband MM-wave amplification 87−45534
common-gate MESFET input stage, active matching 85−50042
complete small size 2 to 30 GHz hybrid distributed amplifier using a novel design technique 87−6117
component centering and tolerancing *(Japanese)* 87−73663
computer-aided load-pull meas. system for microwave cct. large-signal charactn. 87−20901
connectorless hermetic packages for microwave amp. modules 87−10161
constant gain amplifier design, graphical approach, chart construction technique 87−52405
coplanar waveguides used in 2-18 GHz distributed amplifier 87−6115
coupled back-strapped bar-line analysis for low-noise CFAs 88−38993
cross-field, var. anal. 88−25839
cross-field amplifier, multiperiod numeric model 87−66825
cross-field amplifier measurements with a rotating RFE-field probe 86−62996
crossed-field amplifier, effects of ionised oxygen on primary and secondary emission and total current 87−53112
crossed-field amplifier, high mag. field expts. 85−23331
cryogenically cooled 20 GHz FET amplifier for satellite ground stations 87−73706
cryogenically cooled multistage low-noise amplifiers, using FETs and HEMTs 88−38720
CS-3 domestic communication satellite, TWT amplifiers *(Japanese)* 86−27800
cyclotron autoresonance maser amplifier, high power type, 140 GHz operation, theory and design 88−51714
DBS, transponders design 86−49528
DBS solid-state power amplifier/active array antenna system to replace TWTAs 86−23785
DBS t low-noise receiver 86−55427
deflection modulated EBS amplifier, electrostatic focused Pierce-type gun use *(Japanese)* 85−23360
deflection modulated EBS amplifier, semicond. diode design method *(Japanese)* 85−23362
deflection modulated EBS amplifiers, target output circuits *(Japanese)* 85−23363
deflection modulation EBS amplifier, balanced-type meander line deflector design *(Japanese)* 85−23361
deflector-modulated EBS amplifier, design 85−11030
design, feedback probe 86−35093
design using automated Smith charting tool 87−66544
differential amplifier, broadband, 5-500 MHz, 5A-501 device with TO-8 package 85−61126
digital radio links with nonlinear transmit amplifiers, performance anal. 87−48904
diode with field emission cathode, electron current modulation 86−27795
dispersive microstrip transistor amplifier cct., computer-aided anal. and design 87−37574
distortion characts. using vector meas. method 86−8450
distributed amplifier for 100-kHz-22-GHz instrumentation photoreceiver using p-i-n photodiode 88−71125
distributed amplifiers, MMIC design using GaAs FET equivalent model 85−39929
distributed amplifiers, noise figure reduction anal. 85−44912
distributed amplifiers as duplexer/low crosstalk bidirectional elements in S-band 88−32420
distributed amplifiers in hybrid form, module design for cascaded configs. 85−45244
distributed and travelling wave solid-state ccts. and devices, colloquium, London, England (April 1985) 85−44417
distributed array antenna system 87−7629
distributed coupled microwave tube system analysis 87−45509
distributed monolithic travelling-wave amplifiers 85−55144
distributed-gain amplifiers, phase characteristics for excitation of acousto-optic modulators 88−50037
dual-gate MESFET, appl. in high-pass amplifier and fast pulse generator 88−56980
dual-mode 20-GHz downlink TWT for the ACTS satellite 88−57266
duplexer/circulator components at S-band, distributed amplifiers 88−32473
microwave amplifiers continued
ECM transmitter, antenna and amplifier component characts. and developments 87−40657
EHF extended interaction oscillator/amplifier modulator technology 85−6647
EHF four stage V-band MOCVD HEMT amplifier, design and performance *(Japanese)* 87−73795
EHF monolithic receive module technology for antenna arrays 87−47399
EHF power generation 87−40733
EHF solid state amplifier using Si IMPATT diodes 86−8496
EHF solid-state power amplifiers using GaAs IMPATT diode ccts., design considerations 87−37539
electron-wave tubes, tuned amplifiers operation with distributed interaction and beam premodulation 86−47248
electrostatic amplifier, two-frequency signal amplification 85−11056
ESR spectrometer appl. 86−18089
EW wideband FET power amplifier technologies 85−55152
feedback amplifiers, computer aided interactive design, stability anal. 88−56951
FEL amplifier, 35 GHz, expts. 85−18966
FET 8-18 GHz monolithic two-stage low noise amplifier 85−1054
FET amplifier, 28 GHz band, 1.5 W design using 4-way waveguide combiner 85−17853
FET amplifier, active circuit design 85−11066
FET amplifier anal. using power depend. S-parameters 88−63892
FET amplifier gain compression tests, computer-controlled swept system 86−27610
FET amplifier in fin-line technique 87−6110
FET amplifiers, anal. and harmonic optimisation using computer aided approach 88−1003
FET amplifiers, low-noise, noise figure and VSWR optimisation using feedback method *(Chinese)* 87−66562
FET amplifiers, low-noise cooled, design method 88−56952
FET LNAs designed for advanced EHF systems 86−27095
FET low noise amplifiers, trends and development 86−62465
FET low-noise amplifiers, gain and noise figure recovery meas. 88−44382
FET nonlinear power amplifiers, optimum design technique 88−25469
FET power amplifiers, linear amplification of varying envelope signals 85−54694
FET solid-state microwave pulsed-power amplifier 88−56482
FET wideband power amplifier, 1 W over 8 to 17 GHz 85−17850
filter discriminator instantaneous freq. meas. uses linear amplifiers 87−49904
fin line circuitry, design *(German)* 87−44632
FM noise meas. system using delay line discriminator *(Chinese)* 87−41599
four port traveling wave mixer/amplifier using single gate MESFETs 88−63945
free-electron laser amplifier for intense microwave generation 87−46929
frequency converter using four-port nonlinear travelling wave amplifier *(Portuguese)* 87−66569
GaAs monolithic 6-GHz low-noise amplifier for satellite receivers 87−73748
GaAs travelling wave amplifier 87−24444
general-purpose solid-state power amplifier for FM broadcasting 87−66555
generalized power series analysis of intermodulation distortion in a MESFET amplifier: simulation and experiment 88−25462
gigahertz FET transimpedance amplifiers for fibre-optic systems, noise optimum and optical sensitivity 88−18940
Gunn diode reflection amp. performance 85−6540
gyro-klystron amplifier, multicavity high-harmonic design, theory and operation 86−47242
gyro-klystron amplifiers, high-harmonic types for MM-wave operation 85−18021
gyro-klystrons, high-power, large signal analysis 85−23334
gyro-TWT amplifier, expt. results 88−25838
gyro-TWT amplifier using high harmonic cyclotron reson. interaction 87−53124
gyroamplifiers, TE_{0_0} type, saturation props. study 88−57253
gyroklystron amplifier, 30-MW design for high energy linear accelerators 86−21027
gyroklystron amplifier, four-cavity, high harmonic operation 88−25820
gyroklystron amplifier, large-orbit high-harmonic multicavity, operation 88−64191
gyroklystron amplifier, low mag. field, TE_{m11} mode, anal. 85−55383
gyroklystron amplifier for radar facility, 34.5 GHz, 400 kW 86−47241
gyroklystron amplifier phase noise measurements 87−24699
gyroklystron amplifiers, large-orbit high harmonic, theory, design and operation 86−21028
gyropeniotron amplifier, 3 D self-consistent nonlinear theory 88−25804
gyrotron, continuously tunable k_a-band 86−21024
gyrotron amplifier with undulated waveguide, theoretical anal. 85−55384
gyrotron and ubitron amplifier research at the NavalResearch Laboratory 85−55381
gyrotron travelling wave amplifier with out-ridged waveguide 86−35269
gyrotron travelling-wave amplifiers, unified single-mode theory 87−10700
gyrotron-TWA, wide-band reflection type, computer simulation and design 85−6656
harmonic gyrotron travelling wave amplifier, single nonlinear differential eqn. 86−58210
harmonic reaction amplifier, high-efficiency operation using power FET pair 88−71120
harmonic reaction amplifier−a novel high-efficiency and high-power microwave amplifier 88−12607
Harris Microwave Semiconductor low-current MMIC amplifier for military EW modules 88−63935
HELAPS UHF amplifiers, characts. and performance for mobile satellite service 85−14157
helical waveguides, large-diameter, dispersion characts. 87−2334
HEMT, low-noise amplifier for satellite communications systems *(Japanese)* 87−37019
HEMT amplifier, 44 GHz 86−67487
HEMT amplifier exhibiting 7.5 dB gain at 61 GHz 86−8456
HEMT based MMIC amplifier, travelling-wave type, config. for enhanced EW system performance 88−32444
HEMT broadband amplifier, 26.5-40 GHz, design and performance 87−73794
HEMT cryogenic low-noise receivers for 1.3-4.3 GHz range, radioastronomy appls. 88−71114
HEMT low-noise amplifier, 36-40 GHz 86−8513
HEMT low-noise amplifier for Ka-band, design and characts. *(Japanese)* 87−73793

microwave amplifiers continued
HEMT millimeter wave amplifiers, mixers and oscillators, design and development 87−38330
HEMT millimeter-wave amplifiers 88−19392
HEMT MM-wave multi-stage low-noise amplifier, design and characts. 86−20832
HEMT MMIC low noise amplifier, 44 GHz, design, fabrication and performance 87−59878
HEMT monolithic distrib. amplifier, 2-20 GHz, low-noise design with high gain 87−59896
HEMT monolithic distrib. amplifier, 2-21 GHz, high-gain low-noise design and performance study 88−25455
HEMT monolithic distrib. amplifier, 2-21 GHz, high-gain low-noise design 88−25479
high peak power X-band gyroklystron, development, linear supercollider appl. 88−19608
high power coherent 95 GHz transmitter (HIPCOR-95) 86−55378
high power microwave amplifiers of ERS-1 Satellite 87−6334
high-efficiency power amplifier MIC for 800 MHz mobile radio 88−71136
high-gain amplifier powers 6 to 18 GHz 87−11049
high-harmonic gyro-klystron amplifier: theory andexperiment 85−55382
high-harmonic gyro-TWT amplifier with large orbit, operation 88−39016
high-power solid-state amplifiers for freq. range 0.01 to 10 GHz 88−50046
high-voltage FET amplifiers for satellite andphased-array applications 86−8491
high-yield amplifier design, impedance matching structures 88−71059
HIPCOR-95 high power coherent 95-GHz radar 87−76864
hybrid amplifiers state of the art and future projections 87−37037
hybrid distrib. amplifier, declining drain line lengths cct., computer-derived design concept 86−47063
hybrid IC distributed MESFET amplifiers, expt. gain and noise figure 85−28717
hybrid microwave distributed amplifier using MESFETs, noise performance study 85−45243
hybrid power amplifier module for X band 87−66540
hybrid thin film picosecond amplifier modules using Schottky-barrier transistors 87−65879
I/J band CW jammer amp. for Naval EW appls. 87−65873
ICs above 1 GHz, conf., London, England (March 1985) 85−32943
IMPATT, gain saturation in circulator-coupled reflectionamplifiers 86−8497
IMPATT amplifier and oscillators, design using microstrip components, 75-110 GHz freq. range 86−27587
IMPATT amplifiers, active compensation for intermodulation distortion improvement 85−28716
IMPATT amplifiers, linearity and efficiency improvement by active compensation 85−28715
IMPATT diode amplifier, stable broadband type with ridged waveguide cavity 85−17874
IMPATT diode injected locked amplifier with antiphase self-injection cct., noise performance study 87−52867
IMPATT diode MM-wave amplifiers and oscillators, operating cct. efficiency evaluation and optimisation 85−17862
IMPATT diodes use, computer anal. 85−34195
input microwave amplifiers in the light of electromagnetic compatibility requirements 87−45266
integrated finline technology, review 86−53018
intense relativistic electron beam, current modulation by external microwave source 88−32716
intermodulation distortion in MESFET amplifier, generalised power series anal. 87−73717
intermodulation noise anal. due to harmonic transmission in PSK communication system using TWT amplifier 85−41652
internal microwave propagation and distortion characteristics of travelling-wave amplifiers studied by electro-optic sampling 87−6114
jammer amplifier, solid-state, 1 kW, UHF design for US Navy aircraft EW appls. 85−45238
Josephson junction amplifier, voltage locked array 85−62241
Ka-band and Q-band communication amplifier 85−6509
Ka-band front end with monolithic mixer, hybrid IF amplifier and lumped-element Gunn LO 86−47062
Ka-band HEMT low-noise amplifier 88−63974
Ka/Q band IMPATT amplifier technology 85−6508
Kashima 26 m antenna, front end characts. *(Japanese)* 86−30932
klystron amplifier, optimum buncher synthesis 88−25779
klystron amplifier in 2-frequency mode, signal distortion 85−17173
klystron TV amp development over past 25 years in West Germany *(German)* 86−47229
Ku-band amplifiers, comparison of thick- and thin-circuits 87−6127
Ku-band low-noise amplifier, miniature MIC design using batch-process technology 87−45269
Ku-band power amplifier for communications satellites 86−62846
Ku-band reflective diode predistortion lineariser for microwave power amplifiers, spacecraft appls. 86−8522
Ku-band solid-state power amplifier for communications satellites 86−62466
L-band radar module, 2 kW design using 550 W quad building blocks 86−11169
L-band solid-state pulse amplifiers for radar transmitters, transient response anal. 88−56982
large MESFET scaling-up, lumped and distrib. scaling 88−71057
large-signal load-pull meas., vector error-corrected calibration technique 88−22756
large-signal narrow-band quasi-black-box modelling of microwave transistors 87−6122
lateral surface superlattices, applications as millimeter wave devices 86−67493
linear power amplifier with micromodule technology 88−1013
linear solid-state power amplifier for 64 QAM radios 88−1011
linearised amplifiers analysis and design, using active feedback 88−38718
linearity of MESFET amplifiers with optical illuminations 88−25558
load-line analysis in the frequency domain with distributed amplifier design examples 87−73751
low noise amplifiers using two dimensional electrongas FETs 86−8510
low noise cryogenically cooled FET amplifier for 20GHz earth stations 86−57696
low-noise 2-4 GHz preamplifier 85−20851
low-noise amplifier, impedance matching network CAD 87−37577
low-noise amplifier for satellite communications 86−53055
low-noise amplifier performance, matching technique 86−53028

microwave amplifiers continued
low-noise amplifiers for terrestrial and satellite communication systems 87−44628
low-noise amplifiers in down-convertors, using GaAs MESFET 30 dB AGC range 86−8024
low-noise cryogenic microwave amplifiers using FETs and HEMTs 88−12605
low-noise FET and other microwave amplifiers 85−55153
low-noise microwave amplifiers design, structural method appl. 85−61131
M-type amplifier, output characts., effect of magnetic field profile 86−41477
M-type amplifiers with distributed emission, nonstationary modes simulation *(Russian)* 85−28902
M-type amps. with distributed emission, multifrequency interaction *(Russian)* 87−66845
M-type devices, numerical modelling, quasi-periodic approx. appl. *(Russian)* 85−61130
M-type distributed cathode amplifiers, multifrequency regime anal. and modelling 86−27794
M-type flat amp., energy transfer anal., locally uniform space-charge density model 86−21046
magnetron amplifier with distributed emission and closed electron flow, cylindrical model 85−6654
magnetron and crossed-field devices, history of development, World War II to present 85−11842
magnetron maximum currents with secondary-emission cathodes *(Russian)* 87−37824
magnetron return-wave amp. with distributed emission, two-frequency operating mode anal. *(Russian)* 88−19615
magnetron-reflection amplifier, injection-locked, noise performance study 87−73965
matched feedback amplifiers, synthesis and gain-bandwidth props. anal. 87−44622
matched logarithmic amplifiers for millimeterwave detectors 88−56975
MESFET, large signal simulation using time domain and harmonic balance methods 87−11780
MESFET amplifier, cascaded, intermodulation distortion anal. using Volterra series representation 85−54696
MESFET amplifier, noise measure for the optimum design 88−50368
MESFET amplifier power characterisation using Volterra series 86−8500
MESFET amplifiers, analysis and multiharmonic optimization *(Spanish)* 88−56906
MESFET amplifiers, nonlinear distortions investigation 85−11055
MESFET amplifiers, with multifreq. excitation, intermodulation distortion simulation 87−6140
MESFET amplitude modulators, dual gate, optimum design 85−11115
MESFET distrib. amplifier, gain-bandwidth product considerations and design tradeoffs 86−58052
MESFET distributed amplifiers, equiv. cct., prop. and noise performance 85−44911
MESFET distributed amplifiers, intrinsic noise figure 85−50041
MESFET distributed amplifiers, power-bandwidth considerations 88−63905
MESFET distributed amplifiers, wideband power performance prediction using Volterra series representation 87−17355
MESFET dual-fed distributed amplifier , design, gain and noise figure anal. 88−71109
MESFET electrode structs., field-theoretic anal. of wave propag. including losses and small-signal amplification 85−55845
MESFET matrix amplifier: a high-gain module for multioctave frequency bands 87−37553
MESFET n-stage distrib. amplifier, equiv. cct. and nonlinear behaviour, theoretical anal. 85−44913
MESFET waveguide amplifier, CAD 88−12594
MESFET wideband distributed paraphase amplifier 85−55145
MIC broadband multistage amplifier synthesis 86−27634
MIC devices and technology, conference, London, England (Oct. 1983) 85−27967
MIC limiting amplifier for instantaneous frequency measuring system, 8-11 GHz range, design and performance 85−40251
MIC lineariser for TWT and high-power amplifiers in satellite communications 86−69706
microstrip and S-parameter design 87−73585
microstrip sources and amplifiers, MM wave, recent developments 86−58055
microstripline high power amplifier design 86−41345
microwave amplifiers, minimize harmonics in scalar tests of amplifiers 88−4603
microwave conf., Las Vegas, NV, USA (June 1987) 87−72690
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
microwave diode with field-emission cathode, theory 88−44519
microwave monolithic IC amplifiers, GHz-band, design using SST 88−7038
microwave operational amplifiers, appls. *(German)* 86−57670
microwave power amplifier modules, design for 800 MHz land mobile communications 85−11551
microwave power combiner with circular TM_{0m0} mode cavity for FET amplifiers, design 88−13418
microwave predistortion networks using digital circuits, design and performance 85−14127
microwave/MM-wave monolithic IC conf., Baltimore, MD, USA (Aug. 1986) 86−66548
millimeter-wave low-noise HEMT amplifiers , characts. and performance 88−71112
millimeter-wave MMIC characterization by noncontact electro-optic sampling 88−25534
miniature ceramic ccts., microwave systems technology 86−47090
miniature gain block for satellite communication transceivers 87−73749
miniature microwave amplifier combines hybrid techniques for miniaturization 88−1009
mixer/preamplifier integrated component, performance comparison with discrete counterpart 88−50380
MM wave devices, optical control 88−25513
mm wave monolithic ICs progress, oscillator, W-band mixer, distributed amplifier and receive module design 87−45295
MM-wave avalanche transit-time diode reflex amplifiers, CAD 87−45247
MM-wave balanced low-noise amplifier using HEMT MIC, 43 GHz band design 88−71065
MM-wave component design, colloquium, London, England (Nov. 1986) 87−10057
MM-wave distributed amplifier cct. 88−44350
MM-wave IMPATT diode power amplifier design for Q-band operation 85−17862

microwave amplifiers continued
MM-wave monolithic GaAs power FET amplifiers, design and performance 87−59857
mm-wave monolithic ICs for smart weapons 88−44359
MMIC, active circuits anal. using spatial field technique 88−32456
MMIC, Q-band monolithic amplifiers 88−19391
MMIC, total active device and passive network designcapability for optimum travelling-wave power amplifiers 86−53065
MMIC 2-20 GHz distributed amplifier, via hole studies 88−63908
MMIC amplifier, 5-20 GHz, three-stage struct., design and performance 87−59880
MMIC amplifier, high-performance type using ion implanted low-noise MESFET 88−25456
MMIC amplifiers, EW system design 87−73339
MMIC balanced amplifier with octave bandwidth 88−63924
MMIC broadband amplifiers, computer-aided-synthesis of lumped matching networks 88−71080
MMIC broadband limiting amplifier design for EW systems appls. 88−7047
MMIC broadband packaged amplifiers for EW appls. 86−53048
MMIC capacitively coupled traveling-wave power amplifier 85−17827
MMIC channelised switched preselector, design for EW-receiver appls. 88−71083
MMIC chip amplifier for freq. range 0.5 to 5 GHz 87−11046
MMIC design for wideband receiver module 87−59894
MMIC distributed amplifier, 2-30 GHz operation, low-noise FET design and characts. 85−55165
MMIC distributed amplifier for 2 to 18 GHz band with single supply bias network *(Japanese)* 87−59866
MMIC distributed amplifier using dual-gate GaAs FETs, 2-18 GHz, design and characts. 85−23121
MMIC distributed power amplifier, K/Ka-band, with capacitive drain coupling 88−63947
MMIC distributed power amplifier, novel design approach 86−53066
MMIC dual-gate FET distrib. power amplifier, 1-20 GHz design, modelling, fabrication and performance 88−19412
MMIC feedback FET amplifier, two-stage, 6-18 GHz, design and process sensitivity anal. 86−27597
MMIC fully integrated 0.5 W, 2 to 6 GHz amplifier 88−32454
MMIC high-gain distrib. amplifier, 12 dB, design and charact. 87−32072
MMIC high-gain distributed amplifier using cascode active elements 87−6161
MMIC Ka-band gain control amplifier, design, fabrication and characts. 86−41318
MMIC limiting amplifier design for microwave FM receiver systems 85−55168
MMIC power amplifier module, 6.5-16 GHz operation, design and characts. 86−27595
MMIC power amplifiers, stability and cct. modelling 88−63971
MMIC power distributed amplifier using constant-Rnetworks 86−67500
MMIC single-ended and push-pull amplifiers, 6 to 18 GHz, for high-gain modules 88−63949
MMIC travelling wave amplifiers, internal microwave propag. and distortion characts. study 87−17360
MMIC two-stage dual-gate distributed amplifiers, 2 to 26.5 GHz 87−6160
MMIC ultra-wideband amplifier, 2 GHz *(Japanese)* 86−58064
MMIC ultrawideband distributed amplifier, design 88−63936
MMIC wideband low-noise IF amplifier, 8-18 GHz, design for W-band receiver appl. 85−61462
MMIC/hybrid 3 W amplifier with low phase noise at X-band 87−6134
MMICs, Avantek MODAMP series for wideband RF amplifier design 88−44351
MMICs, conf., New York, NY, USA (May 1988) 88−62897
MMICs, development for broadband system appls. 88−50372
MMICs, symposium, St. Louis, MO, USA (June 1985) 86−26471
modelling and microwave test 86−1376
MODFET amplifier CAD, numerical algorithms for anal. and noise performance optimisation *(Romanian)* 88−32422
modular microwave power amplifiers for the ACOL stochastic cooling systems at CERN 88−12593
modules for 12.14 GHz business satellite communications *(Japanese)* 86−58066
monolithic 2 to 20 GHz HEMT distributed amplifier 87−73720
monolithic *Ka*-band HEMT low-noise amplifier 88−71045
monolithic ccts., conf., St. Louis, MO, USA (June 1985) 86−26502
monolithic circuits, conf., San Francisco, CA, USA (May 1984) 85−36
monolithic circuits, conf., San Francisco, CA, USA (May 1984) 85−16545
monolithic IC, HMM-11810-0, 6-8 GHz, cct. description 87−6084
monolithic MIC medium power amplifier, 3.7 to 4.2 GHz 86−20837
monolithic multi-stage 6-18 GHz feedback amplifier 85−1053
monolithic three-stage resistive-feedback amplifier for 2 to 8 GHz band 86−41323
multi-octave high-gain SHF amplifier, design and performance 87−73773
multibeam communications satellites, onboard TWT amplifier *(Japanese)* 87−34478
multicarrier digital signals, nonlinear microwave and MM-wave amplifiers 88−1019
multicavity gyroklystron amplifier theory based on a Green's function approach 86−21025
multidiode microwave regenerative amplifiers, computer design 86−20848
multikilohertz Pockels cell driver 86−3258
multiple-diode reflection type amplifiers using IMPATTdiode, 10 GHz design and characts. study *(Japanese)* 86−14514
multiple-diode reflection-type amplifiers using IMPATT-diodes 87−45224
multistage amplifiers interstage networks, CAD synthesis 88−71052
multistage and single-stage amplifiers, dynamic design procedure 85−23108
multistage broadband low-noise amplifier, distrib. cct. design techniques 85−28393
multistage broadband microwave amplifiers, CAD procedures 88−56991
multistage distributed amp. with 40 dB gain, 2 to 18 GHz 87−45296
multiwave amp. employing relativistic cyclotron oscillators 87−17613
negative feedback amplifier in microwavefrequencies 85−49761
negative-impedance amplifiers, equivalent circuit anal. 85−33695
network synthesis CAD program applied to RF and microwave circuit design. III 87−65646
noise figure determ. of microwave amplifier, using automated System Noise Monitor 86−31631
noise parameters and scattering matrix of negative feedback transistors *(German)* 87−11054
nonlinear amps., output signal props. calcs. 86−27091
microwave amplifiers continued
nonlinear cct. anal./design using modified harmonic balance algorithm 87−16838
nonlinear TWT mode electron velocity calc. *(Russian)* 87−37835
nonreciprocal components, stability anal. 85−22684
O-type travelling wave amplifier, large-signal field anal., 3D electron motion 88−50596
O-type TWT amplifier, large-signal field anal. 86−62998
O-type TWT beam amplifiers, noise characts. rel. to interaction space 85−6661
on-wafer characterization of monolithic millimeter-wave integrated circuits by a picosecond optical electronic technique 88−71044
optical fibres RF optical receiver 88−12585
optically triggered TRAPATT diode amplifier, expt. study *(German)* 85−23109
optimisation, synthesis, by real freq. method *(French)* 88−25522
OSCAR 10 satellite, 60 W uplink amplifier design 85−28387
oscillation impedance variations, noise factor minimisation 88−71014
Peltier-cooled low-noise HEMT amplifier, 20 GHz 86−8512
peniotron amplifier, design and expt. study 85−50160
peniotron amplifier, operation problems, nonlinear analytical theory 85−6659
peniotron amplifier and oscillator characts. at 45 GHz 88−38995
peniotrons at mm-wave frequencies 88−25803
plug-in 11-GHz LNA module with ground plane tuner 87−6130
power, 3rd order intermodulation distortion reduction in FET ccts. 86−8501
power, linearisation using active feedback networks 85−17821
power amplifier, microwave, solid-state, 4 GHz, onboard satellite appl. 87−6111
power amplifier for microwave digital radios with inherent phase compensation 87−73739
power amplifier modules for Antiproton Collector stochastic cooling systems 85−52932
power amplifiers in satellite transponders, dual-gate MESFET predistortion linearisер cct. 86−27592
power amplifiers in satellite transponders, GaAs dual-gate MESFET linearisер 86−8518
power amplifiers using miniature microwave hybrid ccts. 86−47084
power amps., matched transformers design 86−35083
power combining techniques, classification and trends *(Japanese)* 87−24436
power distributed amplifier using constant-R networks 87−6159
power FETs, new generation, characts. and microwave appls. 85−1607
power MMICs, for C-/X-/Ku-bands, design and performance characts. 88−19411
power summing in common load, load props. 85−55129
power transistor amplifier, max. available power gain under large-signal operation *(Japanese)* 87−59863
power-combining multiple-device ladder amplifier, theory and performance 86−41335
power-combining operation of window-output cylindrical cavity multiple-device structures 87−73667
preamp and YIG tuned oscillators cut ELINT noise 87−11044
programmable, broadband power amplifiers for automated microwave testing, 6900H series 20/100 W models 87−37526
proton storage rings, stochastic cooling using microwaves 88−16580
PSIFET (power silicon FET), development 85−23812
pulsed amplifier with bipolar transistors, transient response anal. 88−1023
pulsed IMPATT diode amplifiers 87−6098
pulsed microwave amplifiers for active remote sensing from space 85−61134
radiation effect on microwave-amplifier performance 88−44369
real frequency broadband microwave matching using a modified Marquardt optimization 88−1020
receiver for a satellite-communications ground station 87−48982
reflection amplifier design using IMPATT diode, broadband matching of complex load *(German)* 86−8468
reflection amplifier with levelled output power using EPROMS 87−24483
regenerative, two-stage, reduced nonlinear distortions, design 86−14027
relativistic electron beam amplifiers, two-stage, optimum efficiency 85−6652
relativistic electron beam interaction with waves in diaphragmed waveguide 86−47232
relativistic klystron amplifier, electron beam modulation, theoretical and expt. study 88−50587
relativistic microwave amplifier, MM-range, using high-current electron miniaccelerator 86−58208
relativistic synchro-Cerenkov amplifier with helical electron beam, theory 88−19614
reproducible production oriented amp., 2-18 GHz 87−45297
resonance amplifiers with prolonged interaction, theory 87−24706
resonance-type amplifiers with long interaction 85−23322
resonant extended interaction amplifiers, theory 87−66827
RF and microwave circuit design, network synthesis CAD program 87−66550
RF designs verification using low-cost software 88−44010
ripple beam amplifier, beam periodicity 87−24704
S-band amps. for Japanese deep space earth station 86−57697
S-band cryogenically cooled low-noise amplifier ofdeep space ground station *(Japanese)* 86−41315
S-band high power amplifier of deep space groundstation *(Japanese)* 86−40925
S-band high-power pulse amplifiers, design options 86−53067
S-band klystron, wideband amplifier design with 3 MW peak power 85−55397
S-band solid-state high-power amplifier design 87−73671
satellite communications using low noise amplifiers 85−17832
satellite ground station transmitters, developments in TWTs and klystrons for output stage amplifiers 88−50577
satellite TV, LNA and downconverters development 85−47474
Schottky gate FET microwave amps., intermodulation distortion 86−27106
Schottky-barrier FET microwave amplifiers, intermodulation distortions 85−6534
semiconductor amplifier, phase and amplitude-frequency characteris. optimisation 87−65870
semiconductor devices appl. 87−65895
serpentine waveguide TWT, amplification over 40-54 GHz range 88−39014
shaper-amplifiers implemented by GaAs Schottky-barrierfield-effect power transistors 86−67490
SHF 30 W solid state power amplifier for satellite communications applications 88−56999
SHF four-stage limiting amplifier based on GaAs MMIC chip, 2-6 GHz, design and characts. 88−979

microwave amplifiers continued
SHF lossless two-port combiner using travelling-wave amplifiers and hybrid microstrip technology 87−6138
SHF low-noise amplifier, 12 GHz, thick film microstrip config., satellite receiver appls. 87−17386
SHF multiple-diode transmission type amplifier usingIMPATT diodes, design and performance *(Japanese)* 86−1377
SHK amplifiers with crossed fields, simulation using program package *(Russian)* 86−21050
SIS mixer to HEMT amplifier optimum coupling network, theoretical study 88−19364
Skynet 4 earth stations and high power mm wave TWT amps. 87−40861
small Earth station development for business satellite communications 87−56099
small signal amplifiers, design 87−65927
small-signal multistage FET amplifiers, CAD *(Chinese)* 87−66560
Smith charts speed design of feedback amps 85−40231
software generation of microwave transistor amplifier circuits 88−50418
solid state driver a 43.5 to 45.5 GHz for uplink-transmitter power amplifiers 87−66556
solid-state components for radar, conf., London, UK (Feb. 1988) 88−31321
solid-state devices and circuitry, front-end noise level reduction 88−63922
space-based radar driven by near-millimeter free electron laser amplifiers 88−60253
spacecraft solid-state high power L-band amps. 86−57673
spreadsheets win use as design and analysis tools 87−65644
SQUID, four-junction, amplification by phase locking, microwave operation 85−18602
stability in microwave active ccts. feedback assessment using embedding network method 86−14535
stability in microwave active circuits 88−25553
stackFET-based balanced amplifier using optimum implementation of dual-gate FET 88−71110
stochastic cooling of antiprotons, appl. of microwaves 88−54070
straight-wave amplifier with injected electron flow, spectral charact. *(Russian)* 87−17654
submillimeter detector for radioastronomy satellite, using solid-state devices 86−4781
superconducting vortex flow transistor, optimisation of cct. parameters 87−66529
superconductor-insulator-superconductor microwave amplifiers and mixers, accurate noise meas., variable-temp. loads 86−58053
surface-mount MIC amplifier, Avantek PPA-18632, 6-18 GHz, design and charact. 87−52856
surface-mount packs house MIC amplifiers 87−11047
switched-mode power supplies for TWT amp. 85−61106
synchrotron amplifiers, mode degeneracy 85−11057
SYNMAT CAD program for matching network synthesis 87−24451
temperature compensation cct. for microwave amplifier circuit's gain 85−54686
temperature controlled predistortion circuits for 64QAM microwave power amplifiers 86−8023
thermal analysis using IR imaging system 88−50414
thin-film MIC low-noise preamps, K-band, 18-40 GHz 86−14494
three-cavity gyroklystron amplifier, GKLY-101, config. and performance 85−50158
three-cavity gyroklystron amplifiers, design and performance 86−21026
three-port network characterised with S-parameters, unconditional stability, amplifier design appl. 87−52256
TQC 850A amp. test software systems 88−9880
transient processes calc. *(Russian)* 87−73348
transistor, cct. CAD and anal. 87−66539
transistor amplifier under large-signal operation, max. available power gain 88−44348
transistor amplifiers, CAD by random addition of new components 87−10582
transistor amplifiers, graphic design of matching and interstage lossy networks 85−34179
transistor amplifiers, optimum noise meas. terminations 86−20826
transistor amplifiers, predistortion linearisation circuit design for 256 QAM radio system 86−55171
transistor chip and microwave amplifier meas. using universal fixture 87−66549
transmitters using power amplifiers 85−31165
travelling wave amplifiers using andalusite 87−73702
travelling wave monolithic amplifiers using FETs, design and appls. 85−54710
travelling-wave amplifiers, design and performance anal. 86−47066
travelling-wave IMPATT amplifiers and oscillators, anal. 87−6078
travelling-wave microwave FET amplifier with parallel-gate transmission lines, CAD optimisation 85−45236
travelling-wave power amplifier, capacitively-coupled, 2-8 GHz, MMIC design 85−23123
tubes, literature survey, 1985 review 87−17619
tubes, survey of literature for 1984, amplification/generation appls. 86−27799
tunable limiting amplifier using bipolar super self-aligned process technology 85−40256
tunnel-diode amp. gain calcs. 88−25519
TV transmitters, pulsed klystron stages, system optimisation *(German)* 86−34561
TW amplifiers based on multistream instability 85−55146
two stage dual fate MESFET monolithic gain control amplifier for Ka-band 87−59888
two-dimensional distributed microwave power amplifier, no increase in cct. load 87−52849
two-tier matrix amplifiers, noise theory and charact. study 88−25483
TWT, design 88−44522
TWT, invertor power supplies 85−54674
TWT amplifier, design and charact. for radio relay link system appls. *(German)* 85−40398
TWT amplifier, dual-gate MESFET linearizer 85−23134
TWT amplifier, O-type, large-signal field anal. 85−1243
TWT amplifier lineariser, GaAs dual-gate MESFETs 85−17184
TWT amplifier specification for optimum spectrum control 85−54709
TWT amplifier with linear power charact. and improved efficiency 85−602
TWT amplifiers, 20 GHz 20 W, for communications satellites 87−37838
TWT amplifiers, frequency-dependent nonlinear quadrature model 85−600
TWT amplifiers, spaceborne, quality assurance program 87−10703
microwave amplifiers continued
TWT high-power amplifier, Dornier range, design and appls. *(German)* 88−56900
TWT high-power amplifier, X-band operation, design and performance 88−50598
TWT linearised L-band 200 watt amplifier 85−58082
TWT linearizer for microwave satellite communications transmitters 87−70004
TWTA, gain and output power specification 85−18022
TWTAs for space communications 85−31015
ubitron testing at Naval Research Laboratory 87−53120
UHF two-stage amplifier, 14 W design for 900-950 MHz operation 86−8021
ultra small electron beam amplifiers, microfabrication technology and performance 87−45519
ultraminiature 5-10 GHz, 2-W transmit module for active aperture application 88−12604
USA satellite communications technologies, overview 88−15431
variable gain amplifier, third order intermodulation distortion 85−11063
vectors network analyser time-domain techniques 88−74568
vircator amplifier 88−25818
VSAT market gets new TWT amplifier 88−28781
VSWR reduction using internal feedback 86−57674
VZQ-6900L1 single TWT amplifier boosts 18 to 40 GHz 87−52406
waveguide type power combining amplifiers, design, equiv. ccts. and charact. *(Japanese)* 85−61468
wide band microwave reflection amplifier *(Spanish)* 86−53026
wideband amplifier design using K-transformation 86−58043
wideband amplifiers, matching network design, computer-aided synthesis techniques 87−17354
wideband HEMT balanced amplifier 86−58048
wideband high-power TWT and crossed-field tubes 85−55390
wideband klystron amp. for digital satellite communications 86−21041
wideband linear microwave amplifier for monolithic microcircuits 87−45241
wideband low distortion microwave PLL power amplifiers for analog and digital communications 87−532
wideband low-noise amplifier for 0.7-2 GHz, using bipolar transistors 86−40928
wideband microstrip transistor amplifier for 2 GHz range, CAD process *(German)* 86−57676
wideband microwave amplifiers and mixers, performance 87−37036
wideband microwave power amplifiers using electron semiconductor tubes, limiting frequency bands 88−18951
X-band analogue ccts. of third-generation MMICs from ELAB 87−11061
X-band fin-line receiver 88−50323
X-band high performance monolithic power amplifier using aunique ion implantation process 86−67498
X-band high performance monolithic power amplifier using all RIE etch process 88−19407
X-band injection-locked Gunn amplifier, performance in presence of CW interfering tone 88−7045
X-band low-noise FET amplifiers *(Chinese)* 87−66561
X-band MMIC amplifier on GaAs/Si, MESFET single-stage feedback config. design and performance 88−19409
X-band MMIC amplifier on GaAs/Si, single-stage feedback design, charact, and performance 87−73681
X-band MMIC broadband amplifier *(French)* 88−56941
X-band MMIC low-noise amplifier, design using ion-implanted MESFET technology 87−32074
X-band monolithic series feedback low noise amplifier, three-stage, design and charact. 86−27596
X-band monolithic series feedback low-noise amplifier 86−8471
X-band monolithic variable gain amplifier 88−63970
X-band monolithic variable-gain low-noise amplifier using series feedback 88−63961
X-band power FETs and monolithic amplifiers, ion implantation fabrication 87−6157
X-band single-ended monolithic amplifier using FETs, design and layout sensitivity testing 86−35114
X-band variable power amplifier using dual-gate FET, design and performance 86−14521
X-band variable-gain amplifiers , design for 16 W pulsed solid-state transmitter appl. 88−71064
Al alloy package for microwave amplifier 86−52270
Al-Si alloy package for microwave amplifier, hermetic sealing methods study 87−43989
AlGaAs-GaAs HBTs for microwave power amplifier appls. 88−19417
AlGaAs-GaAs low-noise microwave amplifier and IMPATT oscillator 87−52831
GaAS low-noise amplifier using Advanced SAINT-FETs, 20 GHz band, five-stage design 87−24464
GaAr MMIC direct-coupled amplifier, two-stage feedback design with 12 GHz bandwidth 85−23122
GaAs 86−67504
GaAs, 1 W DC to 4 GHz MMIC travelling wave amplifier 86−41351
GaAs 100 W broadband X-band power amplifiers/combiner using IMPATT diodes and FETs 87−45294
GaAs 12 GHz monolithic cascade low noise MESFET amplifiers *(Chinese)* 87−66559
GaAs 18 to 40 GHz FET amplifier performance and applications 87−66519
GaAs 1.4 GHz MESFET amplifier, flicker phase noise meas. 300 K to 1.26 K 87−37535
GaAs 2 to 40 GHz monolithic distributed amplifier 86−35112
GaAs 2 to 8 GHz MESFET amplifier, charact. at 200°C operation 87−73775
GaAs 2-18.5 GHz MMIC distributed amplifier 86−67503
GaAs 3-7 GHz 1/2 W MMIC low-cost amplifier 86−67499
GaAs 30 GHz monolithic two stage low noise amplifier 86−35110
GaAs C-band 100 W FET amplifier for digital radio 88−1015
GaAs FET 1.6 GHz linear power amplifier for ship earth stations 86−27618
GaAs FET 2 to 10 GHz 1 W TWT replacement amplifier, serrodyne techniques 85−17851
GaAs FET 5-GHz 20-W amplifier for MLS 87−6131
GaAs FET C-band 10 W power amplifier for satellite down-link communication systems 85−6543
GaAs FET X-band high-efficiency 5-watt power amplifier with harmonic tuning , design/charact. 88−71106
GaAs FET X-band power-amplifier design 87−73340
GaAs FET amplifier, 14 GHz, cooled low-noise design for communication satellite appl. 85−40249

microwave amplifiers continued
GaAs FET amplifier, 17 GHz low noise, DBS appl. 85−30966
GaAs FET amplifier, 1.2-1.8 GHz, low noise design *(Chinese)* 88−25503
GaAs FET amplifier, AM-to-PM conversion *(Japanese)* 87−66565
GaAs FET amplifier, cryogenic low-noise L- and S-band design, axion detection appl. 88−42419
GaAs FET amplifier, large-signal charact., modelling and computer calc. 85−33686
GaAs FET amplifier module, S-band, high pulsed power 85−6530
GaAs FET amplifiers for L-band *(Spanish)* 86−47086
GaAs FET amplifiers for the military temperature range requirement *(German)* 88−44364
GaAs FET amplifiers, low noise development RF overload mechanisms, burnout and reliability 85−11062
GaAs FET amplifiers, wideband ultra low noise designs for 100 MHz-4 GHz range 87−65872
GaAs FET amplifiers with reflection parameters, design *(Spanish)* 88−71041
GaAs FET based 40-W broadband class-A amplifier 86−53068
GaAs FET broadband amplifier, integrating waveguide technology with E-plane microstrip insert 88−12612
GaAs FET broadband amplifiers, VMA 110 series, 1-10 GHz operation, coplanar MIC design 87−52854
GaAs FET distributed amplifier, 2-18 GHz, miniature design 85−1052
GaAs FET distributed amplifiers: their time comes again. I 85−40232
GaAs FET distributed power amplifier design, large-signal criteria 86−8460
GaAs FET driver amplifier, 20 GHz, lumped-element wideband design, communication satellite appl. 85−40250
GaAs FET feedback amplifier with 1 μm devices, parametric study using CAD techniques 86−27609
GaAs FET high power distributed amplifier using MBE synthesizedmaterial 86−27627
GaAs FET hybrid thin-film broadband EW amplifiers, 2-18 GHz 87−24454
GaAs FET low-noise SHF amplifier hybrid IC for DBS receivers *(Japanese)* 86−35097
GaAs FET low-noise amplifier, 30 GHz receiver appls., VPE 86−8487
GaAs FET low-noise amplifier for E/F band, externally controlled attenuator and phase shifter 87−24484
GaAs FET low-noise amplifier for military and space communications 88−7059
GaAs FET low-noise amplifiers, self-bias technique with single supply 88−56933
GaAs FET microwave amplifier for U6 GHz 16 QAM radio system 87−34420
GaAs FET microwave amplifiers, design considerations for temp. compensation 87−988
GaAs FET microwave amplifiers, gain recovery when subjected to RF overload 85−28719
GaAs FET microwave amplifiers, intermodulation distortion minimisation 87−17370
GaAs FET microwave power amplifier modules for 14-GHz band 86−14508
GaAs FET microwave power amplifiers, thermal design considerations 86−53047
GaAs FET microwave preamplifiers, Varian E-109 EPR spectrometer sensitivity improvement 88−50385
GaAs FET power amplifier, 10 W, 8 GHz, digital microwave appls. 86−41347
GaAs FET power amplifier, 4 GHz, quasi-monolithic implementation for C-band communication satellite appls. 88−71105
GaAs FET power amplifier, Ku-band, 2 W output power 86−27625
GaAs FET power amplifier design, 64 QAM digital radio system appl. 86−27608
GaAs FET power amplifier for 6 GHz SSB radio 85−40255
GaAs FET power amplifier for 64 QAM digital radio transmitter, design 88−1014
GaAs FET power amplifier for 64 QAM digital radio transmitter, design and charactn. 88−25508
GaAs FET power amplifier for microwave digital radio 85−22668
GaAs FET power amplifiers, C-band design for communication satellite transponders 85−40248
GaAs FET power amplifiers, X-band, class-B operation, design and charact. 87−17356
GaAs FET power amplifiers for multi-level QAM digital radio system, TWT substitutes 88−1012
GaAs FET power module with GaAs matching ccts., design for SHF operation 85−17868
GaAs FET pulse amplifier, with subnanosecond settling time 86−67489
GaAs FET replaces TWT amplifiers 85−584
GaAs FETs, high-power, MBE grown, 14 GHz communication satellite transmitter amplifiers appl. *(Japanese)* 86−27614
GaAs FETs in 35-GHz ccts. 85−28711
GaAs HEMT distributed amplifiers 88−19387
GaAs HEMT lossy match amplifiers 88−71056
GaAs IC, X-band low noise amplifier design 85−11065
GaAs IMPATT amplifier, 100 W 10% bandwidth microstrip low-cost module 87−6097
GaAs IMPATT amplifier technology, Ka/Q band 85−45237
GaAs IMPATT diode amplifier, X-band 100 W 86−8495
GaAs K_a-band monolithic power FET amplifier 87−73711
GaAs Ka-band monolithic FET power amplifier modules 88−63972
GaAs Ku-band power FET amplifiers use flip-chip FET devices 85−61127
GaAs MBE FET power amplifier module, X-band, 6 W, class AB, high-efficiency design 88−71107
GaAs MESFET MIC amplifiers, effect of varying lighting conditions 87−17368
GaAs MESFET MM-wave amplifiers, model-extrapolated S-parameter design 87−6120
GaAs MESFET X-band amplifiers, flicker noise in 2-300K temp. range, expt. study 87−6074
GaAs MESFET amplifier, X-band, intermodulation product and output power optimisation, Volterra series anal. 86−27588
GaAs MESFET amplifiers, K-band, design and performance 87−11065
GaAs MESFET amplifiers and mixers, nonlinear anal. using harmonic balance technique 87−45235
GaAs MESFET amplifiers, multioctave, comparison of configs. 85−17849
GaAs MESFET amplifiers, power optimisation using nonlinear modelling of MESFET 88−19419
GaAs MESFET circuit design, transmission line matching technique using reactance compensation 86−20839

microwave amplifiers continued
GaAs MESFET, decade bandwidth amplification at microwave frequencies 85−1039
GaAs MESFET distrib. MMIC amplifier, 2-18.5 GHz, theoretical and expt., study 87−32075
GaAs, MESFET distributed amplifier, 2 to 18.5 GHz 87−6162
GaAs MESFET distributed broadband amplifiers, pulse response charact. study 87−73344
GaAs MESFET ku-band microstrip amplifiers 88−56957
GaAs MESFET low noise 30 GHz amplifier, development 88−50417
GaAs MESFET microwave amplifiers, nonlinear operation, anal. methods for harmonic output 88−56984
GaAs MESFET nonlinear behaviour, analytical modelling 87−73714
GaAs, MESFET nonlinear models for computer aided cct. simulation and design 88−56988
GaAs MESFET power amplifier output cct. anal./design using NFET computer program 86−28338
GaAs MESFET power amplifiers, single-freq. and broadband types, nonlinear design procedures 88−32438
GaAs MESFET power devices with very high performance, design 88−12614
GaAs MESFET single-ended microwave amplifier, 2-18 GHz, multi-octane performance study 85−1034
GaAs MESFET travelling-wave amplifiers, overview 85−55143
GaAs MESFET ultra broad-band monolithic amplifier module 85−17884
GaAs MESFET ultra wideband distributed amplifier using hybrid techniques, design aspects 85−45245
GaAs MESFETs breathe life into amplifier design 88−998
GaAs MESFETs, single-stage monolithic feedback amplifiers, MMIC process fabrication, performance comparison 86−20824
GaAs MIC amplifier module using matched FET technique 86−1368
GaAs MIC assembly for 12-GHz direct broadcast satellitereceiver 86−8475
GaAs MM-wave monolithic FET amplifier 86−41321
GaAs MM-wave monolithic power FET amplifiers 87−32087
GaAs MM-wave monolithic power FET amplifiers 88−38743
GaAs MMIC 1 to 20 GHz distributed amplifier using MESFETs or HEMTs 88−32452
GaAs MMIC 50 MHz to 3 GHz broadband amplifier, development 85−49762
GaAs MMIC DC amplifier with 12 GHz bandwidth 85−17826
GaAs MMIC FET amplifier, 2-20 GHz, design using CAD techniques 87−17382
GaAs MMIC FET amplifier, K-band power modules, design; fabrication and performance 88−19416
GaAs MMIC FET model statistics and their effects on design centering and yield prediction for microwave amplifiers 88−71050
GaAs MMIC FET power amplifiers, 1 W, 2-8 GHz, distrib., feedback and relative designs comparison 85−45246
GaAs MMIC, Ka-band, 1 W power, high gain, design and fabrication using Be coimplantation 88−71063
GaAs MMIC L-band variable-gain amplifier, with precise binary step control 88−19415
GaAs MMIC X-band amplifier yield evaluation 87−52871
GaAs MMIC amplifier, 3-7 GHz 0.5 W 87−6158
GaAs MMIC amplifier, TGA8061, broadband design for IF appls. 88−1001
GaAs MMIC amplifier design for 28 GHz operation, Ka-band microwave link appls. 85−55177
GaAs MMIC amplifier for 0.5 to 3 GHz 88−50415
GaAs MMIC amplifier, freq. response meas. by electrooptic sampling 88−19360
GaAs MMIC amplifier, radiation induced substrate currents 87−32095
GaAs MMIC amplifier, theoretical description 87−32071
GaAs MMIC amplifier using ion implanted low-noise MESFET process, design and charact. 87−59897
GaAs MMIC amplifiers address EW appls. 86−53052
GaAs MMIC amplifiers, high-performance types, high-yield production technology 86−27601
GaAs MMIC amplifiers, influence of ion-implanted profiles on RF small-signal performance 88−38721
GaAs MMIC amplifiers, wideband RLC feedback type, design, fabrication and performance 85−55169
GaAs MMIC applications 87−52824
GaAs MMIC based power amplifiers, EG8017, dual device config., broad band 6-18 GHz operation 87−73699
GaAs MMIC design 88−56947
GaAs MMIC direct-coupled preamplifiers and main amplifiers, design and performance 85−55140
GaAs MMIC distrib, amplifier for phased array transmit/receive module, optical gain control/PCM 88−71117
GaAs MMIC distributed amplifier, 15 to 45 GHz 87−32089
GaAs MMIC distributed amplifier, optical gain control 88−63927
GaAs MMIC distributed microwave amplifiers, optimisation using analytical/graphical technique 88−71060
GaAs MMIC fabrication by dry etching of via connections 88−25505
GaAs MMIC feedback amplifier, 6-18 GHz operation, design and fabrication 88−50378
GaAs MMIC for 50 MHz-3 GHz broadband amplifier *(Japanese)* 86−782
GaAs MMIC limiting amplifier with low second harmonic distortion 87−32091
GaAs MMIC low noise amplifier for phased array radar systems 88−32469
GaAs MMIC low noise amplifier, foundry fabricated, for phased array radar systems 88−32470
GaAs MMIC low-noise FET amplifiers, X- band, design and performance, satellite communication appl. 86−47082
GaAs MMIC low-noise amplifier, 3.7-4.2 GHz operation, design for TVRO appls. 85−55174
GaAs, MMIC low-noise amplifier, 6-18 GHz, design, fabrication and performance 88−19410
GaAs MMIC low-noise amplifiers, design techniques and product family 88−19370
GaAs MMIC low-noise amplifiers for 60-GHz band 88−63963
GaAs MMIC low-noise amplifiers for radar and communications appls. 85−603
GaAs MMIC paraphase amplifier design, eval. and influence of element variations 86−41354
GaAs MMIC power FET amplifiers, Ka-band, design and performance 87−59893
GaAs MMIC power FET amplifiers at K-band 88−32453
GaAs MMIC power amplifier, 2-20 GHz, design, fabrication and performance 87−59879

microwave amplifiers continued
GaAs MMIC power amplifiers, CAD and cct. simulation techniques 85−44914
GaAs MMIC preamplifier using airbridge micron/submicron gate FET technique 86−27599
GaAs MMIC, producibility 87−993
GaAs MMIC push-pull power amplifier, X-band, 4.5 W, design and charact. 86−35115
GaAs MMIC tapered distrib. FET amplifier in hermetic surface mount package, 1-10 GHz design 86−35120
GaAs MMIC technology, 1 GHz RF modules 88−25511
GaAs MMIC transistor amplifiers, generic specification 88−44368
GaAs MMIC wideband amplifiers for up to 3 GHz *(Japanese)* 87−73342
GaAs MMIC wideband variable gain amplifiers 88−63973
GaAs MMIC yield evaluation 88−32462
GaAs MMICs, amplifiers and phase shifter, L-band radar transceiver appl. 86−35116
GaAs MMICs, appls. in receiver, amplifier and switch products 87−59862
GaAs MMICs, developments and appls. 87−37541
GaAs MMICs for communication 86−27620
GaAs MMICs for digital RF memory subsystems 87−59884
GaAs MMICs for digital RF memory subsystems, design and performance 88−25477
GaAs RF power amplifiers for digital radio systems 88−1016
GaAs Schottky barrier microwave FET pulse amplifier , with subnanosecond settling time 88−70566
GaAs Sharp UHF broadband monolithic amplifiers *(Japanese)* 88−50386
GaAs *V*-band monolithic power MESFET amplifiers ; design, fabrication and charact. 88−71062
GaAs X-band MMIC amplifier, measured elec. package performance 87−52868
GaAs X-band monolithic power amplifiers *(Chinese)* 87−66558
GaAs X-band two-stage MMIC amplifier gamma-ray total dose effects 87−59874
GaAs analogue MMICs, ideal-profile implantation process 87−32721
GaAs broadband FET amplifiers, CAD *(Chinese)* 87−37529
GaAs broadband MMIC low noise amplifiers 85−55175
GaAs class-B FET amplifier, power-added efficiency optimisation 88−71054
GaAs distributed IMPATT diode amplifier 85−11561
GaAs distributed dual-gate MESFET, amplification capabilities *(French)* 88−57684
GaAs dual-gate FET drives 2-18 GHz amplifiers 87−11048
GaAs high-gain MMIC amplifier for UHF band *(Japanese)* 86−57677
GaAs hybrid MESFET distributed amplifier, 2-20 GHz 85−40234
GaAs internally matched power FETs 87−6133
GaAs low noise distributed amplifier with gain control 87−73722
GaAs low-noise MESFET monolithic amplifier, ion-implanted 87−73721
GaAs low-noise MESFETs and high performance MMIC amplifiers using direct ion implantation 88−25480
GaAs low-noise MMIC feedback amplifiers for 800 MHz to 5.5 GHz 85−17885
GaAs low-noise monolithic broad-band amplifier using drain current saving technique 85−50044
GaAs microwave FET limiting amplifiers, computer simulation to aid design 87−66542
GaAs microwave monolithic amplifiers *(French)* 88−7068
GaAs microwave power FETs and MMICs, refractory self-aligned gate technology 88−50362
GaAs microwave power amplifier module for EW appls. 87−32088
GaAs miniature FET power amplifiers, 30-way radial power combiner design 87−6059
GaAs monolithic 2 to 6 GHz feedback amplifier, design and modelling 88−571
GaAs monolithic 2-20 GHz broadband distributed amplifier 87−45286
GaAs monolithic 6-18 GHz medium power amplifier 85−1056
GaAs monolithic DC-6.4-GHz variable-gain feedback amplifier, design and charact. 88−19365
GaAs monolithic IC, distributed, 2 to 8 GHz, design 86−53050
GaAs monolithic L-band limiting amplifier and dual-modulus prescaler IC, fabrication/performance 88−71082
GaAs monolithic MESFET limiting amplifier IC, GHz band 85−61448
GaAs monolithic MESFET low-noise amplifier, 35 GHz 88−63976
GaAs monolithic MIC amplifier with 10-GHz bandwidth, resistive feedback, direct coupled 85−1051
GaAs monolithic X-band low noise amplifier 86−67508
GaAs monolithic X-band low noise amplifiers, design optimisation for high yield 88−32455
GaAs monolithic amplifier, 14 GHz-band 20 mW *(Japanese)* 87−59865
GaAs monolithic amplifiers with wide band and high gain *(French)* 85−49754
GaAs monolithic distributed amplifier, 1 to 20 GHz, cascaded chip hybrid appls. 88−38741
GaAs monolithic limiting amplifiers 87−32090
GaAs monolithic low noise amplifier; 20 GHz band, using advanced SAINT-FET technology 86−67494
GaAs monolithic low-noise negative feedback amplifier using a dual-gate MESFET 85−34191
GaAs monolithic microwave broadband feedback amplifier designtechniques 86−1379
GaAs monolithic multistage X-K_u-band amplifier, 6-18 GHz 85−1028
GaAs monolithic photoreceiver 85−18823
GaAs monolithic power amplifiers, developments for microwave freq. appls. 86−35113
GaAs monolithic true logarithmic amplifier for 0.5 to 4 GHz applications 88−63951
GaAs monolithic wideband amplifier for 0.05 to 2.0 GHz band *(Czech)* 88−12600
GaAs nonlinear power FET amplifiers, optimum design 87−73716
GaAs normally-off DC to 8 GHz amplifier chip 88−56910
GaAs permeable base transistor, small-signal gain performance at EHF 87−37545
GaAs power FET K- and Ka-band high efficiency amplifier modules 87−73777
GaAs power FET amplifiers, large signal modelling 87−73715
GaAs power MESFET amplifiers at K- and Ka-bands, design and performance 88−63919
GaAs power MESFET performance sensitivity to profile and process parameter variations 88−71055
GaAs quasi-monolithic 2 to 18 GHz distributed FET amplifier 87−73774
GaAs quasimicrowave FET power amplifier 87−45228

microwave amplifiers continued
GaAs semi-insulating LEC-grown substrates for low noise microwave amplifiers 87−59873
GaAs semi-insulating substrates for low-noise microwave amplifiers 87−66527
GaAs solid state 15 W 14-14.5 GHz power amplifier, development 88−50416
GaAs solid-state amplifier with feedforward correction for linear SSB appl. 87−23960
GaAs substrates, LEC grown, whole ingot annealed, for low-noise microwave amplifiers 87−53326
GaAs three-stage 30 dB MMIC amplifier for satcoms 85−37001
GaAs transferred electron devices, book contrib. 86−9075
GaAs travelling-wave amplifier 85−55147
GaAs uniplanar MMICs for full-MMIC receiver 88−63960
GaAs wideband monolithic MESFET amplifier using cascodes 87−73675
GaAs wideband monolithic amplifiers, design 85−11067
GaAs-AlGaAs HBT logarithmic IF amplifier 88−63952
InP Gunn devices for MM-wave 85−6511
InP JFETs with high transconductance, fully ion implanted integrated amplifiers 88−56918
InP MM-wave amplifiers and CW oscillators, design and performance 85−50037
InP MM-wave devices and components 85−1016
InP MM-wave devices and components 85−1040
InP and GaAs EHF transferred-electron devices 85−55161
InP diodes application *(Dutch)* 86−15102
InP millimetre wave oscillators and amps. 85−11578
Si 0.5-2.6 GHz monolithic wideband amplifier 86−8472
Si MMIC amplifiers push 1 W at 1 GHz 87−52846
Si MMIC wideband power amplifiers, design and performance 87−37575
Si MMICs using ISOSAT bipolar processes for high performance 88−56935
Si bipolar MMIC amplifiers, Avantek MODAMP series, design and charact. 87−17380
Si, space harmonic monolithic grating amplifier, fabrication, microwave meas. 87−37533
Si-monolithic wideband amplifier IC, 0.5 to 2.6 GHz 86−27629

microwave antenna arrays
2-18 GHz continuously variable 0 to 360° phase shifter, design 88−12544
2-D printed antenna array with feeding network 85−13414
2D bootlace lens antenna system, feed design using coaxial probe assembly 87−7636
3 GHz low-loss stepped delay lines for active aperture antennas 87−2385
4.0 GHz reactively steered adaptive array, planar design 86−64120
10 GHz space power combiner with parasitic injection locking for microstrip antenna array 87−6101
12 GHz band flat array of electronic switches, design *(French)* 85−41775
20 GHz receive only electronically steerable antenna, review *(French)* 85−41706
20-30 GHz band microstrip arrays, design *(French)* 85−41774
20/30 GHz phased array satellite payload 87−42065
30/20 GHz multibeam array antenna for TDMA European satellite systems 88−2841
L-band phased array antennas for mobile satellite communications 87−70015
active antennas: new MM-wave goal 88−45786
active microstrip patch antennas, spatial power combining 88−66223
active millimetric conformal array antenna with quasi-optical feedback, resonance 87−47415
active TV antenna arrays using solid-state power amps. 85−63803
active-array antenna beam shaping for DBS 86−22777
adaptive antennas 87−61531
adaptive array and algorithm *(Japanese)* 87−39497
adaptive multiple beam system concept 87−54732
adaptively controlled transmitting array config. for microwave power transmission between spacecraft 88−23150
airborne monopulse slot array antennas, feed network design 88−66235
airborne phased array antenna for mobile satellite communications 87−27086
aircraft radar antennas 87−61530
annular slots array applicators for induction of hyperthermia at the frequency of 2.45 GHz *(French)* 88−48227
antenna beamforming using optical processing 88−72697
azimuthally magnetised ferrite rod array antenna excited by mag. dipoles, radiation pattern study 86−64064
balanced microwave amps. for antenna arrays, noise props. 87−52823
bandwidth extension techniques in printed conformal antennas 87−39521
beam-forming networks for future European communication satellites 88−27695
broadband circularly polarised microstrip array antennawith co-planar feed, design and charact *(Japanese)* 85−51508
broadband circularly polarized microstrip array antenna with coplanar feed 87−47383
broadband phased array antenna for high power jammer 87−47402
broadband phased-array antennas 85−13375
broadcasting satellite array antenna, features, performance and radiation charact. *(Japanese)* 88−14538
Butler matrices incorporating 90° or 180° hybrids, simplified design 87−27047
C-band high-power feed for planar-array antenna, design 87−27097
C-band phased array anal., pulsed relative phase meas. 87−7626
C-band phased array for space 86−59162
CAD of XC-band microstrip Butler matrix 88−2906
cavity-backed slot array analysis 87−61508
circular coupling of microstrip line and microstrip patch antenna, network modelling 88−40729
circular microstrip patch antennas, two-post transmission charact. 87−27089
circular multimode horns, finite planar arrays, computer anal. 88−72684
circular patch antennas, surface wave coupling study 87−12784
circularly polarised microstrip line planar antenna 86−68922
circularly polarised printed array, strip dipoles and slots composed, design 87−2374
circularly polarised printed arrays, strip dipoles and slots config., design and charact. 87−54736
circularly polarised SHF planar array composed of microstrip pair element 86−68921

microwave antenna arrays continued
circularly polarized active antenna array using miniature GaAs FET amplifiers, design and fabrication 85−19269
circularly polarized array antenna composed of linearly polarized elements−experimental results 87−27082
circularly polarized printed array antenna composed of end-fed strip dipoles and slots 85−36123
circularly polarized printed planar array composed of strip dipoles and slots 87−27083
combined MMIC/MIC 8-channel receive only phased array demonstrator operating in I/J band 87−7630
concentric ring freq. selective surface, influence of multiple-layer dielec. substrates on band spacings 86−68833
conformal arrays, power radiation pattern synthesis 87−47401
conformal arrays of double-sided printed dipoles 87−27081
conformal microstrip antennas, configs., performance and appls. 88−40731
conformal slot arrays on circular waveguide with dielectric covering *(Chinese)* 88−21031
conical horn array, mutual coupling, expt. 85−7755
coplanar waveguide array antenna with wire loop radiating elements, struct. and performance characts. 88−40719
cross-locking in diversity antenna systems 87−19275
crow's nest antenna, calcs., and exptl. results 88−34502
cylindrical microstrip patch phased array antenna−CHALSCAN C 87−39519
DBS, 12 GHz flat-plate antenna, design 85−42559
DBS, active array antenna design 85−42537
DBS appls. *(Italian)* 86−59163
DBS reception, low-cost flat-plate array with squinted beam design 88−14514
DBS solid-state power amplifier/active array antenna system to replace TWTAs 86−23785
DC power transmission, microwave powered high altitude platform 88−75146
dichroic dual-band microstrip array, anal. and characts. study 87−7615
dielectric image line groove antennas formillimeter waves 86−64125
dielectric resonator antennas, mutual coupling consideration, array design appl. *(Japanese)* 87−39466
dielectric slab-line leaky-wave planar antenna for 94 GHz, design and props. 85−46648
digital beamforming antennas, configs., operation and hardware requirements 87−33547
digital microwave line of sight links, limited scan antenna design 85−24986
dipole frequency-selective surfaces of finite size, anal., Pocklington's equation appl. 88−14515
disc coupled resonant antenna excited by circular patch, anal. and expt. study *(Japanese)* 87−39493
disk coupled resonant antenna excited by a circularpatch 86−68937
distributed array antenna system 87−7629
distributed beamsteering controller for a *Ku*-band phased array antenna 88−2860
dual band, dual polarisation microstrip antenna for X-band satellite communications 87−39520
dual freq. band satellite antenna, single layer freq.-selective surface design 87−75621
dual frequency antenna integration using invisible grating structures 87−7617
dual polarized ice surveillance radar antenna, design and performance 87−27056
dual-frequency reflector antenna incorporating a frequency selective subreflector 87−19341
dual-function multi-way uniform combline directional couplers for application to monopulse feed system 88−12563
EHF multifunction phased array antenna 87−12846
EHF wideband phased-arrays, fibre optic components appl. 88−72690
electronic beam steering microwave arrays, developments 87−75613
electronically steered thinned array radiometer (ESTAR) 87−57436
EM coupled microstrip dipoles, self-impedance and mutual coupling calc. using exact image method 87−47297
EM wave scattering by dipoles in inset dielectric guide 88−27492
embedding impedance of detector, far-IR, meas. 85−4073
ERS-1 SAR antenna R&D model and test results 86−3708
fiber optic communication links for millimeter-wave phased-array antennas 87−40955
flat dipole arrays for broad angular coverage and large bandwidth antenna 88−34501
flat folded dipole slotted antenna, substrate influence on bandwidth, theoretical study 85−46617
flat plate array antennas for fixed and mobile DBS reception 88−58975
flat radiating source bandwidth, comparison 86−10194
focused antennas for hyperthermia 88−4927
focused array antennas, focal region characts. 86−22835
focusing planar hexagonal phased array for microwave-induced hyperthermia applicator, optimisation 85−13387
four-element beam-forming antenna 85−7753
frequency-multiplying slot array, quasi-optical integrated struct., design and characts. 86−22837
frequency-selective surface design for dual-band Earth terminal antenna 87−33551
hyperthermic cancer treatment using variably phased antenna arrays, improved temp. distribs. 86−44700
IFF 'Invisible' antenna takes up less space 87−7623
imaging phased array, hard limiting and other distortions at input 86−48705
infinite phased arrays, radiation impedance of dipole printed on periodic dielectric slabs 87−47390
insular guide and microstrip millimetre antenna array feeders, loss comparison 85−13363
integrated microwave antennas in multilayer technology *(German)* 87−61519
integrated planar array with magnetostatic surface waves and electron beam steering feeds 85−13396
integrated slot element feed array for multibeam systems 87−12849
integrated V antenna array for active microwave medical imaging *(French)* 88−48129
inter-injection locking−a novel phase control technique for monolithic phased arrays 88−27678
inter-injection-locked oscillators, radiation coupling 88−19378
intersatellite data relay system, multiple access link using onboard multibeam array antenna 86−30724

microwave antenna arrays continued
interstitial microwave antenna array hyperthermia systems 88−61439
interstitial microwave antenna arrays, distrib. of power and heat prod. 88−48215
interstitial microwave antennas used in hyperthermia, automated meas. of power deposition patterns 86−44699
Jerusalem cross frequency-selective surface response, spectral-Galerkin soln. convergence 87−33506
Ka-band pin diode 35 GHz electronically steered line array 88−14539
Ku-band edge slot array for freq. scanning appls., anal. and design 86−36847
L band multibeam array, cylindrical near-field testing, scope and results 85−24989
L-band antennas for regional mobile communication satellites 87−12812
land mobile satellite regional system for 1990s 87−13668
lens-fed multiple beam arrays 85−13376
lightwave technology in microwave systems 87−19324
linear array with independent control of sidelobes of sum and difference beams 87−47409
linear phases array antenna, radiation characts. by coordinate transformation 88−27598
linear printed arrays, pattern synthesis method using relaxation technique 86−42916
linear-tapered slot antenna fiscal plane arrays for MM-waves, aperture efficiency study 88−27680
log-periodic arrays with split delay-line feeders 87−27104
loop fed slotted cylinder horizontally polarised antenna arrays 85−41770
low profile primary radiator composed of shaped-beamarray having microstrip paired-elements *(Japanese)* 86−68916
low sidelobe electronically scanned antenna using identical transmit/receive modules 88−66209
medical hyperthermia, Phase I regional device evaluation, microwave annular array vs. RF induction coil 87−29796
MIC technology for phased arrays, review 88−38731
microscope Ku-band circularly polarised antenna array with very low cross-polarised radiation field 86−48703
microstrip, two-coupled annular ring antennas, impedance parameters and radiation patterns 85−13274
microstrip active antennas and arrays, electronic tuning and injection-locking expts. 88−72708
microstrip antenna array and feed network anal. 85−41694
microstrip antenna array with multi-octave bandwidth, design, operation 86−54382
microstrip antenna arrays with feed network on backside of substrate 86−68918
microstrip antenna arrays with thick substrates, anal. 88−27688
microstrip antenna bandwidth broadening using displaced multilayer triangular struct. 88−66205
microstrip antennas, absolute gain meas. under mismatched conditions 88−45759
microstrip antennas, high gain *(Hungarian)* 86−16033
microstrip antennas, recent trends *(Japanese)* 85−46626
microstrip antennas, transmission line model for mutual coupling 85−7710
microstrip antennas for radar appls., array design using grid and patch configs. 85−62925
microstrip aperture coupled antenna for monolithic phased arrays 86−48697
microstrip array of concentric annular rings 85−51505
microstrip array on high permittivity substrate, expt. study 86−36846
microstrip arrays, mutual coupling evaluation, generalised method 87−39500
microstrip arrays with parasitic elements, radiation characts. 87−75615
microstrip circularly polarised array with wide axial ratio bandwidth and single feed linearly polarised elements 86−48698
microstrip dipoles, infinite arrays with superstrate dielectric layer 86−48700
microstrip dual folded dipole as a phased array element 88−2877
microstrip elements and arrays with spherical dielectric overlays 87−19273
microstrip flat phased array in large ang. sector 87−47410
microstrip flat-plate array for domestic DBS reception 87−27084
microstrip line coupled to microstrip antenna, anal., array appls. 87−54647
microstrip log-periodic antenna array with endfire beam, design and performance 88−2811
microstrip log-periodic dipole array 86−48699
microstrip monolithic patch array antenna for missile tracking systems 87−47400
microstrip multioctave bandwidth log-periodic antenna array 87−7616
microstrip patch antenna radiation, surface wave effects, theoretical study 88−40659
microstrip patch array antenna 85−7754
microstrip patch array design, coplanar corporate feed effects 88−52296
microstrip patch arrays, plane wave reflection 85−41771
microstrip patch arrays, sequentially rotated, feed radiation effects 87−75617
microstrip patch arrays, series fed. generalised cavity model and its appl. 87−27090
microstrip patches in wire grid config., anal., generalisation for printed dipole arrays 86−29574
microstrip phase array antennas for mobile satellitecommunication 86−48701
microstrip phased array, Ku band 3 bits digital phase shifter appl. 88−52309
microstrip phased array antenna radiation pattern and input impedance, mutual coupling effects 87−33552
microstrip phased arrays including mutual coupling, input impedance and radiation characts., MSAT appl. 87−61505
microstrip planar arrays with dielectric sphere overlays for improved radiation pattern control 85−36121
microstrip serpent antennas, radiation characts. 85−13226
microstrip slot antenna anal. 86−48646
microstrip slot antennas, input impedance, theoretical and expt. study 86−36788
microstrip window array, config. and characts. study 88−21028
microwave fiber optic links for phased arrays 88−72699
MM wave hybrid dielectric-microstrip antenna array 85−13371
MM wave imaging multibeam integrated feed array 87−33553
MM wave slotted waveguide antenna arrays, 39 and 65 GHz, design and perform. 85−7768
MM-wave active phased array architecture design 87−7621
MM-wave beam steering using 'diffraction electronics' 85−2693
MM-wave microstrip antennas, array configs. and dual-polarised monopulse design 87−54735

microwave antenna arrays continued
MM-wave monolithic IMPATT oscillator and active antenna, design, fabrication and performance 88−71116
MM-wave monolithic IMPATT transmitter, oscillator/antenna array design, fabrication and characts. 88−38771
MM-wave phased array antennas, monolithic type architectures 88−34496
MM-wave phased array antennas for Ka-band communications, optical beam control 87−61518
MM-wave two-dimensional horn imaging arrays; config. fabrication, performance and appls. 88−27682
MMIC distrib, amplifier for phased array transmit/receive module, optical gain control/PCM 88−71117
MMIC optically controlled phased-array technology for space communication systems 88−72698
MMIC transmit and receive modules for phase array antennas, 30/20 GHz satellite system appl. 85−55176
MMIC/MIC 8-channel phased array receivers operating in I/J band 87−47404
mode stability of radiation-coupled interinjection-locked oscillators for integrated phased arrays 88−52302
modulated scattering technique, cylindrical near-field scan, error considerations 88−2840
monitoring techniques for phased-array antennas 86−22834
monolithic and integrated phased array antennas, design 87−47405
monolithic phased, architectures comparison 86−54380
monolithic phased arrays for EHF communications terminals, design and fabrication technology 88−40732
monopulse arrays with sum and difference sidelobes constraints, performance indices optimisation 86−68929
monopulse helical array for maritime satellitecommunication 86−29642
MSW fed planar antenna array with electronic phase steering *(German)* 85−36120
multibeam active phased array system configurations for communication satellites 88−22033
multibeam antenna for satellite communications, array fed config. using active elements *(Japanese)* 86−68915
multibeam antenna system for NASA ACTS satellite, development and design aspects 87−27091
multibeam array antenna for data relay satellite system, config. and performance *(Japanese)* 87−27054
mutual coupling effects in waveguide Rotman lens beam forming networks 87−39469
near field test system for very large antennas 87−47424
Nobeyama mm-wave array, 22 GHz tropospheric phase fluctuations, interferometric meas., 27 to 50 m antenna spacings 86−63989
nonlinear synthesis methods for nonperiodic antenna arrays, appl. to microstrip antennas *(French)* 88−66204
nonuniformly spaced slot array antenna with low sidelobepattern 87−7618
optically controlled MM-wave phased arrays status 88−27679
optically controlled MMW phased arrays, design 88−27667
PC antenna array using flat unidirectional folded dipoles, design for 10-15 GHz *(French)* 85−30114
PC leaky-wave line sources, phased array 88−27683
PC manufacturing technology, appl. to microstrip/stripline antennae 86−29639
phased array antennas for airborne ECM, configs, and operation 87−33545
phased array antennas for microwave landing system (MLS) 85−7767
phased array design for deep hyperthermia throughlayered tissue 86−56183
phased array radar antennas using monolithic modules, new architectures 88−2885
phased arrays, direction-finding algorithms with high resolution, expt. performance 87−39525
phased arrays, lost cost MMIC designs for T/R modules 87−59856
phased arrays, MM-wave type with large aperture, fibre-optic feed network 87−75645
phased arrays for MLS appl. 87−33548
phased arrays using MIC technology 87−61532
planar, multiple beam forming using 3D Rotman lenses 87−68889
planar 4.0 GHz reactively steered adaptive array, design using microstrip elements 85−19270
planar antenna array, feeding network, microwave tapped delay line 85−24199
planar array, mutual coupling influence on radiation patterns 87−75633
planar arrays, radar cross-section characts. 87−49151
planar dual frequency antenna, compact, design 88−27689
planar twin dipole microstrip antennas with FET detectors for MM-wave imaging appls. 88−27681
plane waveguide-slot antenna characts., dielectric layer influence 88−40738
plastic antennas, technological considerations for high performance, rugged and low cost implementations 88−40734
printed antenna arrays design 86−68920
printed circuit cylindrical array antenna 87−27080
printed circuit cylindrical array antenna 87−12836
printed circuit low sidelobe Ku-band antenna arrays 86−48704
printed dipole arrays on a cylinder, design and pattern characts. 87−61517
printed dipole electromagnetically coupled to a microstrip feed line, radiation patterns and anal. *(Japanese)* 87−47290
printed dipole millimeter wave antenna for imaging array applications 85−13362
printed planar resonant arrays, design 87−47420
quasi-optical integrated antenna and receiver front end, MIC implementation and performance 88−25486
radar, array systems, review of developments 87−41001
radar antenna technology, developments 88−40667
radar phased array systems, addressing and control using optical fibre and waveguide technology 88−67476
radar sensor, 35 GHz 88−22200
radar type, technological development 87−33544
radio camera: imaging with large aberrant arrays 88−4116
reactively loaded waveguide-fed short backfire arrays anal. 87−75632
reactively steered adaptive array using microstrip patch elements at 4 GHz 85−7758
rectangular waveguides, longitudinal shunt slots anal., effect of wall thickness 87−75527
rectenna array for microwave power transmission 87−2372
rectenna array for microwave power transmission, theoretical and experimental study 86−6333
rectenna system, matching of dipole with diode rectifier, microwave power beam reception appl. 85−13379
microwave antenna arrays continued
reflector antennas, array fed, pattern synthesis 85−36122
reflectors, microwave, polarisation sensitive and frequency selective surfaces, realisation by laser evaporation 88−52304
ridged rectangular waveguide transverse slot resonance and radiation capabilities *(Russian)* 87−39450
Rohde & Schwarz microwave directional antenna AC 008 for 1 to 18 GHz 86−48694
S band adaptive array, experimental results 85−30118
S-band Butler matrix feed network, design for linear array appl. 87−17340
S-band multibeam-array antenna for intersatellite data-relay systems 87−56063
S-band phase array antenna, front-end module design 86−23963
SAR spaceborne and Shuttle Imaging Radar-B (SIR-B) antennas, development 86−16059
satellite antenna scan array design 88−34507
satellite antenna with horn array, power pattern synthesis using successive projections method 87−7586
satellite multibeam antenna systems, C-band reconfigurable beamforming network 85−24985
satellite system, global coverage array design 85−41801
satellite-borne microstrip patch array, demonstration model 85−41800
scanning antenna array, feed-point refl. coeff. determ. time-domain methods 87−39499
scatterometer antenna composed of microstripsubarrays 86−48702
series-fed circularly polarised printed array antenna, design 85−41790
series-fed microstrip patch arrays, shaped beam synthesis 87−47421
serpentine feed for S-band planar array antenna, design 88−2905
shaped-beam antennas design, minimax gain optimization 85−2692
sidewall slotted waveguide array antenna with lowcrosspolar radiation, design and config. 86−48687
slot array in nonradiating dielectric waveguide, design theory 85−24974
slot array in nonradiation dielectric waveguide, self-impedance of isolated inclined slot meas. 85−24975
slot arrays, E-plane horns and low permittivity dielectric lenses appl. 85−41802
slot arrays, fast computation of mutual coupling, BASIC program listing 88−66222
slot-array antennas, manufacturing techniques 88−66221
slotline antenna array, tapered, radiation field and directivity function 85−13230
slotline fed microstrip antenna array modules, design 88−66224
slotted array, design 85−13374
slotted array antennas, mechanically scanned, system appls. 88−66219
slotted coaxial antenna, cancer hyperthermia treatment appl. 86−44701
slotted rectangular waveguide phased array antennas, theory, design and radiation pattern 86−29643
slotted waveguide antenna arrays, design and anal. 88−66220
slotted waveguide array, linear near field meas. 88−34493
slotted waveguide array, narrowband polariser anal. 88−34494
slotted waveguide arrays using carbon fibre materials 87−39518
slow-wave corrugated radial line slot antenna for 12 GHz satellite TV reception 87−33554
soft arrays with internal mutual coupling, design 87−7620
solid-state active phased array antennas for EW appls., design and technological aspects 86−59161
solid-state array antennas, sidelobes control 88−66207
solid-state phased array radar transmitter with adaptive beamforming 86−30881
space-time signal processing of radar set with 2D antenna array 86−69078
spaceborne microwave active phased array SAR, design considerations for C-band operation 87−28692
spaceborne phase arrays, space-fed local oscillator concept 88−72709
spacecraft multi−beam and contoured−beam antennas 87−61472
spherical triangular array antenna, radiation characts., radar appls. 85−41773
steerable flat-plate antenna, circularly polarised type for DBS signals, low-cost design 88−27654
submillimeter wave receiver technology, conf., Lake Arrowhead, CA, USA (April 1987) 88−24310
submillimeter-wave antennas on thin membranes 88−27664
superconductor-insulator-superconductor mixers integrated with slot antennas, imaging array 87−33559
suspended substrate line antenna, design and characts. satellite TVRO appls. *(French)* 86−54374
switched-element spherical array antenna for wide scan angle, mobile satellite ground station appl. *(Japanese)* 87−27053
TACAN radionavigational electronic antenna concept and exptl. verification 85−7769
telecommunications tower, construction and antenna-mounting features *(German)* 85−13369
turreted vehicle internal communications using microwave slip ring system 87−48881
two-dimensional horn imaging arrays 88−58973
two-element microstrip antenna array controlled with active phase shifter 87−39505
ultra-wideband microwave beamforming technique using electro-optics, phased array antenna appl. 86−3704
undulated microstrip line antennas, radiation characts. and polarisation 86−29624
V-band space-based phased arrays, development using MM-wave monolithic technology 87−33546
W-band waveguide slot array design and evaluation 88−27677
wideband circularly polarized array antenna withsequential rotations and phase shift of elements 86−68919
wideband electro-optical microwave beamforming technique 87−39526
wideband microstrip reflector feeds, design 86−10193
wideband phased arrays, printed cct. log-periodic dipole radiating element 87−27088
X-band conformal microstrip arrays on cylinders 88−40723
X-band flat array antenna *(French)* 85−57162
X-band integrated Gunn diode source/microstrip patch antenna with phase/injection locking 85−61463
Yagi antenna pair with fading suppression using polarisation control, maritime satellite communication appl. *(Japanese)* 85−19267
Yagi four antenna config. for polarisation control, maritime satellite communications, appl. *(Japanese)* 85−30116
GaAs MMIC elements in phased-array antennas 88−71037
GaAs monolithic ICs for military radar design 87−3232

microwave antennas
see also lens antennas; waveguide antennas
4 GHz shell antenna *(German)* 87−75593
10 to 30 GHz radiation charact. of reflector antenna with radome in rain 88−8583
11.6 GHz radome-covered antenna radiation meas. 88−27643
12 GHz band satellite powers and other factors 88−28809
20-GHz phased array fed reflector antennas with distributed MMIC modules 85−13390
30/20 GHz band antenna radiation charact. in snow conditions, expt. study *(Japanese)* 86−43004
45° assumption in parallel-plate polariser design 86−64079
64 m reflector antenna for deep space projects, installation and inspection *(Japanese)* 86−36832
750 GHz quasiparticle receiver charact. 87−20385
Ku/Ka band dichroic subreflector development 87−33564
L-band satellite communication antennas for US Coast Guard boats, land vehicles, and aircraft 88−3942
active-array antenna beam shaping for DBS 86−22777
adaptive multiple-beam transmitter for satellite communications 87−48976
Advanced Satcom communication antennas 86−22817
aerial measuring techniques *(German)* 87−61451
airborne SAR imaging system, based on rotating antennas 86−69831
aircraft, satellites and missiles antennas parameters 87−61470
aircraft antennas/conformal antennas missile antennas 87−61471
AMSU-B (Advanced Microwave Sounding Unit), multiband antenna design 88−27645
angle diversity on line-of-sight microwave paths using dual-beam dish antennas 88−3837
angle diversity with two antennas, model and expt. results 88−3839
annular ring microstrip antenna, anal. using cavity model 85−46637
antenna far-field patterns, semi compact range facility for fast prediction 85−41698
antenna gain degradation estimation using C_n^2 height profiles 86−10190
antenna patterns meas., improvement using Fourier transform anal. 88−58957
antennas for small Satcom earth stations 87−26974
aperture antennas, main beam scanning 86−22790
aperture diversity using similar antennas 88−3838
Archimedean two-wire spiral antenna, symmetrically excited 87−75554
array feed for reflector antenna: synthesis of feed pattern 88−21018
astrovehicle momentum compensation device for microwave antenna swinging motion *(Chinese)* 88−23164
atmospheric microwave fluctuations, calculation by a dielectric equivalent 88−3847
attenuation meas., noise utilisation 88−52280
Australian Landsat Station at X-band 88−35439
automated antenna meas. system 86−68890
automated antenna meas. system using HP8510 87−68885
avionics appl., conf., Rome, Italy (May 1987) 87−58555
axial mode helical antennas 87−7607
backfire helical feed 85−13418
balun for PCB antennas, miniature wideband planar 87−39536
beam forming network for a multibeam antenna at 20 GHz 85−13413
beam waveguide ellipsoids, GTD, phys. optics and Jacobi-Bessel diffr. anal. 87−27101
beamforming networks for spacecraft antennas 85−13296
biomedical microwave interstitial applicators for hyperthermia, design with improved treatment vol. 87−35432
bipolar two-band antenna for line-of-sight microwave links *(French)* 85−2677
bistatic intrusion detection sensors, spread spectrum technology appl. 86−4743
bistatic nonlinear responder, harmonic radar cross-section study 85−8462
branch guide directional couplers for communication satellite antennas, anal. and design 88−967
broadband antennas and feed networks, overview 85−13285
broadband conical microstrip antenna 86−3679
broadband electric-field probe using resist. tapered dipoles 87−8729
broadband meanderline twistreflector for the inverse Cassegrain antenna, design and performance 88−14556
broadband monopole antennas, pattern prediction and VSWR performance 88−34410
C-band satellite home receiving antenna, optimum size anal. 87−47312
C/Ku band combination antenna for British TelecomInternational satellite earth station facility *(Japanese)* 86−29602
Cassegrain antenna, conical corrugated horn as optimum monopulse feed 85−19278
Cassegrain antenna, subreflector rotations, gain loss and noise temperature degradation 85−42694
Cassegrain antenna with meniscus-lens-corrected corrugated horn feed, radiation charact. 85−13420
Cassegrain antenna with radome, radiation charact. in rain at 10-30 GHz *(Japanese)* 86−54342
Cassegrain antenna with snow accretion on radome, pattern and signal level degradation study *(Japanese)* 87−75602
Cassegrain antennas for satellite ground stations, radiation pattern anal. 87−39460
Cassegrain radar antennas with broadband andmultiband performance 86−54345
Cassegrain reflector antenna design with optimised spatial efficiency *(German)* 88−58960
Cassegrain type multibeam antenna, front-fed offset config., beam scanning charact. *(Japanese)* 87−27008
circuit board materials for MLS antennas 87−7594
circular aperture antenna, A, B-polar for multimode polarisation anal. in satellite communications 85−7746
circular apertures with Gaussian illum., radiation patterns 88−2745
circular microstrip disc antenna, input impedance using mode matching 86−42988
circular patch antennas with passive conducting posts 87−33525
circular patch microstrip antenna, e-m, electroacoustic fields, two component warm plasma 86−10109
circularly polarized shaped-beam antenna for broadcasting satellites, design and performance study 85−30100
circularly-polarised-wave directors, freq. charact. study *(Japanese)* 88−45773
coaxial square waveguide feed for reflector antennas, radiation charact. 86−22845
compact antenna test range configurations, anal. 88−43689
microwave antennas continued
compact mobile antennas for mobile satellite communications 87−70014
compact ranges, enhanced performance 85−24940
conductive ink printed microwave antenna, design aspects, charact. and radiation pattern 87−54703
conference, Wiesbaden, Germany (June 1986) 87−16282
corrugated conical horns with elliptical cross section, EM fields, Lame functions described 85−7734
cross antenna for passive microwave remote sensing 88−8621
DBS distribution systems for centralised antenna installations, MAC-C *(Italian)* 86−69881
DBS domestic receiving antennas, design options and charact. 86−59148
DBS domestic reception, antenna requirements 85−2682
DBS receiving parabolic antenna using a backfire helical 87−47365
development and manufacture at FMV Precision Mechanics Enterprise 86−42986
DFS satellite, TM/TC antenna development and meas. 85−42564
dichroic subreflectors for multifrequency antennas 86−54354
dielectric image guide leaky-wave antennas loaded by periodic metal strips 88−27642
dielectric periodic leaky-wave antennas, microwave network design 87−27021
dielectric resonator antenna, input impedance 86−59146
dielectric resonator antennas, radiation pattern prediction 88−14468
dielectric resonator antennas , microstrip transmission line excitation, expt. study 88−72676
dielectric rod antenna, far-field radiation patterns, numerical soln. 87−39483
dielectric sandwich-loaded dipole grid for reflector antennas in satellite communications 87−75605
dielectric wedge conical scanned Gaussian optics lens antenna 87−7608
differential-polarisation meas., using dual polarized-source antenna 86−24742
digital microwave radio system, error perform. effect of angle diversity 88−52215
digital radio relay systems, propagation impairments 88−52202
diplexer design, planar integrated microwave components for terrestrial/satellite appls. 86−14517
dipole array for plane wave synthesis 86−68926
direction-finding systems spiral antennas, wideband two-channel 85−3542
directional couplers, symmetrical branch-waveguide type for satellite beamforming network, optimised synthesis procedure 87−73631
directional pattern for microwave diffraction propagation, space-time fluctuations 86−59139
disc coupled resonant antenna excited by circular patch, anal. and expt. study *(Japanese)* 87−39493
discone wide-band test antennas 88−52289
dish antenna, performance charact., radiation pattern anal. 86−10208
dish antenna, transmit and receive patterns anal. 86−10209
dishes for satcomms, requirements 86−11009
distorted microwave imaging antenna arrays, adaptive beamforming 86−3709
double offset Gregorian antenna design for DFS-Copernicus communications satellite *(German)* 87−19317
double-layer freq. selective surfaces anal. and design, dichroic subreflector appls. 85−57106
doubly-curved reflector antenna, synthesis and optimisation *(French)* 86−29609
drumskin radome antennas, ice and snow accumulation effect 87−47434
dual gridded reflector, RF transparent sunshield and thermoelastic distortion meas. 88−34517
dual reflector antenna radiation performance, corrugated horns near field anal. 85−41724
dual reflector antennas, cross-polarisation behaviour *(German)* 87−54663
dual-band reflector antenna incorporating freq. selective subreflector 87−12815
dual-offset shaped reflector antenna with dielectric cone feed for DBS reception 85−36108
dual-reflector antenna radiation patterns, synthesis and anal. 86−43025
dual-reflector dual-band main network Cassegrain antenna with shaped subreflector 88−27647
Earth space paths, angular scintillations, theoretical and expt. study 86−36803
Earth station antennas, beam waveguide feed systems *(French)* 85−57172
ECM transmitter, antenna and amplifier component charact. and developments 87−40657
EHF phase-retrieval technique for antenna metrology 88−21009
EHF polarization-sensitive imaging arrays, monolithic 85−20508
EHF/SHF satellite communications terminal modification/upgrading 88−3955
electrical performance evaluation for reflecting mesh 87−19308
electronically controllable, MM wave components 88−72688
electronically controllable antennas, MM-wave components 88−19353
elliptical offset Gregorian antenna for a transportable earth station 85−7742
elliptical reflector antennas for near-field applications in microwave thermography and hyperthermia 88−36467
EM transient range monocone antenna upgrade 86−43037
EM-coupled transverse microstrip dipoles, anal. 87−75641
emitters comparison, waveguide mouth and horn with metallic or dielectric ring 87−68879
EPR microwave helix as surface coil antenna 85−57126
equivalent circuits for resonant grids 85−24968
ERS-1 satellite, highly shaped beam telemetry antenna design 87−26960
ERS-1 X-band IDTS antenna 87−27039
ESA Data Relay Satellite antenna system 87−56065
Eutelsat 2 program, antenna design 87−26970
Eutelsat II antennas, system and technological aspects 87−27036
EW, antennas for wide sector coverage 85−13286
EW systems, ortho-mode transducer, polarisation diversity 85−24869
fan rib type deployable mesh antenna for satelliteuse 86−68900
far-field pattern construction, exptl. verification of nonuniform sampling technique 87−61475
far-field to near-field transforms in sphericalcoordinates 85−62886
feed systems for 10 GHz operation 87−7634
feeds for microwave reflector antennas 85−30126
fibre optic links appls. in phased-array antenna systems 88−4047
fibre optical feed for a phased array microwave antenna 87−54731
fin line antenna for microwave IC appl. 85−36116
fin-line antenna design for imaging array appls. 85−36096

microwave antennas continued
FIRST antenna, misalignment and thermal distortion effects anal. 87−49216
fixed beam and mechanically steerable antennas 85−13287
flat antenna for satellite TV reception, Mitsushita Electric 12 GHz product using Comsat multi-layer struct. 88−40682
flat millimeter-wave antennas, hybrid design 85−57127
flat plate printed antenna arrays, design, construction and evaluation, report 85−62928
flat printed reflector antenna for mm-wave applications 88−34419
folding antenna for SHF satellite communications 87−54723
free-space impedance equivalent microwave absorber for the cavities of spiral antennas 88−27648
frequency selective surfaces, scattering of arbitrarily polarised incident plane waves 87−75640
frequency selective surfaces, spectral characterisation and appl. to multifreq. antenna systems 86−10176
frequency-selective perforated screens, generalised S-matrix 87−33507
front-fed parabolic antenna with double-choked circular waveguide feed, cross-polar props. study 85−24965
gain standards, calibration 86−36808
GEC Research cylindrical near-field test facility 88−43688
geometrical theory of diffraction and its appls. *(Japanese)* 88−40691
Giotto spacecraft antenna subsystem design 87−26993
GRASP displaced-axis dual-reflector antenna design for EHF appls. 87−26989
grating lobes caused by parallel-plate polariser 86−42915
Gregorian satellite antenna for Germany, theoretical and experimental results 85−41732
groove antennas, dielectric image line for millimetre waves, experimental verification 85−57156
groove antennas with dielectric image line for millimeter waves 85−57125
hazard and leakage detector for satellite ground stations 87−76703
helical antenna for 70 cm band, design 86−29585
helical coil microwave antennas, implantable, thermal dosimetry charactn. 88−61440
helix antennas, gain optimisation, X-band design 86−22811
hoop column 15-m deployable antenna system development 88−34415
horn and Cassegrain antennas development above 18 GHz 88−8607
horn antenna, square corrugated, experimental study 85−2674
horn type, emission fields in close zone of aperture sources *(Russian)* 87−19282
hyperthermia, large volume, of locally advanced tumours, coaxial system design 88−54620
hyperthermia applicator, flexible resonant design 88−54617
hyperthermia applicator fields and thermographic antenna response patterns, meas. using nonresonant perturbations 88−54616
hyperthermia cancer therapy, power deposition within a microwave antenna array 85−38203
hyperthermia interstitial equal-phased arrays 86−60747
hyperthermia system using spot beam antenna for tumour treatment 88−54618
hyperthermia treatment of cancer, comparison of microwave interstitial antennas 87−63823
IC antennas on thin membranes 88−21025
implantable helical coil microwave antenna for interstitial hyperthermia 88−54606
indoor test techniques 85−7737
INMARSAT Saturn marine terminal with smaller resonant reflector antenna *(Norwegian)* 86−10204
integral feed antenna for planar subharmonically-pumped 71 GHz receiver 86−43088
integrated Global Positioning Satellite antenna−low noise amplifier system 87−49209
integrated slot line antenna with SIS mixer for focal plane imaging, radioastronomy appls. 88−34412
INTELSAT Earth station dual-frequency-band antenna development and performance 86−69733
INTELSAT satellite antenna technology 86−10186
INTELSAT Standard-A Earth station antenna bandwidth and depolarisation compensation 86−69734
interstitial microwave antenna array hyperthermia system, SAR patterns 87−4033
interstitial microwave antenna hyperthermia system, power deposition pattern control 87−4032
interstitial microwave antennas for thermal therapy 87−41992
ITALSAT payload design for 20/30 GHz domestic communications and 40/50 GHz prop. expts. 85−20144
Itapetinga 45 ft reflector antenna, aperture efficiency at 90 GHz 88−8588
Josephson junction mixers for submm and mm ranges 87−16950
JRC phased array antennas, development *(Japanese)* 87−61516
K_u-band Earth station antenna G/T determ., using Moon as RF source 87−14501
K-band antenna patterns meas. *(Japanese)* 86−36815
Kashima 26 m antenna, feed system, aperture characts. and beam directionality *(Japanese)* 86−29652
Kashima 26 m antenna, front end characts. *(Japanese)* 86−30932
Kashima 26 m VLBI antenna, back end *(Japanese)* 86−30933
Kashima 26 m VLBI antenna, H maser standard *(Japanese)* 86−29655
Kashima 26 m VLBI antenna data recorder *(Japanese)* 86−29654
Ku-band antenna for spacecraft telemetry and command 85−13295
Ku-band multibeam offset Cassegrain antenna for satellitecommunication applications 86−43043
Ku-band reconfigurable antenna for frequency re-use international communications satellite 88−2717
Ku-band spaceborne wind scatterometer, antenna patterns study 88−2738
Ku-band VSAT systems, purchasing 87−34465
Ku/C-band earth station antenna, 32 m INTELSAT specifications, design and characts. *(Japanese)* 86−16041
L-band antennas for regional mobile communication satellites 87−12812
L-band large antenna shuttle expt., non-uniform sampling techniques 87−26981
L-band monopulse antenna, phase integrals evaluation, Monte Carlo and quadrature methods 88−2802
laboratory experiments using computer-aided test 88−4601
land mobile satellite service, ground vehicle antenna development 85−13291
large antenna assembly and meas., Space Station expt. 86−10197
large antennas, practical manufacture and testing 85−41709
large deployable antennas for satellites, reflector error study, effects on radiation characts. *(Japanese)* 88−72646
large deployable structures for space applications *(Japanese)* 88−10465
large reflector antennas with complex feeds, MM-wave range for quick evaluation 86−42993
Lawrence Livermore National Laboratory electromagnetic measurement facility 87−58654
leaky wave antennas for MM waves 86−64103
leaky-wave antenna for MM waves using nonradiative dielectric waveguide, anal. 85−7735
leaky-wave antenna in millimeter band, analysis and synthesis *(French)* 88−40707
linearly polarised radiation field diffraction by slit in plane conducting reflector 85−46545
linearly-polarized dual-band diplexer in an offsetreflector 86−36864
log-spiral radiating-line antenna 87−27043
loop antennas, branch wire config. for circular polarisation, design and characts. study *(Japanese)* 87−2370
low-noise interferometer for microwave radiometry, cosmic background radiation obs. appl. 88−60700
low-profile antenna for mobile satellite communications 87−54727
low-sidelobe multibeam antennas fed by cluster horns, design for satellite *(Japanese)* 87−27007
Luneburg reflector for linear and circularpolarization 85−51501
magnetic current antennas, transmission line type, glide symmetry and radiation characts. of coaxial structs. *(Japanese)* 86−16017
maritime and aeronautical satellite communications, fading reduction technique for cross dipole fed antennas *(Japanese)* 86−30721
maritime satellite communications, compact antenna system, mount pointing error reduction method *(Japanese)* 87−7611
maritime satellite communications, pair of dipole antennas for controlling polarisation 85−36099
maritime satellite communications, shipborne fading reduction antenna system 85−3402
measurement of antenna characts., using automatic microwave meas. system 85−15010
medical applications of microwaves, conf., London, England (Apr. 88) 88−49386
medical helical interstitial antenna for local hyperthermia, performance characts. 87−57215
microstrip antenna technology, advances for microwave and millimeter wave applications 87−61469
microstrip disc antennas, modelling 85−41750
microstrip disk antenna radiation into biological-likemedia 86−22792
microstrip feed network for four microstrip antenna elements array module 87−47384
microwave array systems techniques phased array radar demonstrator, optoelectronic elements 86−28949
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
microwave phased array system for deep hyperthermia through layered tissue 87−47419
military adaptive subsystems 85−2687
millimeter wave antennas for avionics 87−61473
millimeter-wave fin antennas, investig. 86−43008
millimeter-wave technology, conf., Arlington, VA, USA, 1985 86−33904
millimetric wave antennas for radio astronomy, IRAM project for telescope construction 88−9690
mirror-antenna radar concept for multi-target tracking/3D surveillance 87−3226
missile guidance subsystems testing, ATE techniques 86−43903
MM wave antennas in finline technique, investigations 86−64085
MM wave omnidirectional antenna with elevation shaping, design 85−41714
MM wave scanning reflector antennas, design 85−41713
MM-wave, input impedance and radiation fields of aprinted-dipole on a semi-infinite substrate 86−10179
MM-wave antenna meas. with HP8510 network analyser, report 85−62897
MM-wave antenna meas. with HP 8510 network analyser 87−8720
MM-wave antenna pattern meas. 85−37742
MM-wave antenna reflector for scanner appls. *(German)* 87−54764
MM-wave antennas and devices, survey 86−42978
MM-wave antennas survey 86−36809
MM-wave compact antenna range using dielec. lens 85−2651
MM-wave dielec. antenna loaded with metallic strips, spectral-domain anal. 87−75560
mm-wave leaky antenna design 87−47356
MM-wave miniature monopulse comparator, design for antenna assembly of tracking radar 86−4725
MM-wave planar antennas on thick dielectric substrates; design, fabrication and characts. 88−27640
MM-wave satellite-fed personal communication system, antenna-beam allocation study *(Japanese)* 87−28476
MM-wave technology and RF power sources, conf., Orlando, FL, USA (May 1987) 88−18308
mobile satellite ground station antennas, beamforming 87−54726
mode transducing antenna, radiation patterns 85−24956
modeling of shaped beam satellite antenna patterns 87−61457
modular shell antennas for digital radio relay systems 87−40712
monolithic MM-wave antennas, design 85−13330
monolithic semiconductor antennas for millimetre wave Si and GaAs IC technologies 85−45779
monopulse autotrack antenna receiving system for S-band signal reception from meteorological satellites 86−18576
multi-beam antennas for satellite use, K-band and S-band designs *(Japanese)* 87−27006
multiband antenna for high capacity digital microwave links *(French)* 88−66179
multiband antennas for military satellite communication ground terminals 88−28821
multiband performance of earth station antennas with corrugated feeds 88−28822
multibeam DBS system on 22 GHz band, antenna config., link anal. and feasibility study *(Japanese)* 87−28477
multibeam reflector antennas for INTELSAT VII, configs., characts. and performance *(Japanese)* 86−59149
multiple beam ground station reflector antenna system 87−54714
multiple beam offset spherical reflector antenna with tilted feed systems, satellite earth station appl. *(Japanese)* 87−27005
multiple beam satellite antennas for contiguous high-gain coverage of Europe with freq. re-use 85−19259

microwave antennas continued
multiport antenna model for field to wire coupling and crosstalk problems 88−2696
mutual coupling in near field 86−68832
NASA ACTS autotrack antenna feed system 87−27099
near zone, power density calc. and representation 88−72666
near-field pattern measurements, array fns. determ. method 86−29569
near-field/far-field transformation, plane-polar approach, alternative algorithm 85−24939
near-fields measurement method without anechoic environments 85−13284
NHK high-efficiency flat antenna for satellite broadcast reception 88−66199
offset antenna, 4, 5 and 6 GHz, with low sidelobe and high cross polarisation discrimination 85−30094
offset cylindrical reflector antenna, radiation pattern anal. by BEM 88−8565
offset Gregorian antenna for Earth-station for INTELSAT Business Services *(Japanese)* 88−60091
offset spherical reflector with a low sidelobe radiation, design, satellite ground station antenna appl. 87−39482
offset-reflector antennas in satellite communications and remote sensing, polarisation separative dipole grids *(German)* 85−19225
Olympus satellite, inter-antenna coupling eval. 88−9504
on-board K-band multibeam antenna configuration with low sidelobes and low crosspolarisation 87−7600
optical control and generation of microwave signals, conf., London, England (Jan. 1986) 86−26521
oven leakage monitoring instrument 85−4095
Paardefontein National Antenna Test Facility, development 85−7729
parabolic reflector antenna using metal-plated cloth, design and fabrication *(Japanese)* 87−47346
parabolic reflectors, theory 88−52291
parabolic surface meas. using close-range photogrammetry 87−19313
parabolic torus transreflector antenna 85−13326
parallel corrugated dielectric slab waveguides, radiation of MM waves 86−62818
patch antennas of arbitrary shape, linear transmission line model anal. 86−64046
peripherally-fed helical antenna, wideband matching section performance 86−10212
phase-scanned commutated array network 88−15620
phased array antennas, optical RF distribution links, architectures 88−2854
phased array elements, broadbanding, design considerations 86−54381
phased arrays, appl. of optical techniques 86−29648
physical optics analysis of four-reflector antenna 87−2348
picosecond photoconductive transceivers for MM-wave detection and generation 87−45288
planar antenna, direct wave fed, interaction with semiconductor substrate *(German)* 87−61463
planar microwave circuits, integral equation approach to wideband anal. 86−64043
plastic and composite material appls. 87−39476
plastics and composites, antenna design appls. 87−33517
plastics technology appl. 85−46628
plastics technology appls. 87−39477
polypropylene substrates with low dielectric constant for printed antennas *(French)* 88−34479
polystyrene cap fabrication for Si lens at mm wavelength, thermal moulding 86−10188
power transmission, microwave beam appl., channel optimisation 88−68868
printed circuit antenna radiation efficiency optimisation, superstrate-substrate combination considerations 85−19263
printed dipole electromagnetically coupled to amicrostrip feed line 86−64104
printed microwave antenna technology, techniques and appls., report 85−62898
printed planar log-periodic dipole array antenna 88−14527
Q-/K-bad dual freq. feed horn 85−13416
quadrifilar and bifilar satellite terminals antennas, low-gain type; impedance transforming feed system design 88−34509
quasi optical subsystem for a satellite radiometer 87−50561
radar systems, appl. of microwaves, modern trends 88−53334
radiation around satellite Earth stations, environmental level measurement 88−35438
radiative coupling, interpretation of compact range meas. 87−39456
radiative susceptibility testing, compact range appl. 85−15013
radio link antenna for 7-11 GHz frequency reuse 85−36922
radio-optical antennas, field structure in images of point source 85−51489
radiometers, effects of rain on surface 87−4131
radiotelescope, subreflector supports blockage 86−29581
radome, diagnostic meas. and analysis of wave mechanisms 85−62934
radome enclosures, effects of rain, performance study 1-40 GHz 87−2384
rain scatter, interference prediction 87−54579
RCA satcom Ku-band antenna system 87−26969
rectangular and tapered microwave anechoic chambers−a comparative performance analysis 85−2644
rectenna array for microwave power transmission 87−2372
rectenna systems, effect of incident beam fluctuations on characts. 86−36795
reflector, 64-m antenna for deep-space projects 86−48680
reflector, design criteria for point-to-point microwave and satcom appls. 85−24951
reflector antenna, 64 m, computer-controlled pointing system, deep space probe communications/tracking appls. *(Japanese)* 86−36831
reflector antenna, frequency-selective plates as feed elements, investig. *(German)* 87−54669
reflector antenna, support strut diffr. effect on refl. surface profile assessment 87−33521
reflector antenna profile measurement, microwave technique 85−51491
reflector antenna surface profile tolerance meas., ultrasound or microwave remote sensing appl. 87−26967
reflector antenna system, 64 m, config. for tracking/communications/control of deep-space probes *(Japanese)* 86−36829
reflector antenna system, 64 m, deep space probe communications/tracking and radioastronomy *(Japanese)* 86−36830
reflector antennas, crosspolarisation and gain reduction due to sand or dust 85−41735
reflector antennas, crosspolarisation and gain reduction due to dust 86−16030
microwave antennas continued
reflector antennas, offset, with freq. selective subreflectors in dual/triple band feed system 88−34476
reflector antennas, splashplate feed design 85−41725
reflector antennas for satellite systems, review 85−7750
reflector antennas with serrated edges, control of far-field radiation patterns 87−61481
reflector profile tolerance meas. using ultrasound 85−24944
reflectors, spherical harmonic expansion analysis 88−34441
RF package for business satellite systems at J-band 86−55282
S-/X-band diplexer, design for Weilheim 30 m antenna, deep-space mission appl. *(German)* 85−41806
S-band and X-band receiving antennas, for transportable very-long-baseline interferometry *(Japanese)* 86−6072
S-band earth station for satellite CTV reception in rural areas of Africa 88−28812
S-band mode coupler design for antenna feeds in satellite tracking ground stations 87−75648
S-band shaped beam antenna of Indian Remote Sensing Satellite 86−43047
S/X-band feed system with self-tracking *(German)* 87−54670
SAR antenna panel of ERS-1 satellite, radiation characts. from planar near field meas. 88−34413
satcom antennas feature east/west beam shaping 86−54383
satellite active array antenna design 86−68931
satellite antenna, fibre-optic transmission of C-band microwave signals 88−28843
satellite antenna contoured beams, pattern prediction procedure 86−29559
satellite antenna dimensioning problems and developments *(Italian)* 86−69721
satellite antenna noise temp. of earth from geostationary orbit 85−57062
satellite antenna pointing mechanism with direct-drive EM actuator *(Japanese)* 86−69717
satellite communication, technological developments from 1945 to present day 85−42508
satellite communication antenna design using SCAN consultant system *(Italian)* 85−13282
satellite communication antenna feed, wide-bandwidth diplexing system 86−10224
satellite communication Earth station antenna designs 87−75606
satellite communications, technological developments from original concept to present day 85−25807
satellite Earth station, protection against rain, snow and ice *(Czech)* 88−22013
satellite earth station antenna sidelobe level reduction using improved strut shape 85−3401
satellite ground station antenna design considerations 86−22812
satellite link, reflector antenna optimisation for ground station *(French)* 87−39492
satellite multifeed reconfigurable antenna with cross-polar compensation and good scan performance 87−27037
satellite near-field test facility, for TV-SAT direct broadcasting satellite 87−19309
satellite on-board antennas, advanced configs. for regional/domestic appl. 85−41708
satellite reception equipment from DX Antenna Company 86−49501
satellite reconfigurable antenna system for regional and domestic communications in Africa 88−34477
satellite transmit antenna for UK direct broadcast TV service 87−47368
satellite TV broadcasting, legal aspects, antenna design and programme reception *(German)* 87−49233
satellite TV broadcasting, microwave devices design *(Japanese)* 87−3284
satellite TV receiving equipment, config. and operation 88−29018
Saudi Arabia west coast microwave link, fading problem anal. 88−9403
Schottky diode MM wave monolithic imaging arrays with bow-tie antennas 86−16048
self-supporting tower for microwave antenna 86−68943
sensor, PC computer model 87−75571
shape measurement during manufacture of antenna, photogrammetry appl. 86−22786
shaped microwave cassegrain antenna *(Finnish)* 85−7740
shaped offset triple reflector antennas design and characts. *(Japanese)* 88−45772
shaped-beam antennas for hybrid communication satellites 88−2741
SHF-EHF bands antenna feeder systems of communications facilities, review 87−33515
short backfire antenna, dipole exciter/dual reflector config., radiation characts. study 87−26934
short-backfire antenna gain optimisation by coaxial waveguide excitation 87−33532
sidelobe coupling loss in near field using approx. far-field data, comparison of theory and expt. 88−66168
Siemens radar search antenna, development *(German)* 87−56241
Siemens small earth stations for mobile and flexible business communication 87−49001
sinuous antenna, design 88−58943
slot leaky wave, radiation field characts. 88−34421
small diameter microwave antennas for Earth stations, 8 m, 3 m and 3.5 m *(French)* 87−68878
solar interferometer of Beijing Observatory, local oscillator system using two path method *(Chinese)* 85−20283
solar space electric power station, transmitting antenna, aperture field amplitude distribution, optimisation 87−39473
sonic microwave-antenna simulator 87−29969
spaceborne antennas, far-field patterns determ. from plane-polar near-field meas. 85−51498
spaceborne radiometer antenna reflector, MM wave, development 87−12827
spacecraft antenna design using optimisation search routine 88−34478
spacecraft antenna technology, developments *(Japanese)* 88−8597
spacecraft antennas, perform. eval. from gain contours 88−8616
spherical dielectric antenna, near-and far-field characts. study and appls. 87−19286
spherical near field test range for meas. patterns of large beamwidth antennas 85−2669
spherical near-field meas., microwave holographic diagnosis of antennas 88−2711
spiral antenna for 18-40 GHz range 88−34474
square offset dish antenna design, construction and performance 87−54710
standard-C antenna, development 88−58944
standard-horn gain calibration system 88−34424

microwave antennas continued
star microstrip antenna, performance as linearly and circularly polarised $TM_{2,1}$ mode radiator 86−42990
steerable, low-profile, stabilised antenna for a mobile satcom terminal 87−47357
stripline planar antenna 85−57102
submillimetre heterodyne receiver for KAO, detect. of CO 372 μm line in OMC-1 and W3 88−35625
submillimetre spectroscopy and appls. conf., Cannes, France (Dec. 1985) 87−16247
subreflector developed for simultaneous S and X-bandfrom a single antenna 85−62930
support structures, deflection criteria 85−41810
synthetic antenna, microwave radiometric obs., corrections for increasing spatial resolution 87−75583
synthetic aperture imaging over lossy half-space limitations 88−67468
system parameters measurement using calibrated RF-noise sources 87−35107
tapered microwave anechoic chambers, design considerations 86−1347
Technische Hogeschool Eindhoven in-house satellite antenna test facility *(Dutch)* 85−7739
technological aspects, book 88−11572
technology, conf., Rome, Italy (Sept. 1987) 88−11599
terrain mapping, MM wave passive and active sensors 88−22560
test range development of national antenna test facility at Paardefontein 85−46636
theory components and devices of microwaves, book 87−5178
thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
THF quasi-optical corner cube wire antennas mixer, response modelling 87−17375
thick microstrip patch antennas, probe compensation 87−54757
tilted beam diversity reception system to reduce line-of-sight microwave fading *(Japanese)* 88−21957
tomography, active, for dielec. props. of body determ., cylindrical system and image reconstruction 88−54544
tracking antenna for NOAA meteorological satellites 85−15426
tri-reflector antennas with no cross-polarized component, design and testing *(Japanese)* 85−19257
TV reception via satellite, microwave technology *(German)* 87−13820
TV satellite transmission and ground-reception, reflector antenna configs. and charact. *(Spanish)* 86−55246
TVRO antenna size *Ku* band versus *C* band 88−2704
twin-antenna water vapour radiometer for troposphere meas. *(Japanese)* 86−38960
two-port rectangular microstrip patches with ports at nonradiating edges, transmission line model 87−75557
UK/Netherlands mm wave telescope, antenna design 85−42693
USA satellite communications technologies, overview 88−15431
vector correlation detection type interference canceller 88−52248
VHF and UHF antenna radiation patterns meas. on helicopter 88−8613
VHF-UHF range at Paardefontein, test range 85−46635
Vivaldi antenna, improved design 88−40684
vivaldi antenna CAD for microwave IC design appls. 85−11580
volumetric antenna structure and performance 85−41718
VSAT frequency converter appls. low cost synthesised sources production 88−50291
VSAT systems for military operations support 88−22028
VSAT VANs, network support 87−34466
Warkworth II satellite earth station antenna polarization meas. 88−22025
water-immersed microwave antenna array for medical imaging and therapy, local field study 85−4351
West German Post Office, ground station technology *(German)* 86−37821
WF-H coaxial cable for telecom. appls. *(Japanese)* 87−28346
wideband microwave log-periodic antenna feeding technique anal. 87−27103
wideband multilayer coaxial-fed microstrip antenna element for 11 to 12 GHz 85−46639
wideband multilayer feed network, design and performance 87−6035
wideband sidelobe canceller for an earth station antenna *(Japanese)* 88−40760
wideband strip line 8×8-port feed network, design and performance 87−27094
X-band deployable mesh reflection, surface accuracy meas. by planar near-field scanning 88−2712
X-band helical antenna design analysis 86−59133
X-band monolithic phased-array-radar T/R module, manufacturing cost anal. 88−9644
C-fibre reinforced plastic and thermal paints for reflecting antennas, cross-polarisation anal. *(German)* 87−54664
GaAs MM-wave monolithic dipole antenna, MMIC compatible design 85−19262
$LiNbO_3$ integrated optical modulators with high damage threshold 86−28903
Si high-resistivity substrate MM-wave technology 86−67512
ZnO wideband phased array techniques 85−13364

microwave circulators *see circulators (microwave)*

microwave conductivity *see high-frequency effects*

microwave detectors
10 GHz radar detector for automatic train control 88−22202
11 GHz microwave radiometer, input ccts. *(Czech)* 86−57730
35 GHz detector using nonradiative dielectric line *(Japanese)* 88−29614
35 GHz sampling diode assembly, scale modelling and nonlinear anal. 88−19418
145-GHz-frontend with superconductor-isolator-superconductor (SIS)-mixer 87−20645
230 GHz mixer receiver construction 87−17376
adaptive target detection technique for airborne mm-wave seeker design, real-time operation 85−3499
adaptive whitening, radiometric detection in clutter 85−46830
AGA Thermovision 780 IR Scanner, hardware and software advancement 88−22763
analog superconducting electronics 86−42204
antenna pattern correction in scanning radiometry, singular system analysis 87−54715
asynchronous detector with Gunn diode self-pumping 86−14067
automatic, based on glow discharge tube for millimeter wave intensity distrib. meas. 85−37619
avalanche photodiodes appl. 85−22725

microwave detectors continued
biased hot-carrier diodes, heterodyne and video detecting performance 86−1800
blast furnaces, microwave burden sensor appl. 88−22767
Bloch oscills. in Josephson junctions appl. 85−56212
broad band cryogenic waveguide bolometers, reflectance 88−42101
broadband power sensors for 18 to 40 GHz 88−22765
broadband threshold detectors optimized for built-in test 88−47482
coaxial coupler and directional detector sample 2 to 40 GHz, Krytar strip line components 87−52811
common-user submm receiver for UKIRT and UK-NL telescopes 87−17337
compact quasi-optical dual LO receiver for 300-500 GHz 87−17612
comparison radiometer, computer fast sampling demodulation technique 88−29333
conference, IR and MM waves, Lake Buena, Vista, Florida (Dec. 1985) 86−52120
conference, IR and MM waves, Takarazuka, Japan (Oct. 1984) 85−60654
detecting diode rise-time meas. 85−58910
dielectric resonator microwave freq. detectors 87−44693
diode detector with wideband signal source, anal. 86−14068
displacement meter using five-port device 86−5505
dual-channel radiometer for atmospheric water vapour and cloud meas. 87−63955
dual-mode air-to-ground mm-wave/IR sensor scene registration 88−28965
dual-polarization radiometer, for thermal radiation 87−42212
electronically steered thinned array radiometer (ESTAR) 87−57436
EM distribution in microwave plasma guns 85−43086
FM-CW sensor, water equivalent in dry snowpack estimation 86−69827
free-electron bolometer mixer, noise temperature minimization 86−5313
full-wave semiconductor diode microwave power sensing system, RMS response anal. 88−22556
galactic halo axions, microwave detector 88−29332
glow discharge detector for sub mm waves, dimens. miniaturisation and gas press. scaling 85−20624
gravitational radiation antenna development, 1.5 tonne Nb bar 88−9964
ground-based air defense sensors for the 1990s 88−30217
hazard and leakage detector for satellite ground stations 87−76703
heterodyne investigations into FIR laser outputs and quasi-optical Schottky barrier diode detectors 85−11564
heterodyne receiver, DC to 80 GHz 86−38393
high-risk security area monitoring, microwave detectors design *(German)* 85−42973
history of nonlinearity in microwave devices and appls. 85−230
home security, detector, control units, monitoring and alarm systems review 86−38320
HP's family of MM-wave detectors for scalar network analyser 88−38421
HP's Q/R8486A MM-wave thermocouple sensors 88−42035
hybrid MM wave-IR sensors for target acquisition in adverse backgrounds 87−49582
ideal bolometer, background power effect on performance 87−35102
industrial microwave sensors, develop. and appls. 88−53597
IR-MM wave search systems in air to ground role 87−49771
IR/MMW dual-mode, common aperture optics development 88−47571
Josephson mixer for low noise submillimetre wave detector *(Japanese)* 88−7065
Josephson oscillator, coupling to external circuits via supercond. thin film 88−26716
Josephson SIS mixers as radiotelescope detectors *(Japanese)* 85−20287
Josephson tunnel junctions as microwave detectors 88−13743
K-band receiver, cryogenically cooled HEMT for radio astronomical obs. 87−34696
liquid crystal detector technique for near-field antenna patterns meas. 88−35931
low average power calorimeter design for MM-wave gyrotrons 88−19599
low-noise interferometer for microwave radiometry, cosmic background radiation obs. appl. 88−60700
Marine Observation Satellite-1 (MOS-1) radiometers performance 88−61654
metal-semimetal point contacts, microwave signal indicators, V-I charact., neg. differential resistance *(Russian)* 88−71375
microstrip ring-star 5-ports, optimised design for broadband 6-port meas. appls. 85−17800
Microwave Limb Sounder 183 GHz radiometer 87−35488
microwave powder flowmeter *(Japanese)* 86−38609
middle atmosphere, ozone content meas., mm-wave sensor *(German)* 86−12172
millimetre and submillimetre wave detection, low-noise receiver research in Europe, review 87−73766
MM and sub-MM wave detection techniques 88−29622
MM wavelength bolometers cooled by adiabatic demagnetisation refrigeration 88−29623
mm-band radiometer with variable point contact 88−74365
MM-sensors using fin line and E-plane technologies, design and radar appls. 86−27574
mm-wave and submm-wave radiation detection, problems and appls. *(Japanese)* 88−42263
MM-wave biased detectors, DXW and DXB series, 60-300 GHz operation, design and charact. 88−29334
MM-wave heterodyne imaging array, 95-115 GHz range, config. and performance 88−29013
MM-wave radiometer, airborne, for atmospheric water vapour sounding and rain detection 86−38955
MM-wave radiometer system for remote sensing appls. 3 mm operation, aircraft/helicopter installation 87−15034
MM-wave radiometric system for atm. studies using quasi-optical elements *(French)* 88−61650
MMICs for MM-wave IC radars 88−19379
monolithic detectors, integrated technology 87−74943
MOS-1 airborne verification expt. using Microwave Scanning Radiometer 88−10523
multichannel heterodyne radiometer, for computerised meas. of Tokomak plasma 86−5500
multifunctional electro-optical sensors for precision munitions 88−29339
multioctave source/detector coupling for near-millimetre-wave quasi-optical systems 87−45204
multispectral sensors, target acquisition 87−56267
NASA developments of satellite communications, tracking and robotic vision technology 88−28816

microwave detectors continued
Nimbus-7 Scanning Multichannel Microwave Radiometer for sea surface temp. meas. 86−32568
non-ohmic props. of conducting materials obs., by phase-resolved microwave mixing technique 86−31612
nonelectrical props., detection using microwaves in China, review 87−29266
ocean surface wind speed, Seasat radar altimeter, scatterometer and scanning multichannel microwave radiometer obs. compared 86−6114
oilspill estimation with radar and microwave radiometry 86−56271
optical fibre arrangement for microwave power detection 87−14269
optical fibre usage, design features 88−22612
optimum solution for IF bandwidth and LO frequencies ina microwave counter 86−70207

semiconductor photon drag broadband detector for pulsed high-power MM-wave radiation 87−35080
sensor, PC computer model 87−75571
shape extraction of 3D space objects, microwave and video sensor fusion 88−40935
SIS junction response from the millimetre into the submillimetre wave region 87−16949
SIS quasiparticle direct detector for MM-wave radiation 87−18556
six-port reflectometer operation using uncalibrated semicond. diodes as power sensors 85−37738
snow stratigraphy measured with an active microwavesensor 86−69826
snowpack melting meas. by microwave sensor for fixed frequency 86−3498
solid state submm radiometer, characts., astron. appl. 87−35101
space research, role of US Navy, past, present and future 85−8470
square-law detector SNR output, calc. 87−66546
submillimeter astronomy, low noise heterodyne receiver 87−20646
submillimeter detector for radioastronomy satellite, using solid-state devices 86−4781
submillimetre spectroscopy and appls. conf., Cannes, France (Dec. 1985) 87−16247
submm heterodyne detection system for atm. physic and astronomy 87−35489
submm laser system for local oscillator use in heterodyne receiver, astron. appl. 87−18874
superconducting low noise receiver for mm and sub-mm wavelengths 86−2627
superconducting microwave cavity parametric converter for small harmonic displacement meas. 86−50065
superconducting tunnel junctions, microwave detection, quantum statistical theory 87−1916
superconducting vs. Schottky mixers for mm and sub-mm waves 87−16948
superconductor-insulator-superconductor detector, planar antenna-coupled 85−56176
superconductor-insulator-superconductor mixer, saturation 88−15718
superheterodyne channel of microwave EPR spectrometer 87−65945
target detection, advanced millimetre wave sensors for dual band and dual mode operation 87−49583
temperature determ. from microwave radiation, plasma diagnostics, appl. 85−47981
terrain mapping, MM wave passive and active sensors 88−22560
THF quasi-optical corner cube wire antennas mixer, response modelling 87−17375
transportable very-long-baseline interferometry, geophysics appl. *(Japanese)* 86−6072
Tropical Rainfall Measuring Mission (TRMM) 88−30168
twin-antenna water vapour radiometer for troposphere meas. *(Japanese)* 86−38960

microwave detectors continued
UC Berkeley submm heterodyne receiver for spectroscopy 87−20656
UKIRT mm and submm receivers 87−20658
W-band detector, untuned, struct. and performance *(Chinese)* 87−70657
wavefront reconstruction via IR detection 85−52854
wide-band homodyne method of measuring microwavecircuits 86−31608
wideband low-noise intermediate-frequency amplifier for radiometric receivers 88−12233
X-band microwave life-detection system 86−70393
X-band microwave radiometer, design and fundamentals 88−53675
GaAlAs p-i-n detectors, high speed, MOCVD, fabrication and assessment 85−12731
GaAlAs-GaAs microwave detector 88−9980
$Ga_{1-x}Al_xAs$-GaAs heterostruct. tunable detector for mm and sub-mm radiation, config. and performance 88−25542
GaAs Schottky diode detector cct. for large-scale vidicon appl. 88−25536
GaAs Schottky diodes, submicron, sub MM wave applications 87−29134
GaAs Schottky-barrier photodetector for microwave optical fibre links 87−49088
GaAs optoelectronic IC fabrication, direct writing electron beam lithography process 85−46293
GaAs planar doped barrier detector for general-purpose appls. 87−66541
GaAs sampling ICs for microwave counters 86−70062
p-Ge microwave detectors, hole/photon interaction baked, subnanosec. response, theoretical and expt. study 85−47938
Ge planar tunnel diodes, batch-processing technique and packaging, airborne EW microwave detector appls. 85−61465
$Ge-Ge_{1-x}Si_x$ semiconductor superlattice structs., MM band detection and mixing 88−44371
$Hg_{1-x}Cd_xTe$ detector heterodyne evaluation at 2 GHz by resonant-cavity electro-optic laser frequency modulator 88−19377
InGaAs PIN photodetectors with modulation responseto millimetre wavelengths 85−64148
InSb cyclotron resonance based heterodyne receiver for submillimetre region 86−24534
InSb, cyclotron resonance-assisted subMM wave detectors, responsivity and noise equivalent power 86−5314
InSb, n-type, submillimeter-band radiation detection, mechanisms 87−11365
$Nb/Al\text{-}AlO_x/Nb$ array junction SIS receiver, 40 GHz band operation 87−45237
$Nb/NbO_x/Pb$ alloy tunnel junctions, millimetre wavelength detection 85−56202
Nb-Pb-Nb planar Josephson junction, MM wave response 86−48001
Y-Ba-Cu-O thin films, high T_c supercond., microwave detection and mixing 88−71018

connectorless (drop-in) microwave components, eval. and integration 88−44346
converter, design 86−47029
coplanar waveguide short-gap resonator for medicalapplications 86−27542
coupled multistep lines carrying TEM mode, equivalent circuits of sections 86−16000
CW optical, carriers, microwave transmission and control 85−25913
cylindrical cavity power combiners, mode analytical study 87−6019
cylindrical dielec. resonators, in metallic box, resonant freq. determ. using mode matching method 87−37507
cylindrical dielec. resonators, iterative integral eqn. soln. 86−53012
cylindrical dielec. resonators, resonant freq. calc. using variational principle 86−20791
DC-18 GHz universal coaxial switch, review *(German)* 85−61501
design of high resistance non-grounded broadband loads in terminations and attenuators 88−56902
design trends in passive microwave components *(German)* 87−11017
desktop CAD, appl. 85−10937
dielectric resonators, dual-mode Q-factors determ., meas. procedure 87−77388
dielectric resonators, operation principles and appls. *(French)* 88−44944
dielectric resonators, shielded type, higher order mode eval., PC program 88−50316
differential ferrite phase shift section; 90° type using WRD 200 ridge waveguide 87−37509
differential phase shifters, 90° type using meander-line networks, design and matching *(Japanese)* 85−17786
digital microwave signal shaper, compact spectrum constant-envelope, anal. 87−19683
digitally-controlled attenuator using p-i-n diodes, phase error minimisation 86−1360
diplexer in suspended-substrate technology, design for GPS satellite navigation system appl. *(German)* 87−66493
directed couplers, synthesis based on linearization of directed problem operator 88−958
directional coupler, coaxial line to strip line config., anal. and expt. study 87−37506
directional coupler, optimal design of MM wave integrated dielectric image lines 86−1352
directional couplers, design graphs for parallel coupled lines and 3 dB interdigitated couplers 86−53025
double dielectric-slab-filled waveguide phase shifter, theoretical and expt. study 85−45218
doubly-balanced mixer 88−7036
downconverter for spectral analyser 86−24469
dual polarisation receiver, using superconductor-insulator superconductor junction, 2.5K cryostat design 85−34189
dual-mode ferrite modulator, research 85−11114
dual-mode ferrite phase shifter, fast switching type, scanning phased array antenna appl. 87−73650
dual-mode reciprocal phase shifter, magnetostriction insensitive config., design and charcts *(Japanese)* 85−61467
dual-mode-ring resonators, equiv. cct. and resonance freq. temp. depend. study 86−14468
ECM, dual coherent source and offboard expandable techniques 85−14362
ECM/EW designers, 40 GHz and above using coax 85−3334
education in microwave engineering, preparing for the future 88−24473
EHF/THF quasi-optical polarization rotator 88−71010
electromagnetics, conf., Cairo, Egypt (March 1984) 85−5650
electron bun for accelerator and free electron laser appls., analysis 87−57014
electron cyclotron resonant ion source, efficient low-power design 88−54380
electron gun, performance 85−11829
electronic warfare, microwave components appl. 85−11539
EMC meas. of microwave receiver input devices 87−48880
energy balance in microwave devices without losses taking into account non-propagating waves 87−61431
EW components, review 85−11540
EW requirements, microwave markets and technology 85−58210
EW system design using microwave and millimeter-wave technology 85−13156
fence-guide components for MM-wave appls. 86−35062
ferrite control component design, appl. of TE_{01} mode propag. in circular waveguide 86−29511
Ferrite devices, anal. using transfinite element method 88−71950
ferrite devices, first ten years 1949 to 1959 85−229
ferrite devices, generation 88−33542
ferrite devices, nonlinear effects, study using ferromag. resonance with feedback 87−12057
ferrite phase modulator operation, magnetisation dynamics effect 85−62205
ferrite phase shifters and control devices using circular waveguides, architectural aspects 87−45192
ferrite toroidal phase shifters, anal. using coupled-wave theory 88−57997
ferrite toroidal phase shifters in grooved waveguide, theoretical and expt. study 88−57998
ferrite-varactor microwave circuits 85−11606
ferrites, complex magnetic and dielectric material parameters meas. method 85−12497
ferrofluid composites, mm wave modulator appls. 88−57996
FET, equivalent circuit, nonlinear elements charcts. calc. 87−11794
fibre optic components for microwave systems, technology and market forecast, 1984-94 86−4660
film bolometric power converter, electrodynamic analysis 85−57093
flammability of paper towels in a domestic microwave oven 87−51656
four-port broadband directional coupler, design for dielec. and image waveguides 85−34149
four-way combiner with waveguide ports, struct., design and charcts. *(Japanese)* 88−12577
free electron maser and self-excited microwave undulator 85−35322
Fresnel zone plates, mm-wave charcts. 87−73641
Fujitsu, devices for communications, technologies 87−20037
GaAlAs 11-GHz window laser, room temperature operation 85−46404
generalized external charcts. 85−17804

$BaPb_{1-x}Bi_xO_3$ superconducting polycrystalline thin film, quick microwave switch appl. 87−68001
GaAs FET preamplifier and mixer stage, low-noise METEOSAT converter design 85−50019
GaAs MESFET subharmonic mixer, design *(French)* 85−39966
GaAs W-band monolithic PIN diode switch 86−67560
InP MM-wave devices and components 85−1016
InP and related materials, physical properties and solid state devices appl. *(Japanese)* 86−22022
Pt-GaAs Schottky diodes, microwave and millimeter-wave, noise meas. 85−15020
Sr ferrite planar hexagonal particles, microstruct. and mag. props., millimeter wave device appls. 88−44969
TiC coatings, secondary electron yield from waveguide walls 85−17770
$YBa_2Cu_3O_7$, microwave. cavity resonator constructed from high-temp. superconductor 88−70966

microwave filters
4-band waveguide filter design *(German)* 85−61437
5 GHz range SAW filter fabricated by electron beam exposure with O_2-plasma ashing techniques 87−12028
20 GHz band low-loss lightweight pill-box type directional filter 87−52800
93 GHz circumferential waveguide bandpass filter with broad bandwidth and low loss 88−25438
active filters, construction principles 86−35108
active filters, transversal and recursive types, implementation and charcts. 86−27585
adaptive filter instantaneous freq. meas. receiver with switched multiplexer, config. and operation 88−23230
antipodal ridge waveguide struct., wide stopband lowpass filter 87−6055
arcing, high-power microwave induced 88−71006
band-pass, active, with elliptic AFR 86−41223
band-pass, using (110) Si, deep narrow vertical-walled shafts fabrication 86−53558
band-pass filters, Chebyshev type using high-Q dielec. ring resonators, anal. and design 87−73636
band-pass filters, design using dielec. resonators coupled to microstrip lines 86−27582
band-pass filters, end coupled microstrip/suspended-stripline, design and performance 86−1211
band-pass filters, S and C bands, dielec. resonators, strip line coupling 85−17818
band-pass filters, waveguide construction *(German)* 85−23100
band-pass filters using dielec.-filled coaxial resonators, design method 85−34034
band-pass grid filter for linear polarised MM-waves, synthesis 88−25417
band-pass type, design using dielec. resonator 86−14484
band-stop filter constructed in coupled nonradiative dielectric waveguide, X-band, design and props. 87−17307
band-stop filter design using dielec. waveguide grating 85−54992
band-stop harmonic filter synthesis, appl. of R-transformer to design 87−66511
bandpass Comb, slab-line resonators design optimisation 86−52933
bandpass filter using circular discontinuities in nonradiative dielectric waveguide 87−73639
bandpass filter using electrically coupled $TM_{01\delta}$ dielectric rod resonators , anal. and design 88−70986
bandpass filter using YIG film grown by LPE 86−8433
bandpass filters, CAD 88−50322
bandpass filters based on multilayer dielectric structures 85−6410
bandstop filter in nonradiative dielectric waveguide using rectangular resonators, design procedure 87−73633
beyond-cutoff waveguide-dielectric filters, analytical synthesis 85−1012

microwave filters continued
bias-T diplexer, decade bandwidth design for MIC appls. up to 50 GHz 87−52806
bilateral fin line band-pass filters, X-band realisations *(Korean)* 86−59125
bimodal paramagnetic filter, investigation 86−34943
branching filter using dielec. resonators, config. and transmission charact. study *(Japanese)* 86−20809
broadband band-pass harmonic reject filter, 18-30 GHz, coupled suspended stripline design 87−73637
broadband filters and contiguous channel multiplexers, design for electronic support measures appls. 87−37437
broadband microstrip diplexers 87−45212
broadband YIG-tuned filter/mixer/discriminator for microwave spectrum analyser 88−35896
broadband YIG-tuned preselector for VHF and UHF 86−15407
broadcasting satellite transponders, dual-mode filter for output multiplexer 88−25301
CAD, passive circuit case study 85−11399
CAD, time-domain analysis 87−10602
CAD of bandpass filters on microstrip 88−50350
CAD of waveguide low-pass filters for satellite applications 88−15432
canonical and longitudinal dual-mode dielectric resonator filters without iris 88−25378
canonical bandpass filters using dual-mode dielectric resonators 87−73617
capacitive-gap suspended substrate stripline filters, design 88−858
cavity combline filter design 88−56872
ceramic integrated miniature filters for 900 MHz cellular radio appls. 88−32303
ceramics, dielectric charact. and HF appls. 87−46245
circular waveguide filter for four polarisations, design and charact. freq. reuse appl. *(Japanese)* 86−41312
circular waveguide TE_{011} mode cavity resonator band-pass filter, temp. compensation 88−50339
coaxial high-pass filters with various transfer props., design considerations 87−17212
combline and interdigital filters with tapped-line input, design eqn. 88−38702
communication satellites, recent advances 86−52932
communications satellites, band-reject filters design 85−30967
compact grating structure for application to filters and resonators in monolithic microwave integrated circuits 88−25460
computer-aided anal. and design packages *(Italian)* 88−19349
computer-aided tuning technique 87−6045
conference, London, England (May 1987) 87−43820
coupled 8-pole quasi-elliptic function filter realized in 3 dielectric resonator cavities 87−6052
coupled line segments with diagonal arms, microwave strip filters synthesis 87−10972
coupled microstrip directional filters and appls. *(Korean)* 86−41305
coupled microstrip structs. parameters, losses effect 88−32390
coupled resonator rectangular waveguide filters, circular irises design using large-aperture formulae 85−11514
coupled stepped impedance resonators in comb-line filters, CAD model 88−56896
coupled TEM lines network with unequal electrical lengths, filter charact. 88−49989
coupled transmission lines, conductor losses evaluation 87−73656
coupled-line filters, parasitic-effect compensation 86−27564
coupled-line type bandpass filters using series capacitors, design *(Japanese)* 87−6090
cross-polarisation canceller with transversal filter, performance study *(Japanese)* 86−43721
cross-shaped dielectric resonator structures 86−41311
cubic YIG components save time and space 86−58058
cylindrical dielec. resonator and asymmetric strip line technique for filter realisation *(Polish)* 86−35063
cylindrical dielectric resonators, $TM_{0\gamma\delta}$ mode 86−8444
D-band IC narrowband dielectric filters 87−59827
decorrelation filters by spatial diversity 88−3069
delay-line technology and appls. 85−56262
design with wide suppression bands 87−45017
development, state of the art review *(Italian)* 88−19324
dielectric coated mesh filter 87−45016
dielectric filled waveguides, miniature two-mode filters use 85−34165
dielectric filter for mobile telephone systems 87−45196
dielectric filters, freq. selectivity improvement 87−17312
dielectric grating bandpass filters 85−61429
dielectric grating filters, mutual interference between guided-wave and leaky-wave regions 87−6032
dielectric high-power bandpass filter using quarter-cut $TE_{01}\ \delta$ image resonator for cellular base stations 87−73616
dielectric high-power bandpass filter using quarter-cut $TE_{01}\delta$ image resonator for cellular base stations 88−25381
dielectric image guide gratings in Bragg-refl. region, theoretical design method 86−47048
dielectric microwave resonators, devel., appls., construction, and operation *(Dutch)* 88−50305
dielectric resonator, loop coupled, external Q 85−17782
dielectric resonator band-pass filter, design with high attenuation rate 85−17625
dielectric resonator external Q when probe-coupled 86−53010
dielectric resonator filters, microstrip termination effects on noise figure and insertion loss 86−8425
dielectric resonator filters for UHF and microwave appls., band-pass and band-stop, design methods 87−17323
dielectric resonator filters in waveguide sections below cutoff, CAD 86−1344
dielectric resonator output multiplexer for C-bandsatellite applications 86−11040
dielectric resonator whispering gallery modes coupling to transmission lines 85−23090
dielectric resonator wide band tuning cavity for high performance filters 88−25434
dielectric resonators, appl. to filters 88−945
dielectric resonators for fundamental mode IC W-/D-band filters 87−6021
dielectric resonators in decimeter-band filters 87−17226
dielectric split-ring resonators, struct., props., filter and oscillator appls. 88−70996
dielectric waveguide band-pass filters using parallel-coupled grating, design aspects 86−58033

microwave filters continued
dielectric waveguide band-pass filters with broadstop bands 86−8431
dielectric waveguide channel dropping filter using 3 dB couplers and bandstop gratings, multiplexer appls. 88−32376
dielectric waveguide components 88−38684
dielectric waveguide filters, pass-band freq. adjustment method BEM anal. *(Japanese)* 87−17318
dielectric waveguide grating bandpass filter *(Korean)* 86−53016
dielectric waveguide grating design for bandstop and bandpass filters 85−17794
dielectric waveguide gratings, band-stop charact., field anal. *(Korean)* 88−7028
dielectric-cavity bandpass filters, attenuation band 88−63775
digital interdigital filter anal. and synthesis 88−19286
digital radio, adaptive filters, multipath effects reduction 85−25736
directional coupler and travelling-wave directional filter using slow-wave microstrip lines 87−17309
directional coupler with filter charact. 86−35064
directional filters, one- and two-loop nontraditional design anal. 88−6961
distributed filters, exact synthesis, cascade factorisation procedure 88−32398
distributed microwave active filters with GaAs FETs 86−8373
doubly periodic structure wave interaction, vigorous anal. 86−10162
dual mode canonical filter design for output multiplexer of 12 GHz broadcasting satellite transponder *(Japanese)* 87−24437
dual mode dielectric resonator filters, design and performance 86−8435
dual mode dielectric resonator filters realisation 88−32401
dual mode dielectric resonator filters without iris 87−73618
dual mode dielectric resonator loaded cavity filter with nonadjacent cavity couplings 85−17628
dual TM modes appl. to triple- and quadrupole-mode filters 88−25380
dual-mode band-stop waveguide filters, narrow-band type, crosstalk avoidance 85−40224
dual-mode longit. filters with arbitrary I/O port polarisation, synthesis and implementation 87−6046
E-plane filters, CW and peak power handling capabilities 87−73654
E-plane fin line and metal insert filters with improved charact. 86−14473
E-plane integrated parallel-strip screen waveguide filters 85−61427
E-plane metal-insert filters in microwave waveguides, CAD 87−6016
E-plane type band-pass filters in fin line, anal. and synthesis using CAD program *(Korean)* 87−24423
E-plane waveguide diplexer with integrated metal insert filter 85−55103
EHF hybrid $HEM_{11\rho}$-mode dielectric resonators for filter applications at short millimeter wavelengths 88−71004
EHF nonradiative dielectric waveguide 85−55100
electrodynamic analysis of waveguide filters with inductive metal inhomogeneities 88−953
electronic support measures appls., filters and multiplexers design 87−31997
electronically tunable and switchable filters using microstrip ring resonator circuits 88−71102
electronically tunable band-stop filter , design procedures and coupled microstripline realisation 88−70984
elliptic amplitude frequency response, calculation and implementation 88−38697
elliptic bandpass filters using four TM_{010} dielectric rod resonators 87−6053
elliptic filters using dielec. resonators, elec. and mech. design *(Polish)* 85−34033
elliptic-function six-pole microwave filter using triple-mode degenerate cavities 85−11395
ESM appls. 85−24880
ESM appls., suspended substrate stripline filters design 85−57941
evanescent mode waveguide band-pass filter, Q-band operation 85−11396
evanescent mode waveguide filter with non-touching E-plane fins, anal. and design 88−25309
evanescent mode waveguide with capacitive discontinuity, microwave ccts. realisation *(Czech)* 87−52815
evanescent mode wideband harmonic filters using unified ridge waveguide struct. 88−32399
evanescent-mode bandpass waveguide filter for millimeter-waves 88−966
evanescent-mode waveguide band-pass filters, anal. and design guidelines 85−54989
evanescent-mode waveguide bandpass filter, comments and reply 85−50028
evanescent-mode waveguide dielectric resonator filters, anal. and design, MM-wave appl. 85−17624
evanescent-mode waveguide filter with nontouching E-plane fins, computer aided design/anal. algorithm 88−32389
evanescent-mode waveguide filters built in a day 88−944
EW systems, magnetostatic wave technology appl. 86−23954
exact 5-pole elliptical function filter using dielectric-loaded cavity structure 87−6054
ferrite filter with magnetic memory 87−46397
ferrite tunable metal insert filter 87−59844
ferrites and filters, material and device development 85−11390
fibre optic microwave filters, cascaded, modal dispersion 88−20396
filter discriminator instantaneous freq. meas. uses linear amplifiers 87−49904
fin line band-pass filters, MM-wave, graphical design 88−32440
fin. line coupled, dielectric-resonator filters, design using FEM 88−56897
fin line post, discontinuity parameters, expt. determ., band-stop and low-pass filter appls. 87−52801
fin-line strip discontinuities, appl. to MM-wave filters 88−25420
finlines, unilateral, with arbitrarily located slots, higher order modes 86−67458
four polarisations filter for frequency reuse *(Japanese)* 87−37521
four-port filters, switched multiplexers having low amplitude and group delay ripple 88−25385
free-standing wire grids, characteristic curves for spectroscopic perf. 88−50312
frequency-selective limiting in paramagnetic microwave filters 88−955
generalized Chebyshev channelizing filter for satellite transponders 85−22983
GHz range SAW and STW bandpass filters using harmonic groupe type UDTs 88−51135
grating filters, charactn. using waveguide discontinuities anal. 87−75516
grating filters on dielec. image waveguide, design procedure 86−10170
grooved monoblock comb-line filter suppressing the third harmonics design and performance 87−73522
gyroresonant phase filter for travelling wave gain and efficiency enhancement 88−27000
half-wave stepped digital elliptic microwave filter anal. 88−50277

microwave filters continued
harmonic band-pass filters, planar integrated microwave components for terrestrial/satellite appls. 86−14517
harmonic filtering at UHF and microwave frequencies using distrib. element filters, design aspects 87−17215
hexagonal ferrite tunable band-pass filter, 40-60 GHz, design and performance 86−14338
HF dielec. materials, characts. and appls. to resonators, filters and duplexers *(German)* 88−71876
high speed varactor tuned notch filter for ECM interference suppression 86−8445
high-Q dielectric ring resonator bandpass filter design 88−25382
history of research, design and development 85−226
hybrid coupled amplitude equalisers for narrow band filters 85−17795
hybrid programmable transversal filter using monolithic GAAs FET array, design and characts. 86−14524
IC filters with narrow bandwidths, design 85−22978
inhomogeneous coupled line sections, design procedure 88−66139
INMARSAT B cross-coupled diplexer 87−45218
instantaneous frequency meas., advantages of filter technique 87−3231

interference filters, low pass metallic mesh, for 165 to 880 GHz region 85−40225
Ka-band fin-line bandpass filters, CAD 86−62806
Ka-band microstrip integrated circuit FMCW transceiver 87−6151
Ka-band PC mixer with compact filter for step-tuned local oscillator 87−6153
Ku-band contiguous multiplexer employinglow-loss, odd-order, mixed dual-triple mode cavityfilters 86−11041
linear phase filters 85−11444
linear tapered cutoff waveguide filters, props. study *(Japanese)* 87−6030
low dispersion notch filter for multi-GHz frequenciesusing fiber optics delays 86−27433
low-loss low-cost stripline filter 87−45213
low-loss SAW transducers and their appls. 87−53858
low-pass 'in-a-cable' filters design 85−910
low-pass filter, modelling 87−37449
low-pass finline filter design based on stepped-parasitic compensation algorithm 86−29509
low-pass generalised Chebyshev odd-degree prototype filter for suspended substrate stripline 86−34950
low-pass harmonic filters, optimised design for satellite appls. 85−17631
lowpass filters using hybrid uniplanar structures 88−50304
lumped element filters for electronic warfare systems, design and construction techniques 86−57919
lumped-element microwave filters, design considerations 88−32410
magnetic thin-film layered structure with periodic corrugation, high Q filter characteristics 88−50363
magnetostatic surface wave device with sinusoidal surface corrugation, microwave filter fabrication 87−67796
magnetostatic-surface-wave band-pass filter, tunable transversal type, design and characts. 87−7032
matched four port hybrid filters 87−73620
mechanical tuning structures for dielectric resonator on microstrip substrate, CAD 88−25433
metal insert and fin line filters with passband separation and stopband attenuation improvement 86−27543
metal insert E-plane filters, appl. of transmission matrix formulation 87−19251
metallic *E*-plane filter with cavities of differentcutoff frequency 86−47044
MIC filters, 2D synthesis and design 88−25308
MIC filters, microstrip cct. design procedure 87−6065
MIC slot line resonators, spectral domain anal. 85−17817
microstrip bandpass filter struct. 88−32394
microstrip cascaded step discontinuities, rigorous anal. 88−66138
microstrip commensurate-line band-pass filters, topology, synthesis and sensitivity 88−70980
microstrip devices, new structs. based, expt. study 88−957
microstrip disk cavities filter using gap capacitances coupling , theoretical eval. and performance study 88−70990
microstrip filter, tapped line, CAD 85−55114
microstrip filter design including dispersion effects and radiation losses 87−6060
microstrip filters, parallel coupled, construction technique 88−70981
microstrip filters employing codirectional comb resonators with attenuation poles at finite frequencies, synthesis 88−63867
microstrip low pass filter design 87−59698
microstrip low-pass filters, noncommensurate distrib. structs., image parameter design method 86−41201
microstrip microwave low-pass filters with a Zolotarev attenuation characteristic 87−59692
microstrip rejection filter and microstriplines, bulk and thin film dielec. overlay effects 87−970
microstrip rejection filters, performance comparison of thick film and thin film technologies 88−56851
microwave conf., Las Vegas, NV, USA (June 1987) 87−72690
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
millimeter-band waveguide-dielectric filter with improved selectivity 85−6501
millimetre-wave quasi-optical components, design aspects 87−11027
miniature band reject filters for satellite applications, design using dielec. resonators 85−17627
MM wave waveguide band-pass filters using E-plane techniques, CAD and specifications 85−61436
MM-wave band-stop filter with dielec. resonators using whispering-gallery modes 87−73634
MM-wave broadband E-plane band-pass filter, starting values estimation for CAD procedure 85−22981
MM-wave broadband E-plane band-pass filters, CAD program 85−17623
mM-wave contiguous diplexer designed with printed-circuit elements 87−45193
MM-wave cutoff filter based on NRD-guide technique *(Japanese)* 87−37522
MM-wave double planar E-plane IC filters, design with improved stopband attenuation 85−6414

MMIC channelised switched preselector, design for EW-receiver appls. 88−71083
mobile communications, bandpass filter design 85−30933
mode conversion of waveguide band rejection filters 86−1353
modelling of microwave circuits by the similarity method *(Czech)* 87−6029
MSW filter, microwave cct. model 88−71955
MSW filterbanks for microwave channelised receivers, config., fabrication and characts. 88−33544
MSW tunable bandpass filter 87−7034
multi-cavity microwave communication filters, sensitivity anal. and optimisation 86−62675
multi-section stopband filter with 90° resonator separation, anal. and design 88−38703
multicavity output filter system for a klystron with different characteristic cavity impedances 87−45504
multicoupled cavity filters, exact sensitivity anal. and optimisation 86−27444
multicoupled microwave resonator filters, predistorted lossy design techniques 85−45221
multicoupled resonator filters, predistortion pole techniques 85−17630
multifunction components with single compact housing, product review 88−50379
multilayer microwave volume filters 86−41285
multiple-grid frequency-selective surfaces as periodically loaded structures 88−44333
multiplexing networks, simulation and sensitivity anal., design appls. 86−40869
narrow band-pass filter using dielectric resonators 88−56879
narrow band-pass filters using high-Q cylindrical $TE_{0m\lambda}$ resonator modes 85−17629
narrow-band cutoff-mode filters and switch filters 85−6135
narrow-band filtering of microwave filters, YIG films magnetostatic waves excitation 86−62667
narrow-band filters, design tool based on anal. of rectangular waveguide, discontinuity problem 87−37499
narrow-band microstrip bandpass filters with low radiation losses for millimeter-wave applications 88−38686
narrow-band type with dielec. rod, design using numerical method 86−20792
narrowband elliptic filters on microstrip 85−40220
narrowband fibre-optic microwave filter, design and characts. 87−6064
narrowband single-resonator microwave rejection filters with amplitude and phase compensation *(Russian)* 85−1015
noncommensurate distributed filters design using image parameter approach 85−11573
nonradiative dielectric waveguide 87−6057
nonradiative dielectric waveguide, reson. coupled stub for filter appls. 87−59822
nonradiative dielectric waveguide filter, Chebyshev ripple band-pass type, design for MM-wave appl. 85−17626
nonradiative dielectric waveguide filters, MM-wave, design 87−973
nonreciprocal filter behavior in a periodic edge-loadedferrite microstripline 86−35072
nonreciprocal filters using dielectric resonators 85−23103
optical filtering of microwaves 85−24358
optimal design of multi-cavity filters and contiguous-band multiplexers 85−8256
parallel-coupled line filters, synthesis using equiv. ccts. for inhomogeneous coupled lines 88−56411
parallel-coupled-line wideband microwave band-pass filters *(Chinese)* 86−62804
partially filled waveguide integrated filters, synthesis 87−45179
passband filtering of magnetic volume waves intwo-port planar garnet devices 86−36059
passive components, developments 88−19334
PC filters and diplexers for MM-wave IC, design and performance 86−67486
phase characteristics of directional microwave filters 86−20678
polarisation independent band pass filter with slits of finite thickness in integrating waveguide technology (INWATE) 88−56889
polynomial microwave filters, synthesis 88−19252
posts in rectangular waveguides, equiv. cct. interpolating formulas 87−66490
pseudo-elliptic coupled line microstrip filters 86−47058
quadruple-mode filters 87−73619
quartz, Rayleigh-mode SAW filters for timing recovery at frequencies above 1 GHz *(Japanese)* 87−60760
quartz, UHF low loss SAW filters for front end applications 87−67679
quartz subminiature/thin-membrane resonator configurations and characteristics 87−1854
quasi-lowpass, quasi-elliptic symmetric filter 87−73615
quasi-optical diplexers, characts. *(Japanese)* 86−27446
quasi-optical filter element, reflective polarising interferometer 88−7024
radial line stubs for design 88−71009

satellite ground stations, high power filters developments 85−14206
SAW coupled resonator filter, 1500 MHz 88−51125
SAW filter with centre frequency of 960 MHz 86−28584
SAW filters, GHz range step-type unidirectional low loss devices and 5 GHz IDT filters 87−60751
SAW L-band slanted transducer dispersive filters, phase error compensation *(Japanese)* 87−60746
SAW microwave filters, design and fabrication using fine lithography 85−56072
SAW resonator filters appl. 86−15332
screened slotted line, charact. parameters calc. and expt. investigation of irregularities 86−20786
selection program from K&L Microwave 88−973
selective filters with finite transmission zeros andarbitrary phase characteristics 86−67479
self adaptive bandpass filters with applications 'frequency set-on' oscillators 87−73523
self-equalized, equiripple microwave filter, CAD, filter response data 86−8348
serial MSK filters, microwave implementation for TDMA satellite communication systems 86−27437
SHF selectivity improvement 87−59693
short-step-stub Chebyshev impedance transformers, synthesis procedure 86−67465
shunt-connected microstrip radial stubs 86−41298
shunt-inductance-coupled waveguide filters with expanded second stopband 85−34032
slotted-waveguide filters using cut-off wavelengths for microwave hybrid integrated circuits 87−11018
slow-wave grating struct. for filters and resonators in MMICs 87−73733
spurline band-stop filters, anal. and design 86−27545
spurline bandstop filter analysis and design 86−8440
stepped impedance-resonators for microwave bandpass filters, unloaded Q-factor study 87−17303
stopband optimised *E*-plane filters with multiplemetal inserts of variable number per couplingelement 86−47038
stopband resonance freq. shift due to uncoupled length of resonator, calc. method 87−24429
strip-line directional filters and multiplexers coupled to a resonator loop 88−19340
superconducting band rejection filter for microwave band *(Russian)* 88−19346
superconducting NbTi and Pb(Cu) bandpass filters 85−56263
superconductive convolver with junction ring mixers, use as programmable matched filter 85−54745
suspended substrate stripline filters for ESM applications 87−45216
suspended substrate stripline lowpass filter with a very broad stopband 88−50237
switchable band stop filter for MIC appl. 85−11574
switched filter banks, design 85−22977
Ta-Ta_2O_5-PbBi tunnel junctions for 85-110 GHz SIS mixer expts. 87−66528
tapered circular waveguide cutoff filters for TE_{01} mode MM-waves, anal. and props. *(Japanese)* 88−56874
TE triple-mode filter , design, realisation and prototype characts. 88−70987
technology and adapters integration to standard waveguides, band-pass filters use 85−11532
temperature compensated L-band hybrid SAW oscillatorand resonator filter 86−2544
three-stage feed-through resonator filter, design 85−34039
timing recovery cct. for 2 Gbit/s digital communications system using dielec. resonator filter 87−66440
TNCAD1, CAD program for microwave ccts. *(Chinese)* 85−22588
transient analysis of microstrip side-coupled filter in three-dimensional space 87−24439
transmission line band-pass filter, with wide stop band 88−56738
transmission-resonator filters, method of obtaining broad stop bands 85−6502
tunable ferrite filter, 54-58 GHz 86−36057
tunable filter, 0.5-4.0 GHz, design using YIG film grown by LPE 87−73635
tuning, computer aided 87−59821
two path cutoff waveguide resonator filters withattenuation poles 87−6056
two-mode waveguide-dielectric filters with elliptic amplitude-frequency characts. 86−35065
two-path cutoff waveguide dielectric resonator filters, CAD 86−8436
UHF filter with symmetrical or unsymmetrical insertion of two dielectric disk resonators in the transmission line 85−1009
UHF piezoelec. film resonator-controlled oscillator and filter anal./design using CAD techniques 86−14523
uncooled parametric amplifier, design 88−38707
varactor tuned bandpass filters using microstrip-linering resonators 87−6123
vectors network analyser time-domain techniques 88−74568
versatile multiport coupled combline couplers 87−45209
VLSI for wave digital filters design 85−61379

gyrotron, high-power microwave source, design and performance 88−19591
gyrotron, KfK 150 GHz device, pulse operation, expt. results 88−19596
gyrotron, large orbit, high power generation in conducting wall geom. 86−21029
gyrotron, tunable megawatt type, 120-240 GHz, config. and characts. 88−25795
microwave generation continued
gyrotron and peniotron modes in rotating-beamdevices 85−55380
gyrotron backward wave oscillator as high-power tunable MM-wave source 88−44524
gyrotron BWO, linear theory and design study 85−55407
gyrotron device with high Q cavity for plasma scatt. diagnostics 86−21022
gyrotron oscillator, beam-wave dynamics, self-consistent time-dependent particle simulation 88−64187
gyrotron oscillator, CW type, preliminary design of 280 GHz, 1 MW device 88−25797
gyrotron oscillator, high power K_a-band expt. 87−66828
gyrotron oscillator, K_a-band, axial slotted cavity effects 88−64189
gyrotron oscillator, pulse-line-driven, transient behaviour simulation 88−64188
gyrotron oscillators for high power mm-wave fusion 86−53294
gyrotron oscillators with slotted cross-section struct., linear-theory anal. 88−64185
gyrotron simulations without particles 88−19606
gyrotron windows, material requirements 88−25807
gyrotron with quasi-optical cavity resonator, harmonic operation for HF-radiation generation 85−6649
gyrotrons, 100 GHz 200 kW, expt. results at Thomson-CSF 86−21021
gyrotrons, high frequency, MM and sub MM radiation sources 87−24711
gyrotrons, high-harmonic type, config. and characts. for submillimetre-wave source appls. 85−23320
gyrotrons, starting current and mode competition, linear theory validity study 88−64186
gyrotrons for plasma heating in W VII-AS stellarator, mode purity measurements 88−19595
Heil microwave generator, special form of klystron *(German)* 87−59837
hemispherical resonator for energy store, investig. 88−12568
heterostructure hot-electron diode microwave generation 88−56916
high brightness synchrotron infrared facility at Brookhaven National Laboratory 88−25050
high current relativistic electron beam, interaction with oversize retarding struct. 87−45507
high frequency vircator microwave generator 85−639
high harmonic generation from nonrelativistic cusptron device 85−23335
high peak power transistors for phased-array radars inL band and S band 86−53062
high power, multidimensional numerical simulation 88−25825
high power generation from cusp injected intense relativistic electron beam 85−23329
high power klystrons and lasertrons at SLAC 87−17645
high power microwave emission from strongly magnetized virtual cathode sources 87−17636
high power microwave simulator development for military appls. 88−25782
high power MM radiation generation with high current electron mini-accelerators 86−8694
high power RF from a laser photocathode generator 85−23336
high voltage k_a-band gyrotron expt. 86−21019
high-frequency gyrotron developments 86−47240
high-power backward-wave oscill. driven by a relativistic electron beam 86−21056
high-power Cerenkov oscillator, 10 GHz, annular relativistic electron beam instability 85−6655
high-power emission from a virtual cathode device 85−23328
high-power gyrotron, cyclotron-maser instability, equilibr. self-field effects 88−25783
high-power magnetrons and vircators, progress 87−17644
high-power microwave generation from a virtual cathodedevice 86−14810
high-power microwave generator module implemented by 2T975 transistors 87−65936
high-power microwave sources, conference, Los Angeles, CA, USA, Jan. 1988 88−49345
high-power microwave sources with over-moded output, power and mode diagnostics 85−52857
high-power microwave tubes for state-of-the-art military and scientific applications 88−12885
high-power MM-wave appls. using pulsed or CW gyrotrons 87−37821
high-power pulsed microwave generators, biological effect instrumentation 88−5019
high-power reflex triode for microwave generation 85−23325
high-power reflex triode microwave source investig. 86−21033
high-power short MM-wave generation by refl. at front of relativistic electron beam, anal. *(Japanese)* 88−38706
IMPATT generators with varactor tuning, multidiode, anal. 87−16928
IMPATT-diode generator with open resonator, dipole excited, expt. investig. 87−16927
induced resonance electron cyclotron maser, higher harmonic generation 88−45332
intense pulse generation by relativistic high-current electron beams of microsecond duration 85−45210
intense relativistic e-beam in mag. field 85−1240
intense relativistic electron beams for monochromatic high-frequency electrical pulse generation 85−23348
intense single-pulse microwave sources diagnostics 87−8725
inverted relativistic magnetron, 3D numerical simulation using finite difference code 87−17620
inverted relativistic magnetron, generation of microsecond range microwaves pulses 88−32721
ion source, beam extraction expts. with Ar^+ beam 87−3881
Josephson junctions electromag. interaction in series and parallel combination, equivalent circuit anal. 86−58712
Josephson junctions in mag. field current-voltage struct. and emitted X-band radiation 85−56193
Josephson local oscillators for millimetre and submillimetre wave generation 88−58038
klystron, 150-MW at S-band, design and performance 86−21040
KU band microwave radiation prod. by relativistic backward wave oscillator 85−23359
L-band signal generator for communication and radar appls 87−56716
laser diode, low-frequency square-wave modulation for generation of RF and microwave signals 86−63828
laser diode modulation for high frequency signal generation 86−29283
laser pulses, mode-locked, spatial time-division repetition rate multiplication for microwave generation 85−2384
lasertron microwave generators for electron linacs, Gorlich photocathode use 86−31749

medical applications of microwaves 88−54493
medical applications of microwaves, conf., London, England (Apr. 88) 88−49386
medical imaging physics and engineering, conf., Maratea, Italy (Sept.-Oct. 1984) 87−58528
medical microwave thermal imaging by passive radiometry 88−68392
medical microwave thermography, stabilised broadband correlator design 85−20909
medical microwave thermography using broadband correlation techniques, thermal and spatial resolution considerations 85−59250
medical thermography, singular value decomposition of radiometric integral eqn. 86−32301
meteorological satellite ground antenna for data acquisition (for NOAA) 85−15426
microwave reflectometry, frequency-domain, image reconstruction, parameter identification, simulation tools appl. 87−35179
millimetre and submillimetre wave detection, low-noise receiver research in Europe, review 87−73766
MM wave imaging multibeam integrated feed array 87−33553
MM-wave airborne imaging 92/183 GHz radiometry during Bering Sea Marginal Ice Zone expt. 85−9374
MM-wave heterodyne imaging array, 95-115 GHz range, config. and performance 88−29013
MM-wave imaging in remote sensing, active radar and passive radiometer techniques 88−68618
mm-wave imaging of moving targets 87−41014
MM-wave imaging quasi-optical 85−8945
MM-wave radiometer system for remote sensing appls. 3 mm operation, aircraft/helicopter installation 87−15034
MM-wave radiometric imaging, contrast-reversal problems 86−38956
MM-wave radiometric imaging, sea ice meas./location appl. 86−38969
MM-wave technology and system appls., state-of-the-art review 86−1336
MM-wave two-dimensional horn imaging arrays; config. fabrication, performance and appls. 88−27682
moving surface temperature meas. using phosphor thermography 85−64318
moving-strip-illuminated semicond. panel microwave attenuation and reflectivity 88−22661
multichannel microwave radiometric image restoration 85−57476
multiprobe radiometry for breast exploration, data processing problems 88−54542
non-invasive physiological monitoring with microwaves 86−70409
noninvasive monitoring of physiological movements 86−65427
obstacle avoidance for helicopters, mm-wave solution 86−6032
oilspill estimation with radar and microwave radiometry 86−56271
passive MM-wave imaging for guidance 85−8946
perfectly conducting cylinders, polarisation effects in EM inverse scattering 87−75394
phase retrieval for microwave diagnostic techniques 85−46968
phase tomography for noninvasive meas. of volumetric loss distrib. 86−55823
phased array, hard limiting and other distortions at input 86−48705
phaseless microwave diagnostics, error reduction techniques 85−58860
phaseless microwave diagnostics, uniqueness problem and half plane imaging 85−58861
planar twin dipole microstrip antennas with FET detectors for MM-wave imaging appls. 88−27681
printed dipole millimeter wave antenna for imaging array applications 85−13362
projection imaging for internal struct. determ. 87−41598
quasi optical subsystem for a satellite radiometer 87−50561
radar, signal to receiver noise ratio, minimum resolvable contrast 85−52433
radar imaging, iterative algorithm for data extrapolation in multiple restricted regions 87−63033
RADARSAT programme in Canada for resource management, radar microwave imagery and remote sensing satellites 88−36651
Radarsat synthetic aperture radar system for remote sensing satellite 87−28681
radio camera: imaging with large aberrant arrays 88−4116
radiometer, high-resolution, using 2-reference-noise AGC and digital data smoothing *(Japanese)* 88−60891
radiometry for clinical applics., thermal pattern reconstruction 86−56119
radiometry for medical applics., state-of-the-art 86−56118
remote sensing 88−16944
remote sensing, appls. of microwaves 88−54733
remote sensing, digital processing techniques and multispectral classification 87−77899
remote sensing, passive and active, problematical aspects 86−56248
microwave imaging continued
remote sensing from space 85−59453
remote sensing techniques 88−61629
resolution and contrast of microwave images using a complete first-order iterative algorithm 87−41948
SAR, phase imaging by real-zero conversion 88−15514
SAR data processing, high speed, on NEDIPS data flow computer 87−28686
SAR spaceborne and Shuttle Imaging Radar-B (SIR-B) antennas, development 86−16059
satellite remote sensing, microwave imaging radiometer 88−29626
satellite remote sensing, microwave scanning radiometry and SAR technology, image processing developments *(Japanese)* 88−10512
scanning system for imaging superficial organs 86−25204
sea surface oil pollution monitoring by microwave radiometry 86−12203
short range imaging, appl. of multistatic radar principles 87−13771
sidelobe artifacts reduction and speckle 86−64077
SIR-B image calibration by a corner reflector array 88−74014
SIR-B imagery, radiometric calibration anal. 88−74017
snow buried object detection/recognition, 3D imaging X-band radar system using multi-freq. holography *(Japanese)* 88−35586
soft tissue thermoacoustic imaging with 2.45 GHz microwave applicator 87−3974
spacecraft on-board SAR processing technology for Earth observing system-type missions 88−25269
speckle reduction by CLEAN technique 87−28635
straight wire scatterer 88−4609
subcutaneous temperature measurement by microwave thermography 88−29990
submillimeter laser interferometry with pyroelectric image recording 85−8736
superconductor-insulator-superconductor mixers integrated with slot antennas, imaging array 87−33559
synthetic aperture imaging airborne radar 86−17509
synthetic aperture radiometry for the imaging of hot spots in tissue 88−29991
thermal asymmetry of varicocele, microwave radiometric detect. 86−11964
thermal imaging by radiometry 88−36468
thermal pattern recognition by correlation microwave thermography, biomedical appls. 85−15311
thermographic mapping for use during hyperthermia treatment 85−26753
thermographic signal generation, combined thermal and EM modelling 88−54543
thermographic technique for clinical applics. 86−56120
thermography, singular system analysis for temp. retrieval 88−23064
thermography, tissue thermal and EM modelling 86−56121
thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
thermometric imaging by microwave radiometry *(French)* 88−61313
thin surface film measurement, microwave remote sensing techniques 88−29628
time-domain microwave target imaging 86−5495
tomographic, image reconstruction of objects from multi-incidence microwave exploration 85−59248
tomographic and holographic imaging with microwaves and ultrasound, inverse methods 85−64586
tomographic diagnostics, phase imaging techniques 85−46971
tomography: algorithm for cylindrical geometries 87−57087
tomography, active, for dielec. props. of body determ., cylindrical system and image reconstruction 88−54544
tomography, imaging performance results 87−57131
tomography, iterative nonlinear reconstruction algorithm 86−65424
tomography, linear array arrangement 85−9171
traffic applications, movement recognition by echo signals *(German)* 86−70206
underground object imaging, resolution improvement and clutter reduction 86−49732
underground radar, polarisation diversity method for object imaging and pipe detection 85−52436
visualization of submillimeter laser radiation with a pyroelectrictelevision camera 86−17831
wideband microwave diffraction tomography under Born approximation 88−4921
X-SAR for Shuttle imaging rear freq. range extension 87−63052
GaAs Schottky diode detector cct. for large-scale vidicon appl. 88−25536

microwave-infrared double resonance *see microwave-optical double resonance*

microwave integrated circuits

MMIC device modelling using transfinite element method 88−71087
MMIC device technology for microwave signal processing systems 88−44360
MMIC dielec. resonator oscillators, push-pull freq. doubling for C-/K-bands, design and performance 88−19413
MMIC distrib. image rejection mixer using dual-gate FETs, design and characts. 87−32099
MMIC distributed amplifier, 2-30 GHz operation, low-noise FET design and characts. 85−55165
MMIC distributed amplifier for 2 to 18 GHz band with single supply bias network *(Japanese)* 87−59866
MMIC distributed amplifier using dual-gate GaAs FETs, 2-18 GHz, design and characts. 85−23121
MMIC distributed power amplifier, K/Ka-band, with capacitive drain coupling 88−63947
MMIC dual-gate FET distrib. power amplifier, 1-20 GHz design, modelling, fabrication and performance 88−19412
MMIC dual-gate FET mixer, 2-18 GHz, distrib. design and performance 87−59881
MMIC feedback FET amplifier, two-stage, 6-18 GHz, design and process sensitivity anal. 86−27597
MMIC FET freq. multiplier, broadband design using distrib. amplifier techniques 88−71074
MMIC FET oscillator, temp. stabilisation using Schottky diode as sensor 86−27576
MMIC fully integrated 0.5 W, 2 to 6 GHz amplifier 88−32454
MMIC hermetic packaging with high performance characts., design and construction 87−24449
MMIC high speed circuit testing using ultrafast optical techniques 88−38730
MMIC high-gain distrib. amplifier, 12 dB, design and charact. 87−32072
MMIC high-gain distributed amplifier using cascode active elements 87−6161
MMIC historical perspective 85−222
MMIC insertion using thick film processing, low cost assembly method 87−73731
MMIC ion implanted W-band monolithic balanced mixers for broadband applications 87−59891
MMIC Ka-band gain control amplifier, design, fabrication and characts. 86−41318
MMIC limiting amplifier design for microwave FM receiver systems 85−55168
MMIC lumped broadband matching networks with arbitrary nonuniform losses, computer-aided-synthesis 88−71080
MMIC manufacture, cost reduction 87−6124
MMIC MESFET variable attenuator, DC −50 GHz with 30 dB dynamic range, design and performance 88−71073
MMIC micro-coplanar-strip lines *(Japanese)* 87−73763
MMIC millimeter-wave monolithic passive circuit components using microstrip circuitry 85−40227
MMIC modules, distributed, for 20 GHz phase array fed antennas 87−39498
MMIC multiport chip carriers, design and characts. 86−35121
MMIC optically controlled phased-array technology for space communication systems 88−72698
MMIC package, construction and materials 86−52289
MMIC passive circuit elements 87−1729
MMIC passive elements, modelling using EM simulation tool 88−38733
MMIC phase shift transmit module, design for 20 GHz operation 85−55178
MMIC PIN diode transmit/receive switch 88−32468
MMIC power amplifier module, 6.5-16 GHz operation, design and characts. 86−27595
MMIC power amplifiers, stability and cct. modelling 88−63971
MMIC processes and compatibility between them 87−1728
MMIC receiver, 30 GHz, config. and characts. 87−32073
MMIC receiver, 30 GHz configs. for Ka-band satellite transponder appls. 88−71081
MMIC receiver front end design for high-volume production at low cost 86−67507
MMIC regenerative freq. divider, 5.3 GHz operation, implementation using standard bipolar technology 86−8457
MMIC role in future satellite communications 88−67329
MMIC single balanced mixer with integrated dipole receiving element for 30 GHz operation 86−27602
MMIC single-balanced mixer with integrated dipole receiving element, design for 30 GHz 86−20831
MMIC single-ended and push-pull amplifiers, 6 to 18 GHz, for high-gain modules 88−63949
MMIC SP3T, SP4T switches designed for 30-dB isolation from DC to 6 GHz 88−63940
MMIC SPDT switches, broadband type, design and characts. 87−59890
MMIC square spiral transformers, computer simulation and expt. study for CAD appls. 86−14532
MMIC square-spiral inductors, anal. and S-parameter meas. 86−47068
MMIC struct., 2D and 3D types, anal. using efficient iterative technique 88−25487
MMIC structures, interactive CAD package 87−10583
MMIC technology: better performance at affordable cost 88−44361
MMIC technology and appls. 87−11031
MMIC technology and design in West Germany, state-of-the-art overview 87−73767
MMIC technology for advanced space communications systems, NASA program 85−23145
MMIC technology for EW system design, developments 87−37560
MMIC technology for satellite communications 88−19390
MMIC test equipment limits 88−997
MMIC testing, two-tier S-parameter de-embedding technique with calibration 87−52853

microwave integrated circuits continued
MMIC testing using microwave wafer probe, planar calibration standards verification techniques 88−50383
MMIC transmission line loss calc., variational approach 87−75502
MMIC transmit/receive modules for phase array radar appls., technological developments 88−9641
MMIC travelling wave amplifiers, internal microwave propag. and distortion characts. study 87−17360
MMIC two-stage dual-gate distributed amplifiers, 2 to 26.5 GHz 87−6160
MMIC ultra-wideband amplifier, 2 GHz *(Japanese)* 86−58064
MMIC ultrawideband distributed amplifier, design 88−63936
MMIC VCO module, 7 GHz operation, design, fabrication and performance 88−71072
MMIC wideband low-noise IF amplifier, 8-18 GHz, design for W-band receiver appl. 85−61462
MMIC wideband phase shifter, 2-8 GHz, modelling, design aspects and expt. study 85−23124
MMIC X-band phase shifter, design, layout, fabrication and characts. 86−27598
MMIC-based T/R modules, optical control and interconnects using fibre optics 88−50375
MMIC/hybrid 3 W amplifier with low phase noise at X-band 87−6134
MMIC/hybrid MIC technology for phased arrays, review 88−38731
MMIC/MIC 8-channel phased array receivers operating in I/J band 87−47404
MMIC/MIC-to-waveguide transition for single- and dual-polarization systems 85−17798
MMICs, appl. in RF designs 87−11053
MMICs, Avantek MODAMP series for wideband RF amplifier design 88−44351
MMICs, biasing and matching using thick film processing 87−59901
MMICs, CAD based on physical device models 87−10585
MMICs, CAD models of lumped elements on GaAS up to 18 GHz 88−32437
MMICs, charact. method and design formulae for micro-coplanar strip lines 88−25470
MMICs, comprehensive CAD approach for design up to MM-wave freqs. 88−32431
MMICs, conf., New York, NY, USA (May 1988) 88−62897
MMICs, coupled microstrip lines, performance on interconnections laid on insulating andMIS substrates 86−27579
MMICs, development for broadband system appls. 88−50372
MMICs, developments and modules for array radars 87−63041
MMICs, HEMT device appls. 88−63923
MMICs, low cost designs for T/R modules in phased arrays 87−59856
MMICs, planar transmission lines with finite strip thickness and conductivity, anal. 88−63888
MMICs, slow-wave grating struct. for filters and resonators 87−73733
MMICs, symposium, St. Louis, MO, USA (June 1985) 86−26471
MMICs, use in instrumentation, impact, advantages and appls. *(Italian)* 88−50357
MMICs, WAFFLELINE high-density packaging technique 85−55163
MMICs and hybrid MICs, analogue cct. techniques and implementations *(German)* 87−45221
MMICs and MICs, coupling capacitance determ. of underpasses, air bridges and crossings 87−37537
MMICs and MICs, symbolic anal. for CAD appls., SYBILIN simulation program 86−14540
MMICs and MM-wave ICs, equiv. cct. modelling of losses/dispersion in planar guided-wave structs. 88−32436
MMICs for *Ka*-band multibeam satellite transponder 88−44375
MMICs for low cost design of MM-wave receiver 87−59886
MMICs for use in EW systems, performance, cost and reliability aspects 88−3799
MMICs in communications 86−1364
mobile and hand-held telephone equipment, microwave ICs and components, review 88−3874
modelling, Schwarz-Christoffel integral const. calcs. 88−63941
modules, hermetic sealing by laser welding 85−28062
modules for 12.14 GHz business satellite communications *(Japanese)* 86−58066
MOMBE offers high-volume MMIC production 88−996
monolithic, distributed electrical and thermal parameters 86−53041
monolithic, receiver systems design 86−62848
monolithic, spiral inductors, small size and high cut-off freq. characts. 85−1097
monolithic, trimming 88−44367
monolithic 2 to 20 GHz HEMT distributed amplifier 87−73720
monolithic ccts., conf., Las Vegas, NV, USA (June 1987) 87−58544
monolithic circuits, conf., San Francisco, CA, USA (May 1984) 85−36
monolithic detectors, integrated technology 87−74943
monolithic IC, conf., San Francisco, CA, USA (May 1984) 85−16545
monolithic MESFET ICs, technology and appls. 87−73704
monolithic MIC, interconnections, insulating substrates, MIS structs. 87−17392
monolithic MIC medium power amplifier, 3.7 to 4.2 GHz 86−20837
monolithic MIC VCO, computer modelling 85−34198
monolithic MICs, design and realisation 86−47073
monolithic millimetre-wave oscillator using a transmission line periodically loaded by QWITT diodes 88−50354
monolithic MM-wave antennas, design 85−13330
monolithic MM-wave IC for radio and radar systems *(German)* 88−25523
monolithic multi-stage 6-18 GHz feedback amplifier 85−1053
monolithic semiconductor antennas for millimetre wave Si and GaAs IC technologies 85−45779
monolithic subharmonic mixer design and optimisation 88−25538
monolithic technology, comparisons with other methods 86−58045
monolithic three-stage resistive-feedback amplifier for 2 to 8 GHz band 86−41323
monolithic voltage variable microwave phase shifter 85−55132
multibeam active phased array system configurations for communication satellites 88−22033
multibeam communications satellite, onboard transmitter and receiver 87−48989
multicarrier digital microwave system, high power amplifier linearisation 87−40719
multiconductor hybrid-mode transmission lines, strip characteristic impedance, reciprocity related definition 88−63836
multiconductor planar transmission-line structures forhigh-directivity coupler applications, anal 86−14474
microwave integrated circuits continued
multidimensional microstrip package design 88−38693
multidiode integrated protection circuit 85−11566
multifunction phase array radar, solid state operation 87−20611
multilayer chip capacitor selection 85−34211
multilayer multiconductor strip-like planar transmission line topologies for microwave 88−56976
multilayer planar transmission line structs., unified hybrid mode anal. 88−2662
multioctave double-balanced mixers design 87−37563
multistage distributed amp. with 40 dB gain, 2 to 18 GHz 87−45296
N-way MESFET redundant switch design 88−63931
NMOS 1.2 GHz single-chip NMOS PLL 86−14076
non-grounded T and II attenuators for MIC appls., bandwidth anal. 88−951
noncommensurate distributed filters design using image parameter approach 85−11573
nonlinear circuit simulation in the frequency-domain 86−28431
nonlinear frequency domain analysis 86−8498
nonlinear microwave CAD/anal. techniques, state-of-the-art and trends survey 88−32407
nonlinear microwave circuit analysis using diff. eqns. and harmonic balance method 88−71020
nonlinear MICs and MMICs, unified mathematical concept for freq.-domain CAD 86−14537
nonlinear transmission lines for monolithic IC, travelling wave characts. 85−57089
nonradiative dielectric circulator characterisation *(Japanese)* 88−25408
nonsymmetrical slotted line, theory and expt. 86−41275
octave bandwidth MESFET freq. doubler, 4-8 GHz input signals, design and characts. 85−45231
off-the-shelf GaAs ICs serve both military and commercial applications 88−977
OmniSys, C language-based CAE simulator for microwave system design 88−50345
on-wafer characterization of monolithic millimeter-wave integrated circuits by a picosecond optical electronic technique 88−71044
on-wafer meas. through 18 GHz, microwave wafer probing 85−58864
on-wafer monolithic MIC tests using ATE probe 86−53053
optical control of microwave devices, review 87−11056
optical electronic characterization of monolithic millimeter-wave integrated circuits 88−25535
optically controlled phased array antenna concepts using GaAs monolithic microwave integrated circuits 87−19330
optimisation techniques, for microwave CAD and modelling, state of the art review 88−31930
oscillator with dielectric resonator 85−11084
packages, co-firing technology 86−52288
packaging, colloquium, London, England (April 1986) 86−52147
packaging, development 86−7529
packaging, evolution for design and market challenges 86−7528
packaging, market growth and performance aspects 86−52286
packaging developments 87−36494
packaging schemes to meet GaAs MMIC requirements 87−24448
packaging structures for MICs, analysis by finite difference method 88−25554
parametric modelling techniques for CAD appls. 88−56934
passive components for microwave integrated circuit design 85−11820
passive components modelling, computer optimisation of circuits 87−10584
pattern forming matrices, construction principles 86−41316
PC filters and diplexers for MM-wave IC, design and performance 86−67486
PC stub tuner for microwave ICs 87−37555
periodically plasma-induced semicond. waveguide, Bragg refl. characts. of MM-waves, theoretical anal. 86−48635
phase shifter, solid state monolithic variable with operation into mm wave regime 86−58054
phase-coherent microwave multiple-signal generation using all-pass networks 86−67509
phased array antennas, optical RF distribution links, architectures 88−2854
phased array radar antennas using monolithic modules, new architectures 88−2885
phased array radar transmit/receive module using GaAs ICs 85−14354
phased array radars, miniature hybrid ICs vs. MMICs 87−49173
phased arrays using MIC technology 87−61532
photoconductive IC structures, microwave characts. anal. 87−46687
photoconductors to characterise picosecond response in GaAs ICs 87−26212
PIN diode design of millimeter frequency Bulk Window arrays and their usage in Ka band high power switches 88−56972
planar ccts., generalised spectral domain technique 87−73798
planar circuit approach to MIC design and anal., waveguide models and segmentation method 86−8463
planar circuits, arbitrarily-shaped, anal. using time-domain approach 86−8448
planar circuits, artwork generation and mask production 85−6542
planar directional couplers appl. *(German)* 85−34146
planar integrated microwave components for terrestrial/satellite appls., filter and diplexer design 86−14517
planar integrated optoelectronic antennas, transient response 87−54687
planar log-periodic mixtenna for millimeter and submillimeter wavelengths 87−7612
planar MIC lines, quasi-static modes propag. anal. in anisotropic transmission lines 86−10139
planar MM-wave IC with coplanar waveguide section, adjustable tuners 87−24447
planar MMIC hybrid cct., 26 GHz band 86−67495
planar MMIC hybrid circuit and frequency converter 86−67513
planar structures on biaxial substrates and layered media, dispersion characts., microstrip and finline appls. 88−32372
planar subharmonically-pumped 71 GHz receiver with integral feed antenna 86−43088
planar switching matrix for microwave ICs 85−23140
planar transmission line structs. on anisotropic substrates, spectral-domain anal. 87−73734
planar-mixer diodes, analytical model for MM-waves 85−28709
PlanarPak, new surface-mounted package breaks from traditional MIC packaging 85−1038
plane linear dipole, wave impedance 86−35107
plug-in 11-GHz LNA module with ground plane tuner 87−6130
power distributed amplifier using constant-R networks 87−6159
power distributed amplifier using constant-Rnetworks 86−67500

microwave integrated circuits continued
power dividers in microwave volume integrated circuits 88−63868
power dividers using coupled microstrip-slot lines and double-sided technique 86−20811
power MMICs, for C-/X-/Ku-bands, design and performance characts. 88−19411
precious metal coatings for microwave integrated circuits 88−63917
printed-element triplexer design 86−27762
probe for on-wafer meas. 87−49906
process HE: a highly advanced trench isolated bipolar technology for analogue and digital applications 88−64749
push-pull broadband dielec. resonator oscillator, 20-40 GHz, design and characts 86−27584
QPSK GHz-band monolithic modem ICs, bipolar process technology 88−25062
QPSK MIC exciter and modulator, microstrip implementation for 60 GHz operation 85−17870
QPSK MIC modulator and exciter, 60 GHz design for high data rates 85−23119
QPSK modulator, 4 GHz, for high bit rates 86−35084
quartz image guides for millimeter wave integrated circuits 85−17882
quartz SAW/MIC integrated downconvertor 87−67677
quasi-lumped-element 3- and 4-port networks for MIC/MMIC appls., design and anal. 85−17812
quasi-MMICs, monolithically defined passive elements/bonded active elements, design and performance 87−986
quasi-optical HEMT self-oscillating mixer 88−71128
quasi-optical integrated antenna and receiver front end, MIC implementation and performance 88−25486
radar development trends (1987-2000) 88−28939
radar mMIC T/R modules for the next generation airborne surveillance platforms (U) 87−13786
radar sensor, 35 GHz 88−22200
radar systems, phased arrays, book contrib. 87−76859
radio local distribution systems for high-speed andbroadband communications 86−10653
reactive magnetron ion etching for high definition 88−13170
refractory self-aligned gate process for monolithically combined microwave and digital GaAs ICs *(Japanese)* 87−73760
reliability aspects, operating performance at elevated temps. 88−32443
reproducible production oriented amp., 2-18 GHz 87−45297
resonance loss in microwave ferrite circulators 88−50395
resonant frequencies of whispering-gallery dielectric resonator modes 88−12564
RF and microwave circuit design, network synthesis CAD program 87−66550
RF microstrip test fixture for microwave semicond. devices 88−7057
RF subsystem design for microwave communication receivers 88−21959
ring type, with series-connected arms, design 87−45467
rugged MM wave doubler using series varactor config., design 88−71100
S-band integrated T/R modules with GaAs MMICs, design for phased array radar appls. 85−63757
satellite broadcast receiver for 12 GHz, outdoor convertor unit design using hybrid MIC modules 86−55249
satellite communications, MIC linearisers 86−69706
satellite earth station, predistortion linearisation 88−47014
scanning microwave probe, radiating and nonradiating open struct., mode anal. 87−49907
scattering parameters meas., fixture-network analyser characterisation 85−26469
Schottky diode MM wave monolithic imaging arrays with bow-tie antennas 86−16048
Schottky diode pair harmonic mixer, antiparallel config., design and microwave characts. *(German)* 85−45232
screened cylindrical slotted line for mm-band IC, expt. 86−47055
semiconductor materials and devices for advanced microwave appls. 85−6541
semicustom ICs' ratings and architectures aid analog- and digital-circuit designers 88−1698
shaped beam satellite array antennas for DBS, European area coverage 86−29645
SHF constant-resistance ASK modulator, config. using double-sided MIC 87−73687
SHF converter, low noise integrated, satellite TV broadcasting appl. 86−67446
SHF four-stage limiting amplifier based on GaAs MMIC chip, 2-6 GHz, design and characts. 88−979
SHF lossless two-port combiner using travelling-wave amplifiers and hybrid microstrip technology 87−6138
SHF low-noise amplifier, 12 GHz, thick film microstrip config., satellite receiver appls. 87−17386
SHF receiver front-end, 20 GHz low noise design using MIC functional modules 87−3044
shielded microwave integrated structures, analysis based on orthogonalising substitution method 87−11032
Si-monolithic microwave prescalar IC 85−1049
simulation and design, using partial domains method 87−45466
single layer ceramic capacitors interconnected to microwave ICs 86−14530
single MESFET down-converter for TVRO application 88−71098
single-layer ceramic chip capacitors interconnected to MICs, characts. and bonding 86−41336
single-sideband modulator using 3 D SHF ICs 86−58059
SIS mixers, integrated tuning elements 88−25565
slot line resonators, spectral domain anal. 85−17817
slot-coupled directional couplers on double-sided substrate MIC *(Japanese)* 88−56875
slotted-waveguide filters using cut-off wavelengths for microwave hybrid integrated circuits 87−11018
slow-wave coplanar waveguide for MMICs, high-speed pulse transmission study 87−66532
slow-wave Schottky contact printed lines, finite element anal., MMIC appls. 87−17365
small-signal multistage FET amplifiers, CAD *(Chinese)* 87−66560
soft substrate laminates for RF/microwave cct. appls., thermal characts. study 85−61464

GaAs MMIC phase shifters for phased array radar 88−32471
GaAs MMIC phase shifts for electronically scanned antennae 88−32467
GaAs MMIC phased array signal distribution system using fibre optics 86−58072
GaAs MMIC power FET amplifiers, Ka-band, design and performance 87−59893
GaAs MMIC power FET amplifiers at K-band 88−32453
GaAs MMIC power amplifier, 2-20 GHz, design, fabrication and performance 87−59879
GaAs MMIC power amplifiers, CAD and cct. simulation techniques 85−44914
GaAs MMIC process, microwave prober for yield validation 88−19376
GaAs MMIC, producibility 87−993
GaAs MMIC production, reproducible high yield technology 87−32063
GaAs MMIC push-pull power amplifier, X-band, 4.5 W, design and characts. 86−35115
GaAs MMIC reliability anal., microwave systems impact 88−7054
GaAs MMIC reliability and packaging 88−7058
GaAs MMIC research and development 88−12610
GaAs MMIC satellite down convertor, low-noise design for 6/4 GHz band 87−62922
GaAs MMIC satellite downconverter, 6/4 GHz band, low-noise design 87−76693
GaAs, MMIC, self-aligned planar MESFET technology 88−19401
GaAs MMIC signal meas., noncontact electro-optic sampling technique 85−55135
GaAs MMIC slotline/CPW quadrature IF upconverter 88−63954
GaAs MMIC surface-mount package 87−6086
GaAs MMIC switches, SPST and SPDT types, high-speed wideband design 86−53046
GaAs MMIC switches, driving technique 88−63939
GaAs MMIC system and subsystem appls., special design considerations 86−20845
GaAs MMIC tapered distrib. FET amplifier in hermetic surface mount package, 1-10 GHz design 86−35120
GaAs MMIC technologies 88−56948
GaAs MMIC technologies at microwave freqs. 88−25567
GaAs MMIC technology, 1 GHz RF modules 88−25511
GaAs MMIC, technology and design considerations 85−17823
GaAs MMIC technology, book contrib. 87−45275
GaAs MMIC technology, developments for space communications systems 87−11036
GaAs MMIC testing 88−38745
GaAs MMIC testing, electrooptic sampling meas. with polarised light 88−993
GaAs MMIC transistor amplifiers, generic specification 88−44368
GaAs MMIC transmit and receive modules for phase array antennas, 30/20 GHz satellite system appl. 85−55176
GaAs MMIC transmit/receive radar module for X-band phased array appls. 88−9643
GaAs MMIC using low-noise MESFET by dummy-gate self-alignment technology 88−19402
GaAs MMIC varactor tuned FET oscillators, X- and Ku-band, modelling and optimised design 88−71070
GaAs MMIC wafers, laser chip separation method 88−63968
GaAs MMIC wideband amplifiers for up to 3 GHz *(Japanese)* 87−73342
GaAs MMIC wideband phase-shifter 85−17828
GaAs MMIC wideband receiver module, design and performance 87−59894
GaAs MMIC wideband variable gain amplifiers 88−63973
GaAs MMIC yield evaluation 88−32462
GaAs MMIC-based RF front-end for DBTV receiver *(Italian)* 86−59989
GaAs MMICS, use of lumped element techniques for yield improvement and size/cost reduction 88−19372
GaAs MMICs, ATE system for 'on-wafer' evaluation of microwave and DC characts. 85−10478
GaAs MMICs, FET modelling technique for yield forecasting from processing data 87−73696
GaAs MMICs, MESFET technology, R&D and appl. 85−40236
GaAs MMICs, Manufacturing Technology for Solid-State Microwave Systems programme, progress report 88−50374
GaAs MMICs, VCO, freq. divider, power splitter for X-band PLL-stabilised local source 86−58051
GaAs MMICs, active and passive phase shifters design 85−23077
GaAs MMICs, alloy attachment, expt. study and processing parameters development 88−25481
GaAs MMICs, alloy attachment process, via fracturing eval. 88−25457
GaAs MMICs, amplifiers and phase shifter, L-band radar transceiver appl. 86−35116
GaAs MMICs and bias networks, ionizing radiation transients, circuit response 87−37568
GaAs MMICs, appls. in receiver, amplifier and switch products 87−59862
GaAs MMICs, automated alloy attachment process, reliability eval. 87−59900
GaAs MMICs, automated alloy attachment, solder materials and process study 87−73730
GaAs MMICs, commercial appls. 88−63967
GaAs MMICs, design and realisation using Tektronix's CAD system *(French)* 88−44373
GaAs MMICs, development 85−1021
GaAs MMICs, development review and technological forecast 85−50038
GaAs MMICs, developments and appls. 87−37541
GaAs MMICs, devices for UHF and 14 GHz bands, design and characts. *(Japanese)* 87−11051
GaAs MMICs, fabrication and design, book contrib. 86−8470
GaAs MMICs for MM-wave IC radars 88−19379
GaAs MMICs for communication 86−27620

microwave integrated circuits continued
GaAs MMICs for digital RF memory analogue subsystems, design and characts. 88−25453
GaAs MMICs for digital RF memory subsystems, design and performance 88−25477
GaAs MMICs for digital RF memory subsystems 87−59884
GaAs MMICs for high frequency active devices 88−7060
GaAs MMICs for microwave links 86−58046
GaAs MMICs for military appls., applicability, availability and affordability 87−59855
GaAs MMICs for military systems, appls., economic viability and availability aspects 87−32097
GaAs MMICs, future appls. 88−25566
GaAs MMICs, high performance 0.5 μm manufacturing process, yield considerations 87−73697
GaAs MMICs, high-performance 20-GHz package, design 88−38739
GaAs MMICs, low-cost packaging/testing procedure for manufacturing 87−73732
GaAs MMICs, manufacturing disciplines 86−47088
GaAs MMICs, manufacturing trends and issues, review 85−55171
GaAs MMICs, microstrip transmission lines charactn. and modelling 88−56921
GaAs MMICs, monolithic integration compatible p-i-n diodes, design and fabrication 85−40235
GaAs MMICs, new devices from Plessey 87−11052
GaAs MMICs, nonlinear modelling for cct. simulation and CAD, review 87−59892
GaAs MMICs, overview, past, present and future 87−66571
GaAs MMICs perform in phase shifters 85−1022
GaAs MMICs, procurement trends assessment 85−61466
GaAs MMICs, production automation 86−27619
GaAs MMICs, production forecasts and market considerations 88−25507
GaAs MMICs, reactive ion etching of via holes 85−18260
GaAs MMICs, slow-wave crosstie coplanar waveguides, theory and expt. *(Japanese)* 85−55159
GaAs MMICs, technological aspects and R&D efforts 85−28730
GaAs MMICs, technology and appls. *(Japanese)* 86−1367
GaAs MMICs, technology and design 87−52827
GaAs MMICs using MESFET technology, on-chip tunability techniques 87−52840
GaAs MMICs using airbridge micron, submicron gate FET technique, technology and appls. 86−27599
GaAs MMICs using planar transformer coupling 85−61471
GaAs MMICs, via hole fabrication using reactive ion etching 86−2238
GaAs MMICs with low-wave crosstie coplanar waveguides, theoretical and expt. study 87−52825
GaAs MMICs: current status & future trends 86−47087
GaAs MMICs−getting those system insertions 88−19397
GaAs PIN diode limiter, broadband MBE config., design and performance 87−59883
GaAs S-band MMIC FET mixer 85−34199
GaAs S-band monolithic linear dual phase modulator 88−32457
GaAs SHF frequency dividers with advanced SAINT FETs 86−67511
GaAs SPDT and DPDT high speed MMIC switches, design 85−23146
GaAs Schottky diode detector cct. for large-scale vidicon appl. 88−25536
GaAs Schottky-barrier varactor diode MIC freq. doubler for G-band, design and characts. 87−11070
GaAs Sharp UHF broadband monolithic amplifiers *(Japanese)* 88−50386
GaAs TX/RX module for S-band phased array radars, 2 W 88−15584
GaAs V-band monolithic FET transmit-receive switch cct. 88−63966
GaAs *V*-band monolithic IMPATT VCO 88−71092
GaAs *V*-band monolithic power MESFET amplifiers ; design, fabrication and characts. 88−71062
GaAs W-band monolithic crossbar mixer 85−17836
GaAs X-band FET transmit-receive switch 87−59868
GaAs X-band MMIC amplifier, measured elec. package performance 87−52868
GaAs X-band MMIC manufacturing process 88−32415
GaAs X-band and Ka-band monolithic PIN diode variable attenuation limiters 88−63874
GaAs X-band monolithic power amplifiers *(Chinese)* 87−66558
GaAs X-band two-stage MMIC amplifier gamma-ray total dose effects 87−59874
GaAs X-band varactor tuned monolithic FET oscillators 88−50367
GaAs analog ICs, CAD and modelling 87−32065
GaAs analog MMICs, refractory-metal gate self-align process 86−53782
GaAs analog MMICs, self-align technology 86−62828
GaAs analogue MMICs, CAD techniques *(German)* 87−45260
GaAs analogue MMICs, ideal-profile implantation process 87−32721
GaAs application specific MMIC techniques design, development, fabrication RF missile seeker components appl. 88−63918
GaAs broadband monolithic switches, SPDT and DPDT types, design and characts. 87−53695
GaAs, bumpy road to market 88−44358
GaAs circuit CAD *(Italian)* 87−32190

millimetric non-reciprocal coupled-slot fin-linecomponents, isolator and circulator behaviour study 86−14476
millimetric nonreciprocal coupled-slot finlinecomponents, isolators and four-port circulator design 86−62813
miniaturized mode type isolators employing resistive resonator terminations 88−32395
MM wave finline resonance isolators, 18-26 GHz, design using hexagonal ferrites 85−34156
MM-wave distributed isolator using nonreciprocal coupling struct. 85−1003
MM-wave ferrite device technology, recent advances 86−53900
MM-wave ferrite isolator on dielectric surface waveguide 88−956
MM-wave semiconductor isolators, modified spectral domain anal. 85−23126
mode convertor using phased-matched planar dielec. waveguide with artificial anisotropic struct. 85−34128
nonreciprocal ferrite devices, circulators and isolators, struct. and characts. *(Polish)* 85−999
planar microwave structs. on magnetised ferrite substrate, anal. 87−6012
precision transfer attenuator for microwave attenuation standard *(Japanese)* 88−12561
QPSK X-band waveguide modulator 88−50329
receiver with isolator input noise parameter study 86−47059
reflective nonreciprocal attenuator based on adielectric-semiconductor structure 86−47076
slab isolator in millimetre wave freq., charactn. 88−50310
submillimetre, nonreciprocal attenuators employing magnetoplasma reflection min. effect 85−55121
SW part of MM band isolator for dielectric strip waveguides 87−66499
waveguide technology in transmitter combining 86−53009
wideband K-band Faraday rotational isolator 85−28702
X-band isolators in finline technique 87−6063
Li-ferrite thick-film ferrimagnetic pastes, prep. and characterisation 85−50122

microwave landing systems *see aerospace instrumentation; aircraft instrumentation; ground support systems*

microwave limiters
bipolar limiting amplifiers, 1 GHz band, using parallel feedback technique 87−59870
diode, numeric modelling 87−66484
diode behaviour within working freq. band and outside band 88−71032
Ka-band high-power receiver, passive protection for high reliability 88−25428
nonlinear microwave signal-processing devices using thinferrimagnetic films 86−22020
picosecond optoelectronics for microwave applications 85−62464
quasiactive limiters for L-band receiver protection 88−53139

microwave limiters continued
radar, active high power limiter at MM wavelengths *(French)* 85−58214
S-band coaxial high power semiconductor diode limiter anal. 88−50328
solid-state microwave limiters, problems and solutions, review 87−17311
statistical analysis of amplitude control devices *(Russian)* 85−1017
wide-band limiting amplifiers with low second harmonicdistortion, utilizing GaAs MMIC limiters 86−8489
GaAs PIN diode limiter, broadband MBE config., design and performance 87−59883
GaAs X-band and Ka-band monolithic PIN diode variable attenuation limiters 88−63874

microwave links
1.5 GHz earth-space links, ionospheric scintillation meas. 85−57040
1 kW solid-state amp. for meteor-burst communications 88−7056
2 GHz digital microwave link radio network for electricity supply industry, Belgium *(French)* 88−35372
2 megabit data modem 87−2980
2/12 GHz-band PCM-PSK medium capacity multiplex radio relay equipment, review *(Japanese)* 87−62831
3-11.7 GHz, principles and techniques *(French)* 85−30868
4.5 GHz digital troposcatter link, dispersion and system performance meas. 85−24850
4/6 GHz links, frequency coordination and automatic power control systems 87−40728
4GHz 2-channel fading simulator 86−22692
5 GHz sea reflection multipath propag. 85−24849
6.2 GHz channel simulator, realisation in microstrip technique 88−59989
6.7 GHz line-of-sight path, anomalous propagation conditions 85−41635
6 GHz 140 Mb/s digital radio system, Peru propagation tests 88−46892
6 GHz 140 Mbps digital radio system with 256-SSQAM modulation 88−46888
6 GHz 90 Mb/s digital radio perform. on long highly dispersive fading path 85−20049
6 GHz SSB multichannel radio equipment, development *(Japanese)* 86−10956
6/4 GHz band small capacity satellite communications using demand assignment technique 88−46989
8 GHz all-FET microwave repeater, design 85−14128
10 GHz multirelay link rain attenuation outage time calcs. 87−26758
10 GHz satellite earth paths, influence of atmosphere on radiopropagation 85−62785
10 km 11 GHz digital radio link, expt. results *(Italian)* 88−46882
10 to 20 GHz satellite communications, rain attenuation calcs. 88−20903
10 to 30 GHz range, propagation factors 86−30624
10 to 40 GHz earth-space satellite link propag characts. 86−59817
11.6 GHz downlink, annual and worst month statistics for attenuation, depolarisation and rain rate 85−19143
11.6 GHz Sirio satellite-Earth link, rain attenuation successive fade durations, statistical anal. 86−54290
11 GHz band digital microwave radios, carrier generation 88−53153
11 GHz high capacity digital radio system, experimental results *(Italian)* 85−36924
11 GHz SS entrance link, design 87−28401
12 GHz satellite-to-ground RF attenuation meas. 86−59063
12 GHz tropical region links, radiometric meas. 86−29401
12 GHz/350 GHz radiometer rain attenuation prediction 86−64000
13 GHz digital radio system for urban area 88−15339
13 GHz Earth-space paths, fade rate distributions 87−26759
14.3 GHz rain scatter expts. 86−63997
14/11 GHz path depolarisation and rain attenuation, system implications, impairments prediction 86−59819
14/11 GHz path depolarisation and rain attenuation, system implications, impairments reduction 86−59820
16 QAM, reduced bandwidth, power and bandwidth efficient modulation technique for digital microwave radio systems 86−22888
16 QAM 140 Mb/s digital radio field expt. 85−19134
16 QAM 140 Mb/s high capacity digital radio system field tests 86−30634
16 QAM signal transmission over single mode fibre 88−4019
16 QAM system, 100 Mbit/s, design and performance of adaptive IF equaliser 86−3743
16-QAM 90-Mb/s digital radio, adaptive transversal equalisation of multipath propagation 85−14114
16-QAM PCM digital microwave system, encoding, modulation and demultiplexer channel error distrib. study *(German)* 86−23662
18 and 23 GHz short haul services 86−55185
18 GHz 280 Mb/s radio relay expt., perform. characts. 85−20046
18 GHz band digital, propagation effects 85−25749
18 GHz band high capacity digital radio system family 88−46886
18 GHz digital microwave radio system, bypass net design 88−15332
18 GHz propagation and rain intensity expt. study 88−67242
18 GHz wideband, LOS multipath experiment 86−30644
19 GHz radio system for Rathlin Island 87−55978
20 G-D 2 20 GHz digital radio system *(Japanese)* 85−3347
20 G-D 2 system operating at 20 GHz, transmitter/receiver design and performance *(Japanese)* 85−3348
20 G-D 2 transmission system, reliability study on MICs *(Japanese)* 85−1033
20 GHz band analogue radio subscriber line equipment, design *(Japanese)* 86−10957
20 GHz band digital radio equipment, development *(Japanese)* 86−10955
20 GHz band propagation through rain, characts. estimation 85−25740
20 GHz digital radio-relay system with doubled repeater spacing 85−14116
20/30 GHz earth station for the German DFS Kopernikus 87−40862
20/30 GHz receive-only dual-polarization earth stations 87−40863
20/30 GHz satellite communication bands 85−8354
20G-D2 20 GHz digital radio system, development 85−25738
20G-D2 digital radio-relay system, transmitter/receiver design and performance 85−25739
20G-D2 transmission systems, microwave integrated circuits reliability study 85−25741
21 GHz wideband fiber optic link , 1 km system config. and performance 88−73953
22 GHz band Earth-space path in rainy weather, atmospheric gases and rain attenuation characts. *(Japanese)* 87−26779
22 GHz Earth-space path, attenuation in rain 88−28775
23 GHz radio design 87−13584
23 GHz radio equipments DTS 10-64 and FTD 23 87−34370
23-GHz technology for TV/FM station 88−15331
24 GHz transmit-receive system, phase locking of Gunn diodes 86−64873

microwave links continued
26 GHz band broadband transmission radio systems for subscribers 88−3849

digital radio links for ISDN 87−76031
digital radio links for network appls., principles and measurements, review 87−28385
digital radio links with nonlinear transmit amplifiers, performance anal. 87−48904
digital radio noise and interference meas. system, HP 3708S 88−35801
digital radio noise and interference test set, HP 3708A, analogue power meter 88−35799
digital radio noise and interference test set, HP 3708A, noise generator and reference source 88−35800
digital radio noise and interference test set, HP 3708A 88−35798
digital radio outage time, multipath fading, prediction methods comparison 88−53158
digital radio propagation expts. at 6 GHz, multipath fading 85−19131
digital radio propagation test long term and nonminimum phase 88−3835
digital radio relay system for 19 GHz band high capacity routes 85−57980
digital radio relay systems, current status in NTT, 5 GHz 200 Mb/s 16 QAM system 85−20039
digital radio relay systems, management overview 88−53115
digital radio relay systems, propagation impairments 88−52202
digital radio relay systems in the '80 to '90 88−53154
digital radio relay systems performance 86−55181
digital radio system, 13 GHz, for urban areas 88−35380
digital radio system, 6 GHz, multipath dispersion of cross polarisation interference 85−19133
digital radio system, Launceston-Melbourne 140/68 Mbit/s link 88−53150
digital radio system performances, approx. prediction procedure for BER and outage probability 86−30615
digital radio systems, design of microwave local oscillators 88−28658
digital radio systems, outage prediction for route design 85−20008
digital radio systems using multi-level modulation, multipath degradation, unified anal. *(Japanese)* 85−14106
digital radio testing, out-of-service meas. 88−73787
digital radio testing and constellation patternanalysis 86−69598
digital radio with hitless switching, frequency diversity protection 86−30633
digital radio-relay links, network density limits 88−41527
digital radio-relay systems, bit error performance and availability, propag. and transmission quality *(German)* 86−10953
digital satellite links, unavailability caused by rain attenuation, estimation method *(Japanese)* 88−67323
digital simulation 88−67237
digital subscriber radio system, 26SS-D1, 26 GHz, for high speed digital transmission 86−23689
digital subscriber radio system in 26 GHz band 85−20031
digital system, 400 Mbit/s 256 QAM, performance 87−28395
digital system error rate for multipath propagation 86−17234
digital systems, 16-QAM and 64 QAM, field test results, comparison with sweep meas. 87−28396
digital systems, joint adaptation of equaliser tap-weights and sampling phase 87−40725
digital telephone service for Indian reservation 86−37338
Digital Termination Systems, two-way point-to-multipoint microwave radio business data facility 86−17224
digital transmission capacity expansion 86−43730
diode laser and photodetector packages for microwave optical transmission 88−24570
direct line-of-sight radio links, 20 to 50 GHz, atmospheric and precipitation effects *(Croatian)* 88−35377
direct microwave demodulation for data radio links *(French)* 85−57953
distribution system, automation, communication technology 88−30347
diurnal fading distributions on LOS microwave links 85−7650
diversity improvement prediction 88−53157
Dominica rural communications, development 88−59470
Doppler effects for semi-active air-to-air missile seekers 86−69832
double and triple diversity microwave systems, anal. 88−53160
double polarised microwave communication system, theoretical prediction of operational characteristics 85−42426
DR 6-30-135 digital radio system, design and appl. 85−42464
DRDIV computer program for engineering dig. microwave radio routes 87−40731
DRF 13/03-06 dig. microwave radio relay system 86−43725
DRF 13/03-06 microwave digital radio system, characts. *(Hungarian)* 85−14115
DRS-8 long haul digital microwave radio system, surveillance and maintenance 85−57973
DS3 rate customer controllable broadcast TV multipoint network 88−47311
DTS 10-64 23 GHz digital transmission system, design 87−34416
dual 17 GHz command receiver for direct broadcast satellites 87−13646
duct propag. over sea 86−22696
Duncan Mountain project, microwave and radio communications facility powered by hybrid power generation system 87−30469
dust storm modelling for the calculation of attenuation and probability of fading in microwave systems 87−75441
dust storms, attenuation at 2 and 7.5 GHz, obs. 87−28390
dust storms effect on propagation, realistic anal. 85−19145
dynamic aspects of cm and mm wave propagation and impact on satellite communications 87−39392
E-plane integrated 60 GHz RF subsystem for low cost communications 88−53168
E-plane integrated MM-wave 29 GHz transceiver, design 85−14126
Earth-satellite microwave links, cross-polarisation and attenuation due to dust storms 85−19135
Earth-space link, 11.6 GHz, correlation between fluctuation events, radiometry and spectral anal. 85−7652
Earth-space links, tropospheric amplitude scintillations, probability density fn. 85−57017
Earth-space path, worst month statistics of attenuation and cross-polarisation discrimination 85−41603
earth-space radio links, 10 to 30 GHz, reln. of rain-induced cross-polarisation discrimination to attenuation 85−2555
Egypt, multipath effects of line of sight microwave links 85−20053
Egypt microwave links, multipath fading anal. 86−69601
Egyptian Delta, statistical anal. of multipath fading 85−20052
EHF band utilization for military satellite communications 87−40860
EHF communication systems, jamming presence performance 85−30914
EHF radiometer integrated with freq. hopped communication receiver for propag. loss meas. 85−20028
EHF satellite communications for commercial and military appls. 86−4613

microwave links continued
elementary phase spatial microwave signals, parameters estimation *(Russian)* 88−21198
emergency restoration units for microwave repeater site equipment 87−48913
energy transmission channel, transmit and receive antenna design 87−68850
Ericsson 18 GHz microwave equipment solves New Vector's transmission woes 87−13589
European microwave communications scene 88−21947
European propagation experiment with Olympus satellite, Spanish participation *(Spanish)* 86−3524
externally mounted radio equipment, temp. range specification of system gain 85−47407
extinction properties of visible-, IR- andmm radiation (94 GHz) 87−2307
fading, geographical distrib. prediction from ground based climatological meas. 87−28397
fading, near-to-ground troposphere variations *(Hungarian)* 88−8466
Falkland Islands Trunk System 87−7916
Faraday loss for L-band radar and communication systems 85−57058
fast switching microwave synthesizers for digital communication systems 88−50387

FDM-FM 6 GHz radio relay system for Pakistan Telegraph and Telephone Department 87−40713
Federal Aviation Administration radiocommunication link tester 88−46850
FETs, charcts. and appls. *(Hungarian)* 86−20815
FH system, fast frequency synthesizer development 88−53152
fiber optic link for space communication application 87−20528
fiber-optic transmission of microwave 8 phase-PSK signal 88−28884
fibre optic components for microwave systems, technology and market forecast, 1984-94 86−4660
fibre optic digital microwave system in the South African Post Office 87−8169
fibre optic link, transmitter and receiver design 85−14234
fibre optic links, transmitter and receiver components, S/N limitations 86−37903
fibre optic links appls. in phased-array antenna systems 88−4047
fibre optic links architectures, system level analysis 88−41676
fibre optic links for avionics appls. 87−49081
fibre optic links for microwave signal transmission 87−49084
fibre optic links for phased arrays 88−72699
fibre optic system with photonic conversion, design 88−73934
fibre optic transmission of microwave 8-phase-PSK and 16-ary QAM signals at 1.3 μm 88−35498
fibre-optic and radio-relay links use in local digital networks 88−14950
fibre-optic links, 2-18 GHz, 0.83 and 1.3 μm systems using directly modulated laser sources 88−73952
fibre-optic links for microwave signal transmission, charcts. 88−28885
fixed and mobile satellite Earth stations, 30/20 GHz 87−20440
fixed radio services, technology impact 88−35381
fixed-based RF and microwave radiation biological hazards 86−18381
flexible rural systems [telecommunications], telecommunications 88−60202
FM channel, time domain measure., dispersive model parameters estimation 88−46889
FM microwave link, use for black-and-white cameras 87−76554
FM microwave system for data and FDM signals simultaneous transmission 87−27733
FM microwave trunk, transmission charcts. 88−53156
FM radio systems, multiple diversity 86−55179
FM receiver systems, MMIC limiting amplifier design 85−55168
FM-CW weather surveillance radar expts. on ESA Olympus satellite 88−15626
four-state phase modulator for an X band digital radiolink *(Polish)* 88−25517
France subscriber plant, millimeter waves introduction *(French)* 85−52266
France Telecom's national microwave network 88−73800
frequency allocation and planning of microwave radio relay systems *(Spanish)* 86−4485
frequency and duration of dispersive fades at 6 GHz 88−2573
frequency demodulator for digital radio 88−53155
frequency estimation, comparison of methods 87−55215
frequency planning considerations 86−17221
frequency-diversity improvement in $n/1$ high-capacity digital microwave radio 88−35339
FSK transmitter, design using 13 GHz FET oscillator with dielec. resonator 88−56985
geostationary satellites, optical technologies appl. 85−14154
gigabit QPSK modulator 87−75702
global hop length analysis, MM wave radio links in rain climatic zones 88−9409
GLONASS navigation satellite, comparison with NAVSTAR GPS 88−67330
ground-based tropospheric ducts, terrain obstacles effect 86−68768
GTT-80/KTT-80 radio relay system, protection switching equipment development 85−47425
HF laser package for microwave optical communications 87−49090
high bit rate systems, reliability improvement *(Chinese)* 86−17207
high capacity digital radio relay systems for the 18 GHz band using 16 QAM and cochannel operation 88−28684
high capacity digital radio systems, propag. protection techniques 85−20043
high capacity microwave digital radio systems, power efficient high level modulation 87−40718
high-capacity 60 GHz microcellular mobile radio systems 87−13620
high-capacity digital radio systems, model for carrier recovery, timing recovery and adaptive equalisation 85−57934
high-speed short- and microwave PCM transmission efficiency index *(Russian)* 87−40663
historical development of microwave radio communication 85−238
historical prospective 88−41532
history, developments and equipment 87−76575
horizontal space diversity, measured performance 86−55191
HTN-6u 140 Mb/s microwave digital radio system, transceiver and 16-QAM modem 85−42461
hybrid IC technology, microwave telecom. appls. *(Italian)* 88−25730
hybrid microwave radio relay system at 2 GHz 87−76559
hydrometeor charcts. meas. using FM-CW radar remote sensing 88−54746
hydrometeor cross-polarisation, adaptive cancellation, appl. of propag. theory 88−52211
I-band multipath propagation over the sea surface 88−52223
IF amplifier for transceiver 87−3053
IF cross-pol canceller for microwave radio systems 87−48902
impedance matched fibre optic transceivers for microwave signal transmission 87−49089
integrated front end designed for multichannel EHF radios 87−69888
integrated microwave radio for rural communications, point-to-multipoint subscriber system 88−60005
integrated office last-mile problem, 23 GHz radio solution 85−8018
intercity transmission alternatives, parametric cost analysis 86−55271
interference, time and frequency fluctuations due to terrain scatter 87−40723
interference level estimation of multi-reflected waves inbuilt-up areas 86−68778
interference levels determ. from distant transmitters at VHF and microwave frequencies 85−2605
intermodulation products from mixer 86−4473
interurban telecommunication network of Hungarian PTT, microwave link *(Hungarian)* 86−23686
ionospheric scintillation for microwave satellite links *(Russian)* 88−20907
IR and MM wave propagation in arid climate, expt. studies 87−54583
irregular transmission lines, theory and microwave appls. 87−2328
IRT 1500 integrated telephony system based on 1.5 GHz TDMA radio system, rural telephony and urban data appls. 85−19704
ISDN local loops, use of digital microwave 86−69299
ITALSAT slant path propag. testing for 20, 40 and 50 GHz bands 86−29404
Italy rainfall intensity meas., correlation props. assessment 87−54580

Japanese National Railways communications systems: telephone, microwave and data transmission *(Japanese)* 87−28288
jitter accumulation in digital networks 86−30231
Johannesburg-Kempton Park microwave link, 15 GHz, rainfall attenuation 85−42468
K-band (18-26.5 GHz) temp. stabilised Gunn VCO for digital radio systems 88−53166
K-band digital multichannel radio link, 22 GHz, sub-system design with HF stability 88−60015
K-band satellite channel, cross-polarisation discrimination meas. study using CS-2 earth station *(Japanese)* 87−28492
K-band wave propagation research *(Polish)* 86−15880
Ka-band high-power receiver, passive protection for high reliability 88−25428
Ka-band microwave link, MMIC amplifier design for 28 GHz operation 85−55177
Ka-band propag. expts. using transportable earth-station 88−9514
Kenya installs digital microwave system 86−55180
Ku-band reliability, testing 88−41522
Ku-band satellite communication in VSAT networks, rain fade study 87−28530
Ku-band satellite services, freq. plan 88−9503
Ku-band small aperture earth stations for cost effective communications 88−28802
Ku-band VSAT data networks, system design 88−28763
L-band multipath fading in aeronautical satellite communications, sea surface refl. 87−20472
laboratory simulation facility for multipath fadingmicrowave radio channels 86−30618
land mobile communications, quasi-microwave propagation loss in urban area *(Japanese)* 88−21996
land mobile radio use of microwave bands 86−30650
land mobile satellite service systems 88−15361
leaky feeders for microwave links in tunnels 86−37694
leaky feeders use in underground radiocommunication 86−37693
light density digital microwave system networking, modulation alternatives 88−3825
light shield for microwave radio tower 88−40742
line of sight links in Suez Canal, tropospheric refraction effect 85−7651
line-of-sight, expt. comparison of angle and space diversity 86−30640
line-of-sight channel simulation−a new approach 86−30639
line-of-sight channels, comparison of QPSK, SQPSK, QPR and SQPR systems perform. 85−36921
line-of-sight digital systems, protection techniques, propagation experimental results 85−25329
line-of-sight link, multipath fading 87−47165
line-of-sight links, elevated atmospheric duct, multipart fading anal. 87−26766
line-of-sight links, path inclination, ducts fading reduction 86−69600
line-of-sight links, Rayleigh fading occurrence estimation considering duct effects 88−2579
line-of-sight links, simulation of multipath effects on cross polarisation discrimination 86−59779
line-of-sight microwave link, 18 GHz, multipath propagation expts. 88−34317
line-of-sight microwave link, rain attenuation and fading meas. 88−40556
line-of-sight microwave links, multipath conditions prediction *(French)* 86−55154
line-of-sight microwave links, selective fading, measurement 88−66070
line-of-sight microwave propagation characteristics, terrain effects 85−41626
line-of-sight microwave propagation through atmospheric turbulence, mutual coherence function 85−41608
line-of-sight millimeter wave propagation characteristics 88−52218
line-of-sight multipath components, identification 88−34325
line-of-sight overseas paths, microwave propag. characteristics 85−46564
line-of-sight path, amplitude distortion and frequency diversity on a 1GHz bandwidth during multipath fading 86−29391
line-of-sight path, sunrise and sunset effects on microwave propag. 85−41604
line-of-sight radio paths, transfer function modelling of 55 MHz wide channel during multipath propag. 86−30637
line-of-sight radio-relay channels, multipath propagation, performance charcts. 88−60013
line-of-sight relay links, propag. conditions study and fading prediction *(German)* 87−7537
line-of-sight transmissions at MM-wave IR and optical wavelengths, comparison 88−28692
linear power amplifier with micromodule technology 88−1013
linear varactor upconverters for use in digital microwave radio 88−53167
local access radio interference due to building reflections, computer simulation 87−26870

microwave links continued
local and junction network applications for microwaveradio 85−57979

wideband optical link for microwave subsystems interconnection 88−41677
worst month quotient Q variability distribution 86−11676
worst month statistics of rain attenuation at 35 and82 GHz 86−63998
X-band communication systems, development of 2 kW CW helix TWT 88−39010
X-band low elevation Earth-space paths, amplitude scintillations 86−29408
X-band optic links using high-speed delay lines, eval. for radar test set appls. 88−73956
X-band RF fiber optic links 87−49083
GaAs C-band 100 W FET amplifier for digital radio 88−1015
GaAs FET demodulator and down-convertor foroptical-microwave links 86−55182
GaAs FET power amplifier for 64 QAM digital radio transmitter, design 88−1014
GaAs FET power amplifiers for multi-level QAM digital radio system, TWT substitutes 88−1012
GaAs ICs for military communications, status and commercial availability 85−30875
GaAs MMICs use 86−58046
GaAs RF power amplifiers for digital radio systems 88−1016
GaAs Schottky-barrier photodetector for microwave optical fibre links 87−49088
GaAs integrated circuits for microwave communications, hybrid technology 85−30874
GaAs monolithic receiver and laser driver for GHz transmission rates 87−49087
GaAs plan for DARPA, pilot production line project 85−30872

microwave measurement
see also microwave imaging; microwave reflectometry
3 GHz pulsed magnetron, using electro-optical technique 86−60301
4.3 MHz ocean wave-radar modulation transfer function meas. 86−37926
4-GHz band low-noise measurement system, using Dicke-type radiometer 87−49903
6/4 GHz satellite communication systems, Faraday depolarisation effects minimisation 86−37829
9.6 GHz backscattering matrix of dielec. objects 87−76824
9.6 Ghz backscattering meas. of dielectric targets 87−26751
10 GHz, superconducting RF cable devices for testing radioelectronic equipment 87−64174
10 GHz band power standard, dry type calorimeter *(Japanese)* 87−41596
16-216 GHz full coverage MM-wave scalar network analyser 88−60641
18 to 26.5 GHz waveguide load-pull system using active-load tuning 87−77390
19 GHz precipitation scatter expt. 87−54564
26 GHz wafer probing for MMIC development and manufacture 87−8722
44 GHz noise-figure meas. technique 87−8736
90 GHz satellite radiometer expt. and computer model 86−12152
6310 microwave sweeper *(German)* 87−8718
6407/6409 portable RF SNAs contain sweepers 86−55586
Q-band computerized slotted line system 88−74311
agricultural remote sensing, crop classification, biomass and plant height algorithms from visible/IR/microwave data 85−38358
airborne low level reconnaissance system, MM wave SAR sensor design 87−20617

microwave measurement continued
airborne microwave rain scatterometer/radiometer, DP software system *(Japanese)* 87−15066
airborne microwave rain scatterometer/radiometer, hardware system development *(Japanese)* 87−15065
airborne microwave rain scatterometer/radiometer, satelliteborne weather radar system *(Japanese)* 87−15069
airborne microwave rain scatterometer/radiometer system, rain meas. and data anal. *(Japanese)* 87−15067
airborne microwave rain scatterometer/radiometer system, microwave backscatter expt. of ocean surface *(Japanese)* 87−15068
airborne radiometric meas, at 30 and 90 GHz, interpretation 88−29621
aircraft engine digital electronic control, high-power microwave test results 88−5054
aircraft panel seal integrity monitoring, EM radiation leakage detection instrumentation 85−9282
airport humped runways, power density estimation, wedge diffraction theory appl. 87−61360
altimeter, bread board model 86−25455
AM-AM and AM-PM measurements using the PM null technique, microwave radio components appl. 87−66512
AM/PM modulation, new measurement system for oscillator noise characterization 87−73742
amplifier S-parameters, meas. and calibration technique for accurate meas. 87−77182
amplitude/phase detect., EM field probe, fibre optic transmission 85−20611
anechoic chamber specification 87−72799
anechoic chambers for RF meas., design aspects and appl. of microwave absorbers 86−1335
antenna differential-polarisation meas., using dual polarised-source antenna 86−24742
antenna EM field meas. in near zone 85−58865
antenna EM test facilities, anechoic chamber considerations 86−26617
antenna far-field patterns, semi compact range facility for fast prediction 85−41698
antenna meas. system using HP8510 87−68885
antenna meas. techniques, review 85−41715
antenna measurements using an automatic microwave measurement system 85−15010
antenna near-fields measurement method without anechoic environments 85−13284
antenna phased array T/R module performance optimisation, insertion phase meas. technique 85−64230
antenna system parameters measurement using calibrated RF-noise sources 87−35107
antenna testing, measurement of anechoic chamber reflections by time-domain techniques 88−42259
antenna tower waveguide meas. return loss and distance to fault meas. 86−5499
antennas, attenuation meas., noise utilisation 88−52280
antennas, compact test range, dual-reflector config. and meas. performance 85−62895
antennas, large, practical manufacture and testing 85−41709
antennas, radiation efficiency meas., radiometric method 85−26463
art and science of microwaves 85−34125
asynchronous detector with Gunn diode self-pumping 86−14067
ATE, mm-wave frequency coverage, ECM appl. 86−44132
ATE and instrumentation, conf., Boston, MA, USA (June 1987) 88−56603
ATE conf., Long Island, NY, USA (Oct 1985) 86−33922
ATE system, AN/USM-410(V) 85−31584
atmosphere, appls. of passive microwave remote sensing in meteorology and atmospheric techniques 85−38346
atmosphere, determ. of integral water vapour and liq. water content over ocean from meteorological satellite meas. 85−48476
atmosphere, remote sensing of precipitable water by MOS-1 microwave scanning radiometer 88−5175
atmosphere, total precipitable water retrieval using radiometric meas. near 183.3 and 90 GHz 88−5174
atmosphere sounding method, using mm-wave instrumentation on Space Shuttle *(German)* 86−6109
atmospheric absorption error reduction by differential emission meas. with ground-based microwave radiometer 86−6120
atmospheric attenuation at 11 and 18 GHz obtained by dual freq. Sun tracker meas., anal. 87−61388
atmospheric attenuation time dependences obs., effect on satellite relay systems *(Czech)* 88−73870
atmospheric remote sensing using satellite passive microwave techniques 86−6115
atmospheric turbulence meas., effects on MM-wave propagation 86−38957
atmospheric vertical moisture profile retrieval from microwave radiometric obs. 86−6121
atmospheric water vapour and temp. remote sensing by combined ground-based microwave and satellite radiometry 86−6118
atmospheric water vapour and temp. remote sensing by ground-based microwave radiometry 86−6117
attenuation, review 86−31619
attenuation and ratio−national standards 86−38503
attenuation calibrator, based on X-band SQUID, computer-controlled 86−24666
attenuation meas., precautions *(French)* 88−36196
attenuation meas. by time-interval ratio 86−31607
attenuation meas. system, mixer linearity *(Japanese)* 87−41595
attenuation measurement using ratio transformer and piston attenuator, accuracy comparison *(Japanese)* 85−43087
autodyne converter for controlling electronic film materials *(Russian)* 85−61874
automated dielectric spectrometer for freq. range 10 kHz to 10 GHz 86−65258
automated microwave testing of spacecraft 86−30738
automated microwave tests, productivity increment 85−20713
automated radio and microwave frequency power measurementfacilities 86−38486
automated signal/load parameter meas. in mismatched transmission lines *(Russian)* 87−20859
automated wideband surface resistivity measurements of space cloth 87−70757
automatic calibrator for switched solid state noise sources, in 10 GHz to 18 GHz range 86−31632
automatic error correction in RF and microwave network analysers 86−44227

microwave measurement continued
automatic homodyne network analyser with phase shift keying and baseband data sampling 85−14734
automatic microwave scalar network analyser, design and performance *(German)* 85−14702
automatic network analyser, HP 8510 A based, 30-60 GH_2 operation; design and features *(German)* 86−5145
automatic network analyser with microstrip connectors, calibration procedures 88−968
automatic network analysers, meas. config. and errors *(Spanish)* 86−50019
automatic network analysers, strip line calibration with TSD method *(German)* 88−67708
automatic peak power meter with dual input/display, Model 490 *(German)* 87−70690
automatic system for microwave resonators resonant frequency and Q factor meas. 85−15006
automatic vector network analyser, HP 8510B, design and characts. 87−56579
AV3921 microwave measuring instrument *(Chinese)* 88−4598
average conductivity of tank pad rubber, meas. using microwave techniques 88−68019
bare soil L-band emissivity series for net rainfall, evaporation and water storage estimation 85−64719
battlefield environment, MM wave transmission through manmade obscurations 87−20620
battlefield simulation, design criteria for microwave intervisibility meas. system 86−17497
beam-lead diodes, bond-free nondestructive test fixture 88−63934
beam-lead p-i-n diode nondestructive microwave meas. 87−77389
beams parameters meas. in open space using large liquid crystal screens 86−50208
BER meas. in microwave digital links, automatic test system 88−60560
Bhaskara-II microwave radiometer meas. of atm. precipitable water, performance 86−18578
biological objects, images, phase comparator at 2.5 GHz 86−50489
biological substances, dielectric props. meas. using open-ended coaxial line resonator method 88−29587
biomedical engineering, microwave radiometry appls. *(French)* 85−43318
biomedical microwave radiometry for noninvasive thermometry of subcutaneous tissues 88−16692
biomedical thermographic measurements, influence of tissue layering 88−48110
biomedical three-band microwave radiometer for noninvasive temperature measurement 85−20907
bipolar transistors, S-parameter meas. prediction using phys. device simulator 88−12615
bipolar transistors, S-parameters meas. 88−16468
bistatic radar cross section measurement facility 88−4611
blast furnace burden sensor with X-band microwave *(Japanese)* 88−60920
bolometric mounts on 75-Ω coaxial lines, for power meas. in telephony 86−23648
brain tumors, interstitial microwave hyperthermia, swept freq. meas of antennas 87−8947
broad-band permittivity measurements using thesemi-automatic network analyzer 86−24700
broadband 6-port measurement systems, broadband detectors using microstrip ring-star 5-ports 85−17800
broadband automatic homodyne network analyser with binary phase modulation, config. and X-band operation 86−70074
broadband directional couplers 87−45175
broadband electric-field probe using resist. tapered dipoles 87−8729
broadband homodyne network analyser with binaryphase modulation, microcomputer-controlled system 86−17786
broadband microwave synthesizer, high resolution 86−38406
broadband microwave test fixture 87−70777
broadband mixers, phase error/matching meas. using microprocessor-based microwave test equipment 87−52460
broadband power sensors for 18 to 40 GHz 88−22765
broadband transmission cell for calibrating RF and microwave field probes 86−31622
brush movement meas. in fractional horsepower commutation motors 86−5503
building material water content monitoring using microwave convertor 88−60892
buried objects detection using versatile portable FMCW radar scheme 85−37112
C-band satellite-communications power meas. 88−15419
calibrated transmission lines, impedance meas. 86−18073
calibration and measurement equipment for electromagnetic fields *(German)* 85−14959
calibration and traceability at mm-wave frequency, 1985 status 86−44411
calibration of noise sources, using computer controlled radiometer 86−31623
calorimeter coaxial, and its use as reference standard in automated microwave power calibration system 87−29328
calorimetric microwave loss measurements of granular materials 85−37729
calorimetric microwave pulse meas. in oversized waveguide 86−55822
CAMAC interface for microwave power meter 88−67674
CAMAC-compatible automation of microwave relaxometer using IZOT TsLANP-0270 computer system 87−70780
capacitively-coupled plasma etching machine characterisation *(French)* 88−19823
cardiopulmonary rate monitor, microprocessor-based, using low-power Doppler microwaves 87−35399
cavity oscillators, Q-factor meas. technique 86−24726
cavity perturbation method, transmission line anal. 86−50200
cavity reflection interferometer for single-pulse transient conductivity meas. 88−22766
cavity resonator, electric field meas. with increased directivity 85−52856
cavity resonators, Q-factor and resonant freq. meas. using multipoint method *(Polish)* 85−14994
chemical reacting materials, microwave processing and dielec. diagnosis in single-mode cavity applicator 88−29609
circuit analysis and amplifier design, book 87−65112
circuit reflection matrix meas. using network analyzer 87−63500
circuits, microwave optical appls. 88−70949
circular polarisation analyser, for K_a-band microwave radiation 86−24728
circular waveguide network, attenuation monitoring using switched heterodyne radiometer 86−44377
circulator eigenvalues determ., refl. coeff. meas. 86−8443

microwave measurement continued
cloud radiometry at two wavelengths *(Chinese)* 88−42654
cloudless atmosphere radio emission fluctuations 88−22240
clouds, liquid water and precipitable water vapour determ. by ground-based microwave radiometers 87−71296
cm and mm wavelengths, scintillation and radiometry correlation, experimental evidence 85−26465
coal, on-line moisture determ. at preparation plants 85−15008
coaxial, thermal noise standards radiometer with IF attenuation *(German)* 85−15004
coaxial bolometer mounts calibration against primary standard mounts, microwave power meas. 86−49908
coaxial cable testing for production control, instrumentation and methods *(Italian)* 88−19438
coaxial connector, elec. defects study using simple technique 87−45357
coaxial connectors, refl. coeff. meas. repeatability study using highly reflecting loads 87−45356
coaxial E-field probe design for high-power microwave measurement 85−37737
coaxial line sensor, open-ended, for medical and industrial dielec. meas., assessment 86−55725
coaxial noise source, calibration using waveguide standard 88−29608
coaxial noise standard for the 1 GHz to 12.4 GHz frequency range 85−4104
coaxial probes with finite ground plane for biological dielec. props. meas. 88−36416
coherent RF error statistics 87−8734
combine harvester, spatially attributed automatic data acquisition 88−15974
common base bipolar power transistors, large-signal type, charactn. techniques in L-band 86−14516
compact antenna test ranges for RCS meas., anechoic absorber charactn. study 87−56237
compact antenna test ranges for RCS meas., dual chamber design considerations 87−56239
compact frequency counter offers oven stability 85−20635
compact resonator for frequency standards 87−56822
compact-range technology for antenna and RCS meas. community 87−56236
complex conductivity measurements at several frequencies in the millimeter wave spectral range 88−74555
complex conductivity measurements between 26 and 110 GHzusing complex impedance bridges 86−5479
complex dielec. const. meas. technique using H-plane dielec.-loaded cavity with three layers *(Japanese)* 85−48068
complex dielec. constant. at MM-wave freqs., meas. system *(German)* 88−60881
complex dielectric constant, meas. technique using H-plane dielec. loaded resonator *(Japanese)* 85−4080
complex modulation testing of components and systems accomplished using new tools 87−43954
complex permitt. and permeab. automatic meas. , broadband simultaneous 88−74574
complex permittivities, dynamic meas. of temp. dependence at microwave frequency 87−14482
complex permittivity, dynamic meas. of temp. depend. at microwave freqs. *(Japanese)* 85−52846
complex permittivity and permeability, simultaneous meas. using broadband automated strip line technique 86−44406
complex permittivity and permeability of materials at microwave freqs., broadband meas. method 88−60899
complex permittivity and temp. depend. of dielec. during microwave heating, automated meas. method 86−11683
complex permittivity instrumentation for high-lossliquids at microwave frequencies, improvement 85−64245
complex permittivity meas. using dielec. resonator on microstrip line 85−20701
complex permittivity measurement at microwave freqs. 86−55821
complex permittivity tensor meas., rectangular waveguide standing-wave method 87−63493
component testing at microwave freqs. using spectrum analyzers 87−14505
composite, microwave NDT, moisture monitoring 85−17032
computer-aided load-pull meas. system for microwave cct. large-signal charactn. 87−20901
computer-assisted noise parameter test for microwave transistors meas. 88−50410
computer-controlled time-domain spectroscopy, dielectric props. meas. up to 15 GHz 85−14986
computerized microwave measurement techniques 86−17804
concrete humidity eval. using microwave technique 87−23764
conductivity and permitt. by cavity perturbation method 85−52852
conference, IR and MM waves, Takarazuka, Japan (Oct. 1984) 85−60654
conference on EM meas., Teddington, Middlesex, England (Oct. 1985) 86−26512
conference on instrumentation and meas. technology, Boston, MA, USA (Apr. 1987) 87−68858
conference on instrumentation and measurement, Boulder, CO, USA (March 1986) 86−57103
conference on intelligence in instrumentation, San Diego, California (Apr. 1988) 88−53917
conference on microwave and millimetric components meas., conf., London, England (Nov. 1986) 87−16305
contactless meas. of resistivity distrib. of semiconductor plates, using quasistatic microwave resonator 86−18088
contactless scanner for photoactive materials usinglaser-induced microwave absorption 86−31586
coronary arteriosclerosis examination using microwaves 87−77662
counter design developments 85−37662
coupling radio-optical image convertor to video display 85−8735
cross-field amplifier measurements with a rotating RFE-field probe 86−62996
crosspoint switch matrix solves ATE problems 87−77097
cryogenic motorized waveguide switch 87−56824
cryogenic voltage standards, using series array of Josephson tunnel functions 85−20680
CW power meas., techniques explanation 86−60331
CW radar cross-section measurement facility in X-band 85−20250
CW source provides pulsed microwave signals 88−38740
cylindrical cavity partially filled with dielectric, calc. 86−41302
cylindrical coaxial cell for wideband high-loss dielec. material charactn., EM study *(French)* 88−60880

microwave measurement continued
cylindrical microwave imaging system, temperature and permittivity meas. 88−29593
DBS TV relays, utilisation of Anritsu Electric Company measurement systems 85−14162
de-embedding techniques using time-domain anal. 86−38535
Debye dielectric, computer-based permitt. meas. and microwave power absorpt. anal. 87−49890
dedicated microwave test stations 85−14998
detecting diode rise-time meas. 85−58910
detection and identification of spurious oscillations in waveguide channels 87−21223
detector, automatic, based on glow discharge tube for millimeter wave intensity distrib. meas. 85−37619
development trends, uncertainties reduction *(German)* 85−14580
developments and technologies 85−15001
device behaviour plotting, test technique 86−55769
device for meas. in 27 to 110 GHz interval *(French)* 87−8724
dielectric, NPL 1970-85 developments review 86−31620
dielectric characteristics of gases obs., using gas dispersometer 86−24702
dielectric const. and loss tangent, comparison of meas. methods 87−49893
dielectric constant and loss of ferroelectrics meas., under uniaxial compression low-temp. 86−44397
dielectric constant evaluation of insulating materials: an accurate, practical measurement system 87−77391
dielectric constant meas., error calc., scattering matrix elements 88−39743
dielectric constant meas. of lossy fibres and rods, at microwave freq. 87−56809
dielectric liquids permittivity and loss meas., using two- and three-layer dielectric resonators 88−60875
dielectric loss and permittivity microwave meas. apparatus for temp. to 2300K 86−60322
dielectric loss meas. technique using fixed resonance cavity 85−64244
dielectric loss measurement method using H-plane loading techniques 87−70759
dielectric materials, charactn. at microwave freqs. *(Chinese)* 85−58844
dielectric meas. of birefringent and ceramic materials 87−14490
dielectric meas. of microwave frequencies 86−5487
dielectric measurements in submillimetre range, backward-wave-oscillator technique 85−43075
dielectric measurements of common polymers at millimeterwavelength range 86−11681
dielectric measurements with open-ended coaxial probe 87−70758
dielectric properties meas. at 100 GHz, new method using groove-guide resonator 88−42260
dielectric properties of brine in sea ice at microwave frequencies 85−48063
dielectric properties of materials, meas. techniques 86−38521
dielectric props., mm-wave meas. of birefringent crystalline sapphire and ceramic alumina 88−16438
dielectric props. meas., use of coaxial probes, expt. eval. 87−77374
dielectric props. meas. at 100 GHz using groove-guide resonator 88−29592
dielectric resonator coupled to microstrip line, automatic charactn. technique 87−6015
dielectric resonator materials and their applications 87−66489
dielectric resonators, coupling coeffs. determ., expt. technique 87−24426
dielectric resonators, dual-mode Q-factors determ., meas. procedure 87−77388
dielectric response meas. using detuning of reson. microwave cavity, appl. to solid-liq. transform. study 88−29590
dielectric rods, high temp. microwave characterisation technique and impedance variational model 85−7107
dielectric spectrum of vegetation material 87−63996
dielectric substrate meas. method 88−74575
dielectric thickness meas., microwave system using heterodyne technique 85−37754
dielectric thickness meas., using Doppler phenomena and heterodyne technique 86−24784
dielectric waveguide, sensor for nondestructive inspection of sheet dielectrics by freq. props. analysis 87−73169
dielectric waveguides, nonradiative type, loss meas. technique 85−4094
dielectric/absorption constants meas., using digital spectrometry at MM-freq. 86−38522
diffraction method of complex quality control of cond. surfaces and dielec. coatings 87−16738
diffraction tomography for dielectric constant distribution meas. 87−29251
digital frequency synthesizer for radar and communications appls., development 87−41534
digital meas. of group delay 85−8944
digital microwave network analyzer 85−14730
digital microwave radio, system meas. technique 87−28399
digital microwave radio system meas., dispersion signature anal. 87−48899
digital microwave signal anal., sensitivity improvement 85−42928
digital network analysis, amplitude and phase determ. without knowing frequency 87−70515
diode microwave power detectors, computer-controlled calibration 87−8704
diodes, automated microwave meas. system *(Russian)* 87−66557
dipole antenna radiation pattern meas. using HP 8510 network analyser 86−29610
direct reading microwave moisture meters, error analysis, adjustment, calibration 88−68080
directional coupler, function and use 86−27562
dispersive polarising MM-wave interferometer, complex refr. index meas. 86−5498
displacement meas., microwave interferometry appl. 86−50220
distance measurement, design improvements for three-wavelength distancers 88−74963
distributed processing in RF and microwave measurementsystems 86−44410
dual reflector antennas, cross-polarisation behaviour *(German)* 87−54663
dual six port network analyser with waveguide star junction, matching, sensitivity, Ka band meas. 86−11512
dual six-port network analyser, dynamic range extension technique 85−52708
dual-channel phase shift meas., mismatch error cancellation 86−24667
E-field microwave three-axis probe with submillimeter dimensions 87−14328
Earth-space path, amplitude and phase scintillations, meas. and modelling 85−36016
ECM/EW designers, 40 GHz and above using coax 85−3334

microwave measurement continued
eddy current probe, microwave FMR, and signal processing methods 85−17041
EHF noise factor and equiv. noise temp. meas. technique *(French)* 87−49912
EHF phase-retrieval technique for antenna metrology 88−21009
EHF subharmonically pumped mixer with packaged Schottky diodes, performance study, parameter meas. method 86−27583
electric variables measurement by microwave techniques, book 86−26536
electric vector measurement, amplitude and phase meas., using compound modulated scatterer system 87−70774
electrical performance evaluation for reflecting mesh 87−19308
electrical sampling techniques, tutorial 88−42264
electrically small obstacles, electric and magnetic complex polarisabilities, meas. at microwave frequencies 86−3468
electro-optical technique for intense microwave meas. 85−52853
electrodynamic projectile-velocity meter, using microwave resonator 87−3770
electron beams drifting in magnetic field , plasma frequency meas. 88−74571
electronic distance-meas. instrument accuracy improvement 86−38551
electrooptic sampling measurement of dispersion characteristics of slot line and coplanar waveguide (coupled slot line) even and odd modes 88−74573
electrothermal engine, performance meas. 85−20996
EM distribution in microwave plasma guns 85−43086
EM energy display, using cholesteric liquid crystals *(French)* 85−20669
EM field distribution meas. in shielded absorber-lined chamber 88−4616
EM field meas. apparatus, for planar waveguide systems 88−68017
EM field visualisation using probe based on modulated scatterer technique 87−70779
EM hyperthermia, temp. meas. technique using refl. method 87−57225
EM susceptibility/vulnerability meas. using reverberation chamber 88−2605
EM wave polarisation processing techniques for microwave system meas. appl. 88−4604
end, phase distrib., expt. study 85−11502
equivalent current meas. technique, current probe methods comparison 86−38476
eSM evaluation facility 85−26853
EW receiver digital instantaneous frequency meas. 85−58206
Federal Aviation Administration radiocommunication link tester 88−46850
ferrimagnetic resonance, automatic meas. 88−53843
ferrites, complex magnetic and dielectric material parameters meas. method 85−12497
ferrites, effective resonance linewidth and permittivity determ. 85−58863
ferrites, MM wavelength meas., free-wave method 88−29613
ferrites electromagnetic constants determ. in microwave region *(German)* 87−38655
ferrites/dielectric complex parameters, computer-controlled integrated microwave meas. system in finline technique 85−20481
FET amplifier gain compression tests, computer-controlled swept system 86−27610
FET device charactn., terminating impedance meas. system 86−1369
FET low-noise amplifiers, gain and noise figure recovery meas. 88−44382
FET VCO, microwave medium power, design 88−50409
fiber optic microwave power probe 87−41481
fibre optic microwave power sensor using GRIN multimode silica fibre 87−68087
fibre optic sensors appl. 88−4418
field strength in ESR, pulsed modulation technique meas. 86−24725
field strength probe, submillimeter three-axis design 88−16067
filter discriminator instantaneous freq. meas. uses linear amplifiers 87−49904
finline symmetric test fixture calibration 87−8728
five port circular disc structures for six port analysers 86−11509
flow rate meas. of rice sugar and salt, humidity and bulk density effect 85−26505
FM meters certification and checking, up to 10 GHz, standard apparatus 86−44408
FM noise meas. below 2 GHz, single oscillator methods 86−60340
FM noise meas. system using delay line discriminator *(Chinese)* 87−41599
FM-CW sensor, water equivalent in dry snowpack estimation 86−69827
FM/CW radar applications in instrumentation 86−24669
FMCW radar, BOF slag level meas., unwanted signal rejection 85−48146
four-antenna mapping system for identification of modes in high-power gyrotron 87−17648
four-port automatic network analyzer theory 85−64070
Fram Strait marginal ice zone microwave remote sensing techniques 86−6137
free-space permittivity meas. of lossy dielectrics 88−16439
free-standing wire grids, characteristic curves for spectroscopic perf. 88−50312
frequencies and oscillators metrology *(French)* 87−16932
frequency counter for mm-wave radar testing, up to 110 GHz 86−4724
frequency counters, 5350A and 5351A, GaAs IC front-ends, config. and specifications 85−58752
frequency counters zero in on high frequencies 85−20634
frequency drift meas. cct., with zero indication, for resonator's field meas. 86−18063
frequency meas., 30 to 1000 GHz, millimeter and submillimeter sources *(French)* 85−14969
frequency meas., extension to IR region 86−24661
frequency meas. in microwave range using multi-channel freq. discriminators *(Polish)* 85−64227
frequency measurement, techniques used in frequency meters 88−42244
frequency measurement below 10 kHz and above 100 MHz using counter/timers 86−31573
frequency meters, computer-controlled calibration system and error considerations 86−11434
frequency response measurement of SHF circuits using picosecond pulses 85−4096
frequency standards, using ion traps 86−60312
frequency-halving networks, impedance meas. using two-freq. synthetic loading technique 85−26466
full-wave semiconductor diode microwave power sensing system, RMS response anal. 88−22556
GaAs MESFETs, microwave noise characterization, on-wafer low-freq. output noise meas. 88−25461
gain measurement under mismatched conditions, image method use 88−2757

microwave measurement continued
garnets, microwave props. and parameter meas. *(Hungarian)* 86−15374
glass furnace wall thickness meas. using microwave technique 87−41610
grain moisture content measurement *(Polish)* 86−70254
gravitational radiation detector, parametric transducer using superconducting microwave cavities 86−50062
Greenland Sea marginal ice composition variation obs. with scanning multichannel microwave radiometer 86−6139
ground-based microwave radiometer for atm. temp. profile determ. 85−64735
Gunn diode A-C voltage and frequency, admittance dependence, expt. determ. 88−63942
Gunn diode based autodyne frequency convertor use for contactless meas. of dielec. parameters at SHF 86−60320
Gunn diodes, computer-aided interactive meas. procedure *(German)* 85−26462
gyrotron cold cavity Q-factor meas., nondestructive technique 87−37816
gyrotron expt. at 150 GHz 88−25808
gyrotron microwave power source, meas. problems at 120 GHz *(German)* 85−11838
hazardous EM fields meas., American national standard 86−50190
hazardous microwave radiation meas. probe 88−47667
heart monitor and life detect. system 85−38133
heart monitors, microwave remote, adaptive filtering 86−60772
heart rate, remote noncontacting meas. using microwave signals and digital processing 85−59276
heat-flow calorimeter, random errors reduction 86−31566
HEMTs, scattering parameters meas. at W-band using six-port network analyser 87−59871
Hewlett-Packard microwave counters, performance enhancement 85−42853
Hewlett-Packard mm-wave instruments, review 85−58496
HF instrument with built-in intelligence *(Dutch)* 86−24721
HF linear network parameter meas. in China 86−65155
HF matching meas. and coaxial impedance transformers *(Norwegian)* 86−5501
HF meas. techniques, conf., Braunschweig, Germany (June 1983) 85−10336
high accuracy microwave noise figure measurements 85−14993
high-loss liquids, 9 GHz complex permittivity meas. technique 88−22748
high-power automatic network analyzer for measuring the RF power absorbed by biological samples in a TEM cell 85−3854
high-power microwave sources with over-moded output, power and mode diagnostics 85−52857
high-power pulsed microwave generators, biological effect instrumentation 88−5019
high-resolution instrumentation radar for X-band 87−49158
high-Tc superconductors RF props. 88−68020
high-temp. MM-wave dielec. meas. by free space techniques 88−29618
high-temperature superconductors, disc resonator meas. technique for microwave characts. determ. 88−65008
high-temperature superconductors complex surface impedance, 4.2 to 200 K 88−53821
hollow cored teflon dielectric rod resonator for moisture content measurements by microwaves *(Japanese)* 88−29615
homodyne network analysis, by digital triple phase modulation and baseband sampling technique 85−58632
homodyne network analysis by digital triple phase modulation 86−24737
homogeneous lossy material local thermal structs. and temp. retrieval by microwave radiometry 86−31694
HP8510A microwave network analyser using internal high speed processor 85−8713
HP8510B microwave network analyzer 87−77175
HP8720A microwave network analyzer is completely integrated 88−47450

instrumentation, historical perspective 85−236
instrumentation, new trends *(German)* 85−4092
instrumentation and fundamental issues 87−3734
instruments, development *(Dutch)* 86−31605
microwave measurement continued
instruments and techniques, product review *(French)* 85−31431
integrated radar imaging system for the STAR-2 aircraft 88−60262
Intelsat 12 GHz radiometric expts. rainy climates, comparison 87−26787
intense single-pulse microwave sources diagnostics 87−8725
interface path deterioration, automatic checking 85−47820
interferometer, parallel digitized, 35 GHz, for transient process phase meas. *(Chinese)* 88−74567
interferometer for plasma diagnostics, digital phase comparator appl. 88−22734
interferometric radiometry, signal-to-noise ratio for geodetic appls. 88−16880
interferometry, shot motion meas. of small calibre guns appl. 86−38561
intermodulation effects on passive components and system parts 88−60898
internal combustion engine top dead centre determ., using microwaves *(German)* 86−31616
internal combustion engines, top dead centre meas., microcomputer-controlled microwave technique 86−11717
international intercomparison 75-A12 voltage standingwave ratios in waveguide at 10 GHz 86−5497
interpretation of radiometric measurements *(Czech)* 87−21220
intracavitary hyperthermia, control by microwave thermometry *(Russian)* 87−41988
intrusion alarm RF field disturbance sensors, IEEE standard measurement of RF emissions, report 85−49320
inverse methods in microwave metrology 85−64264
IR and MM-waves, conf., Lake Buena Vista, FL, USA (Dec. 1987) 88−24354
IR images of microwave scattering from ferrite coated cylinder 88−68018
IR materials at MM waves, complex permittivity meas. 87−56826
ITALSAT propagation experiment *(Italian)* 86−17307
Italy rainfall intensity meas., correlation props. assessment 87−54580
Josephson AC voltage steps, microwave phase noise influence 86−2641
Josephson voltage standards, using near-zero bias arrays 85−58779
K_u-band Earth station antenna G/T determ., using Moon as RF source 87−14501
K-band antenna patterns meas. *(Japanese)* 86−36815
K-band M/C components, test-jig realisation 86−35087
K-band MIC component test jig, characterization 85−55151
Ku-band reliability, testing 88−41522
laboratory experiments using computer-aided test 88−4601
laminated media, UHF introscopy, radiopulse envelope synthesis 87−36831
large antenna assembly and meas., Space Station expt. 86−10197
laser distance-measuring instrument, microwave electro-optic modulator 88−27352
Lawrence Livermore National Laboratory electromagnetic measurement facility 87−58654
layered semicond. device study by multipurpose microwave device *(Russian)* 88−971
leaky waveguides, cavity resonator meas. method for phase anal. leakage consts. 86−11688
line-of-sight link, multipath fading 87−47165
line-of-sight multipath components, identification 88−34325
liquid dielectric const. meas. using discontinuity of cylindrical post in waveguide 85−48062
liquid film thickness meas. in gas-liquid flow, microwave method 86−55845
liquid film thickness meas. system using microwave technique 86−18127
liquid materials, complex dielectric constants, wide range measurement in microwave region *(Japanese)* 85−31574
liquid relative complex permittivity meas. using waveguides, in microwave freq. region *(Japanese)* 87−77373
lossless stratified dielectric, dielec. const. profile determ., inverse EM problem solving appl. 85−37730
lossy anisotropic sheet, complex permittivity tensor meas. using standing-wave method *(Japanese)* 87−3721
low-loss casting resins at MM-wave freqs., complex dielec. const. meas. 85−20699
low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
low-loss materials, dielec. props., microwave meas., resonator method 85−64243
low-noise interferometer for microwave radiometry, cosmic background radiation obs. appl. 88−60700
Marconi Instruments 6500 unit and impedance bridge, equipment and techniques *(Italian)* 85−4093
measurement accuracy−RF to optical 86−38530
measuring instrument use 85−47430
measuring receiver set for 40 to 60 GHz *(German)* 85−31428
medical aperture synthesis thermography−a new approach to passive microwave temperature measurements in the body 85−4289
medical microwave radiometers for noninvasive meas. of subsurface tissues temps. 88−16693
medicine, microprocessor-based noncontact heart rate/respiration monitor 85−48274
MESFET large-signal model, verification and amplifier load-pull meas. automated technique 87−6150
MESFET noise figure meas., using computerised instrumentation 88−13441
MESFET reliability life testing, test fixture design 88−7046
metal contact linearity assessment using passive coaxial microwave measuring device 88−22762
metallic surfaces, surface resistance measurement in MM-wave region using cavity resonator 85−8950
method for determining dielectric properties of solids from measurements of pulverized materials 87−77392
metric wave radiation testing, site geometry role 87−26933
MI6500 transmission line test system 88−60896
MIC microwave high-speed testing with IEEE 488 instruments and software 88−32421
MIC substrates, inhomogeneities and permittivity distrib. meas. 87−66566
Michelson interferometer set-up for microwave meas. 88−29616
microbiological objects, dielectric properties meas. in microwave band using increased resolution bridge method *(Slovak)* 87−63492
microbiological objects dielectric props. monitoring, use of microwave bridge *(Slovak)* 87−35171
microbolometer for meas. embedding impedance of detector, far-IR 85−4073
MICROPROBE, glass furnace wall thickness measurement 88−29649
microprocessor-based microwave dielectric measurementof liquids by waveguide plunger technique 86−31593
microprocessor-based spectrum analysers, bandwidth meas. 85−47895
microstrip, effects relative permittivities meas. 87−45153

microwave measurement continued
microstrip backfire antenna, experimental study *(French)* 85−46643
microstrip diagnostics using surface scanning probe 87−21073
microstrip patch antenna on uniaxial substrate, radiation and scattering anal. 87−61455
microstrip sensors, anal. and optimal design for measuring water content of rubber latex 88−53614
microstrip structs. on GaAs substrates, direct calibration and meas. techniques 87−17363
microstrip substrate, characteristic parameters meas. 86−38527
microstrip substrates, permittivity meas. using ring resonator, computer-aided method 87−17326
microstrip technique for broadband homodyne system microwave circuit meas. 88−56960
microstrip transmission line, input impedance meas. by resonance method 86−65250
microstrips, dielectric constant meas. of substrates for microwave and VHF circuits *(Spanish)* 87−3720
microwave anechoic chamber meas., evaluation methodology 86−18096
microwave antenna test range, VHF-UHF range at Paardefontein 85−46635
microwave cavity oscillator, thermal noise and freq. stability, RF spectrum study 85−23116
microwave conf., Las Vegas, NV, USA (June 1987) 87−72690
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
microwave curing of epoxy in sweeping resonant cavity, dielec and temp. meas. 87−79214
microwave displacement meter using a five-portdevice 86−5505
microwave multi-wavelength interferometer for displacement meas., cct. 85−37736
microwave oven leakage, automated survey systems, eval. criteria and procedures 87−31083
microwave phase tomography determ. of dielectric loss tangent 88−53826
microwave resonator circuit model from measured data fitting 87−5571
microwave scattering by surface waves on water 86−63985
microwave signals over broad frequency range, automatic meas. of amplitude and phase 85−64262
military appls. of modular ATE, microwave expansion 87−20896
millimeter-band phase meter with rotary grating 87−63479
millimeter-wave material properties and measurements 87−73582
Millimeter-Wave Polarimeter for remote sensing 88−5143
millimeter-wave technology, conf., Arlington, VA, USA, 1985 86−33904
millimetre scalar network analyser, 18-225 GHz band, config. and operation 88−29291
millimetre-wave materials, dielec. meas. techniques and expt. study 85−26467
minerals, dielectric constant and loss tangent meas. at microwave frequencies, report 87−49894
miniature electric field probes calibration and amplification 88−74341
miniature RF E-field probe calibration 88−53680
miniature RF field probe in magnetrons, performance 87−11294
mismatched semiconductor devices, accurate noise temp. meas. 85−12234
Mitsubishi ML2001 microwave distance meter *(Japanese)* 88−10126
mixers containing systems, computer-aided error analysis 86−24450
MLAs for digital radio 87−77384
MM and sub-MM wave detection techniques 88−29622
MM to micron wavelength 86−38531
MM wave complex impedance and transmission expts. *(Croatian)* 87−8727
MM wave permittivity meas. at elevated temps. 86−18095
MM wave polarisation and range data, knowledge-based anal. 88−67899
MM wave propagation, rain attenuation and rainfall charact. 85−41624
MM wave propagation in moist air, model 86−3526
MM wave radar, balloon lofted sphere as a range dependent calibrated target 88−22181
MM wavelength bolometers cooled by adiabatic demagnetisation refrigeration 88−29623
MM- and sub-MM-wave selectable finesse Fabry-Perot interferometer for freq. meas. 88−29625
MM-band casing diodes, parameters meas. 87−18070
MM-wave and microwave cct. charactn., test fixtures for frequencies from DC to 75 GHz 88−50377
MM-wave and sub-MM-wave precision meas. of material props. 88−29617
mm-wave and submm-wave radiation detection, problems and appls. *(Japanese)* 88−42263
MM-wave antenna meas. with HP8510 network analyser, report 85−62897
MM-wave antenna meas. with HP 8510 network analyser 87−8720
MM-wave antenna pattern meas. 85−37742
MM-wave atmospheric phase scintillations in absorption region, meas. 85−46562
MM-wave automated multiport network analyser, concept 86−38216
MM-wave automated noise figure and gain meas. techniques 88−68016
MM-wave BARITT-type and microwave diodes design, X-band expt. results 88−50403
MM-wave beam steering using 'diffraction electronics' 85−2693
MM-wave biased detectors, DXW and DXB series, 60-300 GHz operation, design and charact. 88−29334
mm-wave cavity meas. 86−38541
MM-wave complex permittivity/permeability meas. by Fabry-Perot resonator 86−38523
MM-wave dielectric meas. of materials, review 85−31573
MM-wave dielectric properties of materials 85−8947
MM-wave direct meas. of complex permitt. and complex permeab. of mag. materials 88−29619
mm-wave guidance systems testing, ATE techniques for high-volume production 86−43903
MM-wave gyrotrons, peak power meas., low average power calorimeter design 88−19599
MM-wave materials, dielec. props. meas. 85−20700
MM-wave measurement and standards requirements fordefense technology 86−24263
MM-wave network analyser, 16 to 250 GHz *(French)* 88−67706
MM-wave planar ccts., Bi bolometer probe design for meas. appls. 86−47067
mm-wave propag., conf., London, England (Jan. 1986) 86−33953
MM-wave radiometers, multisheet transmission windows, comp. 88−68015
mm-wave rain attenuation meas. 88−27476
MM-wave S-parameter measurement system using network analyser, config. and performance 85−37516
mm-wave standards, needs and capabilities 86−60335
MM-wave standards at National Bureau of Standards 85−8948

microwave measurement continued
MM-wave vector meas. system 85−14991
MM-wave vector meas. using HP8510A network analyzer 85−37527
MM-wave vector network analyser using Macintosh II PC 88−74310
MM-wave vector network analysis 88−42008
MM-wave wafer probes, 0-50 GHz operation, calibration standards, design and appls. 87−52822
mm-wavelength range spectrum analyser for upper atmosphere O_3 investig. 88−5157
MMIC, measurement as basis of good design *(French)* 88−63881
MMIC testing using microwave wafer probe, planar calibration standards verification techniques 88−50383
MMICs, use in instrumentation, impact, advantages and appls. *(Italian)* 88−50357
mode-frequency analyzer for high-power gyrotrons in the 2-millimeter wave range 88−29292
mode-selective directional coupler for high power microwave measurements 87−73612
Model 950 Micro Source building blocks for fundamental system requirements 85−54722
modulated scattering technique, cylindrical near-field scan, error considerations 88−2840
moisture determination by microwave transmission phase-shift measurement *(German)* 87−21293
moisture in sandstone cores, temp. effect on accuracy 85−37808
moisture measurement instrument, error analysis 88−36296
moisture/density meas. in particulate solids, techniques 87−56825
MOS-1 airborne verification expt. using Microwave Scanning Radiometer 88−10523
multichannel heterodyne radiometer, for computerised meas. of Tokomak plasma 86−5500
multilayer dielectric structures, wideband microwave introscopy, secondary spectral analysis 85−8937
multilayer dielectric structures testing by multifrequency methods 85−44817
multimode harmonic power measurement of 40 MW pulsedS-band klystrons 86−24731
multipath propagation experiments on 8.2-km line-of-sight path at 30 GHz 88−60002
multiple angle of incidence meas. for permittivity and permeability of lossy materials 88−4591
multiple-parameter microwave moisture meter *(Russian)* 87−21287
multiport device scattering matrix meas. with two-port network analyser, renormalisation transformation 85−37739
multiport junction, simultaneous phase and amplitude meas. on optical signals 85−8973
multiport network analyser for precision vector meas., 26.5 to 40 GHz band 87−21222
nanosecond microwave pulse generator diagnosis , using calorimeter and resonance wavemeter 88−71277
national microwave power standard using microcalorimeter 86−38537
national standards and standard measurement systems forimpedance and reflection coefficient 86−38532
NBS calibration services 86−38182
NBS measurement assurance and accreditation of laboratories providing calibration services 86−38193
NBS uncertainty charts 86−38181
near field antenna measurement system, six port network 86−11491
near MM-wave propagation meas. instrumentation 86−38306
network analyser, 26 GHz to 40GHz band 86−38539
network analyser, automatic, speed and accuracy improvement 86−24734
network analyser, Wiltron 360 *(French)* 88−4608
network analyser automation, using IBM PC and Elf program 88−60627
network analyser HP 8510 B, performance and appls. 87−77161
network analyser wide-band de-embedding with a short, an open, and a throughline 86−38304
network analysers, development *(German)* 87−49601
network analyzer calibration using offset shorts 88−60628
NIAST microwave anechoic chamber, evaluation and modification 87−63501
Nimbus-7 Scanning Multichannel Microwave Radiometer for sea surface temp. meas. 86−32568
noise figure meter, microprocessor-based, principle 87−8721
noise generator, low-temperature mm-wave, loss changes in waveguide in 295 to 77K range 87−29268
noise generator for microwave range appls. 85−14819
noise generators, calibration by IF comparison method 88−981
noise meas., receiver noise removal method 88−29612
noise standard operating at 94 GHz 87−14516
noise standards, UK developments at RSRE 86−31630
noise temp. and power, UK national standard at 77K 87−21286
noise temperature measurement system for mismatched noise sources 85−20538
noise tube sources for the far IR and millimeter region 88−60775
noise-matching microwave network for transistor noise parameters meas., losses meas. method 88−29611
noise-power spectral density reference in the 37.5-78.3-GHz frequency band 87−63504
noise/gain charactn. of microwave devices, ATN-NP4 series ATE 86−24310
non-metal thickness meas. using microwaves *(Chinese)* 86−60342
non-ohmic props. of conducting materials obs., by phase-resolved microwave mixing technique 86−31612
non-planar dielec. samples, complex permittivity meas. technique using open resonator 87−77375
noncoaxial measurements, through reflect line two-port calibration method 88−47666
nondestructive resistivity meas. of III-V semiconductors, using four-point probe meter 87−70756
nonelectric variables meas., development in China *(French)* 86−31613
nonelectrical props., detection using microwaves in China, review 87−29266
noninvasive microwave dielectric sensors, biological and aqueous systems meas. 87−57064
nonlinear microwave devices noise immunity and EMC meas., using integrated automatic system 87−63507
nonlinear microwave Fabry-Perot interferometer, aperiodic spikes, boundary crisis 86−31614
nonmonomodal nature of piezotransducers, effect on dynamic range of acousto-optic modulators in microwave spectrum analysers 88−47491

microwave measurement continued
nonplanar dielec. samples, relative permittivity and loss tangent meas. using open resonator 88−29588
object identification using microwave radiometry two approaches 86−60334
ocean radar cross section, airborne meas. at 5.3 GHz as function of speed 87−8342
ocean remote sensing, development status of ERS-1 payload instruments 87−57390
ocean surface layer temperature profile determ., appl. of microwave emission meas. *(Russian)* 88−5185
ocean surface wind estimation from Nimbus-7 scanning multichannel microwave radiometry 86−6113
ocean surface wind speed, Seasat radar altimeter, scatterometer and scanning multichannel microwave radiometer obs. compared 86−6114
ocean wave directional spectra, aircraft remote sensing 87−71385
ocean waves, two-scale Bragg scatt. model for microwave backscatter from wind-generated waves 87−57393
ocean waves sensing, first-order spectral component of microwave backscatter 87−68764
oceanic rain rates measurement, satellite passive 37-GHz scatt.-based method 86−70529
oil spill detection and analysis, results from radar and microwave radiometry 87−63976
on-wafer meas. through 18 GHz, microwave wafer probing 85−58864
online fruit weighing using a 500 MHz waveguide cavity 88−36193
open resonator, continuous SHF control of thin dielectric layers *(Russian)* 87−14503
open resonator transducer, control of thin conducting structures, dielectric meas. appl. *(Russian)* 87−14502
open slot lines on semiconductor substrate, symmetrical and asymmetrical conductors, theoretical and expt. anal. 88−50300
optical fibre arrangement for microwave power detection 87−14269
optical techniques for wide bandwidth microwave spectrum analysis 88−29286
optically controlled millimeter-wave devices 85−11538
optically coupled field probe for microwave frequencies 85−15014
optimum solution for IF bandwidth and LO frequencies ina microwave counter 86−70207
organic dielectrics in nanosecond duration microwave fields, dielectric surfaces strength 88−39747
oscillator operating parameters test using network analyzer 85−20534
oscillator/amplifier large-signal load-pull meas., vector error-corrected calibration technique 88−22756
oscillators fluctuation characts. meas. by autodyne method 87−63505
OTS-2 satellite range meas. using STELLA terminal 85−14996
oven interfering radiation evaluation by reverberation chamber 88−8524
oven leakage monitoring instrument 85−4095
oversized waveguides, EM mode identification using liquid cryst. sheet field mapping technique 85−11496
oversized waveguides, multimode anal., wavenumber spectrometer design 88−19314
p-i-n diode attenuators, high-power level, expt. investig. 88−25401
paper moisture and thickness meas. using cavity resonator *(Japanese)* 86−31611
parallel-plate coaxial sensor for meas. at RF and microwave frequencies 86−44263
passive frequency source, 24 GHz, microwave absorption in $^{14}NH_3$ gas, operation *(French)* 85−4098
passive linear two-ports parameter identification, low-loss meas. appl. 88−15994
passive microwave remote sensing, albedo and optical thickness estimation 86−6086
peak power meas. at microwave freqs. *(German)* 86−24722
peak power meter, Wavetek model 7500 86−5357
peak-power-meas. equipment for EW and satellite communications 88−9878
Peltier oven for thermistor mounts, microwave power meas. appl. 85−64226
performance monitor appl. at Bonneville Power Administration 88−22757
permittivity, automatic material characterising instrument 87−70766
permittivity, inhomogeneous open-ended resonators as microwave sensor elements 85−20698
permittivity, noncontact measurement of smooth convex target, bistatic radar technique 85−4079
permittivity and permeability, simultaneous meas., frequency-domain technique 85−20711
permittivity meas. by cavity perturbation method 87−14492
permittivity meas. of liquids with low dielectric loss, using inclined X-band waveguide 86−24706
permittivity meas. of lossy liquids and biological tissues, at 35 GHz 87−70761
permittivity meas. of lossy materials, using waveguide-fed series slot array 86−5488
permittivity meas. system 87−29255
permittivity meas. using resonant microstrip technique, calc. using BASIC home computer program 86−5489
permittivity measurement, microwave county perturbation method 87−41590
permittivity measurements using a frequency-tuned microwave TE_{01} cavity resonator 85−26454
permittivity of high loss liquids meas., using 9 GHz dual sample cell 85−31572
permittivity of liquids meas., using orthogonal phase-filter flow cell 85−14984
permittivity of liquids with low dielectric loss, automatic meas. 85−58845
permittivity of moistened and pyrolysed materials in strong RF fields 85−37727
permittivity using short-circuited waveguide method, elimination of ambiguity 88−4600
phase, exchange places method for precise phase shift measurement of large microwave systems *(Chinese)* 87−63499
phase determ. method using Kramers-Kronig transforms 87−77385
phase noise meas. techniques, for pulsed signals 86−24668
phase retrieval in a lossy medium 88−22746
phase shifter using dielectric strip waveguide with movable metal plate, parameters 86−14472
phase tomography for noninvasive meas. of volumetric loss distrib. 86−55823
phase tracking measurement of MM-wave mixers 87−14504
phase-shift measurements in a standards laboratoryenvironment 86−38504
photoconductivity lifetime meas., expt. limitations 85−4099

microwave measurement continued
photoconductivity of Ag halide grains, high sensitivity apparatus *(Japanese)* 87−70776
photoelectric and photodielectric effects meas. 85−43085
photonic measurements of microwave pulses using electro-optic and fibre-optic components 87−18684
picosecond pulse waveform meas. system at NBS, calibration and error anal. 86−38194
pilot respiration and heart rates measurement using noninvasive microwave instrums. 85−9176
piston attenuation as RF signal vernier in 10-300 MHz range, error correction 85−14972
piston attenuator as calculable signal vernier for microwaves 87−29269
planar electronic structs. diagnostics, microwave scanning microscopy technique using coupled one-port cavities 87−77387
planar ferroelectric microcapacitors for microwave devices 87−52909
plasma-controlled semicond. waveguide, time-varying MM-wave vectors meas. using dynamic bridge method 87−21218
polar interferometers using four-probe operation *(Chinese)* 88−22761
polar solute containing solns., dielectric loss and permittivity meas. by 8 mm interferometry 85−8936
polarization structure in general microwave fields, use of C-line and S-surface singularities 86−31621
polymer coating on metallic components, contactless inspection of thickness in prod. line 87−36832
polymers, mm-wave meas. of complex refractive index, permittivity and loss tangent 88−16436
polymers, permittivity, loss tangent and refractive index meas., mm-wave technique 87−14486
polymers dielectric characts. meas., in mm wave range 85−48064
portable automatic test set for aircraft microwave transmission line testing 88−30113
portable microwave spectrum analysers 87−56576
portable working standard of microwave power in waveguides 86−44407
power, amorphous semiconductor thermocouple-couple sensor *(Japanese)* 88−16455
power, microcalorimetric single-load technique with X-band load 88−16460
power, microcalorimetric technique with X-band load 87−14436
power, principles, sensor types and meas. errors 85−48076
power, standards and calibration 85−43083
power, standards review 86−38485
power and energy: national standards 86−38536
power FET, S-parameters determ. under large-signal conditions, load-pull technique 86−27580
power flux density meas. of microwaves in production areas, exposure of workers *(Russian)* 88−23140
power flux density probes calibration, multioctave devices appl. 87−50467
power flux in microwave radar and communications equipment, prediction and meas. 85−15011
power meas. accuracy improvement for automatic module testing 88−36198
power meas. at 15 GHz, international comparison 86−65263
power meas. in mm-wave and submm-wave beams, using photoacoustic detection 86−38540
power measurement, Marconi 6960 microprocessor-controlled instrument, design and characts. *(Italian)* 85−37421
power measurement technique at 10 GHz 86−31568
power measurement using optical fibres 88−36061
power measurements, error reduction considerations 86−31567
power meter, model 490, 10-40 GHz range, dual-microprocessor based design 87−56732
power meters, product survey 88−60805
power semiconductors, intermodulation distortion meas., 3-18 GHz, ATE system 86−26605
power standard, using electron beam 87−14433
power standard, using electron beam 88−16459
power system microwave monitoring systems for failure detection and as maintenance aid 88−17046
precipitation monitoring by satellite passive microwave radiometry 86−6116
primary broadbanded coaxial thermal noise standard, watt unit realisation 87−14438
primary magnetoresistive converters of unmatched waveguide passing wave power 88−56846
probing semiconductor superlattice transport by submillimeter wave cyclotron resonance 88−25953
production ATE for RF/microwave components, progress report 88−11709
profile algorithm for microwave delay estimation from water vapor radiometer data 88−60001
profiles meas. using continuously tuned 53-59 GHz radiometer 85−15425
programmable interface links ATE systems 87−56496
programmable microwave spectrum analysers, diverse appls. 87−70487
programmable tuner system for microwave meas. range 1.8-18 GHz 87−56498
protective metal films electron beam deposition, microwave device for active monitoring of thickness and rate of application of coatings 85−44345
PTFE laminates, test fixtures modification for dielec. const. determ. 88−60879
pulse network analyser, config. and meas. appls. 86−11510
pulse phase meter 88−53815
pulse power meas., pyroelectric receiver appl. *(Russian)* 85−64261
pulse signal meas. accuracy, impulse bandwidth determ. 87−8572
pulse waveform standards for electro-optics 87−29270
pulsed microwave signal peak power meters 85−4010
pulsed microwave signals, meas. instruments using semicond. detectors, operation and error minimisation *(German)* 85−14995
pulsed RF meas., instrumentation control 88−9879
Q band interferometer for high temperature measurements of solid and liq. permittivity 85−31571
quadrature phase shifter, precision, microwave study 87−32058
quartz, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
quasi-optical 8-port comparator cct., single wire grid 88−56970
quasi-optical microwave energy flux divider 88−63857
quasi-optical slot ring mixer noise figuremeasurements, technique and device config. 86−8520
radar cross-section, measurement using HP 8510 automatic network analyser and anechoic chamber 85−64259
radar cross-section meas. using compact ranges 87−56235
radar cross-section testing of targets, ATE system, ADAM/8003 86−31172
radar dish power density, predictive model for range-dependence 85−15012

microwave measurement continued
radar sensing, modelling interactions between ocean and environment 87−35496
radiated power meas., reverberation enclosure performance 86−5502
radiation around satellite Earth stations, environmental level measurement 88−35438
radiation diagnostics, linear electrooptical effects use 88−36195
radiation field, spatial struct. determ. using cholesteric liquid crystal detector, method 85−8949
radiative susceptibility testing, compact range appl. 85−15013
radio and microwave freq. techniques for 88−4703
radio links, microwave power density, human health hazard aspect *(Polish)* 85−25737
radio path horizontal space diversity, measured performance 86−55191
radiometer for 11 GHz band, design and operation *(Czech)* 86−50075
radiometric measurement processing methods *(Czech)* 86−70208
radiometric measurements for airborne and ground based applications 88−22764
radiometric signatures of metallic target models 86−24739
radiometry, inverse problem solution, regularisation 86−70209
radiometry, multifreq., for noninvasive body temp. meas. *(Japanese)* 86−32247
radiometry, polarisation depend. 85−59468
radiometry data, deconvolution methods 85−59467
radiometry of lakes, seas, and oceans 86−32557
radiowave propagation meas. on Ottawa River, very low-level, results 87−26786
radomes and coverings, testing guide *(Spanish)* 85−41807
railgun projectile velocity meas., shorted transmission-line method 87−26711
rain attenuation and water vapour radiometric meas. at NPL 87−19188
RCS meas. using compact antenna test ranges, design requirements and spectral anal. 87−56238
re-normalizing the scattering parameters 86−24729
real time recording of microwave fields, holographic, laboratory prototype 87−54441
rectangular horn of four corrugated plates 85−36104
rectangular waveguide calorimeter for single intensemicrowave pulses 87−8726
reflection and transmission measurements of advanced composite materials 87−29273
reflector antenna, brightness temp. meas. by scanning with microwave radiometer *(Japanese)* 85−26461
reflector antenna, frequency-selective plates as feed elements, investig. *(German)* 87−54669
reflector antenna profile measurement, microwave technique 85−51491
reflector antenna surface profile tolerance meas., ultrasound or microwave remote sensing appl. 87−26967
reflector antennas, microwave holographic metrology for surface diagnosis, iterative approach 85−7733
refractivity, gradient and microwave fading obs. in northern Indiana 86−55192
remote diagnostics in the MM waveband 88−4636
remote sensing, appls. of microwaves 88−54733
remote sensing, geophysical perspective 86−32508
remote sensing, microwave signatures, symposium, Toulouse, France (January 1984) 85−38316
remote sensing, relationship between differential scatt. coeff. and bidirectional reflectance distrib. function 88−5127
remote sensing, strong fluctuation theory for moist granular media 85−38324
resonant frequencies meas., transient scattering from conducting spheres and cylinders 85−4068
resonant-frequency perturbation measurements 88−4576
resonator-type transducers for film thickness meas. *(Russian)* 87−70781
resonators, automatic meas. of passband 86−27556
resonators, automatic method for freq. response and Q meas. *(French)* 85−11510
responses of electric-field probes near cylindrical model of human body 85−52851
RF and microwave safety meas., conf., London, England (Nov. 1984) 85−10351
RF and microwave testing automation 86−55524
RF and microwave testing equipment 86−31617
RF anechoic room absorbers eval. in 30 to 1000 MHz range 87−28869
RF channels, cross-polarised, sweep meas. of multipath effects and space diversity 85−42465
RF channels, cross-polarised and diversity-protected, transfer functions results 85−57972
RF components calibration, 10 MHz to 18 GHz, using desktop computer *(German)* 85−14630
RF magnetic probe using LED linked with optical fibre 85−26288
RF microstrip test fixture for microwave semicond. devices 88−7057
RF plasmas for dry etching, elec. behaviour 85−6848
RF sensor for level meas. using waveguide cavities 88−29707
RF voltage standards, international comparison at frequencies up to 1 GHz 85−48033
RF/microwave signal sampling gates, review 86−24401
RRL primary Cs beam frequency standard, accuracy evaluation 85−58814
S-parameter meas. error correction *(Chinese)* 87−63218
S-parameter meas. of stripline components using automatic network analysers, errors estimation *(German)* 87−66477
S-parameters meas. in HF transistors, simplified error model 86−31610
S-parameters measurement with throughline, short and delay line 86−38529
S-parameters using symmetric fixture 87−70778
safety, environmental monitoring 87−36443
sampling oscilloscopes for economical high-frequency measurement 87−35133
sampling oscilloscopes use for economical HF fast-rise-time signal meas. 87−29180
sampling system with adaptive time-drift compensation 86−5496
sandstone cores, oil and water content meas. using microwave techniques 87−29366
sapphire disk dielectric resonator, temp. characts. obs. at microwave freq. 87−29313
satellite altimetry calibration for ionosphere and wet troposphere 86−6127
satellite and microwave link testing using HP 70000 modularised spectrum analyser 85−47900
satellite microwave radiometry, appl. to classification of forest and surface types 87−57353
microwave measurement continued
satellite microwave ranging, model for correction of water vapour error 88−5122
satellite microwave ranging, prediction of excess path length due to water vapour from ground meteorological meas. 88−5123
satellite near-field test facility, for TV-SAT direct broadcasting satellite 87−19309
satellite remote sensing of Earth resources, microwave sensing *(Finnish)* 88−16942
scalar analyser, ATE appl. 85−14719
scalar analyser, Marconi 6500, design and appls. *(German)* 85−14701
scalar analyser test technique improves coax-to-microstrip transitions 87−8723
scalar network analyser, Hewlett-Packard 8757A, microprocessor-controlled, 10 MHz-40 GHz range *(French)* 85−31429
scalar network analyser with desk-top computer and menu-driven software 85−63966
scalar network analysers, techniques and accuracy considerations *(French)* 86−17894
scalar network analysis for microwave ccts. 87−77174
scalar network meas., introduction 85−20709
scalar tests of amplifiers, minimise harmonics 88−4603
scanning microwave probe, radiating and nonradiating open struct., mode anal. 87−49907
scattering parameters measurement method for two-ports for two lines with gap *(Polish)* 86−18087
scatterometer with mm-wave network analyzer 88−28938
Schottky-barrier diode mixers, computer-controlled meas. systems for testing between 90-350 GHz 86−24297
sea foam, microwave emissivity at 19 and 37 GHz 88−10568
sea surface oil pollution monitoring by microwave radiometry 86−12203
sea surface roughness parameters, remote determ. via microwave polarisation meas. *(Russian)* 86−6128
sea surface scatterometry, quasi-specular sea scatter with modified refl. coeff. 86−60937
sea surface wave height, estimation from Bhaskara II SAMIR data 85−43484
sea surface wind speed sensing, optimum freq. selection for wind scatterometer 88−61648
sea wave spectra determ., appl. of EM techniques 88−16931
seasonal variation of multipath parameters in Egypt 87−34375
Seignette planar microcapacitor parameters meas. 86−18079
semiconductor device modeling and microwave test 86−1376
semiconductor diode mixers, design and characts. for microwave meas. appls. *(French)* 85−11567
semiconductor laser in small loop antenna as sensitive HF EM field probe 87−21219
semiconductor microwave protection devices, intermodulation 85−23141
semiconductor power devices, diffused layer surface resistance reproducibility control, EM methods *(Russian)* 88−1484
semiconductor thin layered structs., NDT using SHF instrument *(Russian)* 88−972
semiconductor wafers, area resistivity distrib. meas., automated apparatus 87−41346
semiconductors, photo-induced complex permittivity meas. 85−14983
semiinfinite waveguide containing inductive post with gap, microwave power resonant attenuation 87−37496
semirigid waveguide development, expt. results 88−50301
sensor appls. in industry 88−53597
sensor for measuring the mass per unit area of a dielectric layer 85−14794
severe storm identification using satellite microwave radiometry 88−5158
shape and dimensional measurement using microwaves 86−60346
shape extraction of 3D space objects, microwave and video sensor fusion 88−40935
sheet material basis weight and moisture content meas. with microwave sensor 88−22812
sheet materials, basis weight and moisture content, microwave cavity measurements 87−70584
SHF and EHF, eliminate surprises when de-embedding microstrip launches 88−4602
SHF channel characts. stability checking, using Gunn diode autodyne 87−3733
SHF-6 microwave device to test heterogeneous layered semicond.-metal structs. *(Russian)* 88−970
shield dielectric cavity resonators, unloaded Q-factor, precision meas. 85−64263
short millimeter wave region high accuracy power meterwith self-calibration function 86−11687
short-circuited line method appl., uncertainty analysis 86−44381
signal testing with programmable switches and attenuators 88−29607
single microwave pulse energy meas. using ponderomotive transducers, dynamic error calc. *(Russian)* 85−31583
singular system anal., microwave radiometric data inversion for temperature retrieval 87−77660
SIR-B expts. in Japan, rice crop truth data collection 88−53361
SIRIO satellite, 11.6 GHz depolarisation meas. 87−7527
site diversity measurements with radiometers at 20 and 30 GHz 87−54563
six-port equations, exact solution 85−15000
six-port impedance meas. technique using planar symmetrical six-port junction 87−37503
six-port network analysers using diode detectors, estimation of true power ratios 86−17899
six-port network analyzer, Stokes vector representation, calibration and meas. 86−11686
slotless precision connectors for microwave charactn. meas. accuracy improvement, design and characts. 88−38832
snow, dielectric properties meas. in 3 to 37 GHz range 87−14483
snow, extinction coeff. of dry snow at microwave and millimetre-wave freqs. 88−10573
snow cover, microwaves interaction rel. to remote sensing, appl. 88−10565
snow cover charting, comparative utility of microwave and shortwave satellite data 85−15433
snow dielec. characts., meas. 86−65254
snow dielectric loss obs. at 3 to 37 GHz 85−64250
snow water equivalent retrieval, appl. of satellite microwave radiometer data 88−10572
snow-covered terrain, microwave emission brightening meas. using tower-based MOS-1 MSR 88−10571
snowpack melting meas. by microwave sensor for fixed frequency 86−3498

microwave measurement continued
soil hydraulic properties, discrimination by combined thermal IR and microwave remote sensing 87−57401
soil moisture, effect of meas. error and confusion from vegetation on passive microwave estimates 87−57402
soil moisture, microwave remote sensing 85−64759
soil moisture, passive microwave remote sensing 85−64761
soil moisture content monitoring using microwave signals, feasibility study 85−20714
soil moisture correlation with airborne microwave sensor data 85−64722
soil moisture measurements, results from Pushbroom microwave radiometer flight over Konza Prairie, Kansas 88−10574
soil moisture sensing, effects of salinity on microwave emission 87−57400
soil moisture sensing, parameterisation of effect of surface roughness on microwave emission 87−71367
solid-state microwave engng. in UK 87−32066
source SWR impedance meas. using sliding short cct. 87−8711
space radiometers appl. 86−56249
spacecraft, automated microwave testing 87−71204
spatial distrib. of electric field meas. in high-intensity EM wave, sensor design 86−5238
spectral analyser, 100 Hz to 22 GHz *(Swedish)* 88−16457
spectral analyser specification parameters and meas. uncertainties 88−67718
spectrum analyser, AILTECH 787, 100 MHz-26.5 GHz operation, config. and characts. *(French)* 85−31430
spectrum analyser, HP 70000 modular meas. system, design and characts 85−42927
spectrum analyser, HP 8562A, microprocessor-controlled with fully synthesized local oscillator 87−77173
spectrum analyser for use with mm-wave radiometer 87−63310
spectrum analyser techniques 85−15002
spectrum analysers, microprocessor controlled *(French)* 85−31418
spectrum analysers, technology, new developments from HP *(Italian)* 88−35880
spectrum analysers with counter accuracy to 325 GHz 85−58639
spectrum analysis, appl. of hollow-conductor type mixers *(German)* 85−14703
spectrum analyzers wider selection available 85−37522
spectrum-analyzer counters eliminate false counts 88−9913
spherical near field test range for meas. patterns of large beamwidth antennas 85−2669
spherical near-field meas., microwave holographic diagnosis of antennas 88−2711
spin-wave instability threshold meas. in microwave ferrites 87−49905
SSB microwave system meas., using network/spectrum analyser 85−63525
SSB mixer with beam lead Schottky diodes, noise figure meas. technique at 94 GHz 86−8519
standard EM field meas. methodology 86−24723
standard-horn gain calibration system 88−34424
standards, crisis, historical review 88−10115
standards, international comparison 86−38543
standards development, role of IEEE 88−10114
steel sheet thickness measurement by microwave Fabry-Perot resonator *(French)* 86−31648
stratosphere composition, appl. of balloon-borne microwave limb sounder 85−38345
stripline loss meas., ring resonator appl. 87−45148
subcarrier measurement systems, crosstalk suppression using double modulation technique 88−35366
submillimeter backward-wave-tube spectrometer-relaxometer, Ge relaxation time meas. appl. 88−53839
submillimeter detector for radioastronomy satellite, using solid-state devices 86−4781
substrate dielec. const., meas. methods 87−63494
substrate materials, dielectric measurements, microwave cavity perturbation technique 88−47662
superconducting systems, Q meas. using digital Q-meter 87−35127
surface resistance of metals meas. at X-band frequencies, using resonant cavities 86−44409
survey of microwave instrumentation *(Italian)* 88−16213
sweep generator, digital control for enhanced accuracy and functionability 87−24487
sweep generators, Wavetek model 960 micro Sweep series 86−5333
swept freq. spectrum analysers, operation and appls. *(German)* 88−29277
swept-frequency meas. technique upto 2 GHz *(German)* 86−70205
synthesized accuracy obtainable from an inexpensive source 86−60332
synthetic antenna, radiometric obs., corrections for increasing spatial resolution 87−75583
system delay lines effects anal. 87−70787
system for recording small frequency deviations ofmicrowave generators 86−27130
systematic errors in composite microwave system, computer-aided algebraic anal. 86−38534
technological aspects, book 88−11572
TEM cell design and performance with enlarged bandwidth and optimised working volume 88−2669
temperature determ. from microwave radiation, plasma diagnostics, appl. 85−47981
terrestrial microwave communication systems, signal-generator testing 85−57970
test and measurement equipment becomes expert 86−31173
test equip., growth of US industry 85−31523
test equipment on microstrip board 88−36197
test fixture de-embedding procedure, propag. const. determ. 88−38723
test range development of national antenna test facility at Paardefontein 85−46636
testing, using improved wideband waveguide loads 86−41303
text fixture charactn., S-parameters eval. using triple-through method 88−56858
theory and practice 87−70784
thermal asymmetry of varicocele, microwave radiometric detect. 86−11964
thermal diffusivity measurement of apples using microwave generators 88−60935
thermal dosimetry based on radiometry in multilayered media during microwave hyperthermia treatment 87−57227
thermal noise power standard, Watt unit realisation appl. *(German)* 85−14966
thermal patterns monitoring 88−4605
microwave measurement continued
thermoelectric primary measuring transducers, nonlinearity of calibration curves 87−35041
thermographic data inversion by singular function method 86−11965
thermometry of impedances by correlation radiometry 88−16456
thickness meter using the resonance of microwaves 85−48099
thin film ICs, metallization effects on microstrip loss *(Hungarian)* 85−61450
three-port microstrip impedance measurement system 88−67996
through-short-delay calibration technique for microwave S-parameter meas. 87−77386
time domain anal. using network analyser data 85−14731
time domain spectroscopy for dielectric props. meas., human skin in vivo meas. appl. 87−14484
time-domain reflectometry, single-reflection, conductivity limitations 87−29256
time-varying microwave impedance, tracking meas. using three fixed probes 88−60872
top dead centre measurement in engine, microwave technique and errors 86−31641
transducers, design peculiarities, impact on cond. structure control *(Russian)* 88−4380
transducers and meas. systems for industrial appl., book 88−55889
transistor noise parameters and noise-matching network losses, meas. method 87−32080
transistors, meas. of y-parameters of admittance matrix 86−14505
transistors large−signal narrow-band quasi−black-box model 86−53573
transition characterisation for de-embedding purposes 88−36199
transmission lines, expt. investig. of discontinuities 88−50299
transmission meas. with error correction, device under test modification 85−14733
transmission technique for dielec. meas. of packaging materials in rectangular waveguide 88−13607
transportable very-long-baseline interferometry, geophysics appl. *(Japanese)* 86−6072
trapped image guide, field distribution anal. 85−28679
trends in microwave measurements, USA industry 88−10113
tropospheric propagation and refractive index meas. *(Polish)* 86−22690
tropospheric propagation at low latitude areas 87−33439
TTL IC sensitivity to RFI determ. 86−57805
TV signals reflection and scattering by wind turbine blades 87−13849
two-port networks, noise parameter meas. considerations 86−50206
two-port resonant ccts., Q-factor meas. using network analyser 86−13910
two-port scattering matrix meas., using sliding load 88−16467
two-port scattering matrix meas. using sliding short 87−70783
ultra-high resolution backscatt. meas. of water splashes 87−8359
universal coaxial test fixture for packaged devices and active/passive chip components 85−14992
variable impedance method of microwave characterisation 86−18094
vector analyzer speeds power-sensor calibration results 88−4332
vector automatic network analysers, Line-reflect-Line calibration technique 87−70504
vector automatic network analysers, two-port verification standards in 3.5 mm and 7.5 mm 85−14718
vector network analyser, Wiltron 360, 0.5-40 GHz operation, design and features 87−70505
vector network analyser, Wittron 360, design, operation and appls. *(French)* 88−47460
vector network analyser for 1-18.6 GHz range, hardware and software modules *(French)* 88−67719
vector network analyzer, coaxial type with operation to 40 GHz, Wiltron Model 360 88−67716
vectorial network analyser, 300 kHz to 3 GHz *(Italian)* 87−3520
vehicle sensor based on radiometry 87−70633
very-high-speed semicond. devices charactn., conf., Bay Point, FL, USA (Mar. 1987) 88−37822
vital life signs detection using microwave energy and digital signal processing 88−10342
volumetric antenna structure and performance, microwave metrology 85−41718
VSWR and loss meas., adaptor reliability effects 85−58790
VSWR measurement of transmitter by using coupler and short 86−38528
W-band free-space and waveguide dielectric prop. meas. 88−29591
W-band power measurement using bolometer, high-performance thin-film barretter mount 85−31581
W-band Sixport network analyser for 90-100 GHz range 88−35895
wafer probe meas. accuracy improvement 88−74572
wafer probing, calibration methods 85−1062
wafer probing, techniques for MMIC testing and one-/two-port calibrations 85−48077
wafer probing techniques at microwave freqs. 88−36192
wattmeters, waveguide and coaxial reference, verification 87−35177
wattmeters calibration, mismatch errors elimination 87−70686
wavefront reconstruction via IR detection 85−52854
waveguide attenuation at 15 GHz, international comparison 87−32047
waveguide below cut-off attenuator, use in precision automated meas. system 86−31188
waveguide below cutoff attenuation standard calibration, using repeatable attenuation step 87−14508
waveguide dielec. measurements, modal anal. of waveguide dielec. measurements 88−42251
waveguide flange joints in 8 mm waveband, impact on reference devices and standards 88−36194
waveguide loads, reflection factor modulus meas. nonequidistant converter appl. 87−32040
waveguide noise generators, temp. distrib. meas. 86−38595
waveguide switch for low-noise radiometer 85−14997
waveguide transistor noise meas. system for mm-wave appls. 85−15007
waveguide-to-microstrip probe transitions for MM-wave device/cct. charactn. appls., design 88−70985
wet soil permittivity obs. at 3 to 37 GHz and −50° to 23°C 85−64249
wide-angle multicomponent diffraction microwave objective 88−4607
wide-band homodyne method of measuring microwavecircuits 86−31608
wideband backscattering meas. technique, computer controlled and error corrected 85−13109
wideband wafer probing, techniques for planar devices, review 88−42266
Wiltron 360 coaxial vectorial network analyser for 40 GHz, config. and performance *(German)* 88−35877
Wiltron 5600 series of scalar network analysers *(Italian)* 87−41432
Wiltron network analyser for microwave equipment *(Swedish)* 88−15990

microwave measurement continued
WMI 8003 precision scalar analyser uses power meter approach for wide dynamic range and accuracy 88−47448
Wobbulator and network analyser, Marconi Instruments 6310 and 6500 *(French)* 86−44332
X-band deployable mesh reflection, surface accuracy meas. by planar near-field scanning 88−2712
X-band electric noise standard 86−60330
X-band homodyne network analyzer with cascaded digital phaseshifters 86−38533
X-band microwave radiometer, design and fundamentals 88−53675
X-band scatterometer 87−77393
YIG single-crystal ferrites, relation between biassing magnetic field and linewidth 87−6999
Ag halide emulsion grain electron lifetime meas. by microwave photocond. *(Japanese)* 88−20489
(Al,Ga)As/GaAs modulation-doped FETs, microwave charact., small-signal parameters 85−6519
BN, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
$BaPb_{0.7}Bi_{0.3}O_3$ boundary Josephson junction array phenomena 86−58710
BeO, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
BeO permittivity meas., between 100 and 300K and 9.3 GHz 85−43074
C fibres, conductivity meas. by microwave cavity perturbation method 85−43065
GaAlAs, contactless semiconductor mobility determination by microwave magnetoconductance meas. 85−45390
GaAs FET noise charact. meas. at MM-wave freqs., test fixture design 88−12592
GaAs FET, picosecond optoelectronic diagnostics 87−26239
GaAs IC microwave meas. using electro-optic sampling 87−73783
GaAs IC testing in production environment 87−52516
GaAs MESFET, propag. consts. meas. technique 88−63883
GaAs MM-wave TED oscillators, cryogenic temps. cooled, expt. investig. 88−63926
GaAs MMIC process, microwave prober for yield validation 88−19376
GaAs MMICs, ATE system for 'on-wafer' evaluation of microwave and DC charact. 85−10478
GaAs Schottky varactors for microwave frequency tuning 88−50402
GaAs active layers, elec. characterisation by microwave absorption 88−32771
GaAs, contactless semiconductor mobility determination by microwave magnetoconductance meas. 85−45390
GaAs devices testing, with digital in-circuit test system 87−24600
GaAs low-noise transistors complete charactn., computer controlled test-set 88−60897
GaAs sampling ICs for microwave counters 86−70062
GaAs semi-insulating substrates, microwave photoconductance technique for non-destructive charact. 85−55472
GaAs slow-wave phase shifters characteristics at cryogenic temperatures 87−32077
GaAs substrate microstrip structures, direct calibration and meas. 87−8730
GaAs:Cr substrate, elec. uniformity, nondestructive characterisation by photoconductance technique 85−23446
p- GaAs-GaAlAs heterostructures, sub-MM-magneto spectroscopy 88−29624
H_2 active masers, meas. results *(French)* 88−58400
H_2, liquid, density measurement system, dielec. const. meas. *(Chinese)* 88−68044
KDP electrooptical power and spectrum analyser for pulsed microwave meas. 85−26470
Li-ferrite thick-film ferrimagnetic pastes, prep. and characterisation 85−50122
Nb sheet and sputter coated cavity meas. comparison 87−67997
Nb superconducting 2-1 material, microwave surface resistance at 4.2K *(Chinese)* 86−15415
Nb superconducting cavities, microwave surface resistance rel. to oxide layers 87−67996
$NiFe_2O_4$, Trans-Tech 2-111, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
Rb clock cavity, microwave field strength meas. via adiabatic rapid passage 85−31286
Si microwave power convertor, transmission-type bolometric 87−24422
Si, minority carrier lifetime meas. by chemical/microwave technique 88−57292
Si-Al_2O_3 composite waveguide, optically controlled, MM wave meas. 88−25360
SiO_2, complex dielec. const. meas. at 245 GHz using double-beam interferometer 87−6927
$YBa_2Cu_3O_7$, high T_c supercond., low loss in microwave cavity 88−7816
YIG filters, Ferretrac electronically tunable type for 0.5-40 GHz region measurements *(German)* 88−32381
YIG, hot-pressed polycrystalline, microwave loss investigation 85−58859

microwave-optical double resonance
ion storage techniques for frequency standards *(German)* 85−48046
magnetometer, optically pumped, sensitivity 88−35942
InP, semi-insulating behaviour after annealing in P, photoluminesc., ODMR studies 87−53189
InSe, direct band-gap exciton states, optical and elec. props. study 85−1319
a-Si:H, P doping, defect creation, photoinduced absorpt., ESR and ODMR studies 86−28146
a-Si:H solar cell, photovoltaic detection of magnetic resonance *(Chinese)* 88−69678

microwave oscillators
see also Gunn oscillators; microwave parametric oscillators; parametric oscillators; tunnel diode oscillators
2 GHz power oscillator with HXTR-4103 bipolartransistor *(German)* 86−14496
4 GHz dielectric resonator stabilised oscillator 87−994
4-cm-band generator stabilized by dielectric resonator 87−52861
6 to 18 GHz octave bandwidth varactor-tuned oscillators 87−66543
8 GHz CW gyrotron oscillator, high-power, prototype 88−25812
14-GHz ultra-high stability feedback oscillator with balanced amplifier 85−1043
16 GHz dielectric resonator oscillators with digital temperature compensation 85−33709
33 to 50 GHz BWO, sweepers upgrading and extension 85−23353
75 GHz coplanar Si IMPATT diode oscillator fabrication 88−63932

microwave oscillators continued
93 GHz injection-locked impatt oscillator 87−66525
100 GHz gyrotron development: main results and conclusions 88−38997
100 GHz varactor frequency doubler 86−8437
350-GHz phase/frequency locked loop for use with a carcinotron backward wave oscillator 87−13811
850-1000 GHz backward-wave oscillator for advanced applications 87−17336
1030 to 1090 MHz SAW hybrid VCO for IFF appls., development 87−38642
3200 series MIC oscillators, PLLs steady microwave DROs 87−52847
'Ka band Gunn diodes microstrip combiner' 88−56888
acoustic microwave frequency sources, developments and stability aspects, review 87−11037
AFC accuracy anal. 86−20353
AFC system, high-speed, with simplified tuning control *(Russian)* 87−17338
AM/FM noise under multifreq. operation, theoretical study *(Japanese)* 85−28728
AM/PM modulation, new measurement system for oscillator noise characterization 87−73742
automated microwave sweep-frequency system using klystrons and backward-wave oscillators 87−52863
automatic freq. tuning using extremum regulation system *(Russian)* 87−65918
avalanche diode synchronised oscillator, amplitude-to-phase conversion reduction 86−41341
avalanche transit-time diode oscillators, operation into nonlinear load, anal. 87−45249
axisymmetric quasi-optical gyrotron oscillator, fusion plasma heating appl. 85−6650
backward wave oscillator, gas-filled, resonant enhancement of microwave radiation, obs. 88−71284
backward wave oscillator, high power expts., performance charact. 88−25840
backward wave oscillators with rippled wall resonators, simulation and anal. 86−1639
BARITT oscillator optical injection locking considerations for phased-array radar transmitter appl. 85−40239
BAW reflection grating resonators 88−56899
bipolar transistor microwave self-excited oscillators, optimised design 88−25495
broadband microwave oscillators, comparison 87−37057
broadband synchronizer of microwave oscillators 85−6212
broadband varactor tuned MIC oscillators in the 6-18 GHz range, operation and charact. 87−32102
broadband VCO using dielectric resonators , config. with varactor tuning for AFC 88−71085
BWO, MM-wave source at Q-band, VBQ 7522 series, design and charact. 85−11852
BWO pulsed phase locked operation 85−61637
BWOs, plasma filled, high-power operation, theoretical and expt. study 88−50599
BWOs for subMM spectroscopy 87−45523
C-band medium-power active frequency doubler design for radar system 87−76851
CAD, for Earth station down convertors 86−4612
CAD tool for nonlinear microwave circuits driven by nonharmonically related generators *(French)* 88−66461
carcinotron freq. and phase stabilisation at 320-370 GHz 87−17651
cavity oscillator, freq. stability and thermal noise RF spectrum, theoretical/expt. study 85−17809
cavity oscillator, thermal noise and freq. stability, RF spectrum study 85−23116
cavity oscillators, Q-factor meas. technique 86−24726
cavity resonator excitation, space charge effects 86−29520
cavity stabilisation techniques for harmonic-mode oscillators 88−50407
centimeter, millimeter, and submillimeter wavelengthfrequency synchronizers 86−46631
circuit analysis and amplifier design, book 87−65112
Colpitts oscillator design, IBM PC program 88−999
common gate MESFET microwave oscillator stabilized by a dielectric resonator *(Chinese)* 87−37531
computer aided design and characterisation of MMIC oscillators using physical device models 85−11094
computer graphics aided large signal design methods 86−27016
confocal Fabry-Perot microwave resonator at 48 GHz for high-resolution spectroscopy 87−49973
correlated-line FM signal generation, solid-state source *(Chinese)* 87−37530
coupled Josephson local oscillator and detector experiments in the tetrahertz regime 88−58037
coupling coeffs. and injection-locking charact. 88−25042
crystal oscillators with fundamental freqs. in UHF and microwave regions, design procedure 88−12587
cubic YIG components save time and space 86−58058
cusptron, design optimisation 88−25829
cusptron, fundamental and 2nd harmonic freq. generation 88−25814
cusptron, six-vane circuit 88−25830
cusptron, theory and simulation 88−25828
cusptron oscillator, fundamental and harmonic electron cyclotron frequencies generation 88−64190
cusptron oscillators, operation charact. simulation 88−25816
cusptron tube, 8th-harmonic type, performance, expt. 88−25817
CW Doppler radar systems, oscillator short term stability effect on meas. accuracy *(German)* 88−35573
CW high power ATT oscillators, modelling and realisation in 94 GHz window *(French)* 88−63557
CW source provides pulsed microwave signals 88−38740
cyclotron autoresonance maser oscillator, 100 GHz, design 88−27004
cyclotron maser, high-harmonic, and peniotron interactions, energy transfer eqn. 85−2165
cylindrical cavity, energy storage and output in the TE_{01} mode 87−45201
cylindrical cavity multiple-device oscillator, stable power combining mode operation study *(Japanese)* 86−14045
cylindrical cavity multiple-device oscillator, stable power combining mode operation 87−45225
cylindrical dielec. resonator stabilised, props. and charact. *(Polish)* 86−35063
design, generalised two-port method 88−25468

microwave oscillators continued
design and performance of oscillators using semiconductor delay lines 88−50413
design method 87−17389
design problems of MM-wave oscillators and mixers 86−27621
dielectric disk resonator stabilized 85−6216
dielectric microwave resonators, devel., appls., construction, and operation *(Dutch)* 88−50305
dielectric resonator microwave oscillators, stable signal source 86−1363
dielectric resonator oscillator, optically controlled microwave cct. design and expt, study at X-band 86−14520
dielectric resonator oscillator embedding network CAD optimisation 87−17369
dielectric resonator oscillator theory 86−1375
dielectric resonator oscillators, appl. of GaAs heterojunction bipolar transistors, tuning and performance 87−24450
dielectric resonator oscillators, freq. stability in L-band 87−73779
dielectric resonator oscillators, MIC design and characts. *(German)* 85−11554
dielectric resonator oscillators, varactor tuned, digital and analog freq., temp. compensation techniques 85−17806
dielectric resonator oscillators at 4, 6, and 11 GHz 87−6094
dielectric resonator oscillators at 4, 6 and 11 GHz 87−11019
dielectric resonator oscillators for telecomm. systems, unified design 87−6144
dielectric resonator stabilised oscillators, configs. and characts. for EW/ECM appls. 88−12590
dielectric resonator stabilised oscillators, temp. stability modelling technique for resonator parameter selection 88−1000
dielectric resonators for fundamental mode IC W-band oscillators 87−6021
dielectric split-ring resonators, struct., props., filter and oscillator appls. 88−70996
dielectric type resonance oscillators *(Italian)* 88−32382
dielectric-resonator oscillator, L-band, electronic varactor tuning, 1325 MHz, design for airborne appls. 88−50381
diffraction electronics devices, optimisation using Pontryagin maximum principle 86−21015
diffraction radiation oscillator, anal. and expt. study 88−7259
diffraction radiation oscillator design and operation *(Chinese)* 88−38983
digital microwave synthesizers *(German)* 87−35105
diode, mixer, local oscillator waveforms determ., modified harmonic balance technique 88−32058
diode generators, ridge waveguide resonator mounted, electrodynamic anal. 88−25497
diode microwave oscillators, frequency stability 88−63914
discriminators using MSW delay lines, automatic phase noise meas. 87−7036
distributed interaction O-type oscillators, effect of space charge field on output characts. 85−50148
Doppler short-range systems, performance characts. comparison 88−71013
double barrier quantum well oscillators, time-depend. approach 88−32413
double barrier resonant tunneling oscillators, freq. limit 86−62469
double dielec. resonator oscillators, configs. with wide linear tuning and temp. compensation 88−71086
double mode oscillator, injection locking with fundamental and third harmonic resonators 86−67072
double-barrier resonant-tunnelling oscillators, freq. limit 85−61446
driving-point analysis of multiple-step radial-resonator waveguide diode mounts with application to IMPATT oscillator circuits 87−73761
dual-diode oscillator uses IMPATT devices 86−14506
EHF extended interaction oscillator/amplifier modulator technology 85−6647
EHF quasi-optic oscillator with efficient power combining 88−63890
electron beam-travelling-electromagnetic wave system, self-modulation instability 86−47247
electronic tuning of magnetron oscillators using PINdiodes 85−61629
electronically tunable microwave oscillators, colloquium, London, England (Jan. 1987) 87−31158
electronically tunable MM-wave gyrotron BWO, design 88−25837
electronically tuned microwave solid-state source, injection-lock bandwidth extension technique 85−50040
EPR spectrometers with AFC, power supply of klystron oscillator 87−65833
European market emphasises the need for better oscillators *(Italian)* 88−32424
EW systems, magnetostatic wave technology appl. 86−23954
fast-settling, low noise *Ku* band fundamental bipolar VCO 87−73752
fast-switching X- and Ku-band multifrequency DRO using single GaAs FET 87−73728
FET, dielec. resonator parallel feedback design 85−17848
FET frequency dividers, transfer properties 85−11493
FET generators synchronisation 87−59859
FET microwave oscillators with feedback, design 88−1022
FET oscillator, dielec. resonator stabilized, 7 GHz operation, mech. tuning, design and performance 87−17381
FET oscillator, LF noise upconversion, theoretical anal. 85−34181
FET oscillator with dielec. resonator, 13 GHz, gate bias voltage modulation, FSK transmitter appl. 88−56985
FET oscillators, design method 86−58060
FET oscillators, expt. eval. to determ. device parameters 86−62836
FET VCO, medium power, design 88−50409
fluctuation characts. meas. by autodyne method 87−63505
fluctuations in a combination-frequency generator 87−52434
flux-flow type Josephson oscillator, coupling to SIS detectors, MM-wave emission study 87−74594
fluxon feedback oscillator 85−1864
FM noise meas. system using delay line discriminator *(Chinese)* 87−41599
four self-excited oscillators in nonsymmetrical system, stability of power summing regime 85−634
free-running dielectric resonator oscillator, specifications 88−7055
frequencies metrology *(French)* 87−16932
frequency control systems *(Spanish)* 87−44645
frequency conversion with an image channel suppression 88−50390
frequency dividers using injection-locked oscillators 88−50348
frequency synthesizer based on single broadband BWT oscillator, 40 to 60 GHz waveguide band 87−983
frequency-translation-loop-based millimeter wave frequency synthesizer 86−27140
front panel programmable microwave sweep generator 86−38404
generation mechanism in systems with virtual cathode 88−64207

microwave oscillators continued

gyrotron, high-density electron beams, negative mass instability 85−28905
gyrotron, high-power step-tunable, single mode operation 87−73963
gyrotron and peniotron oscillators, harmonic cyclotron freq. operation, threshold power transfer anal. 86−53293
gyrotron backward wave oscillator as high-power tunable MM-wave source 88−44524
gyrotron BWO, linear theory and design study 85−55407
gyrotron interaction models for oscillators 87−24693
gyrotron mode conversion at a waveguide-taper junction 85−1233
gyrotron oscillator, 100 GHz, 500 kW, beam and cavity design 85−50156
gyrotron oscillator, 100 kW CW operation, design considerations 85−50157
gyrotron oscillator, 140 GHz 200 kW CW operation, design and performance 87−45518
gyrotron oscillator, 150 GHz, self-consistent calc. 87−32199
gyrotron oscillator, 200 kW, 100 GHz, design, performance and modes study 88−25796
gyrotron oscillator, 8 GHz, design features and performance 87−45521
gyrotron oscillator, beam-wave dynamics, self-consistent time-dependent particle simulation 88−64187
gyrotron oscillator, CW type, preliminary design of 280 GHz, 1 MW device 88−25797
gyrotron oscillator, freq. shift meas. 87−24694
gyrotron oscillator, high power K_a-band expt. 87−66828
gyrotron oscillator, high-power second harmonic emission and freq. locking 85−40396
gyrotron oscillator, K_a-band, axial slotted cavity effects 88−64189
gyrotron oscillator, operational study at 65 GHz 85−34430
gyrotron oscillator, overmoded, mode control via priming, theoretical and expt. study 88−25799
gyrotron oscillator, pulse-line-driven, transient behaviour simulation 88−64188
gyrotron oscillator, whispering gallery mode, cyclotron maser and peniotron-like instabilities study 85−1232
gyrotron oscillator tubes, nonlinear saturation, meas. and anal. 87−66821
gyrotron oscillators, AC and DC transverse self-fields 87−24687
gyrotron oscillators, high-harmonic types for MM-wave operation 85−18021
gyrotron oscillators, overview 88−71278
gyrotron oscillators, phase locked, 10-85 GHz range, NRL SDIO/IST programme 88−50579
gyrotron oscillators, slotted rectangular type, high harmonic emission 88−25813
gyrotron oscillators with slotted cross-section struct., linear-theory anal. 88−64185
gyrotrons, complex cavity, self-consistent RF field approach 85−23342
gyrotrons, starting current and mode competition, linear theory validity study 88−64186
heat sinks using Type 2A diamond, nonlinear heat transfer, mathematical model 88−49550
HEMT and MESFET microwave oscillators, phase noise 87−73747
HEMT millimeter wave amplifiers, mixers and oscillators, design and development 87−38330
HEMT MM-wave dielec. resonator stabilised oscillator, 44 GHz, design and characts. 86−20832
Hertz resonator explains modern oscillators 86−34605
heterodyne for microwave transceivers in radio relay station 88−44353
heterodyne investigations into FIR laser outputs and quasi-optical Schottky barrier diode detectors 85−11564
high efficiency millimeter wave monolithic IMPATToscillators 86−27632
high power submillimeter gyrotrons operating at second harmonic 88−25805
high-power backward-wave oscill. driven by a relativistic electron beam 86−21056
high-power Cerenkov oscillator, 10 GHz, annular relativistic electron beam instability 85−6655
high-power reflex triode microwave source investig. 86−21033
HP 83550A PF plug-in for HP 8350B Sweep Oscillator 88−38408
IMPATT amplifier and oscillators, design using microstrip components, 75-110 GHz freq. range 86−27587
IMPATT cap oscillator and determ. of diode parameters, expt. charactn. 86−53070
IMPATT cap oscillator behaviour and resonance frequencies 88−50358
IMPATT coaxial oscillator ccts., stability criteria, theoretical and expt. study 85−6205
IMPATT diode MM-wave amplifiers and oscillators, operating cct. efficiency evaluation and optimisation 85−17862
IMPATT diode oscillations, flicker fluctuations 86−35089
IMPATT diode oscillator with second harmonic signals, noise anal. *(Japanese)* 87−11058
IMPATT diode oscillator with second harmonic signals, noise 87−73666
IMPATT diode oscillators, broadband varactor-tuned, anal. 85−22700
IMPATT diode oscillators, high-power, external synchronisation 86−20352
IMPATT diode oscillators, power and freq. characts. comparison above 100 GHz using theoretical models 85−6525
IMPATT diode oscillators under multifrequency operation, AM and FM noise 85−55160
IMPATT diode planar oscillators with dielec. resonators, design aspects, pulse and CW modes 85−34172
IMPATT generators with varactor tuning, multidiode, anal. 87−16928
IMPATT low-noise oscillator design at 140 GHz 86−20830
IMPATT MM-wave oscillators, frequency chirp phenomenon 88−56929

microwave oscillators continued
IMPATT oscillator, optical tuning and injection locking 87−45257

IMPATT-diode oscillator, parameter variations effect on charact., computer study 88−7061
indirect optical injection locking of dielectricresonator oscillator for phased array application 86−43074
injection locked 94 GHz IMPATT oscillator chain, three stage, design 87−41021
injection-locked oscillator, transient and modulation conversion 88−50324
injection-locked oscillator output power, phase-plane analysis 88−56946
injection-locked pulsed microwave oscillators, pulse-to-pulse incoherence noise, phase-locking dynamics 85−23105
injection-locked pulsed microwave oscillators, pulse-to-pulse incoherence effects on noise charact. 86−14489
injection-locking charact., coupling coeffs. study *(Japanese)* 87−6067
InP MISFET X-band oscillator and K-band oscillator-doubler performance 85−11569
integrated antenna-mixer and MESFET local oscillator circuit 88−25564
integrated finline technology, review 86−53018
integrated YIG filter/oscillator 87−66553
inter-injection-locked oscillators, radiation coupling 88−19378
inter-injection-locked oscillators for power combining and phased arrays 87−10716
inter-injection-locked oscillators with applications tospatial power combining and phased arrays 87−6100
Josephson junction arrays, mutual phase-locking 85−1874
Josephson local oscillators for millimetre and submillimetre wave generation 88−58038
Josephson oscillator, coupling to external circuits via supercond. thin film 88−26716
Josephson oscillator, flux-flow type, thin-film coupling method 88−33571
Josephson oscillator, flux-flow-type, for MM and subMM radiation 85−18609
Josephson oscillators, voltage tunable, phase-locking in distrib. arrays 87−67876
Josephson tunnel junctions, capacitively coupled, local oscillator feasibility study of gap freq. 87−74591
Josephson VCOs, tunnel junction/resistive SQUID cct. config., chaos and bifurcation study 87−74590
Ka-band dual-channel tracking receiver converter 87−6152
Ka-band gyrotron oscillator expt. 88−25809
Ka-band PC mixer with compact filter for step-tuned local oscillator 87−6153
Ka-band transmitter, mm-wave hardware miniaturisation 86−37936
Kashima 26 m antenna, front end charact. *(Japanese)* 86−30932
Kubo oscillator and quadratic devices , nonlinear response 88−71012
L-band dielec. resonator stabilised microstrip oscillator, low noise design and charact. 87−73729
L-band two-port dielec. resonator oscillator freq. stability, phase noise and temp. sensitivity 88−25467
ladder type multiple device oscillators, parallel running of two systems 87−540
ladder-type multiple-device oscillators, parallel-running of two oscillators study *(Japanese)* 85−45241
large-signal load-pull meas., vector error-corrected calibration technique 88−22756
large-signal modulation of semiconductor lasers with optical feedback for millimeter wave applications *(Japanese)* 87−75130
laser-induced resonance Raman clock, using Na atomic beam 86−38575
linear electron accelerator, master oscillator, self-modulation regime 88−36325
loading and injection-locking charact. study using mathematical model 85−40229
loading charact. rel. to mutual sync. charact. *(Japanese)* 88−19354
local oscillator leakage cancellation cct. for RF mixer operating outside IF freq. range 86−20378
local oscillator selection for digital satellite communications 88−63921
local oscillator synthesizer concept, 4 to 12 GHz 87−32060
local oscillators as microwave sources for digital radio systems, design aspects 88−28658
locked mode design, transistors large signal S-parameters appl. 85−22698
low noise dielectric resonator stabilized X-band bipolar oscillator 87−59903
low noise microwave signal synthesizer 87−66554
low phase noise *X*/*Ku*-band VCO 87−73754
low-noise D-band impatt oscillators 87−45227
low-noise feedback oscillator design, general procedure 87−37059
low-noise microwave frequency synthesizer using varactor tuned dielectric resonator oscillator 87−44658
low-noise microwave signal generation using bulk- and surface-acoustic-wave resonators 88−57885
low-noise oscillator design using CAD tools 87−23978
LSA generator, LF noise anal. 85−11087
M-type self-excited oscillators, oscillations buildup 87−17608
M-type self-oscillator, pilot signal excitation study and design considerations *(Russian)* 86−41482
magnetically insulated transmission line oscillator, high power microwave generation, theory and simulation 88−7261
magnetically insulated transmission line oscillator 88−25777
magnetically-tunable oscillator, realisation with three-port ferrite resonator cct. using slot line *(Japanese)* 85−28727
magnetostatic surface wave delay line based microwave oscillator *(Japanese)* 87−12058
magnetostatic surface wave delay lines, narrowband, tunable microwave oscillator appl. 86−22030
magnetostatic wave resonators and oscillators 86−20790
magnetron maximum currents with secondary-emission cathodes *(Russian)* 87−37824
magnetron oscillator, analytical estimate of limiting parameters 86−41478
magnetron oscillator, residual gas effect on noise *(Russian)* 87−17618
magnetron oscillators, multiple-freq. mode, radar appl. *(Russian)* 87−17617
magnetron transmitter modulation using MOSFET pulse amplifier 85−61631
magnetrons, nonuniform magnetic field effect on output parameters *(Russian)* 88−19616
MESFET microwave oscillator design *(Japanese)* 87−73759
microwave oscillators continued

VCO time varying freq. characts., meas. technique 88−18975
VCO using dielec. resonator 88−56909
VCOs evaluation for system design 86−20846
VCOs for freq. synthesizer appls., controlled tuning considerations 87−32107
VCOs for microwave systems, varactor and YIG types; broad tuning range performance 88−978
VCOs with low-phase-noise , use of Si PBTs for up to 20 GHz operation 88−71078
VHF oscillators using microwave integrated circuits 88−19386
Vircator II operational characteristics study 88−64192
virtual cathode oscillator, electron beam driven, microwave generation 87−73961
virtual cathode oscillator, high-power emission study 88−12884
virtual cathode oscillator, pinched diode driven, dynamics 87−24710
virtual cathode oscillator, radially and axially extracted 86−21032
W-band IMPATT oscillators, optical control 87−17348
W-band microstrip components 86−8438
waveguide-below-cutoff technique 86−67483
wideband digitally tuned oscillator technology for electronic defense 88−63938
wideband quartz crystal synchronisation of microwave generators 88−70588
wideband SHF VCOs using hyper-abrupt profile varactor diodes, design and performance 87−32103
wideband tunable microwave oscillators, design 85−24879
wideband varactor tuned oscillators, 4-20 GHz, design and construction 87−17388
window-output cylindrical cavity multiple-device oscillator, power combining operation *(Japanese)* 87−11023
wobbulator, calibration using digital techniques *(French)* 86−55753
Wobbulator, microwave, programmable, Marconi instruments 6310 with calibration features *(French)* 86−44332
X-band analogue ccts. of third-generation MMICs from ELAB 87−11061
X-band dielect. resonator oscillator, transmission injection-locked, wideband config. with fast locking 88−71084
X-band dielectric resonator oscillator, FM modulated, optically tuned 85−11570
X-band dupletron, magnetron oscillator/duplexer/solid-state receiver package, marine radar appls. 86−20813
X-band oscillators, indirect optical injection locking 86−27577
Zener oscillator for TH_z region 85−34932
AlGaAs/GaAs HBT low-noise oscillator, Ku band 88−71090
AlGaAs/GaAs double-barrier resonant-tunnelling oscillators, operation 86−47529
AlGaAs-GaAs HBT microstrip oscillator, 15.6 GHz, design and performance 88−32418
AlGaAs-GaAs low-noise microwave amplifier and IMPATT oscillator 87−52831
GaAs 115 GHz monolithic FET oscillator 86−35111
GaAs, 35 GHz stable FET oscillator, dielec. stabilised 87−6143
GaAs 69 GHz MMIC FET oscillator 85−17835
GaAs FET YIG-tuned fundamental output oscillator of 33 to 50 GHz 87−995
GaAs FET YIG-tuned transistor oscillators provide wide coverage and low phase noise 87−45261
GaAs, FET dielec. resonator oscillators, anal. of long-term freq. drift 88−25466
GaAs FET dielec. resonator oscillators, stability 87−73753
GaAs, FET dielectric resonator stabilised oscillators, design and characts. study 85−40238
GaAs FET microwave oscillator, signal and noise performance 87−24462
GaAs FET oscillator, 4 GHz, low-noise design with dielec. resonator and varactor tuning 87−45270
GaAs FET oscillator, Ka-band operation, design and performance 85−55142
microwave oscillators continued
GaAs FET oscillator, W-band, 70-110 GHz 85−28714
GaAs FET oscillator design, analytic approach 87−6088
GaAs FET oscillator, highly stabilised design for Ku-band satellite receiver *(Japanese)* 87−24457
GaAs FET oscillator in 13 GHz freq. band *(German)* 85−1025
GaAs FET oscillator, stabilised ultra-low noise with dielec. resonator 87−6093
GaAs FET oscillator with a dielectric resonator feedback *(Chinese)* 88−7066
GaAs FET oscillator with dielectric resonator *(Croatian)* 88−32449
GaAs FET oscillator with dielectric resonator *(German)* 86−52714
GaAs FET oscillator with low phase noise 86−8481
GaAs FET oscillators optical injection locking using fibre optics 87−6148
GaAs FET single dielec. resonator oscillator, low-noise type, anal. and X-band design 85−23115
GaAs FET wideband VCO using hybrid technology, CAD method and implementation 87−11038
GaAs IC 69 GHz monolithic FET oscillator 85−1058
GaAs Ku-band monolithic VCO 87−59869
GaAs MESFET MIC oscillator, 94 GHz low noise design using whispering-gallery resonator modes 88−71069
GaAs MESFET MIC oscillator, quasi-linear design method 86−41326
GaAs MESFET microstrip oscillator, Q-band config. with 30% efficiency 88−19358
GaAs MESFET oscillators, 1/f FM noise study and reduction method 85−17856
GaAs MESFET oscillators, Ka- and Ku-band, efficiency/power/device characts. relationship study 85−28718
GaAs MESFET oscillators, device LF noise and oscillator phase noise relationship study 85−17854
GaAs MESFET oscillators, nonlinear design and optimisation procedure 87−73788
GaAs MESFET oscillators, optical injection locking anal. 85−11069
GaAs MESFET self-bias mode oscillator, large-signal anal. and MIC implementation 86−41329
GaAs MESFET-like, millimeter wave microstrip oscillator, MIC compatible, 10 mW, 30 GHz 88−56967
GaAs MM-wave TED oscillators, cryogenic temps. cooled, expt. investig. 88−63926
GaAs MM-wave mixed tunnelling and avalanche transit-time oscillators, noise performance 85−6510
GaAs MM-wave monolithic IMPATT VCOs 88−63956
GaAs MM-wave monolithic IMPATT oscillators 86−8479
GaAs MM-wave self-oscillating mixer using FET harmonic-mode oscillator 87−6146
GaAs MMIC 60 GHz CW IMPATT oscillator 88−63957
GaAs MMIC VCO, broadband design for 2.5-6 GHz range 88−71071
GaAs MMIC VCO using common drain MESFET, equiv. cct. model, design and realisation 87−32104
GaAs MMIC VCO with 1/4 analog freq. divider, 11 GHz, design and performance 86−35119
GaAs MMIC technology, 1 GHz RF modules 88−25511
GaAs MMIC varactor tuned FET oscillators, X- and Ku-band, modelling and optimised design 88−71070
GaAs MMICs, VCO, freq. divider, power splitter for X-band PLL-stabilised local source 86−58051
GaAs SAW delay lines for oscillators, 1.5 GHz operation, theoretical and expt. study 85−62170
GaAs TED microwave devices using graded doping profiles 88−25555
GaAs *V*-band monolithic IMPATT VCO 88−71092
GaAs X-band varactor tuned monolithic FET oscillators 88−50367
GaAs, field-effect tetrode based microwave oscillator design 88−38748
GaAs high-performance MMIC oscillators, C-band to Ku-band 88−25463
GaAs microstrip patch antenna with embedded IMPATT diode oscillator 87−26986
GaAs microwave resonator, oscillations amplification 86−53015
GaAs microwave tuning Schottky varactor development *(Hungarian)* 88−32426
GaAs monolithic IMPATT diodes for MM-wave appls. 85−34173
GaAs monolithic IMPATT oscillator, Q-band, MBE fabricated, design and performance 88−19403
GaAs monolithic Ka-band VCOs 88−63955
GaAs monolithic VCO, 14 GHz band, appl. to microwave PLL *(Japanese)* 86−27617
GaAs monolithic astable multivibrator type VCO operable up to Ku band 85−11095
GaAs monolithic prescaler and phase-freq. comparator IC, ultra-high-speed, VCO appls. 86−62539
GaAs single-resonator FET oscillator, low-noise design and tuning configs. 85−17855
$GaAs/Al_xGa_{1-x}As$, resonant tunnelling heterostruct. oscillator, current-voltage meas. 86−8828
GaAs/GaAlAs heterojunction bipolar transistor dielec. resonator oscillators 87−6096
GaAs-AlGaAs, quantum well surface plasmon oscillator 87−37534
GaAs-FET YIG-tuned oscillators, multi-octave performance 86−8482
GaAs-InGaAs-AlGaAs DH MODFETs at K-band, HF high-field instability, tuned oscillator demonstration 88−25449
He-Ar laser frequency meas. at 2.39 μm 86−36397
InP Gunn devices for MM-wave 85−6511
InP MM-wave amplifiers and CW oscillators, design and performance 85−50037
InP MM-wave devices and components 85−1016
InP TED 140 GHz oscillator, second harmonic, wideband tunable 86−62822
InP and GaAs EHF transferred-electron devices 85−55161
InP diodes application *(Dutch)* 86−15102
InP lateral transferred-electron oscillators, monolithic and discrete 88−71091
$LiNbO_3$ subminiature/thin-membrane resonator configurations and characteristics 87−1854
$LiTaO_3$ subminiature/thin-membrane resonator configurations and characteristics 87−1854
Si 60 GHz baritt diodes as self-oscillating mixers 86−53032
Si IMPATT diode power combiner for W-band transmitters, design and performance 87−40639
Si MM-wave ICs for receivers and transmitters 88−63958
Si W-band pulsed IMPATT oscillator design 88−32475
Si bipolar transistor Ku-band oscillators with lowphase-noise 87−6095

microwave oscillators continued

airborne platforms capability assessment 86−70459
airborne radar, multistatic and backscattering cross sections simulation 87−13762
airborne reconnaissance, conf., Diego, CA, USA (Aug. 1985) 87−10012
airborne reconnaissance systems, microprocessor based 88−48412
airborne reconnaissance systems evolution 87−4086
airborne weapon systems development, CAD approach 88−54709
airborne weapons platforms capability assessment 88−48271
aircraft, acoustic detection and tracking, wideband array processing 87−9053
aircraft, use of colour moving map display databases 87−40701
aircraft and weapons maintenance system 85−31345
aircraft detectability meas., using simulated IR surveillance equipment 88−30079
aircraft flight simulation, ASAP (AI-based situation assessment and planning) system 88−68529
aircraft guidance and control 86−70505
aircraft management system, four-dimensional trajectory optimisation 87−77702
aircraft Meta-Expert System development, for military appls. 86−70501
aircraft sensor control and data annotation, use of standard digital multiplex bus 85−4404
aircraft weapon systems, sensor subsystem role and architecture 88−61549
airframe company radar simulations, requirements and appls. 87−13789
airlaunch officer training, simulated feedback from Harpoon anti-ship missile launcher 88−48269
AMPES: adaptive mission planning expert system for air mission tasks 88−68696
Analyst's Associate: a natural language model for advanced military message handling 88−9078
anti-submarine warfare, meeting today's challenge 86−70550
anti-vignetting technique for super wide field of view mosaicked images used in pilot training 87−39901
antisubmarine warfare helicopter mission avionics 88−68683
Army-NASA aircrew/aircraft integration program, human-machine engineering 88−68694
artificial intelligence to automatic testing, US Navy TGIR Program 88−35842
ATC part-task training in Royal Air Force, case study 87−14982
ATE, use of third-generation commercial ATE 86−24329
ATE conf., Long Island, NY, USA (Oct 1985) 86−33922
ATE modular concept for Swedish multivariable combat aircraft 85−31350
ATE procurement and management Royal Australian Air Force 87−20866
ATE standardisation, appl to digital pin electronics module 85−31338
ATE supportability within US Navy, CASS program expansion 87−20890
ATE systems, interface connecting devices design 87−20869
ATE systems development, parallel processing techniques overview 85−31340
ATLAS implementation for electronic counter measure systems testing, 716 C/ATLAS version 85−31356
attack management test bed prototype 88−68714
auto-tracker-vision system with applications 85−3707
automated maneuvering attack system, AFTI/F-16 advanced development program 86−70470
AUTOTESTCON 84, conf., Washington, DC, USA (Nov. 1984) 85−27942
AUTOTESTCON 87 conf., San Francisco, CA, USA (Nov. 1987) 88−31292
avionic advanced system design management 88−61559
avionic ground support equipment, test requirements documents development 85−31369
avionic modular system, integrated design for performance and supportability 88−5082
avionics ATE, user contributions 87−21726
avionics expert system for ground threat assessment 87−77768
avionics integration, test facilities and support technologies 88−68582
avionics maintenance 2010 87−14994
avionics system design, development and testing, conf., Las Vegas, NV, USA (May 1987) 88−55841
avionics test program set acquisition, competitive procurement, US Navy appl. 85−31896
B-1B bomber, computer-controlled avionics system featuring navigation, radar and ECM 86−18424
B-1B centralised test program set integration facility 88−35826
ballistic flight simulator, computerised control system and data acquisition 86−38873
ballistic missile defense effectiveness, Monte Carlo exchange simulation 88−17015
battle damage, equipment vulnerability analysis using simulation 88−17008
battle information management, voice recognition appl. 88−14634
battle management algorithms, testing 88−17018
battle management simulation criteria 88−17017
battlefield communications and network management developments 85−47208
battlefield electronic communications-electronics operating instructions 87−76548
battlefield situation assessment, performance in distributed problem solving 88−30224
battlefield spectrum management, artificial intelligence technology appl. 88−23231
BDFA data-flow multiprocessor architecture 85−8476

military computing continued
bird identification for avoiding aircraft collision, use of DEC MicroVAX II 87−56225
boustrophedonic method for compression ofDefense-Mapping-Agency data 86−69096
bubble subsystem for military environment 87−46400
built-in test techniques for VLSI control sequencer of military computers 85−17536
built-in-test equipment implementation of universal pin electronics 85−31342
C^2 systems development, system design approach 88−61733
CAI system for image interpretation instruction, commercial and military appls. 88−47210
Canadian Department of National Defense speech projects, review 85−57316
cartographic system for night attack aircraft 86−70458
CCD analog array processor of IR images, military appl. 85−8779
civilian applications of military technology spinoffs 88−54817
closed-loop simulator for tactical aircraft systems 88−5052
cockpit automation and dynamic allocation, engineering issues and approaches 88−68685
cockpit automation design support system development 88−61561
cockpits and expert systems, appl. of human factors 88−30121
Collins CP-1516/ASQ automatic target handoff system, battlefield mission computer, design and performance 87−40537
commercial computers for military applications 88−30220
common signal processor, application and design 87−49641
communication aspects, conf., Monterey, CA, USA (Oct. 1986) 87−36325
communication systems monitoring and control expert system 86−43455
communications, recent advances 86−54761
communications controller prototype 86−48963
computer architecture for integrated systems 88−48272
conference on aerospace and electronics, Dayton, OH, USA (May 1987) 87−72887
crew station design utilities, early assessment predictive models appl. 88−68693
crewstation integrated design, systems engineering approach 88−61558
crisis management in tactical military arena coding strategies 88−46894
cruise missile and launch vehicle avionics, embedded reconfigurable computer appl. 86−18479
cueing system 87−3493
custom VLSI solution for MIL-STD-1553 B *(Spanish)* 87−73513
Danish Defence Integrated Communication System, implementation and lessons learned 86−23292
DARPA internet protocol suite 85−42256
data bus, high speed, for Pave Pillar appls. 86−12089
data bus system, dual channel, high speed multiplex, for aircraft 86−11140
data highway systems, evolution in the armed forces 86−30424
data processing equipment designed to meet military specifications 88−30221
database devels. for geographic data, Military Survey 88−36721
DATAR development, electronic information and communication system 87−55486
Defence Data Network planning, AI appl. 87−69637
defence departments electronics manufacturing methods and technology program 86−180
defence fixed telecommunications system (DFTS) UK 88−46730
defence integrated secure communications network, DISCON, Australia 85−63218
defence projects, automated reporting system 86−34007
Defense Data Network, X.25 standard, host interface considerations 85−30735
Defense Mapping Agency database, synthetic enhancement of Level-V data for flight simulators 85−9281
deformation-tolerant statistical correctors for enhancement of ship silhouette recognition 88−21326
diagnosis and repair of complex systems, integrated electronic data delivery and training 88−36717
diagnostic expert system for strategic aircraft 86−70445
diagnostic expert system for the B1B strategic aircraft 88−47414
digital geographic data for defence 88−36720
digital map as tactical situation display 87−50518
directed energy weapons, integrated modelling and simulation 87−35462
display-control I/O, compatibility and integrality, effects on dual-task performance and subjective workload 87−69080
distortion-invariant pattern recognition algorithm, aircraft recognition appl. 87−62197
distributed signal processor, dedicated simulation facility 88−3081
Divad air defense system, development 85−20261
DoD communications system control, machine intelligence appl. 88−21503
DoD protocol conformance test laboratory 88−52955
DOD space systems data base 85−31889
dynamic IR missile evaluator upgrade for imagery 88−75024
Earth-launched interceptor rockets, optimal trajectories computing based on simulation 88−68715
Earth-launched interceptors at supercritical speeds, trajectory optimisation 88−61744
electro-optical target identification, aspect angles estimation by Kalman filtering 87−75845
electronic and military products development 88−61772
electronic manuals developments 88−36713
electronic spreadsheet programs for reliability and maintainability engineering problems solving on PC 87−44078
electronic support measures, system design, blackboard architecture appl. 86−30887
electronic systems support programs implementation 88−29264
EM gun engagement model 87−7512
engineering drawing storage, US Air Force and Army 88−36710
equipment design analysis expert system for improved reliability and maintenance 88−61752
ESM data processing, metric techniques appl. 85−58167
ESM processing system development, simulation methods design tool appl. 85−58198
ESM system development and support, EM environment synthesis 85−58199
EW equipment for peace and war 86−43902
EW signal processing, technology development for year 2000 87−39798
EW simulator for aircraft penetrating ground defences 87−13778
EW simulators, real time digital systems 87−48886
EW situation assessment processing requirements 88−68684

military computing continued
expert diagnostic tool, personal computer based, for military avionic systems 88−36608
expert system for ELINT analysis, application to radar system 87−3241
expert system interface for B-1B CEPS 87−63887
expert systems, EW appl. 87−4078
expert systems appls. 88−36706
expert systems in the fighter of the 1990s 86−43890
F-15 digital map feasibility demonstration system 85−9298
F-16 flight simulator trainer for Danish fighter pilots *(Danish)* 88−23156
Facility Advisor: a distributed expert system testbed for spacecraft ground facilities 87−42204
factorized extended Kalman filter 87−13092
fault dictionary for MIL-Spec board problems solution 87−11131
fault tolerance techniques for array structures used insupercomputing 86−46862
fault tolerant power system for flight-critical loads, software design 88−5092
fault tolerant systems, reliability demonstration technique, Monte Carlo simulation 87−44079
fault tolerant systems , military appl. book contrib. 88−73627
field combat simulation, data collection 86−50005
fighter aircraft cockpit automation rules 88−68568
firing simulator for Switzerland's Leopard tanks 88−42729
fixed-eyepoint gunnery, videodisc based interactive simulation visual system 88−75027
flight training simulator using Level V high-resolution data, evaluation study 85−9280
FLIR imaging, scale invariant target detection using optical processor 88−47227
gateway-to-gateway protocol issues in a tactical environment 87−76363
General Electric A/VLSI programmable signal processor, avionic, telecommunication and military appls. *(Spanish)* 87−73493
geographic information system, image processing aspects 88−14752
graphics display technology in avionics 88−54831
Guided Electromagnetic Defense Interceptor railgun system simulation and performance prediction 87−26724
hand-held man-machine interface using an electroluminescent matrix display 85−14670
HARD TOP, EMP hardening topology expert system, development 87−7545
helicopter A129 Integrated Multiplex System, multiprocessor-based control, reliability anal. 85−9344
helicopter mission avionics support, hardware and software integration facility 87−50509
helicopter navigation algorithms for sonobuoys placement in antisubmarine warfare 88−68689
high-speed weapon flyout simulations in embedded training 86−70448
human factors simulation to support software design 88−30226
hydrographic charts and books for mariners 88−36719
IBIS closed breech gun system model 88−17003
IBM LSI-CP microprocessor 86−1110
IC systems validation, tester independent support software system 86−49953

guidance unit with IMPATT diode power combiner, heat source analysis 88−54819
guided optical structures in military environment conf., Istanbul, Turkey (Sept. 1985) 86−66552
hand-held man-machine interface using an electroluminescent matrix display 85−14670
hardware design, reliability achievement 87−44070
head-up display symbology for unusual attitude recovery in fighter aircraft 88−68576
helicopter A129 Integrated Multiplex System, multiprocessor-based control, reliability anal. 85−9344
helicopter integrated navigation system for Canadian military maritime appl. 88−16841
helicopter navigation systems, strapdown, automatic, for combat and military transport 88−16842
helicopters, advanced flight control and navigation system implementation 88−68544

military equipment continued
helix TWTs, high peak power, with wide bandwidth 88−71285
helmet airborne display and sight system development 88−30110
helmet integrated display systems for tactical environment 87−50504
helmet mounted display for tank applications 87−70449
helmet-displays for the combat-proven air force 88−29537
helmet-mounted display, integrated approach to design 88−30109
HEMT based MMIC amplifier, travelling-wave type, config. for enhanced EW system performance 88−32444
high altitude, long endurance military aircraft 88−36577
high frequency tactical antennas go low profile 87−39474
high power microwave simulator development for military appls. 88−25782
high T_c superconductors, military defence appls. 88−48405
high-density SMT hybrids meet the needs of military applications 88−7227
HITS Hierarchical Integrated Test Simulator for low cost factory testing 88−35834
holographic optical elements, industrial appls. in display systems 87−14395
holography appls. in medicine, biology and in military systems 88−2419
Hughes HF adaptive radio 86−30680
hybrid ccts., pre-cap visual inspection requirements, MIL-SID 883 standard 86−20994
hybrid elec. vehicles, traction control and simulation 87−22868
hybrid IC packages, adhesive related failure mechanisms 85−28856
hybrid IC production line certification benefits and costs 87−6289
hybrid microcircuits, quality/reliability assurance procedures 88−57214
hybrid MM wave-IR sensors for target acquisition in adverse backgrounds 87−49582
hybrid packages, multilid, repairable hermetic sealing 86−52269
hybrid thick film ccts., built-in quality 85−202
I/J band CW jammer amp. for Naval EW appls. 87−65873
IC, static discharge test equipment , MIL-STD-883C test method 88−70103
IC obsolescence, MRAP/SRAP project 88−6337
IC static discharge testing, new US military standards 88−70097
IC systems validation, tester independent support software system 86−49953
ICs, military and commercial development 85−17989
ICs, radiation-hardened, technology review 88−71634
ICs, trend towards low weight and high speed 85−45857
ICs, US military standards 87−6775
IF clutter signal generator 88−15552
image intensification developments 88−4489
image relays, hard optic, fibre optic and electro-optic comparison in ground combat vehicle sighting system 85−56389
image transducer using Si liquid crystal light valve 87−70457
imaging sensor autoprocessor, target recognition algorithms development 86−17895
in-circuit testers backdriving and mode forcing, MOD standard 88−35833
integrated avionics for advanced Army rotorcraft 86−18451
integrated communications navigation identification avionics 87−50495
integrated flying aid and mission displays for modern combat aircraft incorporating a digital data base 88−61534
integrated front end designed for multichannel EHF radios 87−69888
integrated navigation system for advanced attack helicopters 87−50503
integrated optic fibre gyroscope, progress towards tactical appl. 86−2780
intelligent C^3 terminal architecture 88−21502
intelligibility of phoneme synthesized speech in high-noise environments 85−15381
intercept radar, FOXHOUND A, airborne, characts. 85−25937
interconnection hardware, design to MIL-STD-1760 military specification for aircraft, design to MIL-STD-1760 military specification 87−17471
IR calibration equipment, US Navy requirements overview 88−74414
IR detector technology rel. to guided missile appls. 86−44308
IR display array for wide variety of targets and scenes 87−70656
IR dynamic background/target simulator 88−75021
IR emitting CRT, US Army developments 87−66853
IR focal plane array appls. and system design technological trends in 1980s 88−74475
IR focal plane arrays, Navy applications 87−41380
IR focal plane arrays using HgCdTe 85−14799
IR imaging radiometer, proof-of-concept design , US Navy calibration 88−74419
IR imaging sensors for long-range nocturnal target recognition 88−22658
IR linescanner for use on unmanned aircraft 87−3494
IR linescanners development for tactical air reconnaissance in 1990s 88−47531
IR scene generation using simulated blackbody 88−74423
IR scene projector developments, overview 87−70655
IR strategic defense seekers testing , using computer image generators 88−75023
IR surveillance and night vision 85−3888
IR systems and components, conf., Los Angeles, CA, USA (Jan 1988) 88−49342
IR technology, Dutch developments in 1950s to 1980s 88−29395

smart weapons for military engagements 88−60757
SMD use in military equipment 87−58692
SMDs invade military and commercial equipment 85−55244
SMT, chip carriers for military appls. 87−43984
SMT interconnection system for military appl. 88−38933
SMT PCB US defluxing for cleaning high-reliability boards 88−57108
SMT PWB assembly development, thermal coeff. of expansion tailored 87−37663
socketing military VLSI chips 88−13450
SODERN visualization system (SVS) in command rooms 86−18048
soft copy imagery interpretation capability 85−3498
solid-state components for radar, conf., London, UK (Feb. 1988) 88−31321
solid-state microwave oscillators, technological progress 87−66551
sonar towed arrays, naval appls. 87−70144
SOS CMOS ASICs, radiation hardened for space and military communications appls. 88−57811
source-control-drawing ICs for military, testing programmes 86−35739
Soviet Navy threat, re-examination 88−61738
space power system technological trends 86−32458
space surveillance with medium-wave infrared sensors 88−67794
space vehicle power system requirement trends, lifetime, reliability and survivability 87−42125
Spanish defense electronics industry, impact of national and international R&D programs *(Spanish)* 88−75019
specifications for suppliers of power supplies to US military 87−64722
speech recognition, man-machine dialog for audio information processing 87−61815
speech recognition index, statistical approach to vocabulary diagnosis 88−14642
speech technology for land based systems 88−66438
stabilised military platforms appl. to commercial TV broadcasting 88−47263
standard military drawings for hybrid components used by manufacturers 88−57213
standoff jamming technology for EW environment, developments for 21st century 87−39405
staring sensors for satellites, development 85−8848
static electricity damage control for microprocessors, US military standards 85−16772
strapdown inertial reference unit with passive fibre optic gyros 87−77772
strapdown single gyro attitude and heading reference, design, performance and test results 85−8841
Strategic Defence Initiative technology, the 'star wars' campaign 87−71186
strategic defense initiatives at Los Alamos National Laboratory 86−36628
strategic defense potential of IR systems 88−22208
strike weapons, RPV and UAV, manned aircraft augmentation 88−10691
STRIX-1/4 W Split Stirling Cooler reliability status 88−48408
submarine links, Pacific Ocean, strategic value during wartime 85−57922
super cockpit for combat aircraft 88−16831
surface warship propulsion, generation, supply and distribution systems 87−35825
surface-mount technology for high reliability military/electronics 86−14622
surveillance sensor test chamber , internal calibrator and calibration sources 88−74416
switching power supplies 86−6854
synchro-to-digital converters, specification for military use 87−66263
TACOM thermal image modelling, military appls. 88−29405
tactical aircraft, low altitude warning system 87−77777
tactical aircraft track-while-scan systems, adaptive UD-factorised Kalman fitter 86−37946
tactical AJ modem, rapid acquisition/reacquisition capability 87−40770
military equipment continued
tactical antennas and their application in the military environment 85−46645
tactical communication systems, fibre optics communication appl. 85−47519
tactical communications, hybrid transmission scheme using single mode fibres 86−69801
tactical communications jamming, technology and capabilities 86−3503
tactical digital facsimile for battlefield command & control 88−41263
tactical digital facsimile laser image recorder 85−41530
tactical digital troposcatter communications systems from Raytheon 86−23659
tactical fiber optic assembly requirements 86−69800
tactical grounding techniques, improvements 88−45722
tactical helicopter, integrated flight control and navigation system implementation 87−50500
tactical multichannel fibre-optic connector design and optimisation *(French)* 88−41714
tactical real-time reconnaissance aircraft instrumentation, use of CCD technology 88−48278
tactical satellite communications antenna, stability and pointing accuracy 87−47353
tactical surveillance systems, multiple electronic sensor acquisition and display workstation design 87−77075
tactical tracking radar, monopulse design 86−4723
tactically deployable tethered aerostat multi-mode radar platform, adaptation for multimission capability 85−8482
TADCOM mobile radio system for defence communications for Norwegian army *(Norwegian)* 88−15357
target detection, advanced millimetre wave sensors for dual band and dual mode operation 87−49583
technology developments in electronic warfare 85−58200
tempest protection for military data processing systems 88−30212
test, measurement and diagnostic equipment, user-addressable data storage 88−29266
test maintenance diagnostic equipment, enhanced testability 85−31355
testability analyser, for US Navy Integrated Diagnostic Support System 88−36716
testability of military electronics 86−167
thermal imager, compact high performance for military appls. 87−49545
thermal imaging, Army perspectives 86−70050
thermal target projector for MRTD testing and vehicle identification training 87−70460
thermoelectric power generator develop. for military appls. 87−43482
thin-film dielectric AC plasma panels 85−14936
Thomson power hybrid IC technology for military and civil applications 86−67608
tI to investigate inadequate testing problems 85−10528
transmission control algorithms, unified representation technique 88−69855
trends in military power supply design 88−42712
TTL obsolescence 88−6336
TV transmissions from military aircraft, 1939 expts. 87−49374
twisted nematic LCD modules for harsh environmental conditions 86−5403
two-dimensional recognition range model 88−53378
TWT, coupled-cavity, for radar transmitter, design 86−53304
UHF emergency-channel receiver, 243 MHz operation, miniature design using hybrid technology 88−59973
UHF solid-state device replacement of electron tube in avionic appls. 87−42081
UK developments of military engineering, economic aspects 88−48404
underground nuclear testing expts., fibre optic coupling to downhole imaging camera 88−33676
underwater vehicles, autonomous and cooperating, hierarchical value-driven control system for coordination 88−36700
United States Air Force R&M 2000 action plan 86−57262
United States Army reliability, availability and maintainability requirements and user perspectives 86−57265
United States Army reliability and maintainability training methods and courses 86−57126
United States Army reliability availability and maintainability improvement 86−57264
United States Army reliability requirements and growth management strategy 86−57266
unmanned aerial vehicles with jamming payloads, design considerations and developments 87−42080
unmanned aircraft, line scan sensor signal processing for moving target detection 88−30115
unmanned aircraft, potential in EW for reconnaissance, jamming and weaponry 87−28672

integrated inertial sensor assembly program status 85−38293
integrated logistics for reconnaissance systems 87−15022
integrated modular multipurpose avionics 86−38883
integrated navigation system for robotic vehicle appls. 88−41771
integrated networks, battlefield infrastructure 86−43434
integrated radar imaging system for the STAR-2 aircraft 88−60262
integrated radio avionics system, fault tolerant, reliability/survivability assessment tool, RADSIM 85−8336
integrated support implementation system 86−4998
integrated technology advanced power system 87−42182
intelligent air attack system, aircraft cockpit displays for knowledge-based system 88−68575
intelligent flight management in threat environments 88−68687
intelligent knowledge-based systems for multi-sensor data fusion 86−37110
intelligent radar scan control algorithm *(Spanish)* 87−77756
intelligent system for error handling 88−52383
intelligent systems for human performance improvement 86−69288
interactive fault isolation using system testability and maintainability programs 88−35831
Interactive Radar Environment Simulation Model (IRESM) 88−15604
international EMC co-operation in the military area 87−26817
international EMC cooperation in the military 87−54601
international standards in military communications 85−63217
Intersputnik satellite network, current status and future options 86−11033
Intersystem: internetworking for space systems 86−30214
Intersystem access control protocol description 86−30108
intrusion detection system, development and field test results 85−139
IR and optical target recognition systems, signal/image processing techniques 87−55256
IR and visual surveillance land-based system 87−3495
IR cueing system for helicopters 87−3493
IR emission sources radiance meas. using thermal imaging radiometer 88−4664
IR flickerless dynamic scene generator for simulation appls. 88−74489
IR focal plane array appls. and system design technological trends in 1980s 88−74475
IR image simulation 88−46209
IR imagery simulation in battlefield environment 87−20966
IR imaging systems, automatic FLIR video assessment 85−20498
IR line scanners of RS-700 Series 85−3878
IR search and track system development 86−17478
IR search and track system signal processing concepts and techniques 88−21312
IR sensing data collection, Targeting systems characterization facility 87−14176
IR signature meas., target vs. background discrimination using multispectral channel data 88−47229
IR signature projection, data-based methodology 87−14183
IR signatures utilisation, considerations 87−13784
IR simulator for electro-optical systems testing against smoke/obscurants 88−75010
IR surveillance system design 87−3496
IR systems and components, conf., Los Angeles, CA, USA (Jan 1988) 88−49342
IR technology, conf., San Diego, CA, USA (Aug. 1987) 88−43558
IR technology, Dutch developments in 1950s to 1980s 88−29395
IR thermal imaging of mechanical assemblies and subassemblies 88−68065
IR tracking system performance assessment, using dynamic simulator 88−47228
IR transmitting fibres, military uses 86−9522
IR warning systems development, PWS and SPIRTAS 88−47524
IR-MM wave search systems in air to ground role 87−49771
IRAMS automatic mass screening system for PCB diagnostics 87−17539
ISDN, appls. and techniques 88−21796
ISDN, army implementation in USA 88−28475
ISDN, basic characts. and transition plan 87−40226
ISDN, United States DOD appls. 88−21795
ISDN appls., defence communication system development 86−30215
isolated targets in IR image sequences, 3-D motion estimation algorithm 85−36403
Israel C^3I systems, building block approach 86−4117
Israeli defence technology initiatives 85−59383
Italian Radio Detector Telemetro, history 85−58223
ITT Falcon purpose-built coastal defence radar 88−60240
IUKADGE DDN, improved UK air defence ground environment digital data network 85−63381
Japan Ground Self Defence Force technology, Signal Corps mission 85−42088
Japanese telecommunication systems *(Japanese)* 85−2973
JAS 39 Swedish fighter plane, combat electronics 85−48378
jet formation and characterization of a conical shaped charge 88−48414
Jindalee−Australia's all-purpose early warner radar system 88−41732
JINTACS, joint interoperability of tactical command and control systems, automation 87−40689
Joint STARS, US military joint surveillance target attack radar system 88−35585
Joint Tactical Information Distribution System, development and deployment 88−16994
Joint Tactical Information Distribution System, introduction 88−3374
Josephson effect voltage standard, for US Army 86−24612
JTIDS, joint tactical information distribution system, dynamic net management 88−28688
JTIDS, navigation aspects 86−55387

military systems continued
JTIDS Relative Navigation, operational aspects 88−30104
JTIDS tactical command and control system, distributed TDMA terminals development 85−8233
junction-to-case thermal resistance meas., MIL-STD-883C, meas. conditions 88−53918
Kalman filter for target tracking, computer-aided approximation 86−43230
KS-147A LOROP camera integration into RF-5E aircraft 87−14998
KS-147A LOROP camera system for RF-5E aircraft 87−14999
LAMPS Mk III anti-submarine warfare, RF chamber avionics test facility 86−38866
Lamps Mk III trainers to speed fleet introduction of ASW system 85−8465
LAN, direct sequence spread spectrum access 88−21684
LAN appls. 88−9152
LAN standards for US Army tactical environment 88−21683
land-based army systems, automated speech technology appl. 85−57319
land-based military satellite communication antenna arrays 88−34508
LANs, application of code division multiplexing techniques 87−69704
Lantirn navigation and targeting system for U.S. Air force 87−8980
laser agile illumination for object tracking and classification feasibility study 88−60281
laser alignment system, long range, artillery alignment applications 88−8377
laser applications 86−15816
laser communications, military appls. 86−69764
laser gyro land navigation system, performance predictions and field results 85−38311
laser satellite constellations for strategic defense, analytic model 88−61741
laser soldering system for military/aerospace appls. 88−48407
lasers, flashlamp technology 87−39193
lasers role and future trends 85−13006
light armoured vehicles, ballistic protection using aramid liners 88−61725
LIGHTSAT, military satellites, development 88−60076
lightwave technology, aerospace and military appls. 88−73949
local net product family for DoD networking 87−48682
Lockheed modifies S-3 Viking for greater ASW mission 85−9287
logic techniques, military-system performance boost 85−6991
Logicon Electronic Warfare Consultant, expert system appl. 88−75014
logistics data integration system (LOGDIS): connecting logisticians to their data 88−68679
logistics support programs for weapon systems, w.r.t. costs and mission effectiveness 88−117
logistics testing, US Air Force system 88−68700
long haul communications in the Pacific 88−41597
long haul digital transmission system design, performance standards 86−55163
long range E-O reconnaissance system and flight test results 87−14997
Long Range Infrared Surveillance System 88−22209
LOS microwave radios, performance eval. using channel simulator 87−40734
low MTBF radar, reliability measures 87−28693
low probability of intercept performance bounds forspread-spectrum systems 86−10258
LPI techniques in the underwater acoustic channel 87−42285
Luneberg lens antenna, system, electronically-switched airborne, design 86−43042
LV switched mode power supplies for US Navy, standardisation program 85−28373
LWIR mosaics focal plane, US Army test facility 88−74488
LWIR sensor observables and/or observable estimates , unbiased rigorous figures of merit 88−74426
M-ary FSK, multiple chips per symbol, perf. anal. in Rayleigh fading 88−21063
magnetic bubble memory, appl. 85−7163
maintainability, an ILS effort to manipulate LCC 85−38301
maintainability and reliability studies, conf., Los Angeles, CA, USA (Jan. 1988) 88−55821
maintenance applying artificial intelligence techniques 86−132
management of airborne reconnaissance images through real-time processing 87−13142
management of integrated tactical CIS [command, control, communications and information systems] 88−21480
MANSAT, Ferranti SHF SATCOM station, development 85−25849
matched filter for infrared background suppression 88−52570
MATE from US Air Force, effect on military equipment manufacturer 85−52651
MATE military modular. ATE system, CIIL instrument interface 86−24309
MATE operating system debugging and re-hosting, software tools 87−20894
material handling system integration for DoD appl. 88−75029
mega-network architecture design alternatives and perspectives 86−23291
Mellin transform and its utilisation *(Slovak)* 86−57301
MESAR, phased array radar 88−15617
meteor burst communications in tactical intelligence support 87−40710
Defense Meteorological Satellite Program (DMSP) 85−26904
METSAT, meteorological satellite data, military appls. 85−26905
MEX12 mobile exchange for military use 88−3718
MHD space power systems, SDI appls. 88−42624
microwave, airborne radar for aircraft interception 86−11158
microwave line of sight communication system for Falkland Islands 87−8165
microwave satellite communications, Conf., London, England (Mar. 1987) 87−36351
microwave systems, high performance, subsystem building blocks 87−76852
microwave systems, high-power electron tubes design 85−58209
MIISA, multifunction integrated inertial sensor assembly, for US military aircraft 88−16998
MIL-specification mixers simplify military systems design 88−63578
MIL-STD 1553 standard serial data communications protocol 86−16656
MIL-STD-1553B implementation, components and design techniques 88−10481
MIL-STD-1777, Military standard-internet protocol 87−19998
MIL-STD-285 meas., seam transfer impedance and EMP shielding effectiveness, correlation 87−26860
MIL-STD-461B for naval avionics appls. 87−26854
MIL-STD-461B specification and commercial EMI requirements, relationship 87−26855
MIL-STD-461B tailoring for naval avionics appls. 88−16824
military memory systems using E^2PROM and core 86−41119

military systems continued
military microwave systems, conf., Brighton, England (June 1986) 87−43793
millimeter wave radar for proximity fuzing of smart munitions 86−55371
millimeter-wave systems and applications in Europe 88−71089
millimetre-wave radar modelling for smart munitions 88−60236
millimetric-wave system design tradeoffs 86−17467

minicomputers
for minicomputer applications see under relevant applications; administrative data processing; computerised control; natural sciences computing see also electronic calculators
3+Mac, software for bringing advanced network services and PC resource sharing to the Macintosh 88−59664
32 bit minis, use in high speed acquisition 86−17857
APN 167 communications computer from Ericsson with ERIPASCAL 87−55710
applications of land techniques in mini and microcomputers, conf., Montreal, Canada, (June 1985) 86−61845
architecture of small computers, textbook 86−13333
Calay systems hardware automation for PCB routing 86−20970
CMOS convolution chip for robotic applications 86−63470
COMPCON 87 conf. San Francisco, CA, USA (Feb. 1987) 87−43790
conf., Mini/Micro West 83, San Francisco, CA, USA (Nov. 1983) 85−16571
DEC PDP-11 minicomputers, connecting to Hayes modems 86−59710
DIPS-V30S hardware system for wider appls. *(Japanese)* 87−67553
DIPS-V series computer, supermini system for computer networks 87−76347
electric utility industry, computer hardware/software spending boom in USA 85−38406
emitter coupled logic array appls. 87−645
FPS-264 scientific computer in VLSI logic simulation 85−33572
HP 2345A Distributed Terminal Controller for HP Precision Architecture computers, with MPE XL operating system, on LAN 88−9124
IBM 801 minicomputer architecture, microprocessor implementation using silicon compiler 86−46487
IBM Series/1, duplexed local communications controllers 85−19815
IBM Series/1 minicomputer, use as front-end communications solution 87−7910
Kiewit network: a large AppleTalk internetwork 88−66953
LAN-based radiation oncology computer system 86−65455
minicomputer system for measuring yarn length for use on cross-beam winding machines *(Polish)* 87−29283
MOS model parameters evaluation *(German)* 86−26986
multi-user systems, choices available 86−49294
music minicomputer system, NED Synclavier 86−24246
NonStop CLX processor, BIST 88−44236
PDP-11 instruction set and architecture on J11 microprocessor 85−839
PDP-11/23$^+$ file server and multi-user station *(Chinese)* 88−52895
Philips DS-790 data communication computer for aeronautical message switching system 88−35276
power electronics in the minicomputer industry 88−62451
Regulus minicomputer architecture, optimum perform. 88−26466
screen display *(German)* 87−63464
SCS-40, ECL PALs in a Cray-compatible minisupercomputer 87−46171
subassembly supply at Prime Computer Inc. 87−43974
submersible based data display and data logging system 86−56265
superminicomputers and consumer videotex *(French)* 86−37410
telephone traffic meas. 86−16797
UPS appls. in telecom. and computing 88−30834
VAX superminicomputers, user needs case study 87−51828
VAXcluster and Ethernet based architecture, performance comparison 87−62691

minimax techniques
1-dimensional recursive digital filters, minimax design, closed form approach 86−46990
3D digital filters, optimal design method, image processing appls. *(Japanese)* 88−6992
accelerating and focusing systems, structural and parametric optimisation, design 87−21345
adaptive asymptotically minimax estimators of smooth signals 88−3031
adaptive robust estimation based on a family of generalized exponential power distributions 85−5839
AI games, minimax alternatives 87−36577
algorithm for adaptive arrays and frequency-hopping communications 85−2689
antagonistic games defined by binary preference relations, saddle point determ. 86−40617
antenna array radiation pattern synthesis, constrained minimax and least squares problems. 87−61529
antijamming group codes, min-max theorem 85−30173

minimax techniques continued
automatic image anal. for complex object inspection, systems approach 87−48183
binary FSK signals, minimax noncoherent detection in nonwhite Gaussian noise 87−7735
binary PSK signals, regular method of pairs synthesis 86−29909
characteristic function reconstruction, optimum strategies *(Russian)* 87−65373
circuit performance optimisation without calculating derivatives, automated penalty method 87−31660
closed saddle function with nonempty compact set of saddlepoints 85−22346
communication channels with incomplete statistical description, encoder-decoder policies 86−3765
communication systems, minimax decision problems 87−19365
compact variable metric algorithm for linearlyconstrained nonlinear minimax approximation 86−19946
compact variable metric algorithm for nonlinearminimax approximation 86−46237
complex hypotheses defined by moments, minimax testing 85−49464
complexity of minimax facility location problem on a sphere *(Japanese)* 88−70243
computer network capacity assignment, optimisation 85−7956
coupled maximin problem, stationary points search method *(Russian)* 87−65372
deterministic signals, continuous-time, minimax estimation in coloured noise 88−46071
digital measurements data, minimax evaluations of effectiveness of algorithms for filtering transient errors *(Russian)* 85−58480
directional derivates in minimax problems 85−39646
discrete linear minimax approximation 86−341
discrete-time filters, simultaneous freq./time-domain approx. using linear equations/programming 85−11429
discrimination algorithms for multivariate mixture distributions, development 88−72982
distribution network operational scheme planning, uncertainty factor estimation *(Russian)* 88−10850
dynamic programming structure, sequential minimaximisation 85−54296
electrical cct. optimisation using a combined deterministic and statistical search *(German)* 87−65628
electronic circuit synthesis, numerical method of finding Chebyshev fraction 87−44495
equivalent differentiable fns. in soln. of minimax problems 86−26740
estimation of sequences, extremal problems 86−48723
exchange algorithm for minimax optimisation, complexity 87−72964
extrapolation error of functions 85−49463
Fan's theorem generalisation 86−40643
filter, minimax equalization for random signals 85−63050
FIR filters approximating minimax filters, weighted-least-squares design techniques 86−62734
FIR filters with powers-of-two coeffs., simple design procedure 88−27976
fitting of parametric physical models, choice of criterion 85−37391
fuzzy logic based expert system, VLSI CMOS implementation 88−38435
fuzzy matrix, strongly transitive, canonical form 87−58796
fuzzy sets Cartesian products resolution 88−49662
general theorem, new approach 86−7656
generalized integro-exponential function 85−49470
global router based on a multicommodity flow model 87−44465
global router for multilayer structures 86−46492
IIR digital filters, very low sensitivity realisation using complex all-pass structs. cascade 87−73551
image fragments, establishing similarity 87−69253
integer flow sharing problem, generalised version, GIFS algorithm *(Japanese)* 87−44165
Kahunen-Loeve transform and Courant-Fischer theorem, relationship 85−2709
large scale nonlinear minimax optimisation 86−57352
linear antenna arrays in uniform metric, phase synthesis 87−27055
linear filtering of phase variables of linear dynamic plants 87−27365
linear ill-posed problems with random errors in data, minimax soln. *(Russian)* 88−63194
linear placement algorithm for PCBs and LSI 85−34278
linear smoothing, minimax, for correlated signals and noise 87−2511
matrix equations in a class of complete and completely distributive lattices 87−58765
measurement errors loss function minimisation *(Russian)* 85−47779
microprocessor IC sets, choice on basis of minimax criterion 88−44211
microwave cct. design, superlinearly convergent minimax algorithm 86−27573
microwave circuit design, superlinearly convergent minimax algorithm 86−14488
microwave circuit postproduction tuning using functional approach with optimisation techniques 85−40237
mIN/MAX autocorrelation factors for multivariate spatialimagery 86−29691
mixed min-max optimization problem with restrictions 88−63186
morphological filters, relation to median order-statistic, and stack filters 87−75783
multiresolution texture signatures using min-max operators 85−30378
multistop location problem on tree 88−24650
nonconvex theorems of the alternative and minimization 87−52005
nonlinear network analysis, optimisation algorithm with step-by-step active function selection 86−7918
nonlinear nonconvex optimisation problem with max-min operations 88−18612
nonlinear programming, optimality, minimax and duality 88−18603
optimal design of multi-cavity filters and contiguous-band multiplexers 85−8256
optimal designs for minimax extrapolation 85−10611
optimisation of probability dependent functionals, linearisation methods 87−5352
penalty method in maxmin search with connected variables, convergence *(Russian)* 88−38101
periodic phase-shift keyed signals, optimality conditions 86−16315
Poisson processes with uncertain rate functions, minimax discrimination 86−13627
power dividers, optimum synthesis, minimax technique 85−1011
pseudorandom information fields meas., movement determ. 88−45811
pulse and periodic phase-manipulated signals, optimality, block struct. of code sequence 85−2832
minimax techniques continued
quasidifferentiable function minimisation, quadratic approx. method 85−22377
radar signals detection, optimal minimax jamming 85−58169
radioelectronic circuit optimisation by IC modelling program 87−44467
recursive 1D digital filters of given approx. type, minimax design 87−24334
regression estimation 85−16874
reliability simulation, game theory appl. 86−13588
resource allocation under uncertainty 85−54247
robust discrimination from diffusion processes with uncertain parameters 87−47865
robust matched filter for uncertainty in noise autocorrelation function 87−55190
robust quantization of ϵ-contaminated data 85−36264
robust receiver in colored noise for local deflection 87−61990
robust signal-plus-noise models, role of 2-alternating upper probabilities 88−34722
robust techniques for signal processing: a survey 85−46803
robust time series anal., survey 87−31393
semi-infinite programming, directional derivatives for value-function 87−72969
shaped-beam antennas design, minimax gain optimization 85−2692
signal estimator, statistical, freq. domain anal. 87−2553
signal estimators family, frequency domain anal. 88−34661
spectral measures of signal/noise, linear minimax interpolation 88−66462
stochastic programming decision model with incomplete information, post-optimisation and sensitivity anal. 88−18604
stochastic programs, solution strategies, nonstochastic tender case 87−5345
strong regularity condition of matrices in minimax algebra 85−49493
system component failure testing, minmax search for critical level 86−246
texture analysis, min-max techniques appl. 86−23127
trajectory parameters estimation in continuous formulation 86−7654
transmission network optimum development strategy selection *(French)* 88−17110
two-dimensional FIR digital filters, minimax design 85−17718
two-person games, noncooperative, equilibrium point theorems 85−286
unifilar and Markov sources, minimax universal noiseless coding 88−27783
variable transformation method for solving linear absolute-value objective-function problems with linear constraints 88−18599
visible surface reconstruction via local minimax approximation 88−59255
Wiener filtering, minimax, under conditions of partial a priori ambiguity 86−29882

minimisation

coordinate descent methods, convergence rate 86−57361
cost network flow, piecewise linear upper bound on the network recourse function 87−72961
cubic splines, class obtained through minimum conditions 86−34197
cyclic minimum correlation problem 87−58815
DC motors starting, with minimised energy losses *(Polish)* 85−27437
delay minimisation in data communication networks, centralized control under uncertainty 87−55723
derivative generation from multivariate scattered databy functional minimization 86−19974
difference grouping PLA, generation of precise binary logarithm 85−54821
digital edge pictures encoding, addressing overheads minimisation 85−46920
digital filters, 3D state-space, minimum roundoff noise synthesis 86−62778
digital transmission filters based on Chernoff boundminimisation 86−47016
disc file actuator, power dissipation minimisation 88−64930
discrete search procedure average duration 86−34184
disjoint system reliability formula, minimising algorithm for sum of disjoint products 88−6322
distributed signal detection networks design and performance comparison 88−27906
district heating distribution network, heat loss minimisation using thermal design 88−23707
district heating network heat transmission piping, design procedure for cost minimisation 85−60010
dominant component data reduction method for eigenvector computation 88−274
dual gauge programs, with applications to quadratic programming and the minimum-norm problem 87−72959
Earth-launched interceptors at supercritical speeds, trajectory optimisation 88−61744
edge detection by cost minimization 88−34830
electric machines global minimisation problem of mixed programming for optimum design 88−48881
electric power plants, stochastic expenditure minimisation *(German)* 86−18906
electric power security enhancement, CAD methods 86−6301
electricity supply industry, environmental and legislative effects of cost minimisation *(German)* 85−64809
electronic circuits, static state anal., comparison of integration methods 87−52258
electrostatic precipitator power supply minimisation using energy management system 85−19101
EM field problems, error minimisation, iterative schemes use 86−59008
minimisation continued
EM scattering and eigenvalue problems, numerical solution, hybrid technique 87−26755
EM scattering off dielectric wedge, integral approach 88−27468
EM theory, error minimization and convergence in numericalmethods 86−59005
energy losses minimisation, leading to elliptic integrals *(Polish)* 85−60138
energy systems, single and combined, DSS for operation planning 88−17368
ϵ-median polish algorithm 87−72953
Espresso-MV: algorithms for multiple-valued logicminimization 86−977
exact penalty function algorithm for non-smooth convex constrained minimization problems 85−28160
exact penalty function for nonlinear programming problems 87−58816
extended conic functions, variable metric methods 85−54298
extremal problems, multiplicative algorithms appl. 85−39642
factorable function tensors, polyadic structure 87−16508
factory electricity supplies in USSR, limitation curve development for loss minimisation *(Russian)* 86−33869
fault tree analysis, modularisation and minimisation process 86−13550
feature selection scheme for discriminating weakly stationary processes 85−30388
filamentous processes detection in images 87−69391
finite difference approx. appl. in nonlinear optimisation process *(German)* 88−38099
finite element/difference grid generation using optimisation 87−223
fixed-point digital filters, residue feedback, roundoff noise minimisation and pole-zero sensitivity 87−12983
fixture wiring CAD for PC boards testing 86−47201
flaw detection, probabilistic inverse problems, conjugate vector method 85−10896
flaw reconstruction, inverse problems, algorithm implementation techniques 85−10898
Fletcher-Reeves method with inexact line search, descent property and global convergence 85−28161
Fredholm integral eqns. of 1st kind, constrained minimisation methods 85−44666
frequency adaptive transversal filters anal., L_K, in plant identification 87−61956
from limited intensity data 88−46258
fuzzy c-means algorithm, local convergence 87−19874
fuzzy clustering, L_1 methods 87−72912
gate matrix layout algorithm 87−65742
gate matrix layouts, automated generation using ALS-UGMA software system 87−65714
general algorithm of FFT and its minimum *(Chinese)* 88−49780
generalised gradient descent method 86−40668
generalised rational fns. for minimisation problem in mean norm *(Chinese)* 86−62075
generalized gradient method for the determination of $(\varepsilon+\mu,\varepsilon+\mu)$-saddle points 86−57357
geometrical optics and beamforming lenticular antennas, nonlinear partial differential equations minimisation 88−27630
global concave minimisation methods, bibliographic survey 87−5353
global extremum finding for fns. with Lipschitz condition 87−5343
global minimization of indefinite quadratic problems 88−18593
globally minimizing polynomials without evaluatingderivatives 86−348
graph orientations minimising radius or diameter 87−10272
HART: a hardware for logic minimization andverification 86−46736
Hessian in function minimization 88−49713
hierarchical image anal., renormalisation group approach 88−66726
high speed memory chips, performance, minimization of delays 86−62583
homopolar machine sliding-contact collector current imbalance 87−30597
HV transmission networks, calc. for minimisation of active power losses *(French)* 85−59655
IC layout, channel density minimisation 88−6597
IC power net sizing, nonlin, separable fn. minimisation 88−43996
image boundary detection by minimising functionals 86−10554
image motion fields estimation, Bayesian formulation and stochastic solution 88−66730
image processing, DC coefficient restoration by cosine and sine transforms 87−39876
image restoration: a regularization approach 87−2644
impulse response identification with deterministicinputs using nonparametric methods 86−64309
incorrectly-proposed problems on sets of piecewise-monotonic and -convex problems, numerical soln. 86−46258
induction motor drive, thyristor PWM invertor fed, power loss minimisation *(Polish)* 86−61778
induction motors, variable frequency source fed, minimum input power conditions 86−45401
industrial steam turbines, operating cost minimisation *(German)* 88−43058
infinite impulse response adaptive filters, extended least mean squared algorithm 86−52970
interceptor Earth-launched rockets, optimal trajectories computing based on simulation 88−68715
interface transducer logic, automatic synthesis and optimisation 88−25143
interference minimisation in a radiocommunication network, use of Monte Carlo and iterative methods *(Czech)* 88−67505
irregular polygons scheduling 88−56161
Kullback principle for suboptimum decoding 88−66322
L_1-estimates in regression, bias and skewness 87−72951
L_1-norm, place in robust estimation 87−72947
L_1-norm based statistical data anal. 87−72946
large power pools emergency reserve capacity optimisation *(Russian)* 85−59639
Lavrentiev phenomenon 86−7650
layer assignment problem for three-layer routing 88−44006
layout design, logical-topological calc. *(German)* 86−66919
layout design, terminals assignments density minimisation 87−10605
LF noise sources minimisation in electronic meas. 88−16368
linear control processes, minimal time function and level sets 87−23573
linear induction motors, parameter optimization using sequential unconstrained minimisation technique *(Japanese)* 85−21652
linear min. mean-square optimisation in video coding 87−7866
linear operators, ω-conditioned number *(Chinese)* 87−44221
linear systems, impulse response identification using nonparametric methods 87−68911
linear vector optimisation with zero-one variables, combinatorial algorithm *(German)* 85−54320
linearization algorithm for nonsmoothminimization 85−54302

minimisation continued
logic minimisation, analytic method *(Chinese)* 87−44168
logic synthesis using rule-based system 87−37214
Long vectors for quasi-Newton updates 87−16517
long-term generation expansion planning, based on maximum principle and Gaussian distribution functions 85−38465
low-order modelling via constrained least squares minimisation 88−43990
LSI layout CAD, interlayer transfer minimisation *(Russian)* 86−626
magnetic separator device, computer simulations of physical systems with optimal parameters 88−52175
magnetisation synthesis by least-squares minimisation with singular value decomposition 87−33373
McBOOLE logic minimizer 86−20494
measuring systems employing search and control devices, anomalous errors minimisation 85−19459
median polish and L_1 estimators 87−65329
metric scaling problems, discrete representations 87−36617
mincut partition algorithm improvements 88−24912
mincut quadrisection: a new approach to standard cell layout 88−24913
mine electric locomotives, traction load control *(Russian)* 85−49163
minimal linear spaces 87−51966
minimum cuts, modular functions, and matroid polyhedra 85−44628
minimum error entropy estimation and entropic prediction filtering coding scheme 86−16078
minimum mean absolute error nonlinear filtering 88−72997
minimum sum of absolute errors regression 87−44118
minimum weight equivalent subgraph problem, efficiently solvable case 85−44608
Minplex, compactor, minimizes bounding rectangle for layout 87−5601
MIS: a multiple-level logic optimization system 88−12312
mixed-discrete linear programming, NP-hard problem 86−19967
monitoring arrangements in radioelectronic-apparatus fabrication technology processes 88−49495
monomode fibres with specific dispersion props., design and manufacture 85−35443
MOS model parameter extraction techniques, comparison 87−6752
moving average autocovariance sequences, nonnegative definiteness 88−73058
moving average separation problem 88−70193
multi-level logic minimization using implicit don't cares 87−44794
multidestination data communication networks, approximately optimal dynamic routing 87−55420
multidimensional digital filters, frequency-domain design and stability 86−20734
multidimensional digital filters, word length minimisation 86−27470
multiextremal function minimisation 87−52004
multimodal functions of continuous variables, minimizing with simulated annealing algorithm 88−11883
multiobjective design of linear networks, NETOPT interactive program 88−49957
multiple output minimization, computer aided 86−20495
multipulse speech coder, pulse location determ., monotonic descent algorithm 86−3797
multipulse speech encoding, pulse density minimisation 87−47585
multiset antichains having minimal downsets 88−63188
multivariate smoothing spline functions, generalised cross-validation 87−65399
N-D IIR digital filters, freq. domain design technique 86−62763
NDO, convex composite, second order necessary and sufficient conditions 87−72967
Nelder-Mead simplex algorithm for unconstrained optimisation 88−49723
network, layout generation/charactn., planar linear arrangements of outerplanar graphs VLSI appl. 88−38066
networks, minimal blocking flows 87−16504
noise optimization of switched-capacitor biquads 87−52721
noisy image restoration by cost function minimization 85−30342
nonconvex theorems of the alternative and minimization 87−52005
nonlinear, minimisation, successive affine reduction 86−52364
nonlinear algorithm based on nonquadratic modelling of objective function 85−54313
nonlinear function minimisation on disjoint simplices, numerical methods 86−13675
nonlinear programming general problem algorithm *(Russian)* 87−51995
nonlinear SOR, relaxation parameter selection 86−57394
nonnegative definite matrices minimisation 88−6407
nonnegative norm minimal solutions algorithm 87−23553
nonsmooth convex functions minimisation, descent method 87−36613
nonsmooth convex minimisation with errors 86−7664
numerical solution of an optimization problem with anunknown boundary 85−54427
offset-type antennas, minimisation of gain losses 85−30079
optical fibre cable pulling tensions, prediction and minimisation 87−8284
optical signal reception with minimisation of mean risk, noise immunity 86−30035
orthogonal transform coding, block distortion, anal., minimisation and distortion measure 85−25029
p-i-n diodes, forward biased, temp. minimisation in large microwave signal mode 87−45240
packet networks, flow control method 87−48667
PALMINI fast Boolean minimizer for personal computers 87−65719
PALs Boolean minimisation using graph colouring on personal computers 87−59441
parallel method, dual simplex method *(Japanese)* 86−66753
parallel multiprocessor restructurable systems, performance/efficiency evaluation using analytical modelling techniques 85−13940
parameter-free multiplier method for constrained minimization problems 88−70239
parametric characterization and an ϵ-approximation scheme for the minimization of a quasiconcave program 87−44189
parametric spectral anal., L_1-norm and L_2-norm minimisation 86−10412
Pareto minima characterisation in convex multicriteria optimisation 85−22339
partial preconditioned conjugated gradient method for large eigenproblems 87−52017
partially adaptive beamformer design, improved power minimisation based design 88−73132
partially adaptive beamformer design via output power minimization 88−14516
peak factor minimization using a time-frequency domain swapping algorithm 88−59154
minimisation continued
peak sidelobe patterns, minimum, phase-only synthesis for linear and planar arrays 88−45748
PHILPA, algorithm for logic minimisation 86−20498
photonic switching systems, directional coupler based, crossover minimisation 88−41133
photonic switching systems, directional coupler-based, crossover minimisation 88−4045
piecewise-linear classifiers, empirical risk minimisation 87−39719
PLA, minimisation for control section of multifunction I/O controller *(Dutch)* 85−33811
PLA circuits synthesis, step-by-step optimisation 87−37141
PLA folding, suboptimal/optimal algorithm, CAD 86−62576
PLA minimization, parallel algorithm implementation 87−65718
PLA optimisation, multiple-valued minimisation 88−669
PLA-based control units, optimal encoding of control logic 85−28502
PLAs, heuristic algorithm for the minimisation of generalised Boolean functions 88−32109
PLAs, minimal sums derivation for completely specified functions 87−37172
polyhedral functions minimisation, regularised decomposition method 86−66746
positive real rational function curve fitting using minimisation techniques 87−65403
power distribution systems, optimum operation using load control, minimum cost anal. 88−23396
power stations, coal-fired, SO_2 emission reduction, cost minimisation model 86−45161
power system, decentralized stabilization 86−39015
power system load forecasting, short-term, temp.-sensitive method, math. model 87−35599
power system performance optimisation 87−77944
power system stabilisation by control-effort and response-time minimisation 86−32682
power system state estimation, using least absolute value tracking state estimator 85−48546
power systems, electric power performance optimisation using discrete minimisation methods 88−30254
power systems, transmission loss minimisation, load flow calc. *(Japanese)* 86−18651
predictive speech coding, adaptively weighted L^2 minimisation 87−39715
predictor-corrector method for unconstrained minimisation 87−10303
projected Newton method for l_p norm location problems 87−72960
projected Newton method for minimization problems with nonlinear inequality constraints 88−63192
pshenichnyi's theorem for vector minimization 87−51999
Puerto Rico, energy planning, systems modelling approach 85−43672
PWM current fed invertor drives, μp-controlled harmonic minimisation 87−22521
PWM invertors for induction motor drives, distortion minimisation 86−66172
quadratic programming, REQP algorithm, global convergent version 88−49711
quasi-Newton method for generating quasi-Choleski factors 85−33306
quasi-Newton method with sparse triple factorization for unconstrained minimization 85−22382
quasi-Newton methods, cancellation errors 87−10308
quasi-Newton type minimisation methods 88−11887
quasidifferentiable function minimisation, quadratic approx. method 85−22377
radar cross section reduction by multiple passive impedance loadings 88−9617
radar target detection, dwelltime minimisation 87−49134
radiotherapy treatment plan optimisation 88−68460
random minimum spanning tree problem 85−22322
rank-one positive definite quasi-Newton algorithms, computational experience 86−19965
rational indefinite quadratic forms, minima 86−19926
reactive power control, optimal, via loss minimization and voltage control 86−18702
real-valued matrix permutation problems 87−10230
reconstruction from zero crossings, network approach 88−28091
rectifier filter minimisation 86−7949
recursive stochastic minimisation algorithms, global convergence 88−31683
regularized linearization method with errors in theinitial data 86−52369
regularized Steffensen method with approximation of inverseoperator 85−60896
relative-entropy minimisation with uncertain constraints, appl. to spectrum anal. 88−34545
relaxation methods for problems with strictly convex separable costs and linear constraints 87−72968
reliability anal., map differentiation of switching functions 87−16435
rerouter for optimizing via count and wire length in channels and switchboxes for double-layer layout 87−46121
residues method for soln. of unstable minimisation problems 88−31660
rotary transformer design with fixed magnetizing and/or leakage inductances 87−35981
rounding errors minimisation algebraically using coding theory 86−10262
routing resources congestion minimisation in component placement problem 85−35135
salient pole machines, damper windings *(German)* 87−9488
second order elliptic problems, regularity results for discrete solns. 88−350
second-order necessary conditions, envelope-effect of infinitely many inequality constraints 88−49720
second-order state-space sections, min. sensitivity based design 85−10909
semiconductor devices, numerical modelling, nonlinear eqns. soln. by Cauchy-Newton methods 87−6645
semiconductor thermistor thermometer 87−63365
sensors dynamic error minimisation *(Czech)* 87−56610
sequential augmented penalty function minimisation technique for low-dimensional engineering problems *(Chinese)* 87−52001
sharing, lin. and combinatorial problems 87−192
shortest path problem with single source, local algorithm 87−36602
signal discrimination, rejection decision probability vector minimisation 86−29878
signal durations, limitations 87−19678
signal recovery using entropy criteria with spectral noise subtraction 87−69232
signal restoration from integral readings, error minimisation 88−14714
similar words recognition based on Perceptron criterion *(Spanish)* 88−52376

minimisation continued
simple set functions 87−52003
single row routeing with fixed street capacity, minimisation of the number of layers 88−38344
single-phase current invertor transient conditions, duration minimisation 85−60299
singular minimisers detection, numerical method 87−65371
slotted ALOHA systems, optimal control by retransmission probability 85−52075
space vehicle power supplies, power losses due to single point failures, minimisation 85−48406
spacecraft operational altitude, w.r.t. cost 88−30074
speaker verification, optimal decision threshold determ. 87−47612
spectral anal. by repetitive minimisation, simplex estimation 86−43250
speech adaptive transform coding using vector quantisation 86−69000
speech output systems, storage requirements minimisation using optimal parameter approx. *(German)* 86−69985
speech recognition, acoustic word model estimation, relation between modelling approaches 88−66339
standard cell placement package, ESP, using simulated evolution 87−65698
static VAr compensators, optimal control for power line loss minimisation 88−68766
stopping criteria for linesearch methods without derivatives 85−10614
subgradient selection method for minimizing convex functions subject to linear constraints 88−18594
sum of convex function and continuously differentiable function 86−40639
surrogate constraint dual problem *(Polish)* 85−54289
SWAMI: a flexible logic implementation system 86−21889
SWAMI, logic minimisation, placement and routing 86−978
symbolic hierarchical artwork generation system 86−20227
Tauberian modelling, absolute value minimisation approaches 86−10428
telecommunication transmission networks, cost-optimal network structure calculation under reliability constraints, heuristic procedure 86−37263
test set minimisation problem 86−7662
test signal generation with minimal crest factor 85−37551
transformers, 3-phase, with interconnected magnetic and electric circuits, inrush current anal. 87−22500
trust-region methods for nonconvex minimisation in Hilbert space, global convergence 88−49743
tunneling algorithm for the global minimization of functions 85−33303
two-dimensional VLSI arrays, modelling technique 88−26476
two-point step size gradient methods 88−31672
two-variables programming problems 87−23524
unconstrained, without derivatives, global convergence and stabilisation 88−31659
unconstrained optimisation algorithm *(Chinese)* 88−63191
unified approach to the minimization of quantization effects in separable denominator multi-dimensional digital filters 88−25343
uniform approximation as a numerical tool forconstructing conformal maps 86−19990
VAr control for multiunit generating station power losses minimisation 87−78473
via minimization, constrained, preprocessor 87−5620
via minimization for gridless layouts 87−65708
VLSI, reduction of clock delays 85−34024
VLSI layout area minimisation, optimal aspect ratios of building blocks 88−64716
VLSI layouts, complexing of minimising wire lengths 87−60528
VLSI PLA folding, optimal $O(n^2)$ algorithm 88−70745
VLSI routing, automatic, channel density minimisation 86−67953
waveform peak amplitude minimisation 88−34700
waveguide antenna array synthesis by optimum efficiency criterion *(Russian)* 88−14470
weak minimization and duality 87−23528
WFTA programs, sounding errors minimisation 88−70295
wind-electric conversion system, without storage, optimal design using nonlinear programming approach 85−32410
WSI reconfiguration models *(Italian)* 87−67354
LiF dosimeters, TL residuals, accumulation effects and minimisation 88−54678

minimisation of switching nets

logic minimization using simulated annealing, NMOS ccts. 87−37229
LOGICIAN, design tool for CMOS mesh arrays 87−66116
MOS cells, optimised layout 88−25074
MOSFET NAND gate circuit design using weight minimization method *(Korean)* 86−939
multi-level logic minimization using implicit don't cares 88−50115
multi-level logic optimization system 87−37231
multiple output combinational circuits, PLA, minimizing algorithm *(Korean)* 87−636
multiple output minimization, algorithm 88−25134
multiple valued functions, exact minimisation for PLA optimisation 87−37230

minimisation of switching nets continued
multiple-output logic fns., minimal decision algorithm anal. using Karnaugh map 86−929
multiple-output switching cct. minimisation 86−40996
multiple-valued logic minimisation using truncated SUM operator 87−52497
multiple-valued minimization for PLA optimization 87−52496
multiplexer unit logical function synthesis from splitting frontiers of Karnaugh map 86−930
negative gate networks, Weinberger-like layout in Boolean level Si compiler, logic minimisation 85−761
pass transistor network simplification 87−52499
PLA folding algorithms based on interval graph theory 85−49825
PLA minimisation, minimal covering problem 87−5585
PLA minimisation system, input variable assignment and output phase optimisation 85−11189
relative placement problem, graphtheoretic approach, gate array appl. 88−38317
river routing in VLSI 87−38368
routing multiterminal nets, 1.6 approximation algorithm 87−73236
shortest covering by modules 87−16965
single-pair switching networks minimisation, appl. of truth tables and zero-paths 86−697
symbolic minimization of logic functions 86−34658
system reliability formula, simplified Boolean version of sum of disjoint products 87−44084
threshold elements synthesis, dynamic programming approach 85−22842
truth-table look-up processing using binary coded residue numbers 85−11190
truth-table lookup using content-addressable memory 86−57812
Turbo Pascal listing *(German)* 88−6613
via minimisation with movable terminals in VLSI routing 87−67508
VLSI communication complexity definition 87−73215
VLSI fast solver for tridiagonal linear systems 87−11848

minimum metallic conductivity
n-$Cd_xHg_{1-x}Te$ gapless semiconductor, extreme disordering of electron scatt. 85−45394
a-Si_xN_{1-x}:H films, conduction band tail width and minimum metallic cond. 85−18101

minimum principle
target image tracking using nonlinear filter based on Pontryagin minimum principle 87−19847

minimum shift keying
8 PSK modulator for MSK signal generation 87−37085
24 kHz MSK Doppler receiver at Faraday, Antarctica 86−64007
120-Mbit/s TDMA, pseudo-bit-error-rate meas. 85−57203
adaptive baseband equalizers for narrowband TDMA/FDMA mobile radio 88−41546
adjacent channel interference effects on hard limited satellite systems 86−55233
ARQ scheme with memory and integrated modulation 87−69409
autocorrelation demodulator for continuous-phase frequency-shift keyed signals 87−44694
automatic signal estimation of modulation type, carrier freq. and symbol rate *(Japanese)* 88−46079
band-limited filtering, constant-envelope signals degradation eval. 87−27543
baseband-serial MSK generation, simple approximate method 86−3749
block division slot setting for improvement of intermodulation effects *(Japanese)* 88−72726
cellular radio system, GMSK, worst case cochannel interference and spectrum efficiency 87−69966
CMOS single-chip MSK coherent demodulator for mobileradio transmission 86−43752
correlative-coded MSK, linear receiver using multithreshold decision logic *(Japanese)* 87−47644
correlatively coded schemes, linear receivers 85−36175
CPFSK signals, adaptive detection in non-Gaussian noise 88−52482
CPM, coded, bit error probability, bounds and simulations 86−54423
CPM, MSK-type reception, cochannel and adjacent channel interference anal. 87−39585
CPM, partial response, adjacent channel interference and Gaussian noise presence, performance 87−12886
CPM discriminator detection, examples 87−12887
CPM schemes, new representations 88−40777
CPSK multi-amplitude signals, minimum distance and bandwidth 87−54847
CSMA/CD broadband LAN using beat signal level detection, 10 Mbit/s operation, improvements *(Japanese)* 87−34136
CSMA/CD broadband network, beat signal level detection method appl. 85−42128
data communication signals, linear receivers optimization 88−45805
Data Encryption Standard for digital land mobile radio security system 88−9461
data transmission system, 1.2 GHz, using GMSK modulation 88−45703
delay-throughput comparison for coded channels in mobile fading environment 88−2933
demodulators, signal generator investig. 87−52455
deterministic signals with MFSK, optimum reception 85−25119
differential, performance in noisy environments 86−68963
differential detection of duobinary MSK 86−54424
differential detection of GMSK using decision feedback 88−59003
differential detection of MSK and QPSK, receiver structs. 87−75688
differential MSK demodulation, effects of hard limiting, digital modulator 87−24001
differentially encoded Gaussian-filtered MSK signals, half-bit offset decision freq. detection 88−14657
differentially encoded GMSK with 2-bit differential detection, optimum receiving bandwidth in mobile radio channel *(Japanese)* 88−41568
digital communication channel eval. 86−30447
digital CPFSK FM radius, effects of narrowband interference 88−28673
digital land mobile radio system, directivity diversity 86−69700
digital mobile radio, multipath distortion characts. for BPSK, QPSK, OQPSK, and MSK modulation techniques 86−37765
digital mobile radio, multipath fading channel, sample timing effect on BER perform. 87−28422
digital mobile telephony, Gaussian MSK with different demodulators and channel coding 85−19705
digital speech transmission in highway microcells 88−28709
digital transmission for land mobile radio channels, performance 85−42493

minimum shift keying continued
direct sequence MPSK receiver, M-ary large sample receivers design 86−16361
DMSK modem, 2400 bit/s for mobile satellite service 86−4390
DMSK two-branch space-diversity demodulator for mobile communications 88−41574
duobinary MSK differential detection using decision feedback 88−46129
error probability for differential detection in fast Rician fading and Gaussian noise 88−40995
fading channels, optimum MSK-type receivers for continuous phase modulation 85−19315
FDMA system, partial response CPM with optimum MSK-type receivers, effect of adjacent channel interference 87−68940
FH MFSK communication partial-band tone jamming and background noise, ratio threshold eval. 87−40679
FH/MFSK, with quantiser limiter, coded, partial band Gaussian interference channel, performance 87−39604
FH/MFSK perform. with diversity and coding vs. partial band jammer 87−20396
FH/MFSK signalling, jammed fading channels, adaptive transmission performance 87−33586
FH/MFSK system in worst case partial band jamming, normalized energy metric, performance 85−63518
fractional-bit differential detection to avoid outages due to freq. selective fading 87−48937
frequency hopped MFSK mobile radio, nonparametric receiver 85−30932
frequency hopping MSK system, error perform. under freq. selective fading and partial band tone jamming 87−69898
frequency offset receiver diversity for differential detection of MSK 87−75687
frequency-manipulated signals with minimum shift, optimum algorithms for reception 85−7881
Gaussian bandpass filter for differentially encode GMSK, optimum bandwidth anal. 85−41837
Gaussian MSK, differential detection 87−39820
Gaussian MSK with discriminator detection in mobile radio channels 87−3067
Gaussian-filtered MSK land mobile radio, spectrum efficiency 86−17249
generalised modulation techniques, simultaneous data demodulation and phase tracking 88−27733
GMSK, two-bit differential detection with and without precoding and using decision feedback 88−2937
GMSK and MSK, differentially detected, bit synchronisation 86−16362
GMSK detectors using noise estimation-cancellation techniques 87−68950
GMSK frequency detection using decision feedback equalisation for mobile radio 88−14571
GMSK frequency detection with decision feedback equalisation, digital land mobile radio, anal. 88−53179
GMSK in Rayleigh fading channels, BERs 88−73157
GMSK performance and comparison with 12PM3 class modulation methods, digital land mobile radio appls. 87−68941
GMSK with data-aided phase control, 1-bit differential detection 87−33591
GMSK with limiter discriminator detection, land mobile radio channels, anal. 87−28448
GMSK with two-bit differential detection, land mobile radio channels, anal. 87−40744
GMSK with two-bit differential detection, land mobile radio channels, anal. 87−28447
GTFM/GMSK, decision directed timing recovery for incoherent detection 87−68942
hard limited satellite systems, MSK and OQPSK, combined effects of adjacent channel, intersymbol and CW interference 87−40813
I and Q data, acousto-optic synchronization and demodulation 87−46617
interference in QPSK, OQPSK and MSK hard-limiting satellite systems, error analysis 86−43772
intermodulation effects in PSK, MSK and QORC modulation systems *(Japanese)* 87−27148
land mobile perform. improvement using fractional-bit differential detection of MSK 86−69674
land mobile radio, data transmission perform. of 18 kbit/s noncoherent Gaussian MSK 86−69673
land mobile radio channels, anal. of Gaussian filtered MSK (GMSK) with differential detection 87−28421
land mobile radio channels, discriminator detection of Gaussian MSK anal. 86−69670
land mobile radio channels, Gaussian MSK with differential detection anal. 86−69671
land mobile satellite channel meas. and models, appl. to MSK signals 88−28704
land mobile satellite channels, comparison of data modulation techniques 87−48980
linear receiver for partial response CPM with index 0.5 88−45862
LSI demodulator using frequency-detection method for GMS signals *(Japanese)* 88−20040
M-ary CPFSK with modulation index 1/M, detection techniques comparison 85−41839
M-ary MSK spread spectrum system, performance 87−40668
matched encoders in combined convolutional encoding and memory-systems 87−54940
minimum freq. keying-AM signal demodulator, noise immunity calcs. 88−27737
mobile packet radio channels, performance degradation due to hidden terminal problem in carrier sense multiple access 85−14203
mobile radio, multipath fading channel, two-ray model, coherent detection of MSK 87−3088
mobile radio error protection, GMSK soft-decision chase decoder 86−49493
mobile radio systems, differential detection of Gaussian MSK 85−20074
mobile radio systems, GMSK modulation using Viterbi equaliser, design and performance 88−15383
mobile satellite communication, binary multi-h modulation for fast fading shadowed channels 87−70020
mobile satellite communications, modulation and voice coding 87−13670
mobile satellite systems, discrete multipath effect on signal reception for MSK and GMSK 87−70019
modem noise immunity for digital signal processing with minimum frequency shift keying 86−37629
modulation and demodulation 86−22883
modulation technique anal., error probability *(Spanish)* 86−22881
MPSK, bit error rate reduction performance using compressed coding *(Japanese)* 85−62978
minimum shift keying continued
MSAT mobile satellite terminals using differential MSK and LPC voice encoding 87−28495
MSK carrier recovery cct. for deviated-frequency-locking detect. *(Japanese)* 86−10395
narrow-band digital communication by means of premodulation low-pass filter *(Japanese)* 86−30673
narrow-band digital FM transmission with diversity reception at 1.45 GHz carrier freq. 88−53171
narrowband FM, double symbol error rates for differential detection 85−46661
narrowband mobile radio channels, digital speech transmission *(German)* 86−23747
NEC MSK remote control IC, review *(Japanese)* 88−21578
nonlinear intermodulation effects in PSK, MSK, and QORC modulation systems 88−2938
overlay modulation, performance anal. and comparison of techniques 86−3783
overlay MSK demodulation using Viterbi algorithm 88−2927
packet radio, low-cost implementation for network development 87−34443
partial response continuous phase modulation, serial MSK-type detection 85−25090
partial response continuous phase modulation with MSK-type receivers, adjacent channel interference 86−68966
phase coherent frequency hopped systems, tracking loop anal. 87−40690
phase trajectory converter for partial responsemodulation 86−4354
portable communications environment, delay spread effects on digital modulations 88−8672
QPSK data transmission, estimator-detector development 85−57202
quadrature MSK demodulator, code word selection for burst synchronisation 87−12932
recursive bandpass equalizer for constant envelopesignals 86−852
Rician fast facing environment and Gaussian noise, differential detection, error probability 87−33693
satellite serial MSK conversion and matched filters at microwave freqs., realisation 86−11038
SAW MSK matched filter, appl. to spread spectrum communication system *(Japanese)* 86−28587
SAW MSK matched filter, construction and characts., spread spectrum communication appl. 87−53850
serial MSK filters, microwave implementation for TDMA satellite communication systems 86−27437
serial MSK modems for TDMA satellite equipment 87−20319
signal detection using open loop technique 86−68965
SNR loss, low-pass filtered FM/MSK 87−40695
soft decision Viterbi decoding in GMSK with coherent detection, performance under Rayleigh fading environment *(Japanese)* 88−45928
software simulation for MSK and RC modulation schemes in time- and frequency-selective mobile radio channels 88−72731
spectral correlation, synchronisers design and performance anal. 87−12876
speech transmission, digital, with 9.6 kbit/s over radio channels *(German)* 86−69595
spread spectrum, asynchronous transmission *(French)* 85−25732
SSMA communications, multipath diversity reception 88−15318
TMS32010 2400 BPS modem implementation for mobile satellite appls. 88−41573
trellis coded differentially coherent MPSK, phase noise effects 87−39661
trellis coded PSK schemes, phase errors effects 87−27152
trellis codes and generalised MSK, optimal concatenation 85−41835
two-bit differential detection 85−41836
TWTs, high-power 30 GHz devices for ground terminal appl., BER testing 88−19620
UHF mobile radio, decision feedback and Viterbi equalizers 88−28738
urban mobile radio channel, Rayleigh fading, limits of data rates 87−69983
Viterbi detection, system performance *(Chinese)* 85−51535
Viterbi detection of MSK signals in the presence ofintersymbol interference 87−2408
Viterbi receivers, VLSI structures, encoded MSK modulation 86−43107

open coal pit, electricity supply and distrib., economics *(Croatian)* 88−49326
open cut coal mining equipment in Central Queensland, electrical requirements 85−49241
open-cast coal mine network voltage oscillation evaluation *(Russian)* 86−26467
open-cast handling excavator program control by microcomputer *(German)* 85−60633
open-cast mine electrical distribution system design and installation criteria 85−49243
open-cast mine power system design minimising harmonic pollution 86−13245
open-cast mining machine drive power convertor programme *(German)* 85−60631
open-cast mining machine slewing gear drive power convertor system *(German)* 85−60632
open-cast mining machinery, electrical installations and automation equipment *(German)* 86−33894
open-cast mining power supply vacuum switchgear *(Russian)* 86−19694
open-pit mining operations, electronic monitoring of dragline performance for improved management information 85−44362
opencast machines, stored program control and automation soln. appl. 88−18281
opencast mines in cold areas, electrotechnical equipment appl. in hoisting installations *(German)* 86−66523
optical dust deposition meter in coal mines 87−63324
optical fibre cable for mobile application in brown coal mining areas 88−28917
optical fibre networks for coal mines 88−22107
ore-grinding rod mill material corrosion meas. and control by A/D telemetry 88−67683
outdoor transformer stations for extractive industry 88−11271
overburden conveyor bridge complex automation using audatec process mastering system 88−18282
PDT 300 Envirosystem, data transmission system for underground mine computerised environmental monitoring 85−25255
mining continued
phosphate mining group technological innovation and continuing education 87−23194
pit pit and quarry distribution network insulation monitoring by selective current transducer *(Russian)* 86−57069
portable microseismic processor recorder, field trials 86−6076
portable mining equipment, power supply from autotransformers 87−65028
position finding in mines with ELF waves forarbitrarily oriented transmitters 87−2836
potash mine microelectronic control equipment 87−31112
power consumption requirements control in mining plant *(Russian)* 87−43723
power network central leakage protection reliability model and test results *(Polish)* 86−13244
power supplies and power apparatus of Hungarian mining industry, safety requirement *(Hungarian)* 86−71166
power supplies in mines, regulation of current harmonics *(Russian)* 85−16533
power supply systems short-circuit currents calc. *(Russian)* 85−59671
power system, convergence control of polar-form Newton based power flow 88−31258
power system, nondiverging power flow using least-power-type theorem 88−10736
power system analysis, using non-iterative approach 85−27000
power system analytical procedures 86−45886
power system cycloconvertor harmonic simulation 86−45889
power system DC track/trolley system, phenomena affecting calc. of inductance and resistance 85−26999
power system design, non-diverging power flow formulation 87−43727
power system earthing problems and design considerations 86−45887
power systems, capacitor assignment based on electrical-cost optimisation 87−65027
power systems, predictive maintenance testing improvement 87−65029
power transformers, operation in tropical conditions, in Papua New Guinea 85−32531
preparation process using automatic control concepts 88−11541
production costs reduction through excess power demand controls 86−7355
protective earthing in mining systems, theoretical study *(Russian)* 86−26461
quarterly repairs and maintenance planning optimisation for electrical mine equipment *(Russian)* 85−10378
radar techniques appl. to bunker contents meas. 85−31099
railway traction locomotives, electric drive technology using induction motors *(German)* 88−62838
railways using WSSB made signal boxes with trackage block diagram 88−11463
reactive power compensation for mine winders andconveyors 86−18691
Red Sea (Atlantis II Deep) mining for polymetallic sulphides 85−5621
reliability of mine elec. equipment 86−26469
remote control of mining machines using radio signals 86−17189
remote seismic monitoring system, with microprocessor based data acquisition and radio network communications 85−43473
remote-sensing in mining−a review of techniques and applications 85−43499
resonance earthing of neutral conductor, safety conditions of 6 to 10 kV mining networks *(Russian)* 87−21970
Robbins tunnel boring machine control and protection system 85−5613
rock breaking machine radio remote control and automation system 85−42471
rock dust content determ. in coal-rock-dust mixture, monochromatic reflectance meter 87−41632
roof instability detection by movement rate monitoring 88−68035
rural distribution networks, effects of cyclical mining loads using thyristor bridge rectifiers 85−43593
safe communication, signalling and control systems in coal mines 86−30272
safety, explosion proof enclosure research, overview 86−26566
safety in mines and other explosive atmospheres *(French)* 85−16717
salt deposit prospecting and mining, ultra short wave radar application *(German)* 87−61464
SCADA for pipeline monitoring and control 88−15965
Secom mine rescue radio, application for vehicle control and shaft inspection 85−42497
seismic networks electronic designs, past, present and future 85−43472
sensitive earth-fault relaying requirements and schemes 86−45020
sequential mine conveyor systems, power demand, probabilistic model 86−32695
shaft structural monitoring, microcomputer-based instrumentation 87−14117
shovel power factors regulator development and simulation results *(Japanese)* 86−19696
single-bracket loader face, quality evaluation *(Russian)* 85−22044
sinusoidal cyclo-converter for mine hoist drive 86−6909
Slurry Monitor for density measurement in mine pipelines 86−31682
South African mining electronics, maintenance perspectives using systems engineering 85−39513
steel, 17 Mn V7, grain refined, manufacture and props., for mine supports *(German)* 85−10253
submersible asynchronous self-exciting generators for well drilling 87−79262
substations load rating at coal sections *(Russian)* 86−7357
surface mine elec. system and equipment design/coordination 88−18277
switchgear, remote monitoring and control unit 85−39128
switching apparatus, electromagnetic contacts accelerated connection, reliability improvements *(Russian)* 85−16153
technical aspects, control, monitoring, power apparatus conf., Pittsburgh, PA, USA (June 1987) 87−58549
telephone service provision for mining industry via remote Earth stations 87−62921
testing of mine monitoring system, using a software package 86−11422
thyristor convertors for drive control 88−11547
track/trolley haulage system impedance models 86−45890
traction motors for electric locomotives in mines, operating modes and failures *(Russian)* 85−16307
transformers in hazardous areas, protective measures and enclosures 85−21679
transport synchronous generator excitation control *(Russian)* 86−33339
transport variable DC drive overload capacity *(Russian)* 86−40358
trolley locomotive installation, maintenance and training approach 87−9980
trolley vehicles in mines, arc reduction technique 85−44242
turbine generator for electric power using mine cooling water 86−45883

mining continued
turbo-air coolers, theory and practical appls. *(German)* 85−5609
underground coal mine monitoring and communications 86−45884
underground coal mine power system reliability analysis 86−45885
underground coal mining, maximum electric power demand and demand factor 85−27013
underground coal mining, temp. rise limits of transformers, motors and cables 88−24302
underground coal mining machinery, explosion-proof elec. drive develop. 88−43529
underground electromagnetic wave propagation, significance to mining 85−35999
underground EM propagation 85−41685
underground mine earthing, coupling with surface earthing, health hazards 85−27107
underground mine telemetry systems for remote control and monitoring microprocessor technology utilisation 85−42198
underground mine vehicles MF control and communication systems 85−3388
underground mines measuring, monitoring and control instruments, use of electronics 85−43092
underground mining locomotive with 3-phase variable speed drive system 88−69858
underground power supply systems optimisation *(Russian)* 87−43724
underground substation monitoring and control system *(Russian)* 87−71551
underground systems approach to microelectronics and microprocessors appl. in Czechoslovakia *(Czech)* 88−67642
underground transformer substations for potash and rock salt mines 87−31111
underground-access oil recovery by gravity drainage 86−39284
University of Mining and Metallurgy Local Area Network 85−25499
variable speed drive for hazardous areas 86−66377
ventilation system with computerised control and monitoring 86−57068
Voitsberg 3 thermal power station, soft coal supply from adjacent mine *(German)* 85−9736
Warwickshire coalfield coal face power systems, effects of production method changes 87−65025
Wearmouth Colliery squirrel cage cycloconverter drive for winder, control system 88−37796
Wearmouth Colliery squirrel cage motor drive for friction winder 88−37795
West German coal mine locomotive haulage characteristics 87−72653
Au underground mining, lighting system for high-speed photography 88−24256
C brush and commutator maintenance in coal mining 87−22946
CO, methane and air velocity fixed point mine-monitoring transducers, location strategy 87−51685
Cu mine tunnel, EM wave propagation, expt. results 87−54543
Ni mine, computerised control system for underground ore conveyors *(German)* 88−31253
Ni-Fe battery for hybrid trolley vehicle, feasibility and test results 85−65507
SF_6 insulated medium voltage switchgear, salt mine example *(German)* 86−39983
U deposit recovery, modular plants 86−45894
U mining and refining in Canada 87−79269
U, passive personal dosimeter, using electrostatic collector and diffused-junction detector 85−31715
ZnO resistive-capacitive protection for switching surges in mining equipment 88−43519

minmax technique *see minimax techniques*

minor planets *see asteroids*

minority carrier conduction *see minority carriers*

minority carriers
ballistic camel diode, optoelectronic negative resistance device, LED integration for bistable memory element 88−58353
bifacial solar cells, diffusion length and surface recombination velocity determ. 88−18073
bipolar devices, small-signal minority carrier transport, numerical anal. 88−26223
bipolar IC simulation, modelling of minority carrier current in heavily doped regions 85−45852
bipolar junction transistors, minority-carrier transport with graded emitter-base junction 87−25232
bipolar transistor, compact model for CACD with accurate description of collector behaviour 87−32497
bipolar transistor, high current gain, with n-doped a-Si:H emitter, modelling 85−23748
bipolar transistor, lifetime measurement, base minority carriers, base transit time *(Rumanian)* 86−2134
bipolar transistor, minority carrier transport, reciprocity theorem proof 86−63253
bipolar transistor, one-dimensional, with arbitrary base parameters, reciprocity theory, proof of validity 85−18298
bipolar transistor modelling, current and charge relations, cct. CAD appls. 86−21518
bipolar transistors, Early voltage anal. and meas. 87−6676
bipolar transistors, emitter modelling for VLSI 88−19933
bipolar transistors, flicker noise due to minority carrier trapping 86−67850
bipolar transistors, heterostructure, high current effects 88−39386
bipolar transistors, minority carrier transport, effect of electron-hole scatt. 85−45657
bipolar transistors, physics and modeling of heavily doped emitters 85−18302
bipolar transistors, polysilicon contacted, precessing parameters effect on base current 86−47544
bulk generation lifetime and surface generation velocity, CCWT method determ. 86−21268
bulk unipolar diodes, unified quantitative theory for elec. props. anal. 87−25205
bulk unipolar transistors in the limit of nonpunch-through, unified model 87−67186
CCD, surface-channel, surface and bulk generation parameters from dark current meas. 86−9137
CMDMOS transistor, conductivity-modulated novel trench-injector power device with low ON resistance and high switching speed 88−64555
CMOS epitaxial wafers, elec. characts. 86−21864
compensated semiconductors, exclusion effect enhancement, impurity illumination, minority carrier generation 85−55428
minority carriers continued
diode lasers, steady state 2D model, minority carrier diffusion length 88−58544
diode reverse recovery time improvement of p-n junction meas., carrier lifetime 88−44578
electron diffusion coeff. from lifetimes meas. 86−63015
epitaxial Schottky diodes, minority-carrier quasi-Fermi level, model 85−40686
fast diodes, computer transient forward voltage drop anal. using 1D computer model 86−15120
gettering by Ar^+ ion implantation, dose optimisation *(Chinese)* 85−50380
graded p-n junctions, boundary conditions on minority carrier conc. 85−18124
Haynes-Shockley expt., majority and minority carrier motion, theory 86−8727
heavily doped emitters, minority carrier transport modelling 88−19932
heavily doped semicond., minority carrier transport, general analytical soln. 85−23387
HF MOS capacitor C-V curves, desktop computer based calc. using equiv. cct. model 87−38293
high-barrier Schottky diodes, minority-carrier injection ratio and charge distrib. 85−55769
HV photoconverter, minority charge carriers diffusion length meas. 87−33050
II-VI heterojunctions, performance optimisation 88−19700
III-V p-n junctions, minority carrier diffusion lengths, SEM study by induced EMF meas. 85−11981
III-V semiconductors, surface photovoltaic spectra of epitaxial materials *(Chinese)* 86−63701
$In_{0.53}Ga_{0.47}As$:Fe metalorganic CVD epitaxial growth and elec. props. 87−31512
insulated gate bipolar transistor, neutron effects on characts. 87−32542
intrinsic gettering of heavy metals, lifetime evaluation of denuded zones 85−1442
IR detectors, minority carrier exclusion 87−21098
IR laser light modulator of ridge-type optical waveguide struct. using free carrier absorpt. effect *(Japanese)* 87−38852
lateral insulated gate bipolar transistors, SIPOS effects 88−33162
LED, Monte Carlo model, minority carrier recombination and radiation reemission 88−2136
LED degradation rate and modulation characts. relation from heterostruct. radiation 85−46292
LEDs, interface recomb. and self-absorption, influence on performance for optical communication 87−7224
lifetime meas. apparatus, based on point contact conductivity modulation 87−77364
lifetime meas. technique using MOS capacitor 85−40580
lifetime measurement, semiconductors, electronic method *(Rumanian)* 86−1666
metal-semiconductor junctions, formation, structural and electrical props. 87−17792
metal-semiconductor structures, variable gap, photon transport of carriers 85−23559
minority carrier transport TOF study 87−24748
MIS solar cells, areal inhomogeneities, equiv. cct. 85−21803
MIS solar cells, spectral props., theoretical anal. *(Polish)* 85−5377
MIS structure, dopant profile monitoring, generation of charge in nonequilib. space charge region 86−58332
MIS structure, pulse biased, dynamical anal. of C-t process, method for meas. of spatial distrib. of minority carrier generation lifetime *(Chinese)* 85−12018
MIS structure generation parameters, influence of processing technology *(Slovak)* 86−58326
MIS structures, minority carrier lifetime meas. *(German)* 87−35182
MISS devices, optical illumination effect, theoretical anal. 86−2963
MOS capacitance in strong inversion at high temp., freq. depend. 87−1342
MOS capacitor, minority carrier bulk generation lifetime and surface generation vel. determ. *(Chinese)* 85−18171
MOS capacitors, minority carrier generation lifetime meas., modified Zerbst method 87−56795
MOS capacitors, minority-carrier generation lifetime, extrapolation 85−50317
MOS capacitors formed on p-type Si substrates, charge injection and trapping 88−64326
MOS devices, widening of subthreshold cond. region at very high temp. 85−12282
MOS IC substrate bias cct. for minority carrier injection prevention 86−41948
MOS struct., minority carrier bulk generation lifetime and surface generation vel. *(Chinese)* 85−18173
MOS structure, deep depleted, minority carrier generation, effect of high elec. field *(Chinese)* 85−45463
MOS structure, minority carrier bulk generation lifetime and surface generation velocity *(Chinese)* 85−34650
MOS tunnel oxide structs., two-carrier cond. 85−34677
MOS tunnel structs., minority carrier quasi-Fermi level 86−35467
MOSFET, channel freq. response, effects of high-field stressing 87−6735
MOSFET, visible light emission beyond source-drain breakdown 86−9159
MOSFET performance enhancement by improved SOS material processes 85−12304
MOSFETs, hot carrier energy distrib. and minority carrier generation mechanism 86−47595
n-p-n transistor component of thyristor, current gain reduction due to p-base doping conc. 88−39426
n-p-n transistors, minority carrier lifetimes 85−18063
n-p-n transistors, storage time reduction method 86−21513
n-type SIPOS and polysilicon emitters 88−19931
narrow direct gap semiconductors, minority-carrier exclusion characts. 86−8762
narrow gap semiconductors, electron and hole recombination 87−45554
negative differential resist. device, reson., tunnelling transistor with quantum well base, high energy injection 86−2130
p^+-n-n^+ diffused diodes, reverse recovery process, effect of electron and hole lifetime distrib. 86−21493
p^+-n-p transistors, heavily doped emitter layer, transit time and charge storage 86−41750
p^+-s-n^+ structure, electrophysical props. of heavily doped layers 85−34596
p-n diodes, heavily doped, boundary conditions and I-V relations 87−67208
p-n heterojunction, reverse-biased graded, negative differential cond. 86−28011

minority carriers continued
p-n heterojunction hot-electron structs., nonlinear photo-EMF 85−12712
p-n homojunction solar cell, minority-carrier lifetime 88−24134
p-n junction, shallow, 2D current injection, analytical soln. 86−21188
p-n junction diodes, minority carrier lifetime determ. from open-circuit voltage decay including junction capacitance effects 87−49911
p-n junction diodes, open circuit voltage decay at high levels of injection 86−53594
p-n junction diodes and solar cells, electrical short-circuit current decay 88−67985
p-n junction diodes and transistors, non-quasistatic small-signal models 87−74251
p-n junction peripheral photoresponse due to minority carrier lateral diffusion, exact soln. 85−34577
p-n junction space-charge region, minority carrier accumulation at base edge under short-circuit conditions 87−72446
p-n junction with high temp. gradient, EMF kinetics 87−45652
p-n junctions, current parameters, meas. by optical beam excitation, scan vel. effect 87−60146
p-n junctions, equivalent circuits for transients, rel. to minority carrier lifetime determ. 85−18150
p-n junctions, light-generated minority carrier transfer in mag. field, photocond. studies 88−44569
p-n junctions, minority carrier diffusion length, scanning method determ., numerical eval. 88−1433
p-n structures, bevelled, p-n junction position and doping gradients, EBIC profiling 85−40497
photodiode, diffused junction, optical absorpt. coeff., minority carrier diffusion length, and impurity profile *(Japanese)* 86−28983
photodiodes, lateral collection, cylindrical symmetry, minority carriers distrib. calc. 86−15573
photon detector devices, local investig. by scanning laser microprobe 87−21076
photovoltaic materials and devices, EBIC anal., SEM modifications 85−12714
polycrystalline semiconductors, minority carrier lifetime, 1D nonequilibrium steady state anal. 87−66863
polycrystalline solar cells, defect passivation by H_2 annealing 85−60426
polysilicon emitter, thermionic diffusion model 87−45899
polysilicon emitter contacts, majority and minority carrier transport 87−45898
polysilicon emitter contacts for VLSI bipolar transistors 87−25231
polysilicon solar cells, I-V characts. and performance efficiency 88−75947
polysilicon solar cells, preferentially doped, light-beam-induced current anal. 86−66325
power MOSFET, radiation hard, neutron irrad. to reduce radiation induced breakdown 86−35694
power MOSFETs, unclamped inductive switching and diode recovery stress failure modes 88−50863
power switching transistors, minority carrier lifetime control by electron irrad. *(Chinese)* 87−53477
precision voltage references, temp. compensated, rapid annealing following fast neutron irrad. 86−35639
PV cells, minority carrier lifetime meas. using device modelling techniques *(French)* 88−20504
quantum wells, reson. tunnelling, physics and device appls. 88−39115
relaxation semiconds., minority carrier injection, boundary conditions effects, numerical computation 87−11327
scaled bipolar transistors, physics, tunnelling and minority carrier transport 85−23928
Schottky barrier diode metal-semicond. interface state spectrum distortion due to nonequilib. occupancy 87−53276
Schottky barrier diodes, epitaxial, in bipolar cct. environment, scaling props. 86−21505
Schottky barrier diodes, resistance modulation in case of high minority carrier injection 87−11732
Schottky barrier junctions, photovoltaic effect 85−23558
Schottky barrier structures, quantum efficiency of photocurrent 87−45690
semiconductor, carrier transport in built-in and external fields 87−24745
semiconductor, minority carrier diffusion length meas. using MIS struct. under light irrad. *(Japanese)* 85−40416
semiconductor, minority carrier diffusion with surface recombination, random walk theory 88−7278
semiconductor, minority carrier lifetime, diffusion length and diffusion const., simultaneous determ. using modulated light beam 87−53152
semiconductor, pure and compensated, parameter determination from exclusion effect laws 85−23411
semiconductor, surface recombination vel. calc. 87−17679
semiconductor devices, generalised reciprocity theorem, short-circuit current and Fermi level 86−28251
semiconductor devices, optical beam induced current meas. 88−64480
semiconductor doping, diffusion length of injected carriers 85−18224
semiconductor epitaxial layers, modulation meas. technique for recombination lifetime profile 88−26017
semiconductor grain boundary photovoltaic effect, scanning laser beam obs. anal. 87−6372
semiconductor IC faulty action, feint luminesc. detection apparatus 88−44829
semiconductor IR detectors, non-equilibrium modes of operation 87−8632
semiconductor thin films, minority carrier diffusion length meas. by differential surface photovoltage technique 86−8717
semiconductor wafer with differing surface recomb. vels., minority carrier continuity eqn. *(Chinese)* 87−66866
semiconductor wafers, minority carrier lifetime and recombination vel. *(Chinese)* 86−27828
semiconductors, extrinsic, isotropic, thermogradient magnetoconcentration effects 85−23393
semiconductors, high-resistivity materials, electronic charge transport theory 86−1664
semiconductors, laser irrad., minority carrier decay, surface recombination effects 85−1263
semiconductors, majority and minority carriers, magnetoconductivity characterisation method 88−19661
semiconductors, minority carrier diffusion length, laser beam induced current meas. 88−32739
semiconductors, minority carrier generation lifetime determ. using C-t parameters *(Chinese)* 85−45374
semiconductors, minority carrier injection, behaviour of majority carriers *(Japanese)* 86−35280
minority carriers continued
semiconductors, minority-carrier lifetime determ. using frequency-domain transient anal. 87−74146
semiconductors, n-type, effect of dopants conc. on resolution and rate of light photoetching, model 87−73979
semiconductors, nondegenerate, carrier lifetime and doping density relations 85−1262
semiconductors, nonequilibrium carrier transport, Boltzmann eqn. appls. *(Chinese)* 88−7282
semiconductors, photogenerated minority carrier collection, spectral response 85−41240
semiconductors, polycryst., grain boundary recomb. vel. meas., EBIC or light-beam induced currents 86−8721
semiconductors, polycrystalline, elec. transport and recomb. under optical illum. 88−57289
semiconductors, polycrystalline, minority carrier lifetime at grain boundary surface and in bulk region 86−27829
semiconductors, surface channel conductivity, effect of charged form of adsorption 85−34448
semiconductors, surface photovoltage technique for minority carrier diffusion length determ. 86−8720
semiconductors, transient photoconductivity meas. of transport coeffs. 85−41244
Si concentrator solar cells, minority carrier lifetime meas. 88−37579
silicide Schottky contacts, epitaxial and nonepitaxial, admittance meas. 88−39145
SINFET, Schottky injection MOS-gated power transistor 87−32521
solar cell, short-circuit current decay for minority carrier lifetime determ., wavelength depend. 88−37385
solar cell photocurrent, minority carrier diffusion length study using computer simulated model 88−24136
solar cell substrate charactn. techniques 87−22768
solar cells, electron beam excited, short-circuit current anal. 86−33660
solar cells, equivalent circuits for transients, rel. to minority carrier lifetime determ. 85−18150
solar cells, minority carrier lifetime, transient measurements 87−58323
solar cells, minority carrier lifetime and surface recombination velocities meas., methods 88−37550
solar cells, minority carrier lifetime determ. from open-circuit voltage decay including junction capacitance effects 87−49911
solar cells, minority carrier lifetime meas. using photocurrent decay method 85−49099
solar cells, photovoltaic measurement techniques, review 85−39211
solar cells, recombination and transport parameters, advanced measurement techniques 87−30967
step p-n heterojunctions, minority-carrier leakage 87−45658
superlattice bipolar transistors 88−57627
suppressed sidewall injection magneto-transistor, analytical model 88−42074
thin oxide integrity, effects of pre-gate oxidation cleaning and gettering 87−25149
thyristors, P-n-P-n struct., high-power, static and freq. characts. optimisation 88−71540
transistor input conductance and base charging capacitance, injection level, impurity profile and field depend. mobility effect 85−55785
tunable current-controlled LED 87−38946
turn-off thyristor with a minority-carrier control gate 86−41772
two terminal triangular barrier devices 87−67212
wide-gap semiconductors, double injection characts. 88−71295
$AgIn_5Se_8$-Na_2SO_4 ($KI+I_2$), semicond. electrodes characterisation by photoelectrochemical techniques 88−1468
Al/Zn/p-p^+ Si diodes, elec. characteristics 87−68294
Al-SiO_2-Si structs., local electrophys. props. of elec. active defects 87−74125
Al-SiO_x-p-Si MIS minority carrier grating type solar cells, temp. depend of I-V characts 87−51475
AlAs-GaAs structures, minority carrier retention 87−74067
AlGaAs solar cells, MBE grown, O impurities effects 88−69687
$Al_{0.2}Ga_{0.8}As$ p^+-n junction solar cell, MBE grown, growth conditions depend. 86−13040
$Al_{0.37}Ga_{0.63}As$ grown by MOCVD, minority carrier props. meas. 88−32816
n-$Al_{0.38}Ga_{0.62}As$, minority-carrier lifetime 88−64236
$Al_xGa_{1-x}As$ homojunctions, minority-carrier diffusion, TOF studies 87−6402
$Al_xGa_{1-x}As$ photovoltaic devices, high speed characterisation 88−2123
AlGaAs/GaAs heterojunction bipolar transistors, emitter-base junction size effect on current gain 86−9103
AlGaAs/GaAs heterojunction bipolar transistors, minority-carrier lifetime and injection efficiency 86−35651
n-$Al_zGa_{1-z}As$/p-GaAs heterojunction, space charge region props., model 88−64284
AlGaAs-GaAs HIGFET technology, one-transistor DRAM develop. 87−44848
AlGaAs-GaAs abrupt interface heterojunction bipolar transistor characts. 88−33172
AlGaAs-GaAs solar cells, electron and proton irradiated, deep level defects and recomb. parameters 86−7027
(AlGa)As-GaAs solar cells, proton irradiated, computer simulations 88−37387
Au/Cd stearate/n-GaP electroluminescent device struct., electron-hole recomb. luminesc., minority carrier injection mechanism 87−33065
Au/i-ZnS/n-ZnS electroluminescent device struct., electron-hole recomb. luminesc., minority carrier injection mechanism 87−33065
Au-Ge Schottky barriers, minority carrier diffusion coeff. from capacitance-voltage characts. 85−40513
CMOS, modified Schottky behaviour in shallow p^+-n junctions, $CoSi_2$ outdiffusion 88−33384
CdHgTe, minority carrier lifetime close to anodic oxide interface 86−8777
CdHgTe, minority-carrier exclusion characts. 86−8762
n-$Cd_xHg_{1-x}Te$, doped and undoped, minority-carrier lifetime 87−11349

Si solar cells, electrical short-cct. current decay meas. system, recomb lifetime and velocity determ. 88−5876
Si solar cells, high efficiency, emitter recombination and minority carrier lifetime meas. 86−7093
Si solar cells, high efficiency, identification of key parameters limiting perform. 87−36137
Si solar cells, high efficiency, medium resistivity, design and fabrication 88−37607
Si solar cells, high-efficiency, n^+-p-p^+ back-surface-field, optimisation 87−58325
Si solar cells, ion implanted and halogen lamp annealed, minority carrier diffusion length 86−7082
Si solar cells, ion implanted, minority carrier transport in shallow heavily doped emitters, effect of dopant density profile 85−49107
Si solar cells, low and high level carrier injection, characts. and performance 85−44183
Si solar cells, low recombination p^+ and n^+ regions for high performance 87−4896
Si solar cells, low resist., voltage-controlling mechanisms 86−33656
Si solar cells, metal insulator n on p, radiation damage 87−4941
Si solar cells, minority carrier diffusion lengths, localised recombination planes 86−26293
Si solar cells, minority carrier lifetime by pulsed photoabsorption decay 88−37504
Si solar cells, multicrystalline, thermal annealing for fabrication 87−9821
Si solar cells, open circuit volt., diffusion induced lattice stress 85−65461
Si solar cells, p-n junction dead layer thickness meas. by nondestructive method 85−32714
Si solar cells, passivation using $ZnS_{0.9}Se_{0.1}$ and GaP semiconductor coatings 87−43463
Si solar cells, polycryst., effective minority carrier diffusion length 88−62618
Si solar cells, polycryst., grain boundary eval. using scanning MBIC method *(Japanese)* 86−33649
Si, solar cells, post diffusion annealing effects *(Chinese)* 88−62597
Si solar cells, short-circuit current, effect of natural and simulated solar spectra *(Japanese)* 85−44179
Si solar cells, submitted to rapid annealing, elec. behaviour 85−60416
Si space solar cells, damage coeffs. of 1 MeV electron fluences 87−9777
Si space solar cells, temp. depend. of I-V characts. 88−37555
Si, thermally oxidized, influence of gettering on recomb. characts. *(Russian)* 85−50357
Si, thermally processed minority carriers recombination rate, O induced microdefects *(Russian)* 88−25872
Si thin film solar cells, optimum design *(Japanese)* 86−33648
Si, upgraded metallurgical grade, diffused solar cells investig. 86−13082
Si wafer, anal. of laser pulse interaction, bulk lifetime and surface recomb. vel. determ. 87−61019
p- Si wafer, minority-carrier diffusion length determ., photocurrent generation method 87−24753
Si wafers, doped by neutron transmutation, minority carrier lifetime, photocond., annealing 87−24765
Si wafers fabricated by CMOS technology, oxidation stacking faults influence *(Slovak)* 86−15040
Si wafers, minority carrier lifetime, nondestructive photovoltaic meas. technique 86−58233
Si wafers, minority carriers generation lifetime effects of oxidation stacking faults in CMOS technology *(Slovak)* 86−15255
Si wafers, semiconductor materials and devices, wafer mapping and data graphics for elec. charact. 87−17894
Si:Al(B)(Ga)(In), material considerations for high efficiency solar cells 87−72436
Si:As, heavily doped, trap controlled minority carrier mobility 86−8740
Si:Au, DLTS meas. using high Schottky barriers 86−14850
Si:Au wafers, impurity removal by Ge back-side gettering, minority carrier lifetime meas. 86−41641
Si:Au(Pt) radiation resistant diode detectors, minority carrier lifetime 87−50168
Si:B, O CZ wafers, O precipitation deep levels, minority carrier lifetimes 86−21121
Si:B, heavily doped, electron lifetime, electron mobility, and band-gap narrowing 87−45570
Si:B high-low junctions for back surface field solar cells 86−71067
Si:B solar cells, low effective back surface recomb. vel. 88−62596
Si:H amorphous thin-film solar cell production by CVD 87−58988
a-Si:H, carrier trapping, picosec. photomodulation studies 88−1403
a-Si:H, diffusion length meas., steady-state photocarrier grating technique 88−25906
a-Si:H doping-modulated multilayers, excess carrier densities calc. 86−63085
a-Si:H films, CVD, optical and electronic props. 87−16700
a-Si:H films, light instabilities, surface photovoltage studies 86−68372
a-Si:H films, minority carrier diffusion length and surface barrier width determ. from surface photovoltage meas. 87−60072
a-Si:H films, minority carrier diffusion length meas. by differential surface photovoltage method 86−35303
minority carriers continued

mirrors
3D laser tracking instrument, mirror systems and optical characteristics 88−34191
5×5 m^2 concentrator heliostat tracking system, based on DC drive 85−42992
20 m^2 heliostat rotation, automatic position control and energy calc. *(Rumanian)* 86−70834
acoustooptic mirror in laser resonator, spectral characts. 86−54177
active distributed-reflector for dynamic-single-mode lasers, axial mode selectivity 85−56732
active image processing, vibr. mirror with CCD image sensor camera and video frame integrator 86−3958
adaptive flexible mirror, light pulse nonlinear distortion compensation under different control geometry conditions 85−56795
adaptive force optical elements based on open pore structures 85−7481
adaptive mirrors, local deform. monitoring using holographic interferometer 87−75257
adaptive optics wavefront correction system, hill-climbing *(Chinese)* 88−72192
advanced optics in government use 88−13989
almost concentric resonators for low gain FEL, alignment and performance 87−26456
amplitude distortion correction, modal dispersal and phase conjugation method 88−20745
antenna accessory for polarisation transforming of primary field 86−29606

mirrors continued
automatic high precision evaluation system for laser scanners *(Japanese)* 86−44104
backward wave couplers and reflectors 88−39916
batch processed optical scanner using Si micromechanic techniques 87−12243
beam expanders, highly off-axis, with low aberrations 85−62641
beam reflected from wave front inverting mirror in randomly inhomogeneous medium, average intensity 88−72527
BEPC focusing X-ray beamline optical design 86−60645
Bragg reflection holograms and concentrator optics 86−9993
camera, high-speed, VK-8L design with laser exposure device 86−5082
cantilever mirror for focusing synchrotron radiation 88−48073
catadioptic telephoto lens with component reflector as second mirror in Cassegrainian system *(Russian)* 85−46235
cavity with phase conjugate mirror, transverse-mode instability and chaos 87−19043
central receiver solar thermal plants, current status 85−5010
charged-large-array-flexible mirror, control by electron beam 85−51015
coatings, high refl. mirror and antirefl., laser damage meas. with unstable resonator-type laser 85−12919
coatings, servo-controlled lasers progress and appls. 87−12547
coatings and characts., for high-power CW Ar lasers 87−68563
coatings for multiwavelength solid state lasers, laser beam testing expts. 87−33248
coherent optical image processing system props. of reflecting elements 85−13610
coherent-optical processing system, parabolic mirror segment structural parameters, effect on image characts. 85−46947
composite mirrors used to suppress competing 3.39 μm lasing in He-Ne visible lasers 86−36407
computer controlled electro-fibre optic system for surface roughness measurement 88−42292
concave mirror unit-magnification telescope 85−12993
conference, optical systems engineering, Cambridge, MA, USA (Oct. 1984) 85−54024
conference, Stanford, CA, USA (July 1985) 86−60533
conference on multilayer structures and X-ray laser research, San Diego, CA, USA (19-20 Aug. 1986) 88−7
conical mirrors, use in laser devices 87−39176
controllers in laser graphics read/write device 87−26587
corner-reflector panels for satellite radar, energy efficiency 87−28696
coupled generator-amplifier system, three-mirror linear cavity, effective refl. coeffs. 85−24613
coupled system with nonideal oscillator entrance mirror, stability of steady-state operation 86−48457
cross-polarized radiation of folding umbrella-type mirrorantennas 86−54350
cylindrical and spherical part precision, contactless meas. *(Japanese)* 86−24765
cylindrical resonator with an internal astigmatic medium 85−12903
deformable mirror device, for spatial light modulation 88−58237
deformable mirror device for optical crossbar switch 88−60171
deformable mirror device for phase encoding and filtering, optical correlation 88−59268
deformable mirror device spatial light modulator, uses in freq. excision and optical switching 88−45253
deformable mirror elements for optically addressed membrane spatial light modulator 85−35535
deformable mirror nearest neighbor optical digital computer 86−37140
deformable-mirror-over-Si, VLSI based spatial light modulator development 88−20454
degenerate misaligned confocal resonator 85−2364
deposition by laser beam evaporation 86−48467
DH lasers with facets formed by hybrid wet and reactive-ion-etching 85−51176
dichroic, with high reflection at 1.06 μ and antireflection at 10.6 μ *(Chinese)* 86−36546
dichromated gelatin transmission HOEs, reflective and refractive optics 87−12608
dielectric coating design for annular mirrors of the alpha I HF laser 88−8034
dielectric coatings for laser mirrors, fabrication 87−7194
dielectric mirror damage due to high K undulator radiation 87−2173
dielectric mirrors in laser resonators measuring radiation resistance *(Russian)* 86−36549
dielectric multilayer coatings for quantum electronic devices *(Russian)* 86−48242
dimensioning for high-power lasers, heat conduction model *(German)* 87−19107
diode laser arrays, coupling with photorefractive passive phase conjugate mirrors 87−61134
diode laser mirrors, focused ion beam micromachining 88−51873
directional coupler resonators as guided-wave optical components 87−60894
directory of optical sensor components 86−36111
distance measurement between lens and reflecting surface, differential confocal optical ranging 87−63510
distributed Bragg mirrors, asymmetric 87−46491
distributed Bragg mirrors, characts., stabilisation 88−58229
distributed Bragg mirrors, surface light wave emission 85−12645
double phase conjugate, optical information processing appls. 87−62176
double phase-conjugate resonators, possible relative position sensing 86−42634
double-pass amplifier with phase conjugate mirror, different frequencies counterpropagating waves amplification 87−26460
double-pass amplifier with phase conjugate mirror, finite light beams energy characts. and struct. 86−58966
double-pass amplifier with wave-front-inverting mirror, spatially inhomogeneous radiation propagation 87−68319
double-transit amplifier for laser systems, power characteristics calc. 86−3252
dual beam laser diode scanning system for ultrahigh speed laser beam printers using a spot control method 87−61270
dual-band lightweight mirror design for mirror antenna 85−41701
dye laser, colliding-pulse mode-locked, femtosecond-pulse laser chirp compensated by cavity-mirror dispersion 86−68486
dye laser, CW, emission line freq. tuning by selective dielec. mirror 86−68482
dye laser, CW operation, thermo-optic inhomogeneities in active medium, distrib. radiation on exit mirror 85−2255
dye laser, DFB, line narrowing using external frequency selective feedback with mirror and etalon 85−62531
dye laser, pulsed single-mode, cavity of prism-grating-mirror combination, spectral linewidth 85−2356
dye laser, synchronously pumped with lumped distributed feedback, picosecond pulse generation 85−24503
dye laser containing a phase-conjugate mirror, picosecond pulse operation 85−18855
dye laser CW pumped by Ar^+ laser, resonator design and anal. *(Chinese)* 85−62623
dye laser femtosecond pulse, chirp-compensation technique using cavity mirror incident angle changes 88−27220
dye laser grazing incidence using intracavity lens and spherical end mirror 87−46930
dye lasers, pulsed, coherent combining using nonlinear phase conjugation 88−20768
dye lasers, pulsed, linewidth narrowing, power enhancement, resonator components *(Korean)* 87−75174
dye lasers, tunable, pumped by Cu laser with different oscillator structures, output power *(Chinese)* 88−40163
EHF/THF quasi-optical polarization rotator 88−71010
elastically bent mirror for focusing synchrotron X-rays 86−60461
electrochromic, with variable reflectance *(German)* 86−42364
electrochromic mirror, development and appl. 85−62409
electromechanical system interaction with optical design, conf., Orlando, FL, USA (May 1987) 88−24324
ellipsoidal mirror analyzer, construction for ion detection 88−42423
EMG telemetry device using upper-line-shift diode and IR radar *(Japanese)* 85−26774
endoscopic inspection, glass fibre, lens and mirror systems *(German)* 86−2901
excimer laser phase conjugate mirrors, appl. 85−12946
excimer lasers, mirror technology 85−41438
external, for Bragg injection semicond. laser with distrib. feedback 87−18989
extreme-ultraviolet multilayer mirror performance: recent test results 88−60771
fabrication of all-dielectric high reflectors, coating materials for UV, selection and characterisation 85−12689
Fabry-Perot resonator, phase-conjugate, using nearly-degenerate four-wave mixing, finesse 85−29919
Fabry-Perot resonators with active medium, large Fresnel numbers, asymptotic theory 87−7413
femtosecond laser preamplifier *(French)* 88−20709
ferromagnetic mirror, reflection matrix, use in ring laser 85−29871
fibre coupled phase conjugate mirror, polarisation and spatial information recovery 88−20744
fibre mirror for polarisation interferometer for temp. sensing, fabrication 86−9525
fibre optic illuminator mirror tunnel arrangement for uniform output light intensity 86−2691
fibre optic sensor, extrinsic using partially reflecting mirror 86−36205
field-sequential discrete-depth-plane three-dimensionaldisplay 86−31533
FIR and MM wave polarisation transforming reflectors 87−19171
flat film concentrators for solar cell arrays, energy characts. anal. 88−55624
focusing devices for laser radiation incident at angle 85−2382
focusing mirror, annular laser beam focusing with Gaussian amplitude distrib. over ring width, numerical anal. 86−22468
focusing system with two-mirror spherical surface, 10.6 μm high-power laser radiation appls. 85−46437
four wave hypersonic reversing mirrors in the saturation regime 85−24666
four-wave hypersonic wavefront-reversing mirrors, noise under absolute instability conditions 86−9952
four-wave phase conjugation using energetically effective sensitive mirrors 85−56832
four-wave wavefront-reversing mirror suppression of opposite wave in pumping with CO_2 laser with unstable resonator 86−68583
Fourier objectives, application of mirror systems in information processing devices *(Russian)* 85−35570
free electron laser, mirror degradation and performance requirements 87−26445
free electron laser, Orsay storage ring, diagnostic techniques and UV-induced degradation of mirrors 86−3192
free electron laser, visible, linac-based, constant and tapered wiggler 88−51830
free electron laser cavity, high reflectivity dielec. mirrors, precise meas. 86−58951
free electron laser cavity alignment and mirror damage 87−75176
free electron laser in X-ray region, machine parameters and characteristics of mirrors 85−2179
free electron laser resonant cavity long, characts. 86−22441
free electron laser resonator designs 86−22440
free electron lasers, concentric cavity, end-mirror intensity vars. 88−8243
free electron lasers, mirror degradation, VUV induced 85−56709
free electron lasers, short wavelength optics 85−2374
free-electron laser Bragg reflectors, space-harmonic couplings, slow-wave interactions, blazing effects 88−40290
front surface and multilayer, as fibre-end reflectors, coupling efficiency 86−48097
galvanometric scanning system with optimal high resolution 87−18789
Gaussian beams, anisotropic, new class, fundamental modes of resonators bounded by crossed cylindrical mirrors 86−9924
Gaussian mirrors in unstable resonators, large-size Gaussian mode 86−9900
Gaussian reflectivity mirror optical resonators, output beam characts. 85−12890
gelatin, dichromated, holographic mirrors, optical characts. 87−61255
glass, replicated, appl. to large segmented opt. systems 87−18788
glass plate stack mirror for laser resonator, refl. coeff. 87−33245
gratings, guided-wave, simple interferometric fabrication method using single mirror 86−2843
grazing incidence mirrors in four-element linear resonators for high-power FEL 86−3236
grazing incidence synchrotron radiation beamlines, mirror and grating power loading effects 88−42364
gyro, passive resonator type 85−24292
gyrotron, quasi-optical, axisymmetric optical system 85−41230
hard laser mirrors, damage threshold 85−56774
headlight reflector calculation by the elementaryreflection method *(Polish)* 85−53905

laser mirrors, cooled, heat loads under uniform irrad. 86−3251
laser mirrors, dielectric, operating range 86−68593
laser mirrors, dynamic effects accompanying pulsed heating 85−7484
laser mirrors, optical figure requirements for use at oblique incidence 85−7482
laser mirrors, reflection coefficient meas. *(Russian)* 88−2328
laser mirrors, spectral characts. 87−12537
laser mirrors, stability criteria, temp. depend. 85−12911
laser mirrors in rhodamine 6G soln. lamp-pumped laser, unstable resonators props. 85−56582
laser optical coatings, nondestructive defect detection 85−35847
laser plasma mirror for picosecond pulse generation 86−22447
laser polarisation characts., stress mirror cavity effects *(Chinese)* 85−46441
laser pulse energy nonintrusive determ. and mirror parameter monitoring, opto acoustic method 86−36553
laser radiation, focusing into arbitrary curve, inverse problem soln., focuser design 85−12914
laser resonator, alignment by simple technique 85−62630
laser resonator, anisotropic three-mirror, selective props. 88−27216
laser resonator, nontransmitting, knife-edge diffr. for coupling out of VUV radiation 85−46433
laser resonator mirror, misalignment effects on polaris. and energy characts. of CO_2 laser radiation 86−36420
laser resonator mirror damage in high-power electron-beam-controlled industrial CO_2 lasers 85−24617
laser resonator Q-factor modulation using methods of adaptive nonlinear optics *(Russian)* 87−26461
laser resonator with Gaussian mirrors, transverse modes 87−2213
laser resonators, phase conjugate mirror, spatial and temporal props. *(French)* 85−41422
laser resonators, three-mirror waveguide, frequency tunability 86−63843
laser resonators with multi-ring reflectors, transverse mode characts. *(Chinese)* 88−51843
laser resonators with ultralow loss dielectric mirrors, gain and loss meas. 85−51210
laser scanner performance, quantification by signature analysis 85−41532
laser scanning system, design and performance, appl. to video cameras and UV microscopes 85−29970
laser scanning system, rotating polygon mirror and drive systems 87−39267
laser system alignment for inertial confinement fusion expts. 86−22586
laser techniques in extreme UV, conference, OSA, Boulder, Colorado, March (1984) 85−7337
laser three-mirror compound resonator with electro-optic switch, laser parameter control 85−56738
laser unstable resonator with dihedral corner reflector in gasdynamic laser, props. 87−33234
laser unstable resonators with spherical mirrors, misalignment sensitivity 88−34068
laser with nonlinear mirror resonator, single subnanosecond pulse prod. 88−14269
laser with resonators coupled by a dynamic hologram, phase conjugate mirror 88−58604
laser with wavefront-reversing mirror based on degenerate four-wave interaction, energy characts. 85−41303
laser-taper coupling, influence of high-index micro-lens 86−48148
lasers, unstable resonators with spherical mirrors, losses and mode structure 88−34067
lasers with wavefront-reversing mirrors, review 86−48455
layered synthetic microstructures as mirrors in free electron laser development 85−2372
light beam detectors for industry *(German)* 87−3558
light phase effects on DFB laser props. 86−29186
Lloyd's mirror as an optical processor 86−16536
Lode Advanced Mirror Program active mirror facesheets, process development 88−61536
Long Range Infrared Surveillance System 88−22209
Luz SEGS-I project, Solar Electrical Generating Station using Line Focus Parabolic Trough Reflector 85−32398
magnetic, MM-wave and microwave technology appls. 88−65968
magnetic mirror operating characts. on basis of polar Kerr effect at 0.63 μm 86−36273
Mangin mirror performance for optical processing with feedback 85−56388
matching with hollow dielectric waveguide 87−46499
material processing by laser, monitoring methods 87−47048
membrane spatial light modulator, optically addressed, incoherent to coherent image conversion 85−12649
metal grid reflectors, laser mirrors and filters at sub-MM wavelength, equiv. cct. formulas 85−24351
metal mirrors for CO_2 lasers, plasma form. 86−15752
metrology of reflection optics for synchrotronradiation 86−60468
microchannel spatial light modulator with improved resolution and contrast ratio 87−12257
millimetre wave quasi-optical couplers, efficiency 85−36109
mirror material test programme at the DaresburySRS 86−60466
misaligned laser resonator with inhomogeneous optical components, eigenmodes, calc. 87−68551
mode-locking technique, nonlinear mirror system 88−45517
monomode fibre-optic link for stabilised RF phase reference transmission 86−64970
motorised mirror assembly for laser beam switching 85−35836
moving-mirror laser-beam scanner enhancement by multipath reflection 87−12649
multiband dielectric mirrors, synthesis 88−2088
multibeam interferometer, mirror irregularities, diffraction effects 87−68743
multichannel demultiplexer for optical communication lines 85−8435
multichannel resonators with wavefront-reversing mirrors, inter. loss suppression 85−18978
multifaceted laser beam integrators 88−45501
multifocal membrane mirror, using multilayer thin-film dielectric-metal-dielectric reflecting structure 86−2899
multilayer components for soft X-ray laser cavities 87−12524
multilayer dielectric exit mirror in laser, non-Gaussian laser beam form. 87−26491
multilayer dielectric mirror coatings for FEL, sideband-induced detrapping prevention 88−14219
multilayer dielectric reflectors, UV damage testing 85−7499
multilayer interference systems solid-state optical mirrors, MBE appl. *(German)* 88−65455

protein crystallography instrument for rapid Laue and rapidly tunable expts., design, ray tracing, heat calcs. 88−74784
push-broom linear array scanner, design of all-reflective flat-field objective 87−29918
quartz, with Ag coating, radiation props. meas. methods *(German)* 85−31609
quartz ceramic laser reflector with glazed coating, spectral characteristics 86−29200
quartz ceramic reflectors, γ-irrad. effects on Nd:YAG laser energy characts. 87−26481
quartz reflector material, induced absorpt. influence on solid-state laser efficiency 85−24525
quasi-optical cavity with slotted output mirror for gyrotrons 88−56861
quasi-optical line synthesis, predetermined radiation pattern formation 85−35996
radiation reflected from phase-conjugate mirror, cloudy medium illumination channel, propagation characts. 87−68783
radiation-supported space mirror 85−57969
radiative Braff mirrors, spectral characts. versus grating groove profile 86−42356
radiographic imaging using multilayer mirrors 88−23052
rainbow holography, one-step using spherical mirror 87−7446
RATAN-600 radio telescope, improvement of surface precision of primary mirror reflecting elements 87−34685
reflection holographic gratings, unslanted, mathematical description 85−62683
reflection meas. in normal geometry *(Hungarian)* 88−14034
reflector, single-mode fibre evanescent grating, backward wave coupling 86−22114
reflector CAD and numerical methods *(German)* 86−33852
reflectors, doping effect on optical pumping in Nd:phosphate glass laser 85−41367
remote pyrometer with variable optical bandwidth *(German)* 85−64156
resonator, negative branch, unstable, for use with free-electron lasers, advantages 86−68575
resonator modes with resonant reflectors 85−12900
resonator three-mirror phase-conjugate, resonances and mirror confinement 86−15776
resonator with self-pumped wavefront-reversing mirror, oscillation modes 85−56740
resonators, phase conjugate, orthogonality props. of transverse eigenmodes 88−20732
resonators with composite mirror, field formation 88−27222
resonators with Gaussian reflectivity mirrors, hard aperture effects on mode props. 87−39159
resonators with wavefront-reversing mirror and inhomogeneous optical medium, fields 85−19037
retroflector-mirror resonator, effects on dye laser radiation directionality 88−20701
reverse wave suppressor mirror in unstable ring resonator 85−18969
rhodamine 6G CW laser with spherical cavity, incoherently pumped 87−54266
rhodamine 6G laser, colliding-pulse mode-locked, generation of 85-fsec pulses by synchronous pumping 85−41353
rhodamine 6G ring dye laser with external retroreflecting mirror 87−26458
ring laser gyro beam coupling reduction by Doppler shifting of scattered light 85−35818
ring laser tuning with prism or grating, mirror number depend. 86−63841
ring lasers, mode-locking due to light scattering 85−29867
ring lasers, planar, with mirror misalignment, stability 88−2312
ring resonator, asymmetric, unstable, collimation of output beam 85−35812
ring resonator system, three-mirror, alignment 86−22435
ring resonator with continuously irregular layer reflector, FTIR prism, natural oscills. 87−19005
ring-coupled resonators, freq. characts. using paraxial beam methods 88−45498
rocking mirror, coherent noise suppression, during one-dimens. spatial filtering of images 85−2901
ruby laser, acoustic intensity modulation using rocking resonator mirror 85−2269
ruby laser oscillator, novel design 87−12422
SBS, phase conjugation for laser systems, investig. 88−58691
SBS amplifier and four-wave hypersonic phase-conjugating mirror, limiting sensitivity 87−68606
sealed-beam lamp reflector aberrations *(Russian)* 86−33838
sectional main mirror in astronomical objection, holographic image corrector 85−46237
segmented-mirror phased-array lasers 88−14232
selectively reflecting mirror with corrugated waveguide on surface, spectral and laser characts. 87−25982
self-pumped phase conjugate mirror, real time image subtraction and 'exclusive or' operation 86−29225
self-pumped phase conjugate photorefractive mirrors, theory 85−51241
semiconductor DFB lasers with phase shifted gratings and reflecting mirrors, dynamic single-mode operation 86−42546
semiconductor integrated optics, opto-electronic integrated circuits *(German)* 88−51699
semiconductor laser, narrow linewidth, single frequency, with phase conjugate external cavity mirror 87−26381
semiconductor laser, phased-array, antireflection coated, influence of external mirror 86−63808
semiconductor laser array, laterally coupled, frequency selectivity mirror reflectivity effects 85−56661
semiconductor laser with external reflector, coherence and spectral properties of radiation 85−2391
semiconductor laser with external resonator mirror, influence on radiation characts. 85−56737
semiconductor lasers, high-magnification curved mirror, power calc. 86−63848
semiconductor waveguide, optical transmission and refl. by slot with mirror walls 85−50935
Seya-Namioka monochromator for synchrotron radiation, optical system and aberration control 88−40039

$BaTiO_3$ double phase conjugation mirror, anal., demonstration and laser appl. 87−26533
$BaTiO_3$ phase conjugate mirror master-oscillator power amplifier using AlGaAs semiconductor diode laser 87−39206
$BaTiO_3$ phase-conjugate reflector in CW ring dye laser 85−56822
$BaTiO_3$ photorefractive passive phase conjugate mirror for coherent coupling of diode lasers 86−54127
$BaTiO_3$ photorefractive phase-conjugating mirror for laser phase-locking 86−36561
$BaTiO_3$ self-pumped phase conjugate mirror, instabilities 87−33330
$BaTiO_3$ self-pumped phase conjugate mirror, regular oscillations and self-pulsating 86−68624
CO laser CW emission spectrum broadening with spectrally inhomogeneous output mirror 88−27055
CO_2 TE laser, high pressure, axial X-ray preionisation 85−29772
CO_2 TE laser using three-mirror resonator, mode control and high energy operation 86−36536
CO_2 amplifier with mirror utilizing degenerate four-wave interaction 87−12384
CO_2 compact 1 J laser with Gaussian refl. resonator, output charact. 88−65559
CO_2 double-pass amplifier with wavefront inversion mirror, radiation form. 85−29888
CO_2 laser, TEA, with three cavity mirrors, two-line operation 87−2056
CO_2 laser mirrors for high power material processing appls. 87−46952
CO_2 laser radars, optical resonator design 87−41036
CO_2 laser resonators, coupling-out hole mirror appls. 86−29190
CO_2 round-trip amplifier with wavefront-reversing mirror, energy charact. 87−26294
CO_2 sealed-off laser, tunability using mirrors or diffr. grating 86−3052
CO_2, waveguide laser with plane mirrors, output charact. 86−29045
CO_2 waveguide laser with quartz capillary and separated diffr. grating 87−68546
$CdIn_2O_4$ RF sputtered films, transparent heat mirror charact., elec. and optical meas. 87−18582
CdS, 2D laser array with tilted mirror resonator, electron beam pumped 88−45403
CdTe laser, frequency-degenerate parametric lasing 85−18904
Cr,Nd:GdScGG, high repetition rate active mirror amplifier 88−20609
Cu diamond turned mirror, single and multiple pulse catastrophic damage at 10.6, 1.06 and 0.532 μm 85−7498
Cu, lacquer-coated, focusing of undulator light at SPEAR 88−22889
Cu mirrors, destruction on strong laser radiation pulse exposure, surface periodic structs. 86−68608
Cu mirrors for synchrotron radiation beam lines, damage obs. 86−60464

mirrors continued
Cu vapour laser with self-pumped wavefront reversing mirror 87−2076
Cu vapour laser with wavefront-reversing mirror induced in active medium 87−2216
GaAlAs, gain guided semicond. lasers with curved minor facet 88−14181
GaAlAs laser with phase-conjugate mirror, self-induced frequency scanning and distributed Bragg reflection 86−63831
GaAlAs/GaAs surface-emitting linear laser arrays with etched mirrors 87−12453
GaAlAs-GaAs surface-emitting laser with etched mirrors 86−42534
$Ga_{0.6}Al_{0.4}As$-GaAs heterostruct. tilted mirror lasers, lateral mode, filamentation suppression 85−56605
GaAs, focused ion beam etching of deep grooves and laser-mirror facets 87−61145
GaAs, integrated optical bent waveguide with 45° mirror, selective LPE growth 87−68062
GaAs rib waveguide totally refl. mirrors, reactive ion etching fabrication and appl. 86−9594
GaAs single-mode rib waveguides with reactive ion-etched totally refl. corner mirrors 86−2724
GaAs-AlAs MQW optical modulators with integrated dielectric reflectors 88−58648
GaAs-AlGaAs, chlorine ion-beam assisted etching, for deflecting mirrors, laser cavity mirrors 87−74215
GaAs-AlGaAs high reflectivity mirrors fabricated by MOCVD 85−18766
GaAs-GaAlAs etched-mirror unstable-resonator lasers 85−18930
GaInAsP/InP CBH surface-emitting laser with dielectric multilayer reflector 88−2269
GaInAsP-InP diode laser cavities, cylindrical mirror facets, reduced beam divergence 87−46943
GaInAsP-InP etched mirror laser, passivation with angled sputtering 87−33154
GaInAsP-InP lasers, surface emitting, threshold current density, mirror reflectivity 86−42600
GaInAsP-InP mass-transported BH lasers and integrated mirrors 85−2345
GaInAsP-InP surface emitting laser at 1.3 μm, raising operation temperature 86−3174
p-Ge laser, FIR, mode structure with and without external mirrors 88−33971
n-Ge with diffused conduction layer, dichroic mirror for optically pumped FIR lasers 86−15024
HCN laser CW RF excited, operational charact., effect of coupling hole in output-side mirror 85−35680
HF CW unstable ring laser performance, reverse-wave suppressor mirror effects 86−36525
H_xWO_3, electrochromic mirrors with variable reflectance 87−74864
He cooled spaceborne spectrometer and telescope for IR limb scanning 88−68636
He-Ne internal mirror laser, frequency stabilisation using thin film heater coated on laser tube 86−9761
He-Ne internal mirror laser, polarisation props., effect of pressure on mirror 85−41331
He-Ne internal-mirror laser model ILGN-202, emission freq. stabilisation 85−12804
He-Ne laser failure mechanisms, mirror damage and contamination *(Chinese)* 88−20589
He-Ne laser, internal mirror, 10 mW, medium speed, printer design *(Japanese)* 86−3041
He-Ne laser, internal mirror, freq. and power stabilisation using fan *(Korean)* 87−18903
He-Ne laser mirror fixing, influence on beam direction *(Chinese)* 88−27017
He-Ne laser mirrors, surface analysis of films *(Chinese)* 88−40281
He-Ne laser, stabilised, with internal mirrors, emission line width, effect of active medium perturbations 86−15635
He-Ne laser with internal mirrors, long-term stability and reproducibility of emission frequency 86−63760
He-Ne lasers, 2-mode, in varying temp. environment, improved freq. stability using electronic servo circuit 86−36545
He-Ne lasers, internal-mirror, stabilisation 86−63745
He-Ne lasers, two-mode internal-mirror, frequency stability sensitivity to polarising optics misalignment 86−15601
HfO_2 optical films for laser mirrors, laser damage expts. 85−29523
I, photodissociation laser with plasma mirror 86−68454
InGaAsP buried heterostructure lasers with stop-cleaved mirrors, quantum efficiencies, threshold currents 86−3157
InGaAsP lasers, stop cleavage fabrication for monolithic optoelectronic integration 85−51155
InGaAsP/InP CW separate-confinement laser with external dielectric mirror 88−27173
InGaAsP/InP self-aligned waveguide mirrors for optical integration 88−45208
InGaAsP-InP laser lenses and mirrors, miniature fabrication 88−65777
InGaAsP-InP waveguide mirrors, self-aligned low-loss totally reflecting *(German)* 87−74813
InP-InGaAsP DH lasers, mirror form. by chem. etching and microcleaving 88−34075
InP-InGaAsP double channel planar buried heterostruct. laser, asymmetric mirror coatings, high-power operation 88−27133
InP-InGaAsP, surface emitting laser diode, slant edge mirrors, multilayer reflectors 87−75123
$In_{2-x}Sn_xO_{3-y}$, photolytic prod., heat mirror characts. 86−62262
$LiNbO_3$:Fe, amplified backward scatt., nonlinear adaptive mirror use 85−24645
$LiNbO_3$: Ti integrated optic mirrors by ion-beam micromachining 88−7952
$LiNbO_3$:Ti waveguide 90° reflecting mirrors 88−39981
Mo highly damage-resistant mirror for high-power TEA CO_2 laser systems 88−2335
Mo laser mirrors, Mo, Au and Ni ion implantation effects, multiple angle of incidence spectroscopic ellipsometry 86−68591
Mo mirror, superpolished, for VUV Ar_2 excimer laser 88−45500
Mo mirrors, destruction on strong laser radiation pulse exposure, surface periodic structs. 86−68608
N_2 lasers with back reflecting mirrors 86−15631
Na vapour phase conjugate mirrors, self-oscill. obs. in ring cavities 86−22528
Nd laser spectrum narrowing with plasma mirror 87−75071
Nd laser with retroreflecting mirror and angle selector, phase self-locking 88−14235
Nd:YAG laser, Q-switched, stabilisation of single-longitudinal mode operation, resonator mirror control 86−3118
mirrors continued
Nd:YAG laser focused beams in the repetitive regime, stimulated Brillouin scatt. aspects 85−46471
Nd:YAG laser, mode locked, with intracavity phase conjugate mirror 87−26367
Nd:YAG laser with cholesteric liquid crystal cavity mirrors 88−51863
Nd:YAG laser with multidielectric variable reflectivity output coupler 88−58632
Nd:YAG, segmented-mirror phased-array lasers 88−14232
Nd:YAG, unstable laser resonator with super-Gaussian mirrors 88−45493
Nd:YAG unstable resonator laser, single transverse mode oscillation using variable reflectivity mirror 88−40275
Nd:glass active-mirror amplifier, high average power 86−36442
Nd:glass laser, active mirror system for TW output powers 87−46843
Nd:glass laser with composite active element and stimulated Brillouin scattering mirror 87−46934
Nd; phosphate glass laser amplifier, wavefront reversal 88−8285
Nd^{3+}:YAG Q-switched laser with three-mirror resonator, stochasticity and regular fluctuations 85−56739
Nd^{3+}:YAG laser, acoustic intensity modulation using rocking resonator mirror 85−2269
Nd^{3+}:YAG laser, free-running, with three-mirror resonator, thermal kinetics of spectrum 86−54120
Ni:glass laser with mirror wave-front convertor *(Russian)* 85−12915
PZT cavity mirror, improved freq. stability of dye laser *(Chinese)* 88−65601
Rb vapour, injection laser with external selective mirror 87−68381
Si X-ray mirrors, fabrication 86−2047
Si micromirrors, chemical etching 88−40038
Si solar photovoltaic modules, flat-plate, effect of solar concentration on performance 85−49108
a-Si:H films, protective coatings for high power CO_2 laser mirrors *(French)* 88−51875
SiO_2-Si_3N_4-SiO_2 rib waveguide on Si, Bragg reflector fabrication techniques 88−45169
SiO_2-Si_3N_4-SiO_2 rib waveguides, low loss Bragg reflectors 87−60957
$Sr_{0.75}Ba_{0.25}Nb_2O_6$:Ce self-starting passive phase conjugate mirror 87−26505
$Sr_xBa_{1-x}Nb_2O_6$:Ce as broadband self-pumped phase conjugate mirror 87−46987
$SrBaNb_2O_6$:Ce, broadband photorefractive props. and self-pumped phase conjugation, use as mirror 88−20734
Ta_2O_5 optical films for laser mirrors, laser damage expts. 85−29523
$TiCl_4$ wavefront-reversing mirror for Cr^{3+},Nd^{3+}:$(Gd,Sc)_3Ga_5O_{12}$ two-pass compact laser amplifier 86−63780
TiO_2/SiO_2 dielectric multilayer reflector for GaAs surface-emitting laser 87−61146
TiO_2/SiO_2 multilayer Bragg reflector for GaAlAs/GaAs surface emitting laser 87−39113
TiO_2/SiO_2 multilayer dielectric mirrors, reflectivity degradation, Orsay free electron laser appl. *(French)* 85−12916
TiO_2-SiO_2 dielec. multilayer reflector for surface emitting lasers, electron beam evaporation 87−31555
TiO_2-SiO_2 dielectric mirrors for optically-controlled transparencies with MOS-liq. cryst. struct., prep. 88−20484
TiO_2-SiO_2 dielectric multilayers, losses and reflectance for He-Ne laser mirrors *(German)* 85−35837
TiO_2-SiO_2 laser mirrors, optical losses and damage resistance, coating design 88−2334
VO_2 programmable mirror for CO_2 improved scan laser 85−51093
WO_3-based electrochromic device, transmissive and reflective light control, appl. as antidazzling mirrors 87−74863
ZnS-Na_3AlF_6, laser mirrors, optical losses and damage resistance, coating design 88−2334
ZrO_2 optical films for laser mirrors, laser damage expts. 85−29523

230 GHz mixer receiver construction 87−17376
320-360 GHz low-noise cryogenically cooled waveguide Schottky diode mixer 87−17346
460 GHz low-noise waveguide Schottky mixer radiometer for radioastronomy 86−43928
470 MHz 5 V CATV tuner 86−14078
600-750 GHz waveguide Schottky barrier diode mixer 87−17373
750 GHz quasiparticle receiver characts. 87−20385
A/D convertor sensitivity increase using two-diode mixer 87−3546
active MOSFET ring mixer with a wide dynamicrange *(German)* 86−67106
AM/FM up-conversion freq. synthesizer, low power single-chip design 86−8032
analogue studio, digital sound mixing 85−3617
antenna testing, mixing techniques comparison 88−45753
antiparallel circuit with 2 diodes for mixing harmonics *(German)* 85−44937
APD harmonic optoelectronic mixer 87−18842
audio installations in Cologne concert hall *(German)* 87−3338
audio mixer, remote controlled using digital control 85−47745
audio mixer for audio amplifier *(Italian)* 85−6228
audio modular mixer. I, construction 86−31077
audio panorama mixer 85−63897
audio-video mixers, review *(German)* 85−20391
automated setup improves mixer loss measurements 86−52734
automatic mixer test set 85−14631
automatic mixing, direction-sensitive gating principle 85−3795
automatic setup tests mixers fast over the range 10 MHz to 18 GHz 86−55531
avalanche diode, harmonic optoelectronic mixer, theory 88−40067
avalanche diode harmonic opto-electronic down-converter 86−62796
BADP17 Schottky diode mixing noise and loss meas. *(Polish)* 88−33137
balanced diode mixers, saturation props. of intermodulation *(German)* 88−38420
balanced fin line mixer for 26.5 to 40 GHz *(French)* 88−63879
balanced finline mixer for Ku band, broadband design, characts. and performance 86−27635
balanced mixer based on the hot charge-carrier thermoelectric effect in semiconductors 85−40253
balanced surface mount mixer using, SOT-23 Schottky-diode pair and matching cct. 87−37576
balanced two-diode microwave mixer, large-signal freq. anal. 88−50391
BARITT diodes, MM-wave type for V-band operation, development, manufacture and mixer appls. *(German)* 87−52858
bi-phase modulator cct., high performance, low cost 86−20382
bipolar IC high-frequency mixers, intermodulation 87−561
blocking in a mixer with a square-wave heterodyne voltage 85−33729
broad band 100 GHz SIS quasiparticle mixers 88−12618
broadband active balanced mixer 86−20383
broadband diode mixers for airborne appls., design and performance 88−25562
broadband millimetre-wave mixers, design 85−22735
broadband mixers, phase error/matching meas. using microprocessor-based microwave test equipment 87−52460
broadband monolithic single and double ring active/passive mixers 88−63959
broadband YIG-tuned filter/mixer/discriminator for microwave spectrum analyser 88−35896
butterfly broadband mixers, improved design adopting shunt connected radial lines 88−56989
CAD, spurious signals calc. using TI-59 calculator *(Slovak)* 85−54751
Carvin MX1688 16×8 audio mixer 87−20758
Cassegrain submillimetre heterodyne spectrometer 88−9689
cellular radio, RF ICs for portable communications equipment 86−4498

mixers (circuits) continued
ceramic bridge, Josephson freq. mixing at liq. N_2 temp. 88−26719
CMOS real-time digital mixer IC, design 87−16954
CMX hardware/software system for sound mixing using Atari 520 ST *(German)* 88−18997
coaxial microwave mixer family converts 1 to 18 GHz 87−17314
colour monitor screen driving circuits *(German)* 86−62494
combined freq. shift modulator/mixer cct., analysis 87−73370
conference, IR and MM waves, Lake Buena, Vista, Florida (Dec. 1985) 86−52120
construction of video mixing units taking account of requirements made by an operating technology orientated on TV picture creation *(German)* 88−29093
coplanar three-wave mixer for coherent and heterodyne detection of optical signals 88−67340
coupled microstrip directional filters and appls. *(Korean)* 86−41305
cryogenic, very low-noise, fixed-tuned mixer for 240-270 GHz 86−8485
cryogenic low noise receivers in the range of 140 to 200 GHz, cryostat construction *(German)* 85−6527
D&R Mixer 2000 review, layout and performance *(German)* 87−14008
D-band millimeter-wave crossbar mixer 85−17880
design using microstrip components, 75-110 GHz freq. range 86−27587
differential amplifier nonlinearity determ. 87−16887
digital audio mixer, design 85−3807
digital freq. mixer, phase locked type *(Chinese)* 88−56517
diode mixer, local oscillator waveforms determ., modified harmonic balance technique 88−32058
diode mixer cct., ESD sensitivity 86−20386
directional couplers, home-made for radio amateurs 85−34141
distributed 1-12 GHz dual-gate FET mixer 87−6113
distributed microwave mixer using space-charge waves in semiconductor thin films 85−6532
double balanced diode mixers, saturation props., of intermodulation *(German)* 88−56518
double-balanced commutation mixer using Siliconix Si8901 quad FET, design and performance 86−52738
double-balanced mixer, high dynamic range mixing with the Si8901 86−46627
double-balanced mixers, computer-automated testing 86−52735
double-balanced mixers, effect of IF port termination mismatches, expt. study 86−52733
double-conversion broad band TV-tuner with GaAs ICs 85−58360
doubly-balanced microwave mixers 86−27156
down converter for SHF frequency band 87−45255
downconverter for spectral analyser 86−24469
dual function mixer cct. for MM-wave transceiver appls. 86−8478
dual function mixer circuit for millimeter wavetransceiver applications 86−27631
dual-beam-lead diode harmonic mixers, 33.8 GHz 85−6515
dual-gate MESFET mixer using a simplified experimental design approach 88−19371
dual-mixer time difference measurement system, common oscillator noise influence 87−23976
EHF, high performance 8 mm frequency band integrated front-end *(Chinese)* 87−59839
EHF low-noise fixed tuned, broadband mixer for 200-270 GHz 85−17881
EHF mixers using surface-oriented low-parasitic Mott diode 85−55133
EHF monolithic receive module technology for antenna arrays 87−47399
EHF quasioptical patch mixers at 35 and 94 GHz 88−71099
EHF subharmonically pumped mixer with packaged Schottky diodes, performance study, parameter meas. method 86−27583
EHF transceiver, design with Gunn VCO and Schottky mixer, digital radar system appl. *(German)* 87−20398
even harmonic Schottky mixer, 4-40 GHz 88−71094
EW mixer bandwidth design for lowest-order intermodulation product avoidance 85−54748
far-IR lasers frequency meas., using point-contact-type Josephson harmonic mixer 88−14256
FET commutation double-balanced mixer of high dynamic range, design and RF performance 87−16956
fin line p-i-n diode attenuators and balanced mixer for 140 GHz, design and characts. 85−23125
Fostex 460 recorder/mixer *(German)* 88−47379
four port traveling wave mixer/amplifier using single gate MESFETs 88−63945
free-electron bolometer mixer, noise temperature minimization 86−5313
frequency conversion, difference modes, comparative characts. 88−38653
frequency conversion coefficients of Josephsonjunctions 86−14493
frequency conversion without parasitic combination components 87−52788
frequency synthesizer, HP 3326A, high-level active mixer 86−46628
fundamental vs. harmonic mixing: some system amplitude ripple considerations 85−34186
GaAs double-balanced dual-gate FET mixer IC forUHF receiver front-end applications 86−8473
GaAs MMIC image-rejection mixer using lumped elements, design and performance 88−19368
gHz band monolithic model ICs for QPSK 87−73741
Gunn self-mixing oscillators simplify smart weapons 85−11072
HDTV chromakey mixer, digital, signal processing methods *(German)* 88−67545
HDTV studio, processing problems and quality *(German)* 85−52464
HEMT millimeter wave amplifiers, mixers and oscillators, design and development 87−38330
HEMT mixer, 45 GHz, single-ended type, design and performance 86−62830
HEMT mixers, large-signal device model and time-domain nonlinear cct. anal. program 88−38725
HEMT MM-wave mixer, design and characts. 86−20832
heterodyne detection using superconductor-insulator-superconductor mixers, quantum noise 87−47468
heterodyne receiver for short millimeter wave radioastronomy *(Japanese)* 85−31135
heterodyne receivers for submillimeter-wave region, technology 85−36906
hybrid splitter improves mixer IMD performance 87−31758
IF constant-impedance bandpass filters for circuit performance improvement 88−44095
image-reject and single-sideband mixers 88−6703
image-reject mixers using soft-board MICs 88−56940
input signal frequency range shifting, double conversion 88−914
integrated antenna-mixer and MESFET local oscillator circuit 88−25564

mixers (circuits) continued
integrated millimeter-wave components using a quasi-optical design combined with planar structures 88−56969
intermodulation analysis EM signals diode mixer *(Polish)* 88−14574
intermodulation calc. for driving signals with arbitrary magnitudes *(German)* 87−31757
intermodulation-free dynamic range of bipolarswitching mixers 86−62498
intersatellite link networks, 32/6 GHz mixer and IF amp. 86−23804
James Clerk Maxwell submillimetre telescope, receiver developments *(Dutch)* 88−29012
Josephson harmonic mixer, point contact junction, microcomputer-controlled etching system 86−2626
Josephson harmonic mixer using composite dielec. rod/metal rectangular waveguide 88−38664
Josephson junction arrays, mutual phase-locking 85−1874
Josephson junction harmonic mixer and three-terminal device design for microwave appl. 85−56222
Josephson junction mixers for submm and mm ranges 87−16950
Josephson junctions, frequency conversion characts., strong coupling with electrodynamic system 88−44096
Josephson mixer for low noise submillimetre wave detector *(Japanese)* 88−7065
Josephson mixers, even-harmonic type, biased and unbiased, excess noise study 85−41051
Josephson mixers, unbiased even-harmonic, low-noise props. 85−41055
Josephson mixers, voltage bias studies at high freqs. 87−18565
Josephson SIS mixers as radiotelescope detectors *(Japanese)* 85−20287
Josephson triode for MM-wave heterodyne detect., anal. 87−66520
K-band (30 GHz) image rejection mixer 88−50352
Ka band down converters, mm-wave balanced mixers 88−63856
Ka-band dual-channel tracking receiver converter 87−6152
Ka-band finline mixer/modulator IC for MM-wave appls. 85−6517
Ka-band front end with monolithic mixer, hybrid IF amplifier and lumped-element Gunn LO 86−47062
Ka-band front-end integrated with monolithic mixer 86−8480
Ka-band PC mixer with compact filter for step-tuned local oscillator 87−6153
Ku-band SSB mixer using Schottky diodes and microstrip technology design and performance 88−56977
local oscillator leakage cancellation cct. for RF mixer operating outside IF freq. range 86−20378
low noise fixed-tuned broadband mixer for 200-270 GHz 85−11108
low noise SIS mixer with gain for 80-155 GHz 87−34698
low-noise interferometer for microwave radiometry, cosmic background radiation obs. appl. 88−60700
M50455-XXXSP TV-screen display controller *(Japanese)* 88−74156
magnetic head-disc media contact detection using freq. mixer 87−60820
MESFET, dual-gate, microwave mixer, anal. 87−24443
MESFET distributed mixers, n-section type, equiv. cct. and design study 85−45247
MESFET gate mixers, anal. and design 87−59255
MESFET microwave mixers, noise figure calc. method 88−32464
MESFET mixer, second harmonically pumped, performance 88−50397
MIC mixer, miniature type with ground tabs for easier soldering to coplanar microstrip grounds 86−14509
MIC modules combination in miniature microwave flatpack 86−848
MIC technology, multioctave double-balanced mixers design 87−37563
microphone mixer, preamplifier for 4 microphones *(German)* 87−28862
microphone switching, remote package design 85−8623
microstrip crossbar up converter for ITALSAT global payload 88−25563
microstrip integrated circuit transceivers for 35, 60 and 94 GHz 87−41015
microstrip mixer cct. with dielec. resonator, image cancellation and low conversion loss design 86−14526
microwave, linearity of mixer in microwave attenuation measurement system *(Japanese)* 87−41595
microwave balanced mixers, anal. and design for CAD procedure appls. 86−41328
microwave broadband push-pull mixer, computer-aided optimisation *(German)* 87−17371
microwave conference, Liege, Belgium (Sept. 1984) 85−5654
microwave devices and ccts., colloquium, London, UK (March 1988) 88−43608
microwave diode mixers, large signal analysis 85−17811
microwave distributed MESFET mixer 85−28713
microwave doubly-balanced mixer 88−7036
microwave dual mixers 87−11040
microwave dual polarisation receiver, using superconductor-insulator superconductor junction, 2.5K cryostat design 85−34189
microwave FET nonlinear ccts., CAD analytical method *(Chinese)* 86−14491
microwave FET upconverter design using load dependent mixing transconductance 88−71127
microwave ICs above 1 GHz, conf., London, England (March 1985) 85−32943
microwave mixer, signal flow graph simplification *(Chinese)* 86−67485
microwave mixer analysis, Schottky diode limitations 86−8505
microwave mixer computer-aided design tool based in the time domain 88−71131
microwave mixer diode qualification, noise figure meas. instrum. 88−56959
microwave mixer with image recovery usingdielectric resonators *(Chinese)* 86−62819
microwave mixers, computer anal., conversion admittance matrix 87−37557
microwave mixers, hollow-conductor type, spectral analysers appl. *(German)* 85−14703
microwave mixers, numerical anal. of intermodulation distortion 88−71130
microwave mixers, numerical method for computer-aided anal. 86−41327
microwave mixers, topological and operating parameter considerations for type selection 86−27612
microwave mixers analysis based on SPICE2 88−1021
microwave mixers of ground receivers for satellite broadcasting services, configs. and characts. *(Czech)* 86−58069
microwave mixers using thin-film technology, TF series for 0.75-26 GHz range *(German)* 88−982
microwave multifunction components with single compact housing, product review 88−50379
microwave noise generators, calibration by IF comparison method 88−981
microwave Schottky-diode mixers, nonlinear modelling and design 88−71132
microwave systems containing mixers, computer-aided error analysis 86−24450

mixers (circuits) continued
microwave transistor mixer, noise and gain characts. rel. to collector function freq. conversion 87−32082
microwave travelling-wave MESFET gate mixer, hybrid design study 86−8517
microwave two-port active mixer anal. 86−27622
microwave two-port active mixers, anal. method 86−20823
MIL-specification mixers simplify military systems design 88−63578
millimetre and submillimetre wave detection, low-noise receiver research in Europe, review 87−73766
millimetre wave superconductor-insulator-superconductor quasi-particle mixers, progress *(Finnish)* 87−32086
millimetre wave technique develop. at Helsinki University of Technology, Finland *(Finnish)* 87−48908
millimetre- and submillimetre-wavelength Schottky mixer diodes, noise anal. and optimisation 87−37548
millimetre-visible wave mixing system for testing HF devices 86−35105
MIM diodes, point contact, mixing props. in IR 87−44685
Mini-Circuits SBL mixer circuits 25 kHz-1 GHz freq. range 86−14066
mixer classes, synthesis diagram systematical description 85−11542
mm wave monolithic ICs progress, oscillator, W-band mixer, distributed amplifier and receive module design 87−45295
MM wave receiver, very low noise, 80-120 GHz, dual polarised cryogenic Schottky barrier mixer 85−8496
MM-wave and microwave Schottky diode mixers, excess noise limitations, theoretical study 86−27589
MM-wave balanced mixers for Ka-band down-convertors, design and development 88−25537
MM-wave bulk unipolar mixer diodes 87−52832
MM-wave cryogenically cooled radiometer for 900 GHz, Schottky diode heterodyne receiver config. 88−1002
MM-wave dual function monolithic mixer cct. design for transceiver appls. 86−20834
MM-wave front end using Gunn oscillator and hybrid cct. techniques, design and housing 87−11066
MM-wave heterodyne Gunn self-oscillating mixer, gain compression study 85−34178
MM-wave hybrid IC balanced mixers, status 88−25546
MM-wave IC, stripline, recent advances 86−35104
MM-wave IC Gunn LO/mixer assembly, suspended stripline and microstrip based design 87−37562
MM-wave IC wideband downconvertor, miniature type, design and performance 86−14515
MM-wave imaging quasi-optical 85−8945
MM-wave in finline technique 86−41352
MM-wave MIC wideband downconvertors using GaAs beam-lead diodes, design and performance 86−20828
MM-wave microstrip subharmonically pumped mixer 86−1358
MM-wave mixer diodes, conversion contribution of nonlinear junction capacitance *(Chinese)* 87−59841
MM-wave mixer technology developments for radar receivers 87−37540
MM-wave mixer using superconductor/insulator/superconductor diode, radioastronomical receiver appls. *(German)* 85−58263
MM-wave mixers, contacting methods 87−32067
MM-wave mixers, design trends 85−661
MM-wave MMICs, advance 88−19380
MM-wave monolithic balanced diode mixer, design and anal. using computer-aided technique 88−44381
MM-wave oscillators and mixers, design problems 86−27621
MM-wave quasiparticle heterodyne mixers using tunnel junction arrays, performance study 87−46414
MM-wave radiometer, 145 GHz, receiver design using superconducting mixer, radiotelescope appl. *(German)* 87−13809
MM-wave receiver for radio astronomy, 85-115 GHz, Pb alloy superconducting tunnel junction mixer 85−37152
MM-wave receivers, mixer configs., development and appls. *(German)* 87−45222
MM-wave Schottky diode mixer, shot-noise limited, fixed-tuned, development and testing 86−20820
MM-wave subharmonic mixer using integrated planar diodes, design and characts. 87−11071
MM-wave superconducting tunnel junction quasiparticle heterodyne mixer, integrated microstrip matching element 86−15433
MM-wave superconductor/insulator/superconductor quasi-particle mixer, microstrip broadband RF matching element 86−28741
MM-wave whisker contacted diode mixer, 240 GHz region operation, design and characts. 85−34177
MMIC design for wideband receiver module 87−59894
MMIC distrib. image rejection mixer using dual-gate FETs, design and characts. 87−32099
MMIC dual-gate FET mixer, 2-18 GHz, distrib. design and performance 87−59881
MMIC ion implanted W-band monolithic balanced mixers for broadband applications 87−59891
MMIC receiver, 30 GHz, config. and characts. 87−32073
MMIC single balanced mixer with integrated dipole receiving element for 30 GHz operation 86−27602
MMIC single-balanced mixer with integrated dipole receiving element, design for 30 GHz 86−20831
MMICs, development for broadband system appls. 88−50372
MMICs, symposium, St. Louis, MO, USA (June 1985) 86−26471

partial derivatives calc. when driven by periodic input signals 87−52313
patch antenna quasioptical mixers 88−66200
permeable base transistor, dual-gate, with high transconductance for mixer and digital IC appls. 88−50819
phase noise meas., long term instability, comparison method using personal computer 88−60858
phase tracking measurement of MM-wave mixers 87−14504
phase-locked 1000 GHz carcinotron oscillator using a quasi-optical harmonic mixer 88−57267
phase-noise leakage through a mixer 88−18998
planar balanced mixer for X-band using coplanar waveguides and slotlines 88−50333
planar integrated coupled slot antenna and receiver front-end, compact low-cost design 87−73735
planar log-periodic mixtenna for millimeter and submillimeter wavelengths 87−7612
planar-mixer diodes, analytical model for MM-waves 85−28709
PLL with imbalanced phase detector, acquisition behaviour 85−54743
point contact diodes, expts. in 30-130 THz freq. range 85−6747
point contact diodes, IR and subMM wave applications 87−29136
point-contact-type Josephson harmonic mixer, frequency meas. of FIR lasers 87−12548
Q-band harmonic mixer using printed circuit technology 85−6512
QPSK GHz-band monolithic modem ICs, bipolar process technology 88−25062
quartz image guides for millimeter wave integrated circuits 85−17882
quartz SAW/MIC integrated downconvertor 87−67677
quasi-optical HEMT self-oscillating mixer 88−71128
quasi-optical integrated antenna and receiver front end, MIC implementation and performance 88−25486
quasi-optical planar structures, recent advances 88−975
quasi-optical Schottky barrier diode mixer for submm region 87−17374
quasi-optical slot ring mixer noise figuremeasurements, technique and device config. 86−8520
quasiparticle heterodyne mixers, quantum noise 85−56211
radar, dynamic diode mixer damage measurements 86−11172
radioastronomy, mm-wave, 230 GHz, low-noise cryogenic receiver, spectroscopic appls. 87−13808
Ramsa WR-8428 console for broadcast and postproduction industries 87−49379
receiver, microstrip down-converter design 87−11060
receiver with superconducting mixer, closed cycle refrigerator 86−2619
remote control transmitter for tracked vehicle, mixer cct. design 85−11103
resonant tunnelling diodes, microwave and MM-wave, cct. appls. 87−45291
RF and mixer stages , book contrib. 88−73790
RF broadband switches using double-balanced mixers, VMOS FET driver design 86−27508
RF ICs, NE 602 and NE 604, for cellular radio 85−49784
RF mixers, selection criteria 87−5727
RF mixers for 30/20 GHz telecommunication satellites *(French)* 85−17834
RF/microwave 88−50380
ring-quad Schottky diodes, junction capacitance meas. 87−6659
satellite mixer upconvertor, 4/20 GHz, design using asymmetrical fin line struct. 87−6041
satellite telecommunications, standard planar biasable mixer 88−25561
Schottky barrier diode microwave mixers, optimization of fluctuation characts. 87−73690
Schottky barrier diode mixers, intermodulation characteris. optimisation 87−65942
Schottky barrier diodes for high-order harmonic mixing in far IR 85−11547
Schottky diode mixer, operation, characts. and conversion loss 87−16955
Schottky diode MM-wave mixer, 140-220 GHz, measured and computed performance 85−23118
Schottky diode pair harmonic mixer, antiparallel config., design and microwave characts. *(German)* 85−45232
Schottky diode receivers, harmonic response, calibration for mm obs. 86−4780
Schottky diodes, microwave detection and mixing conditions study 87−45254
Schottky-barrier diode mixers, computer-controlled meas. systems for testing between 90-350 GHz 86−24297
Schottky-barrier diodes, IR sensitivity anal. 88−1008
Schottky-barrier mixer diodes, 50 GHz-5 THz operation, freq. and noise limits study 85−61457
Schottky-barrier planar diodes appl. 86−20384
Schottky-barrier waveguide mixer, whisker-contacted, meas. at 460 GHz 85−40240
semiconductor diode microwave mixers, selective, frequency response 86−47080
semiconductor diode mixers, design and characts. for microwave meas. appls. *(French)* 85−11567
semiconductor diode mixers, model linearization, parametric approach 86−8063
semiconductor mixers for low noise MM wave receivers *(Japanese)* 85−61447
SHF biasable bridge quad Schottky diode mixers, DBL and DBLX series 87−989
SHF double-balanced microstrip mixer, design for 3.5-35 GHz operation 86−58057
mixers (circuits) continued
SHF receiver front-end, 20 GHz low noise design using MIC functional modules 87−3044
short distance Doppler radar with self-detecting diode oscillator and external diode mixer 88−53374
short millimeter wavelength, nonlinear analysis *(Chinese)* 88−611
Si8901 HF mixer *(Italian)* 87−52453
simultaneous voice and data transmission system 88−35321
single ended Schottky diode mixing at 345 GHz use as low noise mixer and freq. doubler for 690 GHz 87−16951
single MESFET down-converter for TVRO application 88−71098
single-ended Schottky mixer, design and fabrication using integrating waveguide technology (INWATE) 87−17327
SIS junction mixers, noise temperature and conversion loss, exptl. study 86−53913
SIS junction response from the millimetre into the submillimetre wave region 87−16949
SIS microwave mixer receiver with single and array tunnel junctions 85−11579
SIS mixer array components for 350 GHz, radiotelescope appls. 88−32465
SIS mixer integrated with slot line antenna for focal plane imaging, radioastronomy appl. 88−34412
SIS mixer to HEMT amplifier optimum coupling network, theoretical study 88−19364
SIS mixers, integrated tuning elements 88−25565
SIS mixers for THz region 88−25491
SIS quasiparticle mixer, 100 GHz, 10 dB coupled gain 88−12603
SIS quasiparticle mixers with bow-tie antennas 88−50369
sound convertor module for TV *(German)* 88−60416
sound desk, digitally controlled for studio 10 at RIAS-Berlin *(German)* 87−34860
Soundtracs 16/6 semiprofessional mixer desk *(German)* 86−38130
spectrum analyser, oscilloscope add-on, circuits for VCO, mixers and sweep generators 87−21000
spectrum analysers, design for 0 to 850 MHz 85−26249
spurious analysis, computer algorithm for design appls. 86−8065
squaring cct. with output bandwidth from DC to 2.6 GHz 88−44092
SSB low-noise receiver with cryogenic Schottky-diode mixer for 200-260 GHz 86−24002
SSB mixer with beam lead Schottky diodes, noise figure meas. technique at 94 GHz 86−8519
SSB transmitter, design 86−59773
stereophonic fader, cct. design for mixed speech/music programme transmission *(Spanish)* 85−58417
sub millimetre wave Schottky barrier mixer diodes, hot electron noise limitations 85−17820
sub-Nyquist sampling-frequency range limits 87−44704
subharmonically and fundamentally pumped slotline quasioptical mixer 87−6051
subharmonically pumped MM-wave mixer struct. 88−25539
submillimeter wave detectors by superconducting tunnel junction *(Japanese)* 87−60861
submillimeter wave receiver technology, conf., Lake Arrowhead, CA, USA (April 1987) 88−24310
submillimetre spectroscopy and appls. conf., Cannes, France (Dec. 1985) 87−16247
superconducting ccts., analytical method for stationary oscills. 87−67874
superconducting mixers showing strong and weak quantum effects, accurate expt. and theoretical comparisons 88−12619
superconducting quasiparticle 150 GHz mixer with a submicron Pb/Bi/In-oxide-Pb/Bi junction 85−46091
superconducting quasiparticle array mixer, accurate noise meas. 85−54747
superconducting quasiparticle mixer, image freq. termination 88−20287
superconducting quasiparticle mixer general numerical analysis 85−54746
superconducting short-weak-link for submillimetre-wave mixers, struct., fabrication and characts. 88−13745
superconducting SIS mixers, quantum effects 88−65012
superconducting vs. Schottky mixers for mm and sub-mm waves 87−16948
superconductive convolver with junction ring mixers, use as programmable matched filter 85−54745
superconductor insulator-superconductor mixers 90-120 GHz 85−28723
superconductor-insulator-normal metal quasiparticle mixer, 220 to 230 GHz freq. range 88−33569
superconductor-insulator-supercond. mixer, Josephson current noise effects simulation 86−15423
superconductor-insulator-superconductor direct detector and mixer, saturation study 87−74587
superconductor-insulator-superconductor heterodyne receiver at 230 GHz, low-noise design for radioastronomical appls. 87−76902
superconductor-insulator-superconductor microwave amplifiers and mixers, accurate noise meas., variable-temp. loads 86−58053
superconductor-insulator-superconductor mixer, integrated tuning element meas. with Fourier transform spectrometer 88−56927
superconductor-insulator-superconductor mixer, Josephson noise, mag. field effects 86−2632
superconductor-insulator-superconductor mixer, saturation 88−15718
superconductor-insulator-superconductor mixer for 85-116 GHz using inductively shunted edge junctions and integral tuning struct. 88−71066
superconductor-insulator-superconductor mixer heterodyne receiver, low noise, 215 to 250 GHz, for radiotelescope 88−56928
superconductor-insulator-superconductor mixer with Nb-oxide-PbIn and NbN-oxide-PbIn junctions 85−41064
superconductor-insulator-superconductor mixers, integrated tuning elements 88−50370
superconductor-insulator-superconductor mixers, noise parameters 88−63909
superconductor-insulator-superconductor mixers, quantum noise in the quantum theory of mixing 87−67878
superconductor-insulator-superconductor mixers, saturation by out-of-band signals, anal. 88−56923
superconductor-insulator-superconductor mixers integrated with slot antennas, imaging array 87−33559
superconductor-insulator-superconductor MM-wave mixer with RF tuning 87−32081
superconductor-insulator-superconductor quasi-particle mixers, developments 87−74586
superconductor-insulator-superconductor receiver, low noise 230 GHz, astronomical appl. 87−70167
superconductor-insulator-superconductor tunnel junctions, harmonic mixing in MM and subMM regions 86−28747

mixers (circuits) continued
superconductor-insulator-superconductor waveguide mixers, embedding impedances, scaled modal meas. 86−27605
surface-mount microwave mixers for assembly on PCBs 86−14507
surface-mount mixer beckons automation 86−40971
suspended microstrip baluns, performance anal. 87−45203
SynthMix keyboard mixer, design 85−655
Ta-Ta_2O_5-PbBi tunnel junctions for 85-110 GHz SIS mixer expts. 87−66528
Telefunken CF300 TV tuner with MESFETs *(German)* 88−60396
THF quasi-optical corner cube wire antennas mixer, response modelling 87−17375
thin film microwave mixers, Avantek TFG series for 0.75-26 GHz range *(Italian)* 88−984
transceivers, sideband operation, design 87−3048
transistor microwave mixers, design and investig. 86−27616
troubleshooting a broadband mixer in 10 quick steps 88−614
tunable laser sideband generation in far-IR region 87−18911
TV animation store, digital chroma-key and mixer units, report 85−47678
TV tuner, VHF, hyperband and UHF mixer/oscillator sections on one IC 88−22288
TV tuners, IC for performing VHF, hyperband and UHF mixer-oscillator functions 87−34808
two-loop phase-locked automatic frequency control system, digital frequency mixer 86−14065
two-tone intermodulation in diode mixers 87−37074
UC Berkeley submm heterodyne receiver for spectroscopy 87−20656
UKIRT mm dual-polarisation receiver 87−20658
uni-planar double-balanced mixer using a new miniature beam lead crossover quad 88−71093
up-converter receiver, interference susceptibility reduction using mixer channels 86−43717
varactor microwave mixers, energy characteristics optimisation 87−65941
VHF converter for short-wave receivers, cct. 85−14413
VHF/AM air band convertor, 106-150 MHz operation, cct. design using MOSFET mixer 85−14091
video mixing unit, operator's working position *(German)* 86−65074
video mixing units, model system for operational technology assessment *(German)* 85−37287
video mixing units, operating technology *(German)* 88−29092
video signal mixer for CATV, construction *(Chinese)* 86−24107
videodiscs, sound mixer's guide 85−8607
vision mixer control panel, control panel design elements 86−11253
Volterra series analysis of multiport selective electronic circuits *(Polish)* 86−640
W-band microstrip components 86−8438
W-band microstrip subharmonically pumped mixer, with over 10 GHz RF bandwidth 87−6082
W-band mixer with 35-GHz bandwidth offers broad applications 87−45262
W-band monolithic balanced mixer 86−27630
W-band monolithic balanced mixer using Schottky barrier diodes 86−8476
W-band monolithic GaAs crossbar mixer using SBDs 85−1059
W-band subharmonically pumped mixer with packaged Schottky diodes, expt. study 86−14522
whiskerless schottky diode for MM and sub-MM wave appl. *(Japanese)* 87−73757
wide band millimetre subharmonic mixer 88−50396
wide-band MESFET mixers, dual-gate model 88−56974
wide-band optical heterodyne balanced mixer receivers, design 87−56161
wideband microstrip balanced mixer 87−66524
wideband microwave amplifiers and mixers, performance 87−37036
wideband microwave mixers, modelling and optimisation 88−56903
X-band analogue ccts. of third-generation MMICs from ELAB 87−11061
X-band fin-line receiver 88−50323
X-band mixer, embedding network parameters *(Chinese)* 87−66513
Al tunnel junctions, quasiparticle mixing close to gap freq. 85−56200
AlGaAs/GaAs HEMT, optically controlled microwave performance 87−73770
GaAS MESFET microwave self-oscillating mixer *(Korean)* 88−44356
GaAlAs/GaAs planar mixer diodes, MOCVD grown 85−34174
GaAs 87−32100
GaAs 30 GHz monolithic balanced mixers using ion-implanted FET compatible 3-inch wafer process 86−67506
GaAs, 94 GHz planar monolithic balanced mixer 85−17837
GaAs FET preamplifier and mixer stage, low-noise METEOSAT converter design 85−50019
GaAs Gunn diode MM-wave mixers, homodyne and heterodyne studies 86−20825
GaAs IC, electro-optic sampler with picosecond time resolution 85−62466
GaAs MESFET MIC gate mixer, design, fabrication and characts. *(Korean)* 87−45256
GaAs MESFET amplifiers and mixers, large-signal nonlinear anal. 85−18364
GaAs MESFET amplifiers and mixers, nonlinear anal. using harmonic balance technique 87−45235
GaAs MESFET balanced mixer with very low intermodulation 87−73785
GaAs MESFET, microwave distributed mixer, design 85−11576
GaAs MESFET mixer, wideband microwave type using distrib. mixing, theoretical and expt. study 86−27591
GaAs MESFET mixer with very low intermodulation, X-band, design and performance 87−45234
GaAs MESFET mixers, stability conditions, anal. and design 85−17866
GaAs MESFET mixers, theory and anal. 85−6526
GaAs MESFET resistive mixer with low distortion, design and performance 88−38732
GaAs MESFET self-oscillating single gate X-band mixer 88−32463
GaAs MESFET subharmonic mixer, design *(French)* 85−39966
GaAs MM-wave mixer diode, fabrication using high energy implantation 87−66522
GaAs MM-wave self-oscillating mixer using FET harmonic-mode oscillator 87−6146
GaAs MMIC 35 GHz receiver using Schottky diode mixer and MESFET IF amplifier 88−19405
GaAs MMIC balanced mixers and phase shifters, designs for X-band operation 85−50039
GaAs, MMIC double balanced mixer using FETs, 6-18 GHz, design and performance, EW appls. 86−14529
GaAs MMIC dual-gate FET mixer, double balanced, UHF receiver front-end appls. 86−27594

mixers (circuits) continued
GaAs MMIC freq. convertor, low-noise design for X-band operation 86−20822
GaAs MMIC frequency convertor, low-noise X-band operation, design, fabrication and performance 85−55173
GaAs MMIC mixer using dual-gate FET with reduced output impedance, 12 GHz band 88−32450
GaAs MMIC technology, 1 GHz RF modules 88−25511
GaAs S-band MMIC FET mixer 85−34199
GaAs Schottky barrier diode mixer for FIR laser interferometer 86−11597
GaAs Schottky barrier diodes for high sensitivity millimeter and submillimeter wavelength receivers 87−73765
GaAs Schottky barrier mixer diodes, excess noise study and technique for reduction 87−37550
GaAs Schottky barrier mixer element operation at sub-MM wavelengths 88−25489
GaAs Schottky diode X-band balanced mixer, design and characts. *(Polish)* 85−34175
GaAs Schottky diode mixer, MM-wave operation, design and characts. 85−61455
GaAs Schottky diodes for multipliers, mixers and modulators, photolithographic fabrication 86−27606
GaAs Schottky diodes, submicron, sub MM wave applications 87−29134
GaAs Schottky-barrier mixer diodes, intrinsic conversion loss model 86−62829
GaAs VHF-UHF monolithic front end 87−59262
GaAs W-band monolithic crossbar mixer 85−17836
GaAs beam-lead diode subharmonic mixer design for MM-wave spectrum analyses appl. *(German)* 88−19373
GaAs coplanar mixer diodes for MM-wave systems, struct., fabrication and characts. 88−56995
GaAs diode *W*-band crossbar mixers integrated entirely on a single-sided substrate yielding 15 GHz instantaneous bandwidth 87−73756
GaAs dual-gate MESFET mixer, large-signal equiv.-cct. model 85−45233
GaAs dual-gate MESFET monolithic mixers, 12 GHz operation, DBS receiver appl. 85−34176
GaAs microstrip monolithic mixer, 94 GHz 87−17347
GaAs mixer diodes, high performance low noise, plasma tailoring of photoresist 86−1913
GaAs monolithic MIC mixer-IF amplifiers for direct broadcast satellite receivers 85−1048
GaAs monolithic Schottky junction pairs for W-band crossbar mixers 87−66523
GaAs monolithic downconvertor using UHF LO/mixer config., TV tuner appl. 86−38031
GaAs monolithic microstrip balanced mixer, planar, 94 GHz 85−1060
GaAs optically controlled microwave performance 87−73770
GaAs optoelectronic mixer operation at 4.5 GHz 85−18808
GaAs photoconductive mixer for broadband downconversion 85−2154
GaAs single balanced diode X-band monolithic mixer 85−34200
GaAs uniplanar MMICs for full-MMIC receiver 88−63960
GaAs wideband phase-detector for homodyne reception 87−73723
GaAs-SiO_2 interfacial stress and excess noise inSchottky-barrier mixer diodes 86−41738
n-GaAs-reverse biased Schottky optically pumped tunnelling millimetre-wave mixer 86−62842
GdBaCuO point contact based MM wave Josephson mixer 88−19366
HgCdTe photomixers for FIR heterodyne receivers 88−29386
InP Gunn diode MM-wave mixers, homodyne and heterodyne studies 86−20825
InSb cyclotron resonance based heterodyne receiver for submillimetre region 86−24534
Nb Josephson point contact, freq. mixing of 50 GHz microwave and 4.25 THz FIR light 87−74603
Nb based superconducting structs. for MM-wave receivers, expt. study 88−13746
Nb point contact Josephson junction mixer, coupling and conversion efficiency at 469 microns 86−22041
Nb/Al-AlO_x/Nb 30 GHz band SIS receivers using closed cycle refrigerators 88−15720
Nb/Al-AlO_x/Nb 35-50 GHz superconductor-insulator-superconductor receiver, wideband tuning method 88−15719
Nb/Al-AlO_x/Nb SIS mixer, 100 GHz, design and characts. 87−74589
Nb/Al-AlO_x/Nb array junction SIS receiver, 40 GHz band operation 87−45237
Nb/Al-AlO_x/Nb junctions for millimeter-wave mixers, fabrication process and characts. 88−13744
Nb/Al-AlO_x/Nb superconductor-insulator-superconductor junction MM-wave mixer, characts. 87−66530
Nb/NbO_x/Pb alloy tunnel junctions, millimetre wavelength detection 85−56202
Nb-Al_2O_3-Nb refractory material SIS junction structures 87−67853
Nb-AlO_x-Nb SIS mixer receivers, dual channel design for Nobeyama MM-wave array 88−15717
Nb-Nb planar Josephson junction devices, submillimeter mixing, expt. study 87−74588
Nb-NiO_x-Sn point contact tunnel junctions, submillimetre wave response 85−56203
NbCN/PbBi mixer elements for heterodyne receivers, design and optimisation 85−61469
Nb_3Ge base electrode tunnel junctions, cct. appls. 87−67891
NbN superconducting tunnel junctions, linear array, MM-wave mixing 87−37559
NbN tunnel junction fabrication for mixer appls. 88−26708
NbN-NbN Josephson point contacts, current-voltage characts. 88−20306
NbN-oxide-Pb SIS junction MM wave image sensor using quasi-optical system configuration 88−29468
Pb alloy based SIS mixers for low noise millimetre-wave heterodyne receivers 88−44380
Pt-GaAs Schottky microjunctions as MM-wave mixer diodes, characts. and noise study 87−6461
PtSi-Si Schottky diodes, struct., properties and fabrication, S-band microwave mixer appl. *(Polish)* 85−1032
Si 60 GHz baritt diodes as self-oscillating mixers 86−53032
Si MMICs using ISOSAT bipolar processes for high performance 88−56935
Si Schottky-diodes for UHF/VHF mixers *(Polish)* 85−1559
Si bipolar MMIC for freq. conversion at up to 20 GHz 87−73778
Si bipolar MMIC freq. convertor, 10 GHz, self-oscillating mixer config., design and characts. 87−11034

mixers (circuits) continued
Si diode mixer for 35 GHz stable FET oscillator, dielec. stabilised 87−6143
Ta superconducting tunnel junctions for microwave mixing in quantum limit 86−47999
W-Ni point contact diode, far infrared harmonic generation and mixing 87−46973
Y-Ba-Cu-O thin films, high T_c supercond., microwave detection and mixing 88−71018

mixes *see mixtures*

N_2-CO_2-CS_2 mixture, calc. of gains for vibrational transitions 87−2072
N_2-O_2 mixture discharge characteristics and regions of negative point-to-plane gap 85−62124
N_2-electronegative gas insulating mixtures, transport coeffs. 85−29366
O_2-N_2-I mixture laser active medium 87−68362
SF_6 gas and mixtures, time to breakdown of covered electrodes 85−35233
SF_6 mixtures, breakdown characts. *(Korean)* 86−47894
SF_6-CO_2 mixtures, electron swarms, time resolved obs. 85−35237
SF_6-N_2, for circuit breakers, wall-stabilised arcs, decay 86−26214
SF_6-N_2 mixture, DC interruption by spiral arc 86−28546
SF_6-N_2 mixtures, gas comp. meas., optical method 85−35238
SF_6-N_2 mixtures, particle contamination control method, dielectric strength, breakdown tests 85−24015
SF_6-N_2 mixtures, streamer and leader propag., vel. meas. 88−39754
SF_6-N_2(N_2O)(CO_2)(air) binary mixtures, breakdown voltages in uniform elec. fields 85−1779
SF_6-air mixture, corona formation and propagation 86−28549
SF_6-based dielectric gas mixtures 85−24002
SF_6-butene-CO mixtures, volt-time characts. of rod-sphere gaps 85−29367
Tl-Xe mixture, optically excited, Raman and atomic resonance lasers 85−29766
Xe-2, 3 DMB filled proportional counters, gas gain meas. 88−4808
Xe-Ar mixture used for continuous tuning of coherent radiation in the 117.6-119.2nm range 86−54213
Xe-CO_2 87−63635
Xe-Cs mixtures, stimulated emission of UV radiation efficiency 87−74978
Xe-TEA gas mixtures, emission spectra in proportional counter 87−35352
Xe-ethane gas mixtures, Monte Carlo calcs. of electron transport 87−63635
Xe-hydrocarbon gas mixture, drift velocity and Lorentz angle meas., detector appls. 88−4802
Xe-methane 87−63635
XeCl in two-component mixtures, lasing 85−56520
XeF in two-component mixtures, lasing 85−56520
ZnCdS:Ag-$CdS_{1-x}Se_x$:Cu mixtures, photoconductivity study 88−26940

mobile antennas
1.8 to 28 MHz RF car antenna 88−34433
2 meter design 85−41699
10 metre band for radio communication 87−8156
800 MHz inverted F antennas for portable radios 86−68861
L-band phased array antennas for mobile satellite communications 87−70015
active window antennas for radio reception in cars 88−45776
adaptive antenna moving in multipath field, fast signal acquisition algorithm and simulation 87−39457
adaptive array antenna for mobile communications 86−43085
adaptively controlled transmitting array config. for microwave power transmission between spacecraft 88−23150
add-on active aerial with SMDS 86−42992
aerials and base station design 86−10214
aerials for car radio systems *(Norwegian)* 87−7596
airborne, FM by synthetic Doppler 87−75570
airborne monopulse slot array antennas, feed network design 88−66235
airborne phased array antenna for mobile satellite communications 87−27086
airborne radar, using electronically steerable antenna technology 86−69829

mobile antennas continued
airborne SAR imaging system, based on rotating antennas 86−69831
aircraft, for VSW range, with compensation cct. *(Czech)* 87−54711
aircraft antennas, SARGASSES interactive computer program with graphics 87−26992
aircraft localizer antenna system, truncated corner reflector design 87−75655
aircraft mounted antennas, EMI coupling at SHF/EHF, anal. and meas. 88−14445
AM-FM active windshield antenna with equivalent performance to whip 86−43046
antenna pattern diversity branches characts. in urban mobile radio 88−34417
antenna system for land mobile-satellite links 86−54359
antennas for digital radio systems 86−23759
APPLE spacecraft VHF antenna system, design 86−10218
array antenna of 4 short axial mode helical antenna *(Japanese)* 85−2697
automatic antenna-alignment system, development 88−58945
automobile, radiation patterns *(Czech)* 87−68880
automobile antennas for FM radio, radiation patterns, effect of body and earth 85−19258
automobile body, internal EM field distrib., expt. study for interior-type antenna design *(Japanese)* 87−33362
automobiles, automatic antenna retraction 85−27747
avionics systems EMC modelling 87−77786
Ball Aerospace Airlink, microstrip patch antenna system 88−45787
Band III antenna systems and siting 85−20103
broadband meanderline twistreflector for the inverse Cassegrain antenna, design and performance 88−14556
broadcast antenna using rear window heater, design, operation and safety *(Czech)* 88−45771
broadcasting satellite array antenna, features, performance and radiation characts. *(Japanese)* 88−14538
built-in diversity antenna for 800 MHz band portable radio units 87−27035
car TV antenna system *(Japanese)* 88−74111
car window mounted antennas, RF energy density meas. 86−68884
CB antenna, 2 meter band conversion 85−57135
cellular mobile phone antenna design 88−21967
cellular radio, omni and directional antennas, rel. perform. in urban areas, RF propag. meas. 86−68885
cellular radio mobile UHF transmitting antennas, exposure of human subjects in near localities 85−63588
cellular subscriber antenna configs. and effects on system design 87−69948
circular microstrip two-port higher order dominant mode antennas, design and meas. 88−66186
circularly polarized shaped-beam antenna for broadcasting satellites, design and performance study 85−30100
compact mobile antennas for mobile satellite communications 87−70014
computer assisted antenna radiation pattern system, plotting for ships 86−68868
conformal microstrip antennas, configs., performance and appls. 88−40731
contoured-beam satellite antennas, use of hard horns to improve cluster feeds 88−45791
correlated fading effects on level crossing rates and average fade durations 88−27498
cross-dipole fed square horn, circularly polarised feed for C-band satellite antenna, design 88−58978
design, for mobile ground terminals 86−48674
detachable mobile radio unit antennas 87−48946
detachable mobile radio units, antennas performance characts. and configurations *(Japanese)* 87−8188
DF system for AirLand Battle 2000 85−31120
diversity antennas in mobile communications, operating mechanism 88−35395
double offset Gregorian antenna design for DFS-Copernicus communications satellite *(German)* 87−19317
dual frequency antenna integration using invisible grating structures 85−41728
dual-resonance broadband microstrip antenna 86−68862
electronically steerable mobile satellite array antennas, lens feed concepts 87−27076
elliptical offset Gregorian antenna for a transportable earth station 85−7742
emergency locator transmitter antenna gain distributions, under simulated crash conditions 85−25766
ESM land-mobile appls., antenna systems design 85−57138
ferroelectric antenna for mobile communication systems 88−8618
FM car radio reception, multiple antenna diversity 88−2583
FM car radio reception characts. 86−69900
geostationary satellite signal degradation due to Suninterference 87−8229
Giotto spacecraft antenna subsystem design 87−26993
Harada Model MT-2 antenna for two meters 88−40673
heater antennas, rear-window, mobile radio and broadcast reception appl. 86−64095
helix antennas, polarisation optimisation *(German)* 87−54674
hemispherical coverage antennas for satellite mobilecommunications 86−64955
HF, design 85−30098
HF J-pole antenna for amateur radio 88−27609
HF mini-dipole using mobile whips 87−68863
high capacity land mobile communication system, base station/vehicular antenna design techniques 87−48951
high-frequency whip antenna, 800 MHz 87−27001
horn antenna, lossy mag. material coated, design for Earth coverage beam from geosynchronous satellite 88−66180
ICOM AH-2 HF mobile antenna system 87−68862
inflatable space rigidized reflector development forland mobile missions 86−59155
kite-borne antennas for HF portable operation 88−34434
land mobile satellite service, ground vehicle antenna development 85−13291
land vehicle antennas for satellite mobilecommunications 86−54356
large aerospace antenna, optimal quasi-static shape control 85−51500
large deployable antennas for satellites, reflector error study, effects on radiation characts. *(Japanese)* 88−72646
large deployable structures for space applications *(Japanese)* 88−10465
linear selective tunable SW antenna, desensitisation protection *(German)* 87−61498
low cost cartop phased array steering 88−15381
low gain antennas for land-mobile terminals 87−12831
low-profile antenna for mobile satellite communications 87−54727

mobile antennas continued
low-sidelobe multibeam antennas fed by cluster horns, design for satellite *(Japanese)* 87−27007
maritime and aeronautical satellite communications, fading reduction technique for cross dipole fed antennas *(Japanese)* 86−30721
maritime satellite communications, antenna pointing error reduction 88−35433
maritime satellite communications, compact antenna system, mount pointing error reduction method *(Japanese)* 87−7611
maritime satellite communications, compact shipborne antenna system 86−64954
meander zig-zag monopole antenna with broadband characts. 87−27042
microstrip antennas, wide bandwidth, for mobile ground stations 87−54728
microstrip log-periodic antenna array with endfire beam, design and performance 88−2811
microwave multi-beam deployable antenna system for large-capacity communication satellite 88−27608
MM-wave homogeneous ferrite phase scan antenna, design and characts., military appls. 87−54702
mobile-to-satellite communication antenna requirements 86−30692
monolithic phased arrays for EHF communications terminals, design and fabrication technology 88−40732
monopulse helical array for maritime satellitecommunication 86−29642
motor vehicle rear-window heating element as 144 MHz receiving antenna 87−47341
MSAT vehicular antenna systems, performance 87−27078
MST-X phased array crossed-slot element design 88−2850
multi-beam antennas for satellite use, K-band and S-band designs *(Japanese)* 87−27006
multibeam antenna for satellite communications, array fed config. using active elements *(Japanese)* 86−68915
multibeam antenna system for NASA ACTS satellite, development and design aspects 87−27091
multibeam reflector antennas for INTELSAT VII, configs., characts. and performance *(Japanese)* 86−59149
multiple antenna diversity by the scanning process *(German)* 87−26997
multiple beam antenna fee development 87−19347
multiport patch antenna for mobile communications 85−13277
NASA's Advanced Communications Technology Satellite, switches, lasers and electronically-hopped antennas *(Japanese)* 87−76698
NASA's mobile satellite technology program 86−50685
on-glass automobile antennas, installation aspects and test methods 88−34436
phased array antennas for airborne ECM, configs, and operation 87−33545
planar antennas for satellite sound broadcasting reception with mobile receivers *(German)* 87−54738
planar inverted F antenna for 800 MHz band mobile radio 87−68865
polypropylene substrates with low dielectric constant for printed antennas *(French)* 88−34479
portable and mobile antennas for frequency agile HF systems 85−30109
portable antennas for out-of-the-ordinary QTHs, design 88−8570
post loaded microstrip antenna for pocket sizeequipment at UHF 86−68901
printed-on quarter glass TV antenna system for cars 87−75578
PRODAT system architecture, satellite based mobile communication system 87−13665
radionavigation antenna drive design and special DC motor development 87−39535
railway tunnel radio telephones, earthing problems *(German)* 87−42520
ray analysis of a class of hybrid cylindrical aircraft wings 88−27591
ray analysis of a class of nondevelopable satellite launch vehicles 88−27592
rear-window heater antennas for mobile radio and forbroadcast reception 86−36842
RF safety standards evolution; impact on mobile and portable transmitters 86−69663
Sandpiper mobile scanner antenna , review 88−72681
SAR spaceborne and Shuttle Imaging Radar-B (SIR-B) antennas, development 86−16059
satcom antennas feature east/west beam shaping 86−54383
satellite antenna contoured beams, pattern prediction procedure 86−29559
satellite antenna dimensioning problems and developments *(Italian)* 86−69721
satellite antenna near field test facility, computerised system 86−59156
satellite ground station antennas, beamforming 87−54726
satellite mobile ground stations appl., conf., London, England (May '87) 87−51755
satellite multibeam antenna systems, C-band reconfigurable beamforming network 85−24985
satellite near-field test facility, for TV-SAT direct broadcasting satellite 87−19309
self-phased array studies for mobile satellite terminals 87−47412
self-phased receiving array for mobile satellite appls. 87−54756
self-supporting antennas for ships *(Japanese)* 87−54686
shipboard antennas, metal structs. effect on characts. 88−2708
shipborne antenna structure, complex, far field radiation anal. 86−68865
small antennas for transportation, research review *(Japanese)* 88−34428
spaceborne phase arrays, space-fed local oscillator concept 88−72709
spacecraft antenna technology, developments *(Japanese)* 88−8597
spacecraft antennas development using optical technology 88−41678
spacecraft array antennas synthesis using Fourier transform method 87−27085
standard-C antenna, development 88−58944
symmetrical thin plate triangular antennas, anal. 87−39459
Ten-Tec series of 'Ultimate' HF mobile antennas, review 87−75572
thermal analysis technique applied to a conformal phasedarray antenna, interceptor missiles development 87−4067
transportable communications, antennas 86−43065
UHF band, anal. 88−14489
UHF band quarter-wave monopole on automobile, anal. *(Japanese)* 86−68841
UHF bent-slot antenna for portable equipment, receiving perform. in urban areas 88−27624
UHF bent-slot antenna system for portable communication equipment 87−75596
UHF path loss prediction, diffraction based theoretical model 88−34323
urban mobile radio, characts. of antenna pattern diversity branches *(Japanese)* 87−8206
US space station antenna design concepts 87−27038
V-band space-based phased arrays, development using MM-wave monolithic technology 87−33546
vehicle ante4nnas, wire-grid analysis 86−68863

mobile antennas continued
vehicle antennas, adaptive regulation of directional characteris. *(German)* 87−54672
vehicle rear-window heater aerials, broadcast reception and mobile radio communication 86−64105
vehicular antenna, power gain radiation patterns meas. 86−16035
vehicular technology, conf., Tampa, FL, USA (June 1987) 87−65070
vertical monopole antenna, automobile roof mounted, UHF radiation patterns *(Japanese)* 85−30083
vertical radiation patterns in UHF band 87−2363
vertically polarized flat antenna with omnidirectional radiation 86−68886
vertically viewing antennas, satellite signals reception for mobile communication 88−8601
VHF antennas on vehicle, mismatch EMI coupling and mutual interference study 87−12755
VHF broadcast reception in motor vehicles, antenna diversity systems appl. *(German)* 87−54671
VHF-UHF mobile wideband Doppler direction-finder PA 555, description 86−30903
VHF/FM antenna-diversity reception in motor vehicles, efficiency *(German)* 88−9447
VHF/UHF portable transceiver aerial matching 88−28742
VLF/MF band loop antenna system, design with series transformer-coupled network 87−68884
wideband transportable antenna for NVIS links 88−40712
windscreen antennas, active, for antenna diversity reception in motor vehicles *(German)* 87−75601
WSE WP-727 DX docking booster and Com-Rad CR2/4A dual-band antenna, review 88−41500

mobile communication systems

digital land mobile communication adjacent channel interference rejection method 86−69662
digital land mobile radio, impact of frequency selective fading at several hundred Kbit/s 88−28705
digital land mobile radio, robust voice transmission, 16 kbit/s 88−46940
digital land mobile radio system, directivity diversity 86−69700
digital land mobile radio with discrimination detection, perform. of 12PM3 modulation methods 86−69676
digital land-mobile radio, speech and channel coding 88−40786
digital link for 900 MHz *(German)* 86−17255
digital microwave links, fixed and mobile, modulation techniques, multipath propag., design criteria *(German)* 85−42457
digital mobile communication using linear modulation method 87−68928
digital mobile radio, bandwidth determ. and radiowave propagation study *(German)* 88−53173
digital mobile radio, burst error occurrence mechanism due to multipath propag. 86−69696
digital mobile radio, channels with multipath fading, model for range and reliability eval. *(Spanish)* 87−56006
digital mobile radio, conf., London, England (Oct. 1985) 86−7409
digital mobile radio, data test equipment for digital channel anal. 87−69984
digital mobile radio communications, self-synchronising scrambler/descrambler multiple-error characts. study 85−30940
digital mobile radio systems, 16 kbit/s split band adaptive predictive codec implementation 88−67245
digital mobile radio systems, propag, meas. appl. in performance study 86−69697
digital mobile radio transmission channels, simulation *(French)* 86−4521
digital mobile radios, wideband radio simulator *(German)* 86−23740
digital mobile telephone, implementation on single chip 88−25283
Digital Mobile Telephone Switching System, development *(Japanese)* 85−36933
digital mobile telephony, Gaussian MSK with different demodulators and channel coding 85−19705
digital mobile transmission, comparison of multipath delay and BER perform. 88−72559
digital mobile transmission channel characterisation from exptl. meas. 87−76609
digital mobile-radio systems, satellite and terrestrial links, testing using channel simulator 85−14133
digital mobile-radio with discrimination detection, modulation methods 87−8184
digital modulation for portable radio channels with frequency-selective fading 87−39598
digital PLL, first order, performance 85−47439
digital portable communications channel with time delay spread, modelling and anal. 87−3089
digital portable transceiver using GMSK modem and ADM codec 85−3372
digital radio, low cost voice compression technique 87−20426
digital radio, satellite-aided mobile communications 86−4605
digital radio communications, effects of urban impulsive noise, bit error rate estimation 86−43764
digital radio for vehicles, interleaving or spectrum-spreading 87−3061
digital radio pagers, slim design, advanced technology 85−8325
digital radio system development using digital simulation *(German)* 86−23734
digital signal processor chip implementation of demodulator 88−56637
digital signalling technique using tone calibration 87−76582
digital speech coders with synthetic regeneration during fades, intelligibility tests 87−28247
digital speech coding for mobile radio 87−69054
digital speech coding methods comparison 88−41575
digital system, PAM/FM techniques 87−40768
digital systems, bit error distrib., comparison between field meas. and fading simulation 85−57998
digital systems, linear modulation scheme 86−55224
digital systems implementation mobile systems, digitisation *(German)* 87−69911
digital technique for speech transmission *(Croatian)* 85−42485
digital telephony, modulation method *(Swedish)* 87−69944
digital transmission, high-speed *(Japanese)* 86−69644
digital troposcatter system design and evaluation, military appls. 85−8323
digital variable-delay, sine/cosine noncoherent detector 85−54742
digitally trunked voice and data 88−3893
direct access FDMA satellites using narrowband techniques, potential for mobile communications 87−40857
direct conversion FSK receiver, sensitivity simulation results 88−73846
direct sequence spread spectrum land mobile communication equipment, configuration and performance *(Japanese)* 85−30938
direct-coupled $\lambda/4$-coaxial resonator bandpassfilter for land mobile communications 87−5945
direct-sequence spread-spectrum radio for indoor wireless communications 87−69925
disasters and emergency appl. *(Japanese)* 86−69642
dispatch systems, development in Norway 85−58032
distributed algorithm for reorganization and communication scheduling in mobile multi-hop radio networks 87−56018
distributed mobile switching centre environment, simulation 86−4544
distributed protocols for mobile radio networks 85−63149
distribution density of multipath propagationdelay for mobile radio communication *(Chinese)* 86−64874
diversity antennas in mobile communications, operating mechanism 88−35395
diversity combiners using vertically-spaced base-station antennas received signals, eval. 88−28706
diversity reception techniques development, S/N improvement methods *(Czech)* 85−20081
diversity techniques for leaky feeder systems 85−57216
DMSK two-branch space-diversity demodulator for mobile communications 88−41574

land mobile radio signal statistics in nonurban environments 87−69959
land mobile radio signals in flat suburban terrain, standard deviations of local means 86−69666
land mobile radio system subject to fading/shadowing, outage probability 85−57989
land mobile radio systems, digital, channel estimation 86−49494
land mobile radio systems, intermodulation product generation suppression in materials and structures 87−13630
land mobile radio systems, PAM/FM, Reed-Solomon error and erasure correction 88−73831
land mobile radio systems, planning, method selection for accurate prediction of field strength 85−3382
land mobile radio telephone services, status 88−35413
land mobile radio telephone system, medium capacity, supervisory and test control program design *(Japanese)* 85−20067
land mobile radio use of microwave bands 86−30650
land mobile radio using equal-gain combining diversity, charact. study *(Japanese)* 85−47441
land mobile radiotelephone system, medium-capacity, radio link control program design *(Japanese)* 85−20065
land mobile radiotelephone systems, past, present and future 88−3886
land mobile radiowave propag., standard plane earth eqn. for clutter losses determ. 87−26782
land mobile receiver RF intermodulation immunitymeasurement using two signal generators 86−37767
land mobile satellite, on-board processing payload technology for European system 87−13669
land mobile satellite channel meas. and models, appl. to MSK signals 88−28704
land mobile satellite channels, comparison of data modulation techniques 87−48980
land mobile satellite channels, simulation of forward error correction/ARQ data transmission 86−69725
land mobile satellite communications, channel model, modulation and error control 87−13664
land mobile satellite communications, lens antenna concepts 86−68917
land mobile satellite communications, propag, effects 86−48593
land mobile satellite communications, proposal for expt. 85−63575
land mobile satellite communications, statistical model and channel coded performance 88−41572
land mobile satellite comparison with terrestrial cellular radio, economic and market aspects 87−13662
land mobile satellite experiment, MSAT-X, retransmission protocol for message service 86−23825
land mobile satellite expt., MSAT-X, perform. of adaptive multiple access scheme for message service 85−14196
land mobile satellite expt. (MSAT-X), adaptive mobile access protocol for message service 85−3396
land mobile satellite link, statistical model 86−37826
land mobile satellite link, statistical model 85−14198
land mobile satellite links, dual-pilot tone calibration technique, performance anal. 88−9498
land mobile satellite propagation modelling 88−2577
land mobile satellite regional system for 1990s 87−13668
land mobile satellite service, frequency allocation 87−13674
land mobile satellite service, frequency spectrum allocation 87−13671
land mobile satellite service, UHF band 86−59788
land mobile satellite service for Australia 87−76702
land mobile satellite service systems 88−15361
land mobile satellite services, 800-900 MHz band, proposed US systems 85−14156
land mobile satellite services, conf., Noordwijk, Netherlands (June 1986) 87−10046
land mobile satellite services, institutional aspects, INMARSAT/European effort 87−13675
land mobile satellite signal statistics, meas. and modelling 87−3141
land mobile satellite system, integrated voice/data demand-assigned multiple-access protocol 85−14140
land mobile satellite systems, fade meas. at L-band and UHF in mountainous terrain 88−45683
land mobile satellite systems, propag. meas. 86−48592
land mobile satellite systems, roadside tree attenuation meas. at UHF 87−62895
land mobile satellite systems using highly eccentric orbits 87−13678
land mobile satellite transmission, propag. considerations 86−30705
land mobile service, field strength meas. and computer prediction comparison 86−17278
land mobile service frequency and space separation limits for three-transmitter interference 88−3884
land mobile service radio station frequency separation algorithm 88−3885
land mobile spread spectrum communications, research and appls. *(Japanese)* 87−40758
land mobile system, NTT-MCS-L2, control techniques and power savings effects of intermittent operation 87−69985
land mobile system in NTT, high capacity 88−46934
land mobile systems, development in Europe 86−59799
land mobile telephone radio units, FM modem baseband CMOS LSI 85−47298
land mobile telephone system, 800 MHz, cuber predistortion linearisers for relay equipment 86−43753
land mobile telephone system, detachable mobile radio units fundamental design considerations *(Japanese)* 87−8186
land mobile telephone system, medium capacity, software structure and performance evaluation for radio link control *(Japanese)* 85−20066
land mobile telephone system, portable radio transceiver unit design considerations *(Japanese)* 87−34460
land mobile telephony, European developments *(Dutch)* 86−37335
land mobile terminal for satellite data communication 87−13667
land mobile-to-mobile communication channel, statistical model 86−69631
land service transceivers, EMC parameters standardisation efficiency estimation 88−35390
land service transmitter, range control *(French)* 87−13615
land services, radiocommunications with mobile subscribers 87−48925
land systems, book 86−7419
land systems, tutorial 85−58008
land usage factors in mobile radio propagation prediction 88−28739
land vehicle antennas for satellite mobilecommunications 86−54356
land- and air-mobile communications, interference effects modelling 87−40743

mobile radio systems continued
land-mobile satellite system for digital communications in Europe 87−13677
leaky feeders for microwave links in tunnels 86−37694
leaky feeders use in underground radiocommunication 86−37693
leaky-feed systems for vehicle location in mines and metros 85−36931
LED brightness controller, for mobile radio transceivers 88−56819
limited area communications *(Japanese)* 86−69641
linear transponder for a mobile satellitesystem 85−58081
link allocation protocol 86−59803
link allocation protocol for mobile multi-hop radionetworks 86−54605
live TV broadcasting via satellite, mobile Earth stations use *(Italian)* 86−59837
local ALOHA radio communications with capture andpacket buffers 86−55225
local average power estimation of mobile radio system 85−36940
LOCSTAR radio-determination satellite system 88−53192
LOCSTAR system of radio position-fixing by satellite *(French)* 87−13804
London Buses, electronic systems, developments 86−52014
London propagation path losses at 450 MHz, measured and predicted data comparison 85−41632
Los Angeles Metro Rail, communications systems for control and supervision 85−3390
low bit-rate speech coders applicable in mobile satellitecommunication systems 85−58027
low gain antennas for land-mobile terminals 87−12831
low power, low voltage receiver integrated circuits 88−28743
low-power radio communication sets, antenna height dependence of 800 MHz attenuation measured in houses 86−15874
M-Sat mobile satellite communication system 88−28818
macroscopic diversity architectures for universal digital portable communications, cost comparisons 86−55228
macroscopic diversity in frequency reuse radio systems 87−69126
Manchester coded digital FM with discriminator detection, pulse shaping effects 87−69956
manoeuvring platforms, radio communication between them 85−42501
Marconi Instruments 2955 test set for mobile radio 85−42848
marine mobile service for developing countries 85−20082
marine service, frequency-adaptive decameter radio-communications circuit study 88−9421
maritime and aeronautical satellite communications, fading reduction technique for cross dipole fed antennas *(Japanese)* 86−30721
maritime coin telephone for ships *(Japanese)* 85−25586
maritime global satellite communications, digital transmission system/equipment design for INMARSAT appl. 85−14183
maritime mobile propagation meas. using PROSAT 85−42500
maritime mobile satellite communication Earth station, low cost, low G/T, null steering system 85−42561
maritime mobile telex service, experimental satellite switch development 85−47458
maritime satellite channel, influence of multipath propagation on PSK-modulated systems 85−42499
maritime satellite communications, compact antenna system, mount pointing error reduction method *(Japanese)* 87−7611
maritime satellite communications using INMARSAT, sea reflection fading charact. 85−63604
maritime service in developing countries *(Spanish)* 86−59801
maritime services integration into public telephone network 86−59794
MATS-D dig. mobile telephone system 87−76603
MATS-D hybrid mobile radio system, spread spectrum appl. *(German)* 87−13609
measurements and models of a mobile-satellite link withapplications 86−55270
medical mobile radio, computer-based access 85−63553
medium band speech coding for mobile radio communications 88−67274
medium-capacity land mobile radio telephone, link control program, design and evaluation 86−23752
Megaset 900 cordless telephone from Siemens 87−69760
memory ARQ systems, hybrid error control system 88−40812
memory support batteries, board mounted, for telecom. appls. 88−30977
message and data communications outside Japan *(Japanese)* 86−69650
meteor scatter propagation and SSB operation, beginner's guide 85−30026
meteorological maritime communications, radiowave appls., review *(French)* 86−23708
metrical change estimation in fully connected mobile networks 88−73592
MF narrowband wireless system for communications and vehicular control in underground mines 85−42498
MF-lower HF groundwave communication ranges, data rates and coding effects 87−40771
microcomputer based frequency assignment model 87−3079
microprocessor interference to VHF radios 88−53184
microstrip phased array antenna for mobile satellite communication service 88−2879
microwave transmitter design, shipboard and ground, signal processing and computer impact 85−25745
military communications equipment in mobile environment, shock/vibration protection using helical-coil isolators 87−40748
military digital radio networks, spread-spectrum techniques and jamming/interception aspects *(Spanish)* 85−52279
military mobile radio relay network, management *(Dutch)* 85−8333
military RPV surveillance systems, secure data link 87−48713
military tactical radio planning and spectrum management 88−60068
miniaturised high permittivity 800 MHz band channel dropping filter using TM_{010} mode dielectric resonator 85−17622
Minicall, personal paging system in Sweden *(Swedish)* 86−37780
mining, computerised monitoring and control system using telephone/pager system 86−13241
mining, control and monitoring via medium-frequency techniquesand existing mine conductors 86−4503
mining industry, microwave radio in mines and tunnels 85−42495
mixed Nakagami-lognormal distribution−a feasiblestatistical model of fading in mobile radioenvironment 85−62786
MM-wave in urban environment, propag. studies in region of O_2 absorption band 88−28728
MM-wave satellite-fed personal communication system, antenna-beam allocation study *(Japanese)* 87−28476
MobilData, Oslo pilot project, technological realisation *(Norwegian)* 87−48958
Mobildata system for transmitting data over car phones *(Norwegian)* 86−49489

mobile radio systems continued
mobile communications, trends and forecasts including cellular telephony and wireless PBXs 88−3855
mobile data link field trials, eval. for advanced train control system 88−72555
mobile radio data service provision via community repeaters 88−28735
mobile radio telephone systems, potentialities and limitations *(Finnish)* 85−47118
mobile satellite plans and status 87−56039
mobile stations, antennas and propagation *(Japanese)* 86−68870
Mobile Subscriber Equipment contract, PTARMIGAN system demonstration 86−17252
mobile-satellite systems, proposed range of services 85−57983
mobile-to-satellite communication antenna requirements 86−30692
Mobira radio telephones, marketing and exports *(Swedish)* 85−14137
Mobitex, mobile ISDN for road traffic appls. *(Swedish)* 85−52275
Mobitex−public mobile radio service 87−13267
MOBITEX radio communication network for text data and speech *(Norwegian)* 87−8205
modems for data communications 85−36812
modulation impact on optimization of ground terminal and mobile satellite payload 88−9465
modulation techniques 86−10246
modulation/demodulation, amateur radio basics 85−2733
monochrome TV band reallocation 86−17537
monolithic crystal filter, 90 MHz, for narrowband mobile radio systems *(Japanese)* 87−69946
motor vehicle, bodies with glazed windows, EM scatt and excitation analysis using perturbed eigenmodes 86−68756
motor vehicle information availability improvement prospects *(French)* 88−15355
motor vehicle radios, public land systems *(German)* 86−69617
Motorola's KDT portable radio data terminal system, appls. 85−25535
Motorola local mobile radio systems, microprocessor control 86−55209
mountaintop radio repeater station, solar powered 88−41571
moving point trajectory approx. under interference conditions, mobile radio system *(Russian)* 88−3859
MPT 1327 signalling standard derivations 88−28733
MPT 1327 standard signalling protocols for Band III trunked systems 86−69687
MRG system with common base station, development *(Swedish)* 86−17259
MSAT, Canada's satellite based mobile communication system 87−13676
MSAT, mobile satellite services in Canada, implementation plan 85−47491
MSAT mobile satellite communications system, advanced conceptual design study 85−31012
MSAT mobile satellite terminals using differential MSK and LPC voice encoding 87−28495
MSAT-X appls., low cost conformal phased array anal. 88−2880
MSAT-X Mobile Satellite Experiment 86−59856
MSAT-X Mobile Satellite Experiment, modulation selection 88−3901
MSAT-X mobile satellite expt., pipelining protocol for message service 86−59869
MSAT-X mobile transceiver, base station and gateway station design 88−53201
MSE, Mobile Subscriber Equipment for US Army 85−57986
MSK, fractional-bit differential detection to avoid outages due to freq. selective fading 87−48937
MSK digital transmission for land mobile radio channels, performance 85−42493
MSK narrow-band digital communication by means of premodulation low-pass filter *(Japanese)* 86−30673
MSK signal detection using open loop technique 86−68965
multi-beam mobile satellite communications systems, config. and design parameters study *(Japanese)* 87−28475
multi-channel mobile radio, freq. hopping synthesiser IC 88−35404
multi-hop radio networks, distributed protocol for broadcasting 88−9464
multi-system with overlapping coverage, NMD freq. selection method *(Chinese)* 86−23698
multi-user collaborative coding scheme for mobileradio 86−10269
multibeam mobile communication system satellite design parameters optimisation for max. subscriber capacity *(Japanese)* 86−55251
multibeam mobile satellite communication system 87−3140
multibeam mobile satellite communication systems, link configurations 86−23824
multibeam mobile satellite communication systems, compact mobile terminals 88−46999
multibus radio LAN 88−21712
multichannel duplex system for large area radio dispatching communication, appl. *(Chinese)* 86−23700
multifunctional coding schemes for secure communication 87−12931
multihop, mobile, packet radio networks, distributed broadcasting transmission schedules 88−52663
multihop dynamic radio network, collision free channel access algorithm 87−62850
multihop mobile packet radio network routing protocols 86−54606
multihop mobile radio networks, time synchronisation and ranging 86−59802
multihop packet radio network using random access techniques, optimal design parameters 87−28408
multihop packet radio networks, channel signalling and access protocols, performance anal. 87−34449
multihop packet radio networks, channel spatial reuse and access protocols 87−33833
multihop radio networks, critical connectivity phenomena 87−34463
multilayer PC board production, using surface mounted device technology *(German)* 86−17246
multilevel correlative digital FM system, power efficient system 88−72735
multipath delay, effect on timing recovery 87−26790
multipath environment, tracking performance of narrowband phase-locked loop 85−36945
multipath fading, digital simulator 86−30687
multipath fading channel, causes of burst errors 88−28701
multipath fading channel, system bit-rate selection, analytic model 87−76581
multipath fading channel, two-ray model, coherent detection of MSK 87−3088
multipath propag., spread spectrum techniques 86−11003
multipath propagation, wideband modelling, stochastical approach 86−36723
mobile radio systems continued
multipath propagation effects, UHF wideband statistical model and digital simulation 85−57996
multipath propagation in direct sequence spread spectrum systems, tracking error reduction *(Japanese)* 86−69661
multipath radio propagation, effects of delay spread on timing recovery 88−28650
multipath signals effect on mobile/personal satellite communications, digital modulation digital simulation 87−13645
multipath time delay jitter measured at 850 MHz in the portable radio environment 87−69929
multiple air interfaces for personal telecommunications 88−73817
multiple trellis coded modulation (MTCM) performance on a fading mobile satellite channel 88−45866
multiple-access communication system usingfrequency-time-hopped multilevel FSK *(Japanese)* 86−10601
multiple-tone selective call decoders 86−30657
multiterminal cordless telephone system *(Japanese)* 88−21826
mutually correlated multipath fading waves, generation technique to simulate land mobile radio reception *(Japanese)* 88−72553
narrow-band digital FM transmission with diversity reception at 1.45 GHz carrier freq. 88−53171
narrowband, realization of a noncoherent CPM-demodulator with digital signal processing 87−48963
narrowband analog transmission *(Japanese)* 86−69643
narrowband coherent data transmission in mobile environment 87−69968
narrowband digital modems for land mobile radio 88−28712
narrowband fading channels, flexible digital simulator, design 87−56016
narrowband FM receiver, delay-flat IF filter design for mobile radio communication *(Japanese)* 87−40764
narrowband MCA system, devel. 88−60044
narrowband mobile radio channels, digital speech transmission *(German)* 86−23747
narrowband mobile radio service in Europe *(German)* 87−69930
narrowband modulation methods for land mobile radio 86−30662
narrowband packet radio, distributed approach, system design 87−8208
narrowband TDMA mobile radio system, burst transients 88−67244
nation-wide automobile telephone service using new tracking exchange technology 85−47448
nationwide radio paging system, development *(Japanese)* 88−21987
naval battle force readiness communications 86−55217
naval communication, evolution *(French)* 87−40759
NB-TDMA mobile radio link, performance of DPM, Viterbi equalisation and channel coding 88−15385
NEC high capacity radio paging system, development *(Japanese)* 88−21986
NEC paging information management system *(Japanese)* 88−21989
NEC power amplifier for personal radio *(Japanese)* 86−781
NEC radio pager, design *(Japanese)* 88−21990
NEC radio paging transmitter, development *(Japanese)* 88−21988
NEC small-to-medium capacity paging system, development *(Japanese)* 88−21985
nested channel method for voice and data communications 86−37802
Netherlands car telephone system, 3rd generation European System 85−52286
network control system, RANCOS, operation 87−13593
network design using set theory 88−21991
network of radioelectronic facilities for mobile objects 87−13612
network planning, models, methods and tools, review 87−69964
network planning and spectrum efficiency 86−23211
network structure *(Polish)* 87−76587
networks, automobile systems *(Japanese)* 88−41559
networks, conf. London, UK (March 1988) 88−43604
new locator system for Europe 85−14144

Pinpoint vehicle location system using two-way radio from British Telecom 86−64875
Plessey (800 MHz) Logic Trunk Radio System 88−3887
PLL-FM modulator, reference freq. switched, config. and charact., mobile transceiver appls. *(Japanese)* 87−37077
plug-in multipath noise filter for FM car radio *(Japanese)* 87−10959
pocket receivers, survey *(German)* 88−35391
police activities, use of mobile communications *(Japanese)* 86−69640
portable combat radios, new capabilities 86−69623

mobile radio systems continued
portable communications, digital, universal system, applied research perspective 87−28439
portable communications environment, delay spread effects on digital modulations 88−8672
portable communications environment polarisation diversity 86−55208
portable radio, digital, multipath time delay spread 87−62848
portable radio, macroscopic diversity performance 88−46922
portable radio channel, diversity selection using convolutional coding 88−46936
portable radio communications, Rayleigh distributed multipath fading effects on carrier recovery perform. 87−3090
portable radio environment, delay spread effects 88−46937
portable radio equipment, batteries 86−33586
portable radio system, diversity selection using coding 88−9457
portable radio systems, noise limited environment, user access 88−3880
portable radio telephone systems, service availability location probability estimation 88−73843
portable radios, EMI source detection 87−68819
portable telecommunication equipment, commercial battery systems and rechargeable batteries 86−33588
portable VHF transceiver develop., systematic approach 88−67280
PORTATEL cordless telephone, 900 MHz link *(French)* 88−3695
positioning systems *(Swedish)* 85−52420
postdetection diversity using a modified phase-correction loop for digital and mobile radio 87−27140
power delay profiles measured in mountainous terrain 88−72557
power system appls. of mobile radio voice and data transmission 86−49490
power utility, mobile radio communications controller applications 85−57984
PRCS, consumer-oriented mobile radiotelephone 85−36954
prescaler, 1 GHz band GaAs, dissipation current reduction 86−57706
printers appl. 85−20060
Private Advanced Radio Service (PARS), development 88−46952
private and cellular mobile radio data protocols 86−23777
private land mobile radio services, sharing of UHF TV band 87−76607
private mobile networks, VHF, adaptive slow frequency-hopping system use 85−58001
Private Mobile Radio, Band III 88−28700
private mobile radio, frequency assignment, problems and solns. 88−67253
private mobile radio, trunked, for London 87−48924
private mobile radio system, trunked, in UK Band III, signalling standard, protocol aspects 87−56003
private mobile radio using trunking technology, VHF Band III 88−46921
private mobile two-way radio, features *(German)* 88−9433
private networks, channels trunking 85−52285
private paging system 87−48940
PRODAT system architecture, satellite based mobile communication system 87−13665
production testing with mobile radio test sets 87−20838
programmable CMOS analog signal processor for mobile radio system 87−62861
programmable devices, industrial and organisational possibilities *(German)* 86−23748
programmable features and the mobile radio user 86−55205
propagation, unifying expression of environmental structure effect 86−69690
propagation and interference in land mobile systemsdesign 86−30661
propagation characteristics, 800 MHz, comparison of prediction methods 86−43750
propagation field strength prediction techniques 86−48594
propagation in urban environment, conf., London, England (April 1986) 86−45945
propagation loss charact. over sea path at 250 MHz band *(Japanese)* 88−45700
propagation loss prediction, diffraction losses stabilised estimation 86−17251
propagation of mobile radio signals, in Auckland, New Zealand, at 851 MHz 87−13604
propagation study, reminiscences *(Japanese)* 85−36947
propagation time delay jitter meas., portable radio environment 87−54560
PROSAT, future appls. of mobile communication by satellite 85−47492
protective multiple earthing for public mobile radio base stations 88−28746
pseudo SAW resonator for UHF range VCO 86−15321
pseudo-coherent demodulation of MSK type signalsadapted to frequency hopping transmission *(French)* 86−48749
PSK trellis codes for mobile satellite communications 88−2930
Ptarmigan: deployment within British Army, conf., London, England (Nov. 1985) 86−45950
Ptarmigan: development from Triffid and Bruin systems 86−49499
Ptarmigan: encryption provided by Marconi 86−49498
Ptarmigan: evolution as data bearer 86−49500
Ptarmigan: introduction into service with British Army of the Rhine 86−49496
Ptarmigan: operational concepts and interoperability 86−49497
Ptarmigan: outline system description 86−49495
Ptarmigan, common carrier digital mobile radio communication system for battlefield use 86−23706
ptarmigan interoperability with allied trunk systems 88−60043
Ptarmigan tactical mobile access system for British Army 86−30683
public and commercial services, outlook *(Japanese)* 86−69635
public mobile radiotelephone service in Hong Kong 85−63244
public mobile service control 85−47450
public radiotelephone systems, narrowband time multiplex transmission procedure *(German)* 86−23735
public services, market aspects *(German)* 86−64878
public switched telephone network and switching techniques, interworking *(Japanese)* 86−69323
QAM mobile data system using fading correction, implementation 88−73819
QPSK signal in nonlinear channel in digital shipborne Earth station system, performance *(Japanese)* 86−11036
QPSK system, novel coded, bit error performance 86−48783
quasi-synchronous radiotelephone networks, props. 88−21528
Racal-Tacticom Caracal hand-held military frequency-hopping radio 88−21977
radiation-supported space mirror 85−57969
radio alarm systems for security of personnel 88−41555
radio alarms in the mobile radio environment 85−39504
radio channel meas. and future predictions 88−28695

mobile radio systems continued
radio channels, generalised tamed FM with discriminator detection, anal. 87−39606
radio communication system for hydroelectric power station *(Chinese)* 88−60021
radio data system receiver 88−35654
radio link for push-button signal boxes *(German)* 87−76208
radio paging, cost and market potential 88−60048
radio paging, systems and suppliers 88−3857
radio paging system with high capacity, development 87−48941
radio propagation environment for universal digital portable communications 87−26789
radio propagation studies in a small city for universal portable communications 88−72556
radio receivers, book 88−69987
radio receivers, modulation and channel coding schemes 88−14849
radio-electrical problems in mobile radio systems *(Italian)* 87−33443
radiocommunications test set appls. 87−8182
Radiodata, FM sound broadcasting service *(Italian)* 85−58305
radiodetermination satellite service, international regulatory recognition 86−49527
radiopaging, CCIR Code No.1 for message display 85−57274
radiopaging, cost effective alternative to cellular radio 88−67272
radiopaging, perform. evaluation of codes 86−69675
radiopaging receiver for Pocket Bell service in Japan 86−30670
radiopaging system design, CCIR code no.1 appl. 86−4541
radiopaging systems 86−10994
radiopaging systems, technology and appls. *(French)* 87−48960
radiopaging using the INMARSAT MARECS-B2 satellite 88−41540
radiophone switching and signalling 86−10924
radiotelephone as mass communication medium *(German)* 86−23709
radiotelephone equipment for vehicle or handheld use for Mitsubishi Electric *(Japanese)* 87−40747
radiotelephone service, digital transmission methods *(German)* 86−23711
radiotelephones, automated message services 86−23769
radiotelephones, hand-held units, 3-D modelling of cochannel reuse relationships 86−4523
radiotelephones, spectrum efficiency improvements 85−20104
radiotelephony, mobile message handling 86−30249
radiotelephony and mobile radio systems, overview *(German)* 86−30675
railway bus service in Westphalia, large-scale utilisation of radio; implementation and operation *(German)* 86−49487
railway radio systems, trends *(Japanese)* 88−3860
railway shunting with radio telecontrol system *(German)* 85−60498
railway signalling from track circuit, evolution of electronics 86−4548
railways, communications to and on high speed trains *(German)* 87−62855
railways, radio systems for voice and data communication, economical freq. use *(German)* 85−25776
RAMAGE, a private mobile radiotelephone network *(French)* 87−13286
RANCOS 21/31 control systems for mobile radio networks 87−13594
Rancos operating system for Swiss postal coach service radiotelephone network *(German)* 86−55220
random FM noise with selection combining 88−58843
random FM noise with selection combining 88−58843
rate-compatible punctured convolutional codes for digital mobile radio, perform. 88−72770
Rayleigh fading environment, switched diversity perform. 85−30926
Rayleigh fading mobile radio channel, perform. of orthogonal FDM/FM scheme for data transmission 86−69672
Rayleigh fast fading channel simulator 87−69986
RBS 901 radio base station for the Nordic Mobile Telephone system 88−3875
RDS, Radio Data System, for AR1 traffic information *(German)* 88−41793
RDS radio data system receiver for traffic broadcasts *(German)* 87−34434
RDS USW radio receivers with transmitter identification *(German)* 88−9420
real time programmable land mobile channel simulator 87−3084
receive IF filter compensation 88−35402
received signal freq. stabilised synthesizer for mobile radio unit; implementation and performance study *(Japanese)* 88−41570
receiver acts. realization using monolithic ICs *(Czech)* 85−8326
receiver distribution systems, signal dividers design 85−63581
receivers, IC components NE 602/4 *(German)* 87−69918
receivers, large signal behaviour and performance criteria *(German)* 85−14135
receivers/transmitters, mobile-radio methods take account of new technology 88−41561
receiving system for practical surveys of mobileradio reception 86−64889
rechargeable batteries for portable telecommunication equipment, conf., London, England (Dec. 1985) 86−26513
rectangular tunnel containing trains, waveguide and using finite element method 87−13616
rectifier for mobile telephone systems 86−45523
Reed-Solomon codes over fading dispersive channels 88−72773
reference-based modems 86−49363
regular-pulse excited linear predictive codec for digital mobile telephone system 88−67144
regulatory control of land mobile radio 86−10995
remote base station hybrid power generator, photovoltaics and thermoelectric 88−5600
remote UHF repeater, solar-powered 85−65179
repeater using continuous tone coded squelch system 85−63543
repeaters, microprocessor based controller for a voice communication receiver 87−28436
repetition coding advantages 87−3077
reservation TDMA protocol anal. 85−58023
residual-excited LPC with vector quantisation, digitisation of mobile radio 88−66312
RF intermodulation interference probabilities in the cellular radio frequency bands 85−2611
RF power transistors for mobile radio systems, reliability evaluation 87−23434
RF power transistors for mobile-radio systems, reliability 87−6662
RF propag. path-loss prediction model for military mobile access 86−29393
rF propagation in tunnels 87−20408
RF safety standards evolution; impact on mobile and portable transmitters 86−69663
RF signalling facilities 87−48922
RITA system, radiotelephone subsystem, technical solution 86−30684

mobile radio systems continued
RK-1−short-wave radio station for the railway communication system 'Transport' of the USSR *(German)* 87−56007
road guided waves, propagation anal., ray method 86−68777
road traffic organisation in Croatia, introduction of radio communication *(Croatian)* 87−13617
road vehicle monitoring system, computerised config. with radio communication for centralised management *(Japanese)* 85−30935
road vehicle route guidance systems design 85−36779
road vehicles, satellite communication appl. 87−49013
roadside radio system for broadcasting onexpressway 86−4538
Rohde & Schwarz mobile radio-surveillance and radiolocation systems 88−53387
Rohde & Schwarz test system for mobile field-strength recording 87−56779
RPS 80 from Ericsson, sophisticated police mobile radio system 87−55997
RZ SSB receivers using improved lineariser 87−69976
S900D narrowband TDM method for public radiotelephone system *(German)* 86−69614
S-ALDHA multi hop networks, throughput and delay 88−41577
S/N ratio formula for FM and AM signals under Rayleigh fading 87−68782
Santec ST-20T 2 m band hand-held transceiver 87−69913
Satcom system for US Navy 85−25782
satcom terminals, miniature portable systems 87−28545
satellite, average waiting time for accessing batch-processing dispatcher 88−67250
satellite, digital modulation, computer simulation 85−57211
satellite ACSSB modulation, co- and adjacent channel protection requirements 88−73837
satellite based land mobile radio system, channel study and transmission procedures *(German)* 86−23736
satellite channels, fading compensation, forward error correction 87−34484
satellite channels, time diversity using trellis coded modulations 88−46981
satellite communication, binary multi-h modulation for fast fading shadowed channels 87−70020
satellite communication, CDMA vs. FDMA channel capacity 88−53210
satellite communication systems, error rate monitoring and correction study *(Japanese)* 87−3139
satellite communications, channel simulation for research facilitation 87−34485
satellite communications, conf., London, England (Apr. '85) 85−44412
satellite communications, demand assignment 85−42545
satellite communications, four receivers, digital implementations comparison, BPSK, DPSK and SS modulations 85−47493
satellite communications, L-band phased array antenna charact. 87−70015
satellite communications, modulation and voice coding 87−13670
satellite communications, speech coders, design and eval. 88−41586
satellite communications for aircraft 86−49564
satellite communications in 1990s, international overview 88−3922
satellite communications with small mobile earth possibilities 85−52307
satellite expt. using hardware simulator 86−4609
satellite fading channel, communications by vocoder 86−4566
satellite fading channel, communications by vocoder 86−23826
satellite links, combined FEC/ARQ data transmission 87−49007
satellite links branch out−diversifying space communications 87−48981
satellite mobile communication, error correction with interleave study *(Japanese)* 87−49004
satellite mobile communications in Europe, ESA projects and French LOCSTAR system *(Spanish)* 88−60092
satellite mobile Earth stations appls. Canadian experience 86−59867
satellite on-board processing for mobile communications 85−47496
satellite propagation, measurement and modelling 88−66066
satellite propagation data management system 87−70013
satellite receiver, dual pilot tone calibration technique for multipath fading reduction 87−3133
satellite serves for mobile communication 87−13622
satellite service, terrain shadowing severity assessment 86−55239
satellite service appls. in Alaska 86−59800
satellite service developments and benefits 86−23823
satellite service requirements 85−58033
satellite services, search for potential users 87−13653
satellite services, transmission freqs., elliptical orbit considerations and payload requirements 88−3904
satellite services in USA and Canada, plans, status and spectrum allocation aspects 87−28525
satellite sound broadcasting around 1GHz, technical factors 85−37173
satellite system, antenna pointing accuracy importance on max. number of available users 85−14197
satellite systems, discrete multipath effect on signal reception for MSK and GMSK 87−70019
satellite technologies, research and development opportunities in Australia 87−76711
satellite-link channel-simulation facility for mobile communications 86−32426
Saudi Arabian Automatic Mobile Telephone Service expansion 85−25313
SAW filter, multitransducer struct., for use in mobile telephone equipment 87−6966
scanning checking bleeper, for car ham radio 86−37758
Scimitar H, combat radio of the 80s 85−42477
SCOT, shipborne satellite communication terminal from Royal Navy, enhancement program 85−47494
SCPC satellite, demand assignment system design 86−17342
SEA-RL coding for document transmission to mobile radios 88−28749
Secom mine rescue radio, application for vehicle control and shaft inspection 85−42497
second generation mobile spectrum monitoring system 86−17279
selective personal radio communication system *(Hungarian)* 86−64883
separated-split-phase FSK, time diversity effect 86−69699
service area estimation using topographical database 86−69691
service industries, expectations *(Japanese)* 86−69655
services, conf., Munich, Germany (Nov. '85) 86−19712
services (1987-1996) interaction, competing or complementary 88−60059
services in the year 2000 and beyond 88−35421
services in UK, review 88−53170
Sfurd system, urban radio call service *(German)* 88−35393
ShackMaster amateur radio station controller capabilities 86−10978
shared systems are private mobile radio's future 88−35411
SHARP, Stationary High Altitude Relay Platform, for telecommunication service provision 86−55223
Sharp radio paging system, development *(Japanese)* 88−15367

mobile radio systems continued
Shinkansen train radio system renovation 86−59791
ship-shore packet switched communications 88−21690
shipboard exterior communication design anal., extension to wideband systems 86−30679
shipborne antenna structure, complex, far field radiation anal. 86−68865
ships, integrated on-board computer system and datacommunication *(Japanese)* 86−69714
ships, simultaneous HF transmission and reception *(French)* 88−9446
Siemens 900 MHz cordless telephone *(German)* 88−9419
Siemens TBB 200 CMOS PLL chip for 900 MHz transmitter equipment *(German)* 88−32295
sigma delta A/D-converter for mobile telephoneapplications 87−813
signal distortion caused by frequency selective fading, anal., model and simulation *(German)* 87−13607
signal processing for narrowband packet radio 87−8209
signal techniques for the light infantry 87−76598
signal transfer point system, large capacity, design *(Japanese)* 87−28282
signalling devices, selective call, tone squelch and digital signalling 85−58022
signalling system for industrial piece-production process control appl. *(Czech)* 85−51997
signals used in mobile communication systems, review 87−28419
simulation model of a mobile radio channel and its application to data transmission *(German)* 87−20421
simulcasting technique and interference prediction 86−10980
SINCGARS, new generation combat net radio system 88−3878
SINCGARS second source, suppliers selection 88−35388
single cell trunked and cellular mobile radio systems, spectrum efficiency anal. 88−28703
single sideband 942 MHz mobile radio system for speech and data communication 85−36939
SINTAC system, flight test programme *(French)* 87−39406
Skylink mobile satellite service, 806-902 MHz, system config. using multiaccess techniques 85−14157
Skylink mobile satellite system 85−63627
Skytrain operations and maintenance radio system 88−3890
slotted ALOHA networks anal., Markov model 85−3369
smart spectrum analyzer MS612A for mobile radio *(Japanese)* 86−50007
SMPS, 12 V, for mobile transceiver 86−14004
SMT assembly of mobile radio production 88−12808
software simulation for MSK and RC modulation schemes in time- and frequency-selective mobile radio channels 88−72731
space and terrestrial systems in the digital network evolution 87−33981
space radio services and WARC-MOB-87 88−53393
Space Shuttle communications and tracking system 87−40865
Space Station communications and tracking system 87−40866
space-time diversity reception 86−37772
spatial selection of multiplicative noise in portable radio communications networks 87−69940
spatial-reuse TDMA/FDMA for mobile multi-hop radionetworks 86−11001
speaker-independent voice recognition scheme for mobile telephone voice dialling 87−69076
specialised mobile radio trunking system versus cellular mobile telephone, comparison of features and pros and cons 85−63591
spectrum requirements, technology impact 88−35420
spectrum sharing between mobile radio and television 85−20095
spectrum utilisation, effective techniques *(Japanese)* 86−69652
spectrum utilisation, international dimension 88−34966
spectrum utilisation, status and trends *(Japanese)* 86−69651
speech codec for digital mobile radio, bit reduction *(German)* 87−34436
speech codecs for digital mobile radio, comparison 88−67258
speech coder for digital mobile radio, linear predictive analysis, VLSI implementation 88−40880
speech coders, quality assessment 88−41547
speech coders for mobile radio, quality assessment 88−46763
speech codes for mobile telephone systems *(Norwegian)* 88−14646
speech coding for the mobile satellite experiment 88−2999
speech digitisation with lower bit rate *(German)* 86−23746
speech encoding technique for low bit rate coding applicable to naval communications *(French)* 87−39817
speech enhancement techniques for mobile radio terminal appls., performance anal. 87−47574
speech performance comparison for same BERs in FDMA and CD900 systems 88−15387
speech scrambling, single chip LSI use in cellular and land mobile radio 87−12959
speech scrambling single chip LSI for cellular and land mobile radio 86−69689
speech synthesis application in critical care medicine 87−61810
speech transmission, digitised, through VHF FM repeaters 86−69688
spread spectrum channel, throughput anal. for code division multiple accessing 85−2913
spread spectrum frequency hopped MFSK communication system, multiple tone interferers effect 86−37766
spread spectrum systems, appls. 86−30674
spread-spectrum mobile radio communications, direct sequence and frequency hopping *(Japanese)* 86−69645
SSB mobile radio development for use with satellites 85−63576
SSB transparent tone-in-band techniques for mobile data communication 85−57214
SSFH band mobile communication equipment, performance and configuration *(Japanese)* 85−25775
standardisation, current systems and developments forecast 86−17241
STARNET Band III trunked radio system 88−46947
Starphone pocket phone from STC 86−59793
Starsat from Omninet, advanced mobile satellite communications system design 86−4608
station location, automatic position determ. techniques, VHF/UHF propag. aspects *(German)* 85−52280
stations for radio telephone systems 86−43760
statistical modeling of a mobile radio channel 87−3087
statistical-empirical interference prediction modelfor tactical land-mobile communication over a limitedgeographical area 85−62821
stepped-impedance resonator band-pass filter appl. 88−56877
stochastic Rician fading process, autocorrelation function evaluation 86−42842
sub-band speech encoder for digital mobile radio appl., design and performance eval. 87−48962

mobile radio systems continued
subband and regular pulse excited coders, appl. to mobile communications 88−27822
subband coding, use of error control coding and antenna diversity 88−72772
subband speech coding and matched channel coding for mobile radio channels 88−72771
submarine multifunction antenna, description and operation 85−41734
subscriber device innovation, rationalisation and technical demands *(German)* 86−23745
subscriber networks, 25-1000 MHz, automatic control system *(French)* 87−8195
subscriber radio system trends 88−21975
survivable packet radio network control algorithm, design 86−30685
Suzuki fading process, simulation and analysis 88−73031
SW radio data transmission equipment for marine applications 86−10983
Swedish mountain radio system 85−52287
Swiss public telecommunications networks, digitisation aspects *(German)* 87−13213
switched-diversity 64 kb/s FSK receiver in freq.-selective Rayleigh fading 85−3367
switching diversity technique using carrier-jitter sensor 85−30941
Switzerland trains telephone service *(German, French)* 88−67259
System 4 automatic radiophone 87−55987
system architecture and management of advancedregional satellites for land mobile application 86−55268
T-SAT communication satellite payload for mobile services 86−69731
TACS, UK national radio system, signalling capacity anal. 85−63562
tactical AJ modem, rapid acquisition/reacquisition capability 87−40770
tactical digital facsimile for battlefield command & control 88−41263
tactical land mobile radio services, semi-empirical interference prediction model 85−63572
tactical land-mobile radio environment, interference probability computation 86−30676
tactical mobile radiocommunications of Belgian army, speech spectrum systems *(Flemish)* 88−9445
tactical radio environment, parameter sensitive interference prediction model 87−28434
tactical radiocommunication for Belgian Army *(Dutch)* 88−35408
TADCOM mobile radio system for defence communications for Norwegian army *(Norwegian)* 88−15357
TDMA appls., bandwidth efficient DPSK 88−66276
TDMA experimental mobile radio link 88−73827

terrestrial mobile radio, technical problems 87−27882
terrestrial radio spectrum management tools, conf., London, UK (May 1988) 88−55844
testing of PCs, final test procedures 86−30665
Thomson-CSF equipment for Malaysian Army 86−43761
time diversity modulation strategy for the satellite-mobile channel 88−45838
time modulation scheme for digitally encoded network communications, aircraft collision avoidance appls. 87−54836
TM 400 mobile microwave links, review 87−3056
TMS32010 2400 BPS modem implementation for mobile satellite appls. 88−41573
TMS3 2010-based ACSSB modem for mobile satellite applications 88−46790
token passing mobile networks, updating interval of round robin sequence determ. 86−4539
tone calibrated technique fading channel radio system, laboratory meas. 87−28441
tone decoding using a microprocessor 87−48928
track to train mobile radio communication system for Swiss Federal Railways 88−35385
traffic control using mobile remote radio generated equipment *(German)* 86−69656
train control system, advanced, using mobile radio data links *(French)* 87−79095
train radio installations using common-freq. transmitters, setting and meas. procedures *(German)* 86−10987
train radio on German Federal Railways, equipment updating considerations *(German)* 86−55218
train-ground radio with data transmission *(French)* 87−34452
train-radio in Brazil, network arrangements *(German)* 86−55219
trains and obstacles effect on cutoff frequency and field in arched tunnel as waveguide 85−42502
transfer function measurement as a characterization of the urban mobile radio channel 87−47208
transmission reliability of characters, computation *(German)* 88−28718
transmission trunked mobile radio 86−55201
transmitter identification in the Berlin car radio *(German)* 86−69616
transportable digital microwave radio-relay system foremergency operation−11P-12M 86−4504
Transportation electronics, conf., Dearborn, Michigan, USA (Oct. 1984) 85−63246

mobile radio systems continued
transportation radio systems, multibeam channels, statistical parameters of broadband signals 88−35397
trellis coded multilevel DPSK on fading mobile satellite channel, performance 88−2931
trellis decoding of linear block codes in digital mobile radio 88−72767
trellis decoding of linear block codes in mobile data transmission *(Japanese)* 88−21997
trellis decoding of linear block codes in mobile data transmission, simplified algorithms *(Japanese)* 88−21998
truck systems, appl. of satellite communications 87−13663
truckers use onboard data terminals 86−69620
trunk-mounted mobile equipment, thermal perform. 87−76620
trunked land mobile radio, microcomputer controlled, spectrum conservation 85−14130
trunked mobile dispatch system, shared service algorithm 87−20419
trunked mobile radio, efficient systems, design consideration 85−63574
trunked mobile radio in Band III for business users 87−20412
trunked mobile system, key states approach in anal. of traffic control strategies 87−69954
trunked radio for airport ground communications 86−49504
trunked radio for airport ground communications 86−4496
trunked radio systems, 800 MHz, integrating secure speech communications 87−69974
trunked radio systems, design considerations 87−3081
trunked radio systems, loading considerations for public safety dispatch 87−69952
trunking and interworking 86−10605
trunking system, rapid access protocol 85−20089
trunking system RF spectrum occupancy meas. 88−3883
tunnel with cross-junction, EM wave excitation/propag. study 87−75438
tunnels, ground to vehicle data communications using natural microwave propag. 87−69957
tunnels, radiation pattern calcs. 88−2586
TV, mobile reception, picture impairments due to multipath propagation 86−4831
TV Band III planning 86−17277
two meter system, design 88−41533
two-tone sequential encoder, radiopaging 88−60020
two-way interconnection with public switched telephone network 86−30659
TWT linearised L-band 200 watt amplifier 85−58082
UHF band mobile radio propag., polarisation charactS., expt. study *(Japanese)* 88−35416
UHF band mobile radio propag. charactS. in residential area for low antenna height base station *(Japanese)* 88−21995
UHF channels, data transmission 85−14138
UHF factory radio channel, charactn. 87−75424
UHF field strength meas., effect of buildings and vegetation *(German)* 86−23722
UHF high-power satcom amplifier for mobile radio appls. 86−17254
UHF link propag. charactS. for low antenna height base stations 86−48590
UHF mobile communications, digitally processes multimode modulation/demodulation system for narrowband voice signals 85−30942
UHF mobile radio, decision feedback and Viterbi equalizers 88−28738
UHF mobile radio, field strength measurement system 86−43765
UHF mobile radio at 500 MHz, propagation 85−57994
UHF mobile radio channels, wideband, characterisation 88−15382
UHF multipath propag. simulation 85−24851
UHF pilot-tone SSB mobile radio networks, feedforward signal regeneration 85−58024
UHF SATCOM architecture for tactical mobile radio 86−59860
UHF satellite to land mobile communication, propagation theory and meas. 85−63585
UHF terrestrial mobile radio channel, meas. and modelling 86−37798
uHF-band radio propagation characteristics in built up areas for land mobile system using low antenna height base station *(Japanese)* 87−69947
UHF-VHF airborne radio-surveillance system 88−35405
UHF/TDM communication link for Worldwide Airborne Command Post system, feasibility study 85−8334
UK Band I radio spectrum, services implementation, investigative study 86−37784
UK development prospects 86−23763
UK land mobile tactical satellite communications 87−13599
UK mobile radio options 87−13602
UK nationalised power industries use of mobile services 85−63571
UK radio spectrum management, new approach 88−60362
UK trunking system signalling standard, protocol aspects 86−37787
UK VHF cordless phone service, interference from European TV transmitters 85−20098
Ultraphone digital radio system with voice/data communication for Fixed and mobile user 86−17240
ultrashort-wave charactS. in urban conditions 86−37771
UMN, unified multinetwork packet radio system of US Navy, distributed dynamic routing algorithm *(Portuguese)* 87−76184
UMN, unified multinetwork packet radio system of US Navy error control schemes *(Portuguese)* 87−76624
uncorrelated antenna signals 86−69694
underground mine vehicles MF control and communication systems 85−3388
underground radio communications improvement and use of RF simulcast networks in rapid transit operations 86−4546
underground railway telecommunication systems 86−43734
uni-directional satellite paging system for land mobile users 88−53214
Uniden 800 MHz product line 85−63539
United States national radio paging system 88−35407
units miniaturization and LSI appls. *(Japanese)* 86−69648
universal dig. portable radio communications, macroscopic diversity and freq. reuse 87−27703
universal digital portable communications: a system perspective 87−69921
universal digital portable radio communications 87−48943
universal digital portable radio communications, RF performance of macroscopic diversity signal strength 86−55227
Universal Mobile Telecom. System concept 88−15368
universal portable radio communications 86−37764
urban areas, wave propagation charactS. in groove guides 88−34293
urban mobile radio, charactS. of antenna pattern diversity branches *(Japanese)* 87−8206
urban mobile radio, four-branch antenna pattern diversity reception 86−69695
urban mobile radio channel, Rayleigh fading, limits of data rates 87−69983

mobile radio systems continued
urban mobile radio channel delay-Doppler responses, physical optics estimation 88−21965
urban mobile radio channels, data exchange 86−37773
urban mobile radio environment, spread spectrum communications using diversity 88−15386
urban mobile radio propag., fast-fading charactn. at 855 MHz 86−3505
urban mobile radio systems, propag. charactS. study of EM waves in groove guides *(Japanese)* 87−7539
urban mobile radiocommunication, effects of directive antenna radiation pattern on multipath fading *(Japanese)* 85−47442
urban radio, propagation factors controlling mean field strength 85−7638
urban railway communications technology, Zurich *(German)* 87−43560
US Army subscriber equipment network, routing algorithms 87−40773
USA mobile satellite aviation services in 1545-1559/1646.5-1660.5 MHz band 87−13661
USA mobile satellite service 87−13672
USA mobile satellite system, integrated voice and data protocol 88−9497
USW charactS. under urban conditions 86−37763
VCO, unlock error correction, phase ramp extraction *(Spanish)* 87−69991
vehicle identification, automatic, technology and appls. 86−4547
vehicle paging and receiver, development 85−36929
vehicle radio position reporting technique, safety from interception and positioning, nuclear safeguards appl. 88−41579
vehicle radio system 88−3889
vehicle rear-window heater aerials, broadcast reception and mobile radio communication 86−64105
vehicular communications technology, conf., Philadelphia, PA, USA (June 1988) 88−69998
vehicular positioning system, operational, case study of high technology systems 86−4542
vehicular technology, conf., Dallas, USA (May 1986) 86−66535
vehicular technology, conf., Tampa, FL, USA (June 1987) 87−65070
vertical patterns of mobile antenna at UHFfrequencies 86−4530
very low speed message communication system using hand-held earth station 88−3936
VHF band, mobile-service designing methods 87−20407
VHF car radio reception improvement space and antenna diversity appl. *(German)* 87−20414
VHF FM mobile radio, Marconi RC640 87−8180
VHF marine radio *(German)* 88−60036
VHF maritime and inland waterways service in France, automation 86−59795
VHF microwave link for long distance mobile communication, microprocessor-controlled repeater stations 85−8324
VHF mobile radio, SSB modulation considerations for easing freq. congestion 86−43739
VHF mobile radio propag. prediction models 88−27517
VHF mobile radio propagation in urban areas 86−37797
VHF pagers, use of RF narrowband double mode SAW filters 86−59790
VHF radio paging receiver, high technology 85−63556
VHF radio station FM-300 of system DRS-3 *(Russian)* 85−20064
VHF reception in moving vehicles in motorway tunnels *(German)* 88−67546
VHF SSB mobile radio links, speech actuated AGC *(Spanish)* 87−69990
VHF-UHF mobile wideband Doppler direction-finder PA 555, description 86−30903
VHF/FM antenna-diversity reception in motor vehicles, efficiency *(German)* 88−9447
VHF/UHF mobile reception in urban areas, prediction models 87−47206
VHF/UHF radiotelephone networks, speech communications recording 88−21527
VHF/UHF radiotelephones for industrial processes control 86−64564
VHF/UHF radiowave propag. CharactS. for mobile communications in suburban areas 86−54295
village radio telecommunications system in Sierra Leone 88−60064
VLF, LF, HF receivers from thomson CSF/DTC *(French)* 87−41192
VLF/LF radio test system for testing receive communication systems 88−60063
vocoder in mobile satellite communications, configs. and performance 85−30954
voice activated dialling equipment for mobile telephones, speaker-dependent 88−73848
voice and data networking, UK national scale 88−46945
voice communication solutions for professional decision-makers 86−55212
voice scrambling for mobiles and interconnects 85−19323
voice-operated automobile telephone dialler incorporating digital speech recognition device 86−30467
VSAT mobile technology 87−76630
VSB modulation for high-speed data transmission over narrowband channels, SW mobile radio appl. *(German)* 86−48743
WARC, mobile telephone services *(Norwegian)* 88−15371
WARC for mobile services, preparations 87−48956
warehouse communication and control 85−63545
warning system technology *(German)* 85−52276
Weaver-based direct conversion SSB systems, fading correction circuits evaluation 86−37803
West German industrial locomotive with radio remote control *(German)* 85−60496
West Germany, mobile radio ccts. for public transport *(German)* 85−14145
wide area binary paging, signal formats 87−20411
wide area paging systems, bleepers, evaluation 86−4518
wide area radio paging 87−40741
wide-area binary paging 87−13603
wide-band packet radio for multipath environments 88−53181
wide-band packet radio technology, signal processing and network architecture design 87−34447
wideband digital cellular mobile systems, multipath effects combat, conf., London, UK (Oct. 1987) 88−11609
wideband measurements of the UHF mobile radio channel 87−47203
wideband mobile radio, channel simulator *(French)* 88−46928
wideband mobile radio channels, BER simulation, correlation with environmental parameters 87−76613
wideband radio channel, impulse response meas. for rural, residential and suburban areas 87−48933
wideband radio channel at 910 MHz, impulse response measurements from moving vehicle 86−37761
wideband TDMA signals reception in multipath environment 86−37795
wideband UHF multipath propag. modelling, environment-dependent approach 88−27515

mobile radio systems continued
windscreen antennas, active, for antenna diversity reception in motor vehicles *(German)* 87−75601
wireless network for wide-band indoor communications 87−69923
wireless paging system from IWP, new version *(Japanese)* 88−9437
Worldwide Airborne Command Post switching and intercommunication systems, config. and update requirements 85−8335
worldwide satellite services, standardisation *(German)* 88−41590
worldwide satellite-based communications, navigation and surveillance system 88−22008
yacht satellite communication systems 85−30973
Yaesu FT-727R hand-held transceiver for 144 and 440 MHz 87−48926
Yaesu FT-757 GX amateur radio transceiver, test report *(German)* 85−3379
GaAs 1 GHz prescaler *(Italian)* 87−48930
GaAs Sharp UHF broadband monolithic amplifiers *(Japanese)* 88−50386
GaAs devices for mobile communication equipment *(Japanese)* 88−21980
GaAs dual modulus 128/129 prescalar IC, 1 GHz for mobile communication systems 85−61345
GaAs two-modulus prescalar IC, 1 GHz, SCFL cct., hand-held mobile radio transceiver appl. *(Japanese)* 87−10814
Ni-Cd batteries for portable radios, life prolongation 88−62568
Ni-Cd hybrid sealed battery development for military manpack radio set 86−40058
Ni-Co battery for mobile telecommunication devices 88−43368

mobility, carrier *see carrier mobility*

MOCVD *see chemical vapour deposition*

model reference adaptive control systems
AC electric drive, adaptive regulator with reference model *(Slovak)* 87−78978
arc furnace, nonlinear three phase, model algorithmic control 85−5523
boiler combustion control, model reference adaptive algorithm 86−25883
coding, MRAC system *(Japanese)* 88−8714
current-fed induction motor speed control 88−69359
current-source invertor-fed induction motor control based on dual Luenberger observer 87−22372
DC motor, speed control using MRACS technique 88−75627
DC motor, thyristor driven, cascade adaptive speed control 86−66099
DC motor, thyristor driven, cascade adaptive speed control 88−23952
DC motor drives, variable speed, microprocessor-based using MRAC 87−51503
DC motor speed control, model algorithmic or predictive heuristic method 86−66100
DC motor speed controller, model reference adaptive control based system 86−6793
DC motor system, thyristor driven, with reson. loading model reference adaptive control 85−53719
DC motor with PWM drive cct., discrete-time MRAC approach *(Japanese)* 88−5927
DC motors, MRAC based armature current control in interrupted armature current mode 87−9573
DC servomotor, position control system *(Japanese)* 85−27450
DC servomotor efficiency optimised speed control *(Japanese)* 87−51230
flight trainer loading control, MRAC simulation study 88−16816
four-quadrant AC motor drive power factor improvement and pulse pattern optimisation 86−70910
hydroelectric generating equipment, MRAC *(Chinese)* 88−30633
hydroelectric generating set, microprocessor-based MRAC 88−17533
induction motor, secondary resistance identification using model reference adaptive system 87−9540
induction motor, speed regulation using model reference adaptive control 87−30562
induction motor, two-winding, driven by reference current adaptive invertor, two-phase operation characts. 85−21602
induction motor drive system, transvector controlled, optimal speed regulator using model reference adaptive control 86−51954
induction motor drives, field oriented controlled, reduction of dependence on parametric variations 86−33400
induction motor drives, model reference adaptive system for rotor resistance compensation 87−4988
induction motor drives, PI model reference adaptive controller 88−75975
induction motor MRACS, secondary resistance identification and its characts. 87−51204
induction motor secondary resistance identification using model reference adaptive system 86−39800
induction motors, invertor-fed, vector control using rotor speed identification and MRAC system 88−30723
interconnected power systems, robust decentralised load frequency regulator 85−64841
large disturbances effects, control of systems subject 85−5396
microalternator system for dynamic performance modelling 87−22276
microprocessor-based adjustable speed DC motor drivesusing model reference adaptive control 86−40212
model system for control of extremum states, use of complex-system data representation language *(Russian)* 86−39041
NASA's flexible grid experimental apparatus, decentralized control experiments 87−4074
NASA space station telerobot control system, standard reference model architecture 88−42601
noisy measurement system model, consistent structure determ. 85−37396
power system dynamic stability improvement, static VAr compensator design using MRAC system 88−23248
power unit boiler, combustion control, appl. of model reference adaptive algorithm 86−6581
quick response induction motor drive, rotor resistance variation, microcomputer based adaptive compensation 86−6775
servodrive, failure resistant design, structural redundancy approach 88−5914
signal encoding appls. 88−34714
synchronous generator model reference adaptive control simulation 87−30543
thyristor driven DC motors appl. 86−12847
turbogenerator appl. 85−64848
turbogenerator excitation controller design via exact model-following techniques 88−30661
unknown systems control via deconvolution 88−46124

modelling

1/f noise in metal contacts, granular resistors andthin film resistors 86−14562
2D adaptive gradient lattice algorithms, convergence properties 88−27880
2D noncausal blurring filters with image restoration appls., modelling and recursive state estimation 88−28026
3D EM fields of current-carrying conductors, modelling using ANSYS finite element program 87−26606
6-10 kV supply networks, reliability improvement, optimum resource distribution, math. model *(Russian)* 85−4546
110 kV transformer substation, strategic planning model *(German)* 87−15824
200 MW turbogenerator core and stator windings, thermal state, math. model 85−9828
300 MW power plant, air/flue gas flow and pressure models 85−27306
500 MW power plant, KRAB steady-state total plant modelling system appl. 85−60017
AC and DC transmission lines on same tower, simulation of interactions 85−15547
AC earthing problems, soln. and math. model 85−38548
AC generator universal mathematical model *(Russian)* 86−56712
acoustic emission waveforms, quantitative, predictive modelling 85−10888
alloy, high temp., quantification of development pot., S-shape model forecasting capability 86−33996
AM broadcast reradiation from buildings, numerical modelling and MF field strength meas. 86−48572
amperometric enzyme-substrate electrode with pO_2 basic sensor, math. simulation 88−74794
amperometric enzyme-substrate electrode with pO_2 basic sensor, math. simulation 88−74795
amplifier with modified feedback arrangement, nonlinear model and distortion reduction 85−17181
analogue and digital ccts., performance comparison, models 85−28287
angle tracking systems, polarisation depend. 85−63741
application specific IC design schedules, quantitative model 87−1643
arm movement tracking using computergraphic modelling/analysis 87−29279
ARMA spectral estimation, recursive modified instrumental variable methods 87−47774
ARMA stable reduced-order model construction 85−13544
asymmetrical differential amp., mathematical model 86−14026
asynchronous machine, eddy current starters, parameters determ. *(Polish)* 85−9893
asynchronous machine, polyphase, mathematical model, appl. *(Polish)* 85−9891
automated nondestructive active thermal inspection 85−471
automatic excitation control of power system asynchronous generators, mathematical model *(Rumanian)* 85−5080
automobile parts, thermoelastic stress analysis of plastic models 88−16513
autoregressive model order determ., relations between various criteria 86−10228
Bajina Basta reversible hydroelectric plant transient operation model *(Croatian)* 85−65174
balanced model reduction in time- and frequency-domain 86−62370
battery porous electrode impedance with axial conc. gradient 85−5360
binary information sources, Gilbert burst-noise channel model and encoding scheme *(Japanese)* 87−61587
bipolar devices, integral charge model using Gummel relations 86−15143
blast furnaces, kinetic-dynamic modelling and simulation *(German)* 85−49202
boiler, special purpose, transient modelling of operational upsets 85−21465
bond graph modelling, restrictions on constitutive laws and modulation 88−8678
bond graphing for model form. and design *(Dutch)* 88−11872
BWR systems, math. model development, Laguna Verde plant appl. 85−59970
capacitance RF hyperthermia, model for impedance determ. and power deposition charactn. 87−41985
capacitive RF hyperthermia, model for impedance determ. and power deposition charactn. 87−41984
centralised power supplies for forging equipment, operating modes determ., math. model *(Russian)* 85−16469
centralised power supplies to induction heating equipment, convertor substation stability, investigation *(Russian)* 85−16432
circuit modelling by numerical analytical method *(Russian)* 88−49942
circuit protection devices and networks, modelling 88−19908
circuits and systems, conf., Louisville, KY, USA (Aug. 1985) 86−57091
clinical engineering, maintenance model 85−59373
clinical engineering, model for standards use and development 87−63711
CMOS logic gates, timing model for charact. waveform 86−970
coaxial TEM deep-body hyperthermia applicator, 3D model 87−8941
cogeneration of power and heat, economic sizing model 85−48866
coherent lightwave communications, receiver modelling 87−49093
combined cycle power plants, computer calc. of frequency and duration models 85−59839
complex IC packages, 3D modelling 86−61944
complex measuring-computing system, potential possibilities analysis 85−37462
complex system reliability, maintainability, availability and testability, Markov models 86−263
component dependency models in Markov Monte Carlosimulation 86−251
composite materials, thermal quality control, parabolic eqns. of heat conduction 88−49903
compound channel models and modelling methods, random and burst errors *(Japanese)* 85−51531
computer system interruptions due to power supply disturbances, modelling and simulation 88−48539
conf., Pittsburgh, PA, USA (April 1985) 86−52121
conference on ccts. and systems, Kyoto, Japan (June 1985) 86−61839
connector/cable system, performance modelling, Teledeltos technique 85−11669
consumable electrode welding arc dynamic modelling 86−7326
convertor-fed synchronous motor drive, cross coupling saturation effect, math. model and simulation 85−27689
convertor-fed systems, control strategies and math. models *(Italian)* 85−16170
correction theory and algorithm for reachability matrix model *(Japanese)* 88−18544

modelling continued
crystal growth from vapour, surface processes, computer modelling 85−39692
crystal oscillators, frequency stability models and fractional reactance slopes 87−59242
CT methods use for nondestructive inspection under conditions of insufficient data 87−16736
Cuk convertor, modelling and anal. using discrete impulse the response method 86−34519
current transformer differential group interaction and transient process model *(Russian)* 86−6828
cylindrical targets, focused microwave heating 85−65621
DC field controlled electric machine, reduced order observer appl. to recursive state estimation 87−78691
DC machines, multiport dual model with gyrators 85−21644
DC motor, static convertor-fed, current regulation and speed control *(French)* 85−16044
DC series motor, chopper fed, transient response, dynamic modelling 87−58105
DC servo system, PWM motor control, linear model 85−27589
DC-DC resonant convertors for resonant switch mode power supplies, anal. and modelling 87−15910
DC-DC series resonant convertor, small-signal model 85−60308
decomposition method to solve problems onoptimization of physical devices on the basis of thesimilarity theory *(Russian)* 86−46426
degradation model for metallized polyester capacitors 87−37596
dielectric and magnetic materials, linear feedback modelling of polarisation and magnetisation 85−35287
diesel engine dynamic modelling *(French)* 87−35831
digital circuit power supply disturbances, effect on propag. delay, modelling and expt. study 87−16974
digital signal processing, modelling the quantisation error of arithmetics 87−55241
digital simulation, modelling techniques 87−36882
digital system design, noninterpreted propag.-delay-based model 87−17036
direct frequency convertor-induction motor system, math. model for performance evaluation *(Russian)* 85−5184
discrete-time multivariate point processes, estimation of rate 86−64162
discrimination information as the fidelity measure for modeling and filtering processes 87−55174
dual mode cavities, modelling of coupling by coaxial probes 88−70988
earthing systems, modelling using element aggregation 86−25637
eddy current coil impedance in crack vicinity 85−10879
eddy current data inversion and flaw reconstruction using multifrequencies 85−10881
eddy current flaw characteris., exptl. verification of inversion algorithm 85−10882
eddy current inspection capabilities, exptl. modelling technique 85−10874
eddy current phenomena, pulsed, finite element modelling 85−10877
eddy current probe impedance plane trajectories, Fourier descriptor classification 85−10880
eddy current probe with ferrite ore, model, development and verification 85−10885
eddy current response to subsurface cracks, estimation from two-dimens. finite element code 85−10878
eddy current signal calculations for surface breaking cracks 85−6095
eddy current signal computation and quantitative inversion with realistic probe models 85−10883
eddy current system, stat. detection model 85−6096
eddy current testing, computer model for objects near penetrable interface 85−10873
eddy current testing, finite element model for soln. of three-dimens. problems 85−10875
EEG sleep anal. method based on autoregressive modeling and cluster anal. 88−61373
EFOM-12C energy supply model, Mark I version, main features 85−32267
EHV overhead line safety, displacement current flowing through human body *(Russian)* 85−54094
elec. cct. with ideal switches 87−16844
electric current perturbation probe, model and optimisation problem 85−10884
electric discharge machining, pulse train props., stat. modelling *(Turkish)* 86−7332
electric fields from transmission lines and substations, effects on humans 85−38249
electric fuses, mathematical modelling of thermal processes 85−44115
electric lamps, dynamic models of electromagnetic compatibility *(Russian)* 85−44287
electric machine magnetic-bearing system, horizontal-shaft, system modelling and control design 86−66030
electric resistance furnace operation simulation using numerical modelling technique 87−79207
electric utility industry, policy anal., system dynamics approach 85−26927
electric ventricular assist device, regurgitation, performance effect and modelling 88−10441
electrical machines, conference, Lausanne, Switzerland (Sept. 1984) 87−35970
electrical machines for drives, mathematical models *(Italian)* 85−15971
electricity supply industry, residential load shape modeling based on customer behavior 85−59612
electroacoustic transducers for sound-powered telephone, bond graph modelling 87−35520
electromechanical convertor winding currents rel. to flux linkages *(Russian)* 88−5644
electromechanical systems, modelling, simulation and techno-economics *(Polish)* 86−19193
electron devices, large scale simulation for the tube design appls. 85−55357
electronic components, step-stress life tests functional models, statistical study 85−5803
electronic systems, organisational maintenance, modified state representation 86−40500
EM LF imaging, charact. scattered signal parameters, Rayleigh coeffs. 85−62760
emergency and standby power supplies, reliability evaluation 85−43573
emission filters for switched mode power supplies 86−20688
energy demand forecast in Japan, computer model *(Japanese)* 86−61989
energy planning, role of mathematical models *(Slovenian)* 87−57721
energy supply modelling package EFOM-12C Mark I, user's guide 85−32266
modelling continued
environmental issue development, Lawless and Molitor models validated 87−50577
EPRI Commercial Sector End-use Energy Demand Forecasting Model implementation guide 85−64869
EQUIPS interactive process modelling package, capabilities and design 88−57417
error analysis of the aggregation method, withapplication to the selection of reduced-order models 86−19971
errors, for meas. and estimation 85−37388
ESD-related hot spots, thermal anal., IC input protection device appl. 88−71814
exterior EM field problems, modelling, infinitesimal scaling 85−24703
ferrite core eddy current probe model 85−54555
ferromagnetic elements, principal component method for magnetic charact. 86−42103
ferromagnetic materials, hysteresis, math. model 85−7136
fibre optic sensor, market growth model 88−16149
fine arts painting anal., autoregressive models appl. 87−69338
fitting of parametric physical models, choice of criterion 85−37391
five-port symmetrical waveguide junction, EM model using least-squares boundary residual method 87−37504
flow meas. process analysis, time correlation method appl. 85−37804
fluxgate magnetometer sensor development, equiv. cct. model, design and automobile compass appl. *(Japanese)* 88−16451
fossil fuel power plant simulator, drum boiler model anal. 85−27307
fossil fuel power plant simulator, feedwater heater model, training appls. 85−27308
free electron lasers, short pulse type, transverse mode coupling 88−8242
frequency spectrum method for voltage mode PWM converters, modelling, digital simulation and anal. 86−45574
fuzzy implication operators, influence on accuracy of fuzzy model 85−39013
fuzzy model accuracy, influence of fuzzy implication operators 85−39012
gas blast circuit breakers, electric arc adaptive mathematical modelling methods 86−26200
gas-filled switch, numerical simulation of space charge controlled transport 85−5306
geo-graphic code representation of 3D objects from drawings 88−66667
geophysical EM prospecting, design of models for EM scale modelling 88−68610
Greek energy system, EFOM-12C/GRESOM model for evaluation of alternative scenarios 85−9571
grounding systems under steady-state conditions physical modelling accuracy *(Slovak)* 86−65764
growing fatigue crack, AE, theoretical models 86−52566
HDL appl. at analogue level 88−12149
heated component temp. distrib. determ. from similarity factors *(German)* 86−6559
heavily-saturated transformer and reactor equivalent circuit *(Italian)* 86−61553
high-speed packaging anal. and modelling for GaAs digital ICs 86−13494
holographic NDT on pipes, predicted fringe patterns 87−59037
humidity meter improvement by component modelling 86−18570
HV, substations, electric strength modelling of multielectrode insulating systems *(Russian)* 86−6925
HV transmission system, right of way losses due to tornadoes, computation of frequency, math. model 85−9479
HVDC thyristor convertor valve design, characterisation, eval. and modelling 86−9122
hybrid cct. on ceramic substrate, thermal model for 2D temp. distrib. calc. 86−53249
hydraulic modelling at the Piedra del Aguila dam, Argentina 85−38906
hydroelectric scheme, water management and energy calculations, math. model *(Russian)* 85−15916
hydrothermal power system unit commitment, branch-and-bound soln. *(German)* 85−53596
IC lithographic processing, modelling study of superficial topography 86−28091
IC metallisation, model for electromigration behaviour in terms of flux divergences 87−67141
IC wafer fabrication lines, simulation modelling 85−7055
iceberg drift dynamic modelling from current profiles and wind obs. 88−48333
iceberg season severity, long-range statistical forecasting 88−48334
image motion estimation, integrated spatio-temporal model and recursive algorithm 85−36402
immittance dynamic model for power system operation prognosis *(Czech)* 87−21842
IMPATT diode oscillators, power and freq. charact. comparison above 100 GHz using theoretical models 85−6525
induction channel furnaces, electromagnetic charact. determination by physical modelling *(Russian)* 85−44319
induction generators, appl. of power electronic switching techniques, static invertor exciter 85−27423
induction machines, equivalent load model 85−43909
induction motor, 400 kW, torque transmission system, torsional vibrations, influence of transient state, anal. *(Polish)* 85−9904
induction motor, single phase, frequency convertor-fed, math. model *(Polish)* 85−9907
induction motor accel. and braking regime control relationships in automated programmed hardening system 86−45407
induction motor drives, thermal transients modelling *(Russian)* 85−65248
induction motors, composite load model, improved method 85−27420
inductosyn, inter-winding capacitance determ., math. model *(Russian)* 85−16068
industrial heating plant water treatment, computer program modelling *(Rumanian)* 85−54009
integral manifold as a tool for reduced-order modelingof nonlinear systems: A case study 86−66990
integrated optics, beam propagating method, algorithm 85−35540
integrated optoelectronic components, modelling and anal. using mode matching with modular microwave equiv. cct. 87−61054
intelligent measurement based on model building and parameter estimation 87−3399
interconnected power system simulation model reduction 86−32642
interconnected power systems, economic optimisation, using mathematical models *(Czech)* 86−44870
interconnected power systems, state estimation of internal and external networks 85−32085

modelling continued
inverse and direct half-space scalar diffraction, Helmholtz eqn. approx. and aperture identification 85−57005
inverse methods applied to microwave target imaging 85−63747
inverse problems approach to observation results processing 88−29194
inversion, identification and information 87−54802
invertors with improved energy parameters, analogue computer modelling *(Russian)* 86−6877
ion thrusters, ring and line cusp type, performance model 85−31945
isolated power systems, dynamic impact of wind generation, performance simulation 86−33246
JINDALEE, over-the-horizon radar, simulation and modeling 85−47551
Josephson junction, current driven, electronic simulator, chaos, return maps, phase-locked states 85−29509
Klaipeda city air pollution reduction programme *(Russian)* 87−77893
Krsko nuclear power plant mathematical model *(Croatian)* 85−65036
Lancaster Sound western entrance, iceberg motion statistical modelling 88−48335
large scale interconnected systems, model reduction 88−30301
laser cutting, physical mechanism and modelling 88−20808
laser cutting including pulsed operation, dynamic model 87−47043
laser soldering of thick film ignition module, process parameter variations effect, analytical model 87−6287
lightning stroke, radiated field calc. using travelling current source model *(German)* 87−12662
linear induction motors during open-load starting computer modelling of mechanical characts. *(Russian)* 85−60175
linear modeling and the coherence function 87−33676
linear nonGaussian random process model validation by bispectral estimation 88−49641
load forecasting, 5th symposium, Boxborough, Ma, USA (Oct.1983) 85−64868
logic CAD, behavioural modelling using workstation-implemented algorithmic language 85−11148
long-term prognosis of power consumption, using mathematical models *(Czech)* 86−44842
low-pressure RF glow discharges, transport equation soln. by staggered-mesh finite difference numerical method 88−64165
LWR primary coolant system, thermal-hydraulic modelling during degraded core accidents 85−4854
M to N-phase transformers, phase coordinate modelling using equivalent circuits 85−21688
machine windings, electromagnetic systems incorporating discrete conductor layers, multilayer anal. 85−32438
magnetic clutch using permanent magnets, math. model *(Russian)* 85−62202
magnetic field modelling of arbitrary shaped bodies using elementary sources *(Russian)* 85−62727
magnetic recording, 3D write model 87−18496
magnetic recording, spectral model for time-base distortions 87−67740
magnetic recording process, two-dimens. simulation *(German)* 86−36036
magnetic recording processes, two-dimens. modelling *(German)* 87−67764
magnetostatic leakage field modelling in defect detection 85−10893
magnetostatic leakage fields of surface defects, math. model and defect size determ. applic. 87−16737
magnetrons, cylindrical hydrodynamic multifrequency model, optimisation techniques *(Russian)* 86−41481
management science, new teaching approach 87−23266
mandibular kinesiograph recorded signals, distorted, GMDH correction modelling 87−29700
marine radar iceberg detection model, verification study 87−28656
MARKAL energy system model, computerization and appl. 87−50681
Markov models for reliability, maintainability and availability assessment 86−57279
mathematical model of volumetric flow rate generators for liquids with stepped plunger drive 88−4692
mathematical modelling, conf., St. Louis, MO, USA, Aug. 1987 88−43553
mathematical modelling of operating parameters of computing centre *(Russian)* 85−10582
mathematical models for heating and ventilating engineers 85−16449
medium voltage transmission networks, development of dynamic idealized analysis model *(Croatian)* 85−32118
metrological model of data-and-measurement system 86−24276
metrological problems of dynamic measurements indata-and-measurement systems 86−24251
mho distance relay, dynamic state space model 86−32852
microelectronic devices, special bow type electrode design, thermal behaviour determ., math. model and simulation method *(German)* 85−16782
microstrip circuit elements on cylindrical substrates, dynamic models 87−73648
microstrip transmission-line structs. on GaAs, and Al_2O_3 substrates, modelling and meas. 86−27551
microwave characterisation of dielectric rods with simultaneous heating 85−7107
microwave devices, modelling using efficient l, optimisation 87−6069
microwave IC structs. on anisotropic substrates 86−27590
microwave propagation characts. along Earth-space paths in 1-100 GHz range, computer model 88−67333
microwave propagation modelling in troposphere, parabolic eqn. method 88−72541
microwave thermographic signal generation, combined thermal and EM modelling 88−54543
MIM capacitors for MMIC appls., distrib. model and expt. verification 87−45233
MMIC wideband phase shifter, 2-8 GHz, modelling, design aspects and expt. study 85−23124
model reduction via Chebyshev polynomials 87−10297
modeling and dynamic characteristics of a permanentmagnet brushless DC motor drive with current inverter 86−66103
modeling concepts for VLSI CAD objects 86−57559
motor magnetic circuit loss meas. and modelling *(French)* 87−64537
MSW filter, microwave cct. model 88−71955
MTBF equation transformation for complex mission scenarios 86−264
multi-port waveguide junctions, adaptive spectral response modelling 87−73627
multichip/wafer scale interconnects, modelling 87−67160
multidimensional models of complex engineering systems 87−52025
multilayered structure, acoustic model for nondestructive evaluation 85−10902
multipulse modelling of signals, improved method 86−29960

modelling continued
multivariable power spectra approx. by phase matching 87−55199
natural gas market modelling system of USA Energy Information Administration 86−12545
nonlinear systems, distributed-parameter-model structure determ. *(Russian)* 86−13954
nonlinearities modelling by graphical-analytical method, using operational amplifiers *(Czech)* 86−20234
nuclear power plant electrical raceway system dynamic testing on 1/3 scale models 85−63984
nuclear power plant safety, cause-consequence relation disturbance model 85−48677
nuclear power station wet-steam turbine and separator-steam generator, dynamic characts. *(Russian)* 85−48683
nuclear reactors, SAMSON vibration test facility for multi-axis dynamic motion simulation 85−43807
nuclear systems, finite element modelling of unidirectional thermal conduction fields *(Rumanian)* 85−33315
oceanic expendable dissipation profiler mechanics model 88−48356
operational amplifiers, monolithic, nonlinear macromodel for time-domain simulation 88−63536
operational transconductance amplifiers, improved nonlinear macromodel for computer simulation 85−22689
optical modelling of incremental displacement systems *(German)* 86−5532
overhead crane, electromechanical system of travel mechanism, dynamics, math. model *(Russian)* 85−5610
overhead transmission lines, EM transients, overview 85−15623
packages for high-speed ICs, elec. charactn., model and time-domain reflectometry technique 86−13493
PACS radiologic workstation user interface design, model 88−36554
PACS system, simulation in hospital environment 87−14962
parallel phenomena modelling 87−35469
parameter model for intelligent instruments and systems 87−3415
pass transistor logic, algorithm for modelling 'stuck at' faults for fault simulation 85−6281
PCBs, mechanical modelling and reliability assessment 85−28777
PDM, two-dimens., phys. model 85−57200
PDM, two-dimens., phys. model 85−57201
perceived lightness, uniform quantisation, in digital radiography 88−36453
periodic signals, neural network as trainable model 88−8797
permanent magnet AC motors with buried magnets, field weakening and drive applications 85−43919
perpendicular recording, analytical modelling 86−28664
perpendicular recording write head improvement using large-scale model 88−57953
Petri net modelling techniques and applications 85−54269
Petri nets, stochastic, analysis by decomposition of transition rate matrix 87−51985
phase shifters, static, thyristor-controlled, in power system math., models 85−27518
PHI3D, graphic interactive package for three-dimensional fields computation 86−63907
photovoltaic plant anal., energy and power methods, comparison 85−48904
photovoltaic power system, stand-alone, reliability estimation, math. models 85−32393
picture archiving and communication systems, conceptual models for interactions 85−31825
planar resistors, conductivity fluctuations, model 87−52877
plane-parallel induction systems with magnetic circuits, analysis *(Russian)* 85−16428
PLLs with edge-triggered phase detectors, demodulation behaviour model and expt. verification 88−6696
Plume Model Validation and Development field measurements at moderately complex terrain site 85−59509
polluted insulators, influence of AC test source parameters on flashover, computer modelling 85−43638
polyphase convertor power cubicle design, mathematical modelling of in-phase operating valves *(Russian)* 85−32585
power convertor model for steady-state stability anal. and controller design 87−78776
power convertor systems, discrete modelling 86−7994
power convertors for multiple power transmission, mathematical simulation study *(Russian)* 85−53762
power cycle visualization and modelling techniques 87−30400
power demand load forecasting, accuracy of time series modelling 85−48558
power distribution node harmonics, probabilistic modelling 87−78097
power electronics regulation with microprocessor, 1st, 2nd and 3rd order systems modelling *(Spanish)* 86−7954
power generating sets, large size, and their control systems, design, math. model 85−38956
power generation expansion planning, dynamic and economic model 85−48559
power line surges, wave propagation above corona threshold 86−6359
power network, description and evaluation using a grid data language *(German)* 87−64016
power network switching surge expt. planning binary regression models *(Russian)* 86−6337
power plant model development for training simulators, modularisation 85−59850
power plant operational description and potential improvement analysis 87−64218
power plant system approximation, model reduction algorithms 85−9453
power plants, automatic voltage regulation and turbine system dynamic models *(Dutch)* 85−53374
power station control, thermal process simulation, math. model *(German)* 85−9683
power station turbine modelling for control system anal. 85−59847
power supplies to electric drive apparatus, power requirement modelling *(Russian)* 85−10140
power system, interconnected, nonlinear representation reduced-order model 87−30105
power system, total exergy efficiency of basic combination models *(Chinese)* 87−9102
power system control centre, modelling error effects, on online security anal. 86−50835
power system control centre, modelling error effects on online security anal. 86−56374
power system dynamic equivalents, internally balanced analysis 87−15138
power system dynamic process modelling, mathematical anal. 87−21825

modelling continued
power system modelling, systems approach 86−32643
power system models, combined sources of electricity and heat generation *(Czech)* 86−12253
power system operator recovery actions, explicit modelling technique 87−9124
power system planning, entropy model for long-term evaluations *(Russian)* 85−48560
power system reactive power control and management, textured computational modelling 85−59614
power system reduced-order model using model anal. and selective model anal. 88−23295
power system security analysis, neighbouring interconnected network model errors 86−50877
power system small disturbance stability, charactn. with models incorporating voltage variation 86−50783
power system voltage stability, generalised anal. 85−48526
power system with synchronous generators, math. model 85−38423
power system with synchronous machines, controller design using model control principles 85−4556
power systems, dynamic model of external networks *(Dutch)* 85−53256
power systems, maintenance, routine-overhaul determination *(Russian)* 85−59619
power transformer modelling for transient overvoltage calc. 87−78732
power transformer parameter estimation from time-domain data 86−66126
powered upper extremity prostheses, model of research and development program 87−71175
PROD, VLSI fabrication process fault diagnosis system 86−61919
production loss prediction, analytical system availability techniques and microcomputer model 86−66634
production systems, reliability inspection and maintenance effects on quality and efficiency 86−61914
PROMOD III combined-cycle production-costing model enhancement 87−72011
proportional hazards model appl. in reliability field 85−22279
proportional hazards modelling, reliability data appl. 86−40592
pulverised fuel boilers, furnace dynamic model allowing for combustion process 85−48843
PWM invertor-fed linear network, math. modelling and simulation 85−28322
PWR coolant velocity field, potential flow model 85−48784
quantitative autoradiography, compute-based, calibration procedure, model for nonlinear response of film/camera 88−42509
quartz resonator, LF, Q-factor meas. method and cct. development 87−35180
R-C-NR structure, improved rational two-port model 86−688
radar clutter suppression, polarisation vector signal processing 85−63744
radar sea clutter, meas. and modelling using envelope statistics 86−11149
radar system modelling, UK facility for target scattering charact. determ. 86−23942
railways, rectifier two-substation power system 85−27735
railways, two-substation power system model, DC charact. 85−27736
rapid thermal processing, modelling of diffusion 86−1880
RBMK-1000 nuclear reactor, math. model *(Russian)* 86−45099
reactive power compensation, quadratic mathematical model *(Russian)* 85−59544
reactor coolant transient thermohydraulic behaviour model *(Croatian)* 85−53465
reactor core models for meltdown accident consequence assessment *(German)* 85−48775
reduced order modelling using integral manifold for nonlinear systems 88−48918
reliability, new stage method getting arbitrary coefficient of variation by two stages 87−36552
reliability and maintainability symposium, Philadelphia, USA (Jan. 1985) 86−39
reliability growth model unification framework 86−57255
reliability modelling of systems with human errors 87−58760
reliability technology, conf., Bradford, England (April 1986) 86−66540
residential photovoltaic arrays, thermal behaviour modelling 86−7148
resistance regulated arc furnaces, modelling of electrical charact. and parameters 85−32803
rod insulator, surface current distribution during flashover *(Russian)* 85−53344
running frequency spectra estimation using Kalman filter algorithm 88−66493
SAW devices, pulsed model study *(German)* 86−9370
SCARA robot dynamic modelling, DC permanent magnet servomotor and actuator 88−43353
screen printing process, 1 D model and wet film thickness calc. method 88−57161
semiconductor modelling, existence-stability anal. for stationary Van Roosbroeck system 86−14835
semiconductor wafer temperature transient model in furnace conditions *(Japanese)* 85−61821
sifting theory in nonlinear signal and image processing 88−27728
signal generation, random, of specified spectral form, inverse Fourier transform algorithm 87−75768
simulation and modeling, conf., Montreal, Que., Canada (June 1985) 87−31153
Simulation Conference, Antwerp, Belgium (Sept. 1986) 87−31149
simulation modeling for estimation of the characteristics of measurement errors 87−63547
soil resistivity modelling for substation earthing, electrolytic tank test rest results 85−59815
soil splash and sheet erosion model from Landsat data 85−64728
spacecraft solar cell arrays, computer aided prediction and anal. 85−48423
spark gaps, high energy, performance evaluation, math. model 85−5313
steam plant thermodynamics, computer aided modelling for mechanical engineering students 85−38863
stochastic interconnected systems, model order reduction for decentralised control 85−4581
stochastic models, conference, Siebenlehn, Germany (June 1983) 85−263
stochastic signal modelling in spectrally-correlated domain, program struct. *(Russian)* 85−2836
storage battery development for electric road vehicles, thermal charact. 85−53898
submarine interconnection between French and English power systems, reliability modelling 85−9445
modelling continued
submersible 3D load transducer platform for vessel/pier collision modelling 88−22539
submicron critical dimensions optical control, image modelling and line profile meas. 88−18518
superconducting cable, modelling of energy losses 85−43616
superconducting synchronous generator SUSI, modelling laws appl. to construction *(German)* 85−38977
superconducting windings, mathematical modelling of thermal processes 85−41079
surface mounted components, ionic contamination detection, theoretical model and testing 88−64086
surface mounting attachment, predictive reliability model 85−28079
switch-mode power supplies, power switch modelling technique 86−20271
switched capacitor filters, noise anal. using Z-domain models 86−34977
switched mode power supplies, modelling, anal. and regulation 86−40909
switching DC-DC regulators, modelling, anal. and design *(Spanish)* 86−52670
synchronous generator, salient pole, polyphase, static and dynamic behaviour, math. model 85−32474
synchronous machine, convertor-fed, round rotor, polyphase, math. model 85−32473
synchronous machine modelling and model reduction through singular perturbation methods 85−32467
synchronous machines, state equation solutions using separated mode model 87−9526
synchronous machines connected to HVDC systems, capacitive load transients study 85−60157
synthetic fuel development, econometric modelling and policy analysis 85−59859
system availability, top-down apportionment method and model 86−274
system availability model simplification by statistical sampling 86−273
technical workforce groups in US, computer modelling, APL 86−57294
telecommunication traffic, economic dimensioning of link systems with point-to-point selection and alternate routing 85−8255
thermal power station optimal load distribution anal. 85−21428
thick film components, model, structural, verification 86−14730
thick film resistor model 88−1229
three phase power networks, modelling of short-circuits *(Spanish)* 86−25559
three phase transmission lines, untransposed, state equation modelling and simulation programs 85−21229
three-dimensional shape modelling and image generation based on distrib. function *(Japanese)* 85−51786
three-phase arc furnace cct., linearized mathematical model 85−49199
three-phase power system elements modelling using multidimens. matrices 88−36729
thyratron, linear, commutation, modeling, particle simulation 87−60059
thyristor chopper with current control, for DC motor speed regulation, synthesis and analysis 85−32609
time-varying transmission path, modelling and optimum adaptive equalisation *(Japanese)* 88−46075
TPP-804 boiler furnace chamber aerodynamics, fired model 85−48840
transformer winding modelling method for system switching transients study 86−65602
transient ionising radiation interactions with microelectronics, modelling and simulation 88−57764
transistor amplifier transconductance modelling 86−774
transitory shape signals, parametric modelling and classification, automatic *(French)* 88−21272
transmission and distribution switchgear, CAD 86−45623
transmission line tower, effective inductance, mathematical model 87−57678
transmission network planning, minimum cost secure network synthesis, mathematical model 85−59652
transmission networks, asymmetric models with phase disparity *(Russian)* 86−65670
transmission networks, dynamic load model synthesis 85−53299
transmission system faults and stormy weather correlations, reliability modelling 85−9482
turbine-generator shafts, torsional vibration anal. using distrib., parameter model, computer algorithm 87−42758
turbogenerator shaft torsionals, computer modelling of speed governor effects 85−60126
TWT, wide-band, with external feedback self-oscills., numerical modelling 85−6660
UHV power supply systems, capacitor banks switching, overvoltage protection, measures and math. model *(Russian)* 85−4674
underground coal gasification models compared 86−39285
UNIRAM power plant availability modelling program, user's guide 85−53376
US flaw characterisation module, quantitative, development 85−6080
US testing, computer based modelling of test arrangements *(German)* 87−44426
variable speed wind energy conversion using synchronous machine 85−38941
VHDL language for electronic systems modelling and simulation 88−523
video mixing units, model system for operational technology assessment *(German)* 85−37287
VL 80R electric locomotives, EM processes for continuous voltage regulation, modelling of operation 86−26365
VLSI industry, model for cooperation between university, industry and government 85−80
voltage locked Josephson junction array amplifier, model, gain, input impedance, bandwidth 87−18557
wall-stabilised arc sustained in forced axial air-flow, numerical model 85−65376
waste water treatment industry, appl. of reliability and availability analysis 85−32872
water turbine generator in small hydropower station, modelling and speed control *(Spanish)* 88−5651
weld, NDT, elec. current methods modelling 87−341
wind obs. through ambient noise, numerical calibration model 88−48351
wind power generator torque measurement, simulation and modelling 86−45306
wind power input integration into small grid systems, computer modelling techniques 85−5024
wind turbine systems, oscillatory and gusting torque effect on power system 86−25506

modelling continued
wire-duct electrostatic precipitators, corona characts. modelling using charge simulation techniques 85−24759
Yugoslav 400 and 220 kV power system static stability analysis, reduced state-space model *(Croatian)* 86−65628
Yugoslav electric power system dynamic equalisation at 400 and 220 kV *(Croatian)* 87−57522
Ag strip fuse burn-back velocity, 1D numerical model 87−72342
Ga-As soln., electrotransport model for liq. phase electroepitaxial growth 87−52130
HgBr electric discharge lasers, multidimensional modelling 85−12772
$LiNbO_3$ based electro-optical devices, modelling and BPM calcs. 87−54115
Ni-Cd batteries, Goddard model for aerospace appls., alterations using computer simulation 87−22701
Pb storage batteries, equivalent electrical circuit model *(Japanese)* 85−60413
Pb-acid battery electrical model 85−65431
Pb-acid battery electrodes design, math. model 85−32697
Pb-acid cell, mathematical model 88−37362
Si, CVD, mathematical model of chemical kinetics 85−10810
Si, laser doping process from gas phase, modelling 86−8998
Si, model for thermal oxidation kinetics 88−64406
a-Si:H films, laser induced CVD, model 85−49610

modelling, computer *see computer aided analysis*

models *see modelling*

modems
1.544 Mb/s and 2.048 Mb/s modems for CCITT supergroup DIV and DAVID applications 87−28278
2.4 kbit/s autodialling system design 88−46778
2.4 kbits/sec adaptive serial HF system, performance tests 85−30778
2 megabit data modem 87−2980
2D adaptive equalizer design for CMOS single-chip voiceband modem 86−64810
8-DPSK TCM modem for land mobile satellite communications 88−67165
8PSK modem, coded, with Viterbi decoder, study using simplified metric calculation 85−42345
9- and 16-level QAM modems, design and construction *(German)* 86−23662
10 bps diversity system, performance tests 85−30777
14.4 kbit/s modem employing viterbi algorithm 87−8091
14.4 kbit/s modem employing Viterbi algorithm 86−10874
16QAM modem with filtering and carrier-recovery techniques 86−55076
16QAM modem with new filtering and carrier-recovery techniques 86−37618
19.2 kbit/s VLSI modem using trellis-coded modulation 86−55065
19.2 kbit/s voiceband data modem using 8-D trellis coding 88−46784
32 kbps ADPCM with coding characts. improvement for 9600 bps modem signal 87−28241
64 QAM modem design and meas. techniques 87−34421
64-state SQAM modems, power efficient operation 88−3810
64/256 QAM high-level multicarrier digital radio system, feasibility considerations 85−14125
90 Mbps 68 APSK modem with honeycomb constellation for digital radio systems 88−46887
212A modem chips using CMOS technology 85−17226
240-baud full-duplex modem market developments 85−36817
256 QAM modem for digital radio system, performance 86−55194
256 QAM modem for high capacity digital radio system 87−2978
256 QAM modem for high capacity digital radio systems 85−42438
256 QAM modem for multicarrier 400 Mbit/s digital radio 87−48893
256-QAM DIV modem, design and field test 87−48856
256-QAM performance in distorted channels 85−47302
300 baud modem, construction and cct. 86−64805
300 baud modem, HC 5570 device, design and performance *(French)* 86−64809
300 bauds monolithic modem circuit 85−62113
600 b/s quasiphase modem using power-line carrier upper AF sideband *(Chinese)* 87−3035
1024-QAM and 256-QAM coded modems for microwave and cable systems appls. 87−48896
1200 bit/s, using active low-pass RC filter, design with identical functional blocks *(Slovak)* 85−39961
1200 bps full-duplex modems, advantages of signal processor and switched capacitor technologies 85−14018
1200 bps modem IC 86−8061
1200/2400 bit/s split-band full-duplex modem, analog front-end LSI chip 87−20317
2048 kbit/s data-in-voice modem 85−14001
2400 b/s modem network for customer orders and cost cutting, Dysan corporation 86−10869
2400 baud DPSK modem for packet radio appls. 86−69497
2400 baud modem market, MNP class 5 data compression and class 4 error correction controversy 88−41465
2400 baud packet and bit error rate 86−69498
2400 bits/s data modem implementation on digital signal microprocessor 86−43630
2400 bps, purchasing decisions 87−69781
2400 b.p.s. data pump 87−69787
2400 bps modems, data integrity techniques 86−10871
2400 bps modems, review 88−3703
2400 bps modems, standards and applications 86−10875
2400 bps modems for online searching 88−41469
2400 bps V.26 modem using TMS-320 implementation 87−55884
2400-bps modems speed connect time on public nets 86−17098
2400DX for 2400 bit/s duplex transmission in switched telephone network 85−3258
4800 bit/s microprocessor-based CCITT compatible data modem 85−52126
8748 microprocessor-based systems *(Spanish)* 85−14009
9600 bit/s QAM facsimile modems, CMOS 5 V analog front-end 88−21571
9600 bps modem, microprocessor based 86−17101
12000 BPS telephone modem for digital voice security 86−4398
AC power-line modem, Controlonics Nonwire 85−14000
acoustic coupler, home construction using AMD Am 7910 chip *(German)* 85−30768
acoustic coupler for data collection *(Czech)* 88−35871
acoustic coupler used with Commodore 64 *(German)* 86−30481
acoustic coupler with automatic answering and dialling feature 85−14008
acoustic couplers, popular survey *(German)* 88−41444
acoustic couplers and modems, working principles *(German)* 86−30480

modems continued
acoustic-wave speed measurement, detector cct. 87−50008
AD630 balanced modem chip appl. to magnetometer cct. *(German)* 86−38324
adaptive carrier phase control in modem receiver using CCITT V.29 16 ASK/PSK modulation system *(German)* 87−40530
adaptive chirp modem 87−28280
adaptive digital AGC 86−844
adaptive lattice filter for distinguishing modem data from speech 87−45011
adaptive serial modems for performance gains 86−30484
ADPCM algorithm for voice and 9.6 kbits/s modem signals 88−40775
ADPCM coders, evaluation for digital circuit multiplication equipment 88−52337
ADPCM performance impact on voiceband data 86−55077
advanced groupband data modem using orthogonallymultiplexed QAM technique 86−55068
advanced modems, additional functions 88−41467
AEA ATU-1000 advanced terminal unit, review 87−34249
AEA PK-64 Pakratt and HFM-64 modem 86−59709
Agora telematic terminal, review 87−62578
AGV, real time control using RF data links 87−3123
Alcatel autodialling modems for PSTN 87−2972
alternative approaches pending ISDN implementation 87−28227
AM79C12 dial modem peripheral, intelligent 1200 bit/s CMOS IC 86−30479
Am79C12 Dialer Modem Peripheral, bus-controlled VLSI modem solution 87−69786
AMD Am 7910 chip, use in acoustic coupler *(German)* 85−30768
analog interface circuit (AIC) for high-speed modems 88−71783
analog interfaces for digital signal processing systems 86−67278
analog transmission of digital data using Datex terminals *(German)* 87−34250
analog-digital converter for data transmission equipment 85−8248
analogue modems, digital world development 85−36820
analogue multiplier using Si bipolar super self-aligned technology, radiation hardness 86−58003
Anchor Automation Signalman Mark XII modem 85−52120
Apple Modem and Access II reviewed 85−19923
ASK modem, NE5050 IC for data transmission over 220 V power line *(German)* 88−15244
ASK NE5050 modem for data transmission through 220-V networks *(Italian)* 88−63576
AST Reach! modem and Crosstalk XVI telecommunications package 87−8092
asynchronous and synchronous modems, market development 88−59886
asynchronous carrier adapter with modem attachment card 86−43628
asynchronous task scheduler 86−55066
asynchronous/bisynchronous 2400-baud modems, standardized communications protocols 85−57836
Atari users survey, modems and modem software 87−2970
auto-answer modems, fault detection 86−69496
autodial modems, buyers guide 86−4387
autodialing modems 86−4388
autodialing standards for modems, lack 86−17089
automatic remote modem speed checking 87−2976
automatic testing, high data rate 88−15257
back-up modem switching controlled by EIA interface 85−42340
bandlimited digital communications, voiceband modems and digital radio trends and appls. 86−64498
bandwidth compressive 16-state SQAM modems through saturated amplifiers 87−40527
BBC Micro usage, examples and modem choice 86−30482
BBC microcomputer, £40 modem with autodialling/answering 85−25608
BBC microcomputer, program listing providing built-in modem 85−42339
BER measurement method 85−57841
binary passband echo canceller for 2 wire duplex modems 85−14010
binary passband echo canceller in a 4800 bit/s two-wire duplex modem 85−14003
bit-slice digital signal processor for high band rate modems 85−45115
block-inversion-coded QAM systems 88−66287
board-level modems, buyer's guide 87−69766
board-level modems boast higher speeds, more features and lower cost 87−10732
board-level modems for personal computers, product survey 85−25610
boost fast modem throughput by analyzing dial-up lines 88−15241
breakdown type protection diodes *(Italian)* 88−33138
Bright Star and Tandata QCOM modems for Sinclair QL reviewed 85−63425
broadband modem for cable TV networks, digital demodulation design 86−4392
burst modem for satellite communications, compact LSI- and MIC-implemented 88−46978
burst-format spread-spectrum communications, SAW technology appl. 85−14099
business satellite communications, FEC combined burst modem 88−46979
business satellite compact terminal, modem and FEC LSIs 88−46980
buyer's guide 88−59887
buyer's guide 88−67163
buyer's guide 88−3705
buyer's guide 88−9332
buyer's guide 88−15253
buyer's guide 85−30767
buyer's guide, automatic and manual models 85−19928
buyer's guide to high-speed modems 88−53075
buyer's guide to low price modems 85−30770
buyer's guide to modems and multiplexers 86−10876
buyer's guide to modems in UK 88−35271
C-band 120-Mbit/s TDMA QPSK modem for on-board satellite appls. 88−3899
cable television, RF modem with channel duplication 87−28819
callback modems, security and cost-control advantages 85−42337
Carbon Copy link for connecting PCs *(German)* 88−59634
cards, standards and performance *(French)* 87−20298
cards, standards and performances *(French)* 87−20299
carrier frequency estimator for modem signals 88−73004
CATV, character generator ringing problem 87−70264
CCITT recommendations 85−63420
CCITT standards on modems error control 88−28408
CCITT V23 compatible, EFB7510 IC, design and performance *(Italian)* 85−19927

modems continued
CCITT V.32 modem, implementation on a general purpose DSP chip 88−799
CDLC data transmission standard for cellular radio 86−37788
cellular mobile radio channels, implementation 88−28711
cellular radio data communication services, modem and protocol development 86−17239
cellular radio for data communication 86−49478
cellular system, 4800 bit/s high speed data transmission 87−3083
checklist for modem connections 86−69499
Chinese power-dispatching microcomputer-based remote control device *(Chinese)* 87−50878
chip sets, guide to features 86−69500
chip sets and modem ICs 87−59670
chip technology for high-speed modems 87−40533
CIT-Alcatel new generation of modems 86−4386
city distribution system supervisory link via local CATV system 86−25564
CMDS 300-baud FSK modem 85−30771
CMOS, single-chip 85−63417
CMOS analog and digital master slice LSI 88−7736
CMOS analog front end for a two-chip 2400-bit/s voice-band modem 88−21841
CMOS digital subscriber loop transceiver, 160 kb/s, with memory compensation echo canceller 86−37592
CMOS FSK modem, 1200 baud 85−30773
CMOS FSK modem, config. for low transmission rates *(German)* 85−3253
CMOS low noise switched capacitor analogue front end for a V22 bis modem 87−62755
CMOS LSI modem for transceivers *(Japanese)* 86−4394
CMOS modem chip, TSG 7515, design and charact. *(German)* 87−62744
CMOS modem device, design of microprocessor-telephone interface systems 85−8242
CMOS single-chip analogue front-end for high-speed modems 85−8247
CMOS single-chip DPSK/FSK modem, design with Bell 212A and CCITT V22 compatibility 86−37630
CMOS single-chip echo canceller design for high speed modems 88−67167
CMOS single-chip modem, TSG 7515, FSK and DPSK operation, design and charact. *(French)* 87−62743
CMOS-based single-chip modems 87−8095
code efficient Bell 103 equivalent modem 86−34622
code efficient carrier detect for a Bell 103 equivalent modem 87−28268
coded 8 PSK modem with Viterbi decoder, performance, simplified metric calc. 87−48756
coded octal PSK system performance disturbed by imperfectrecovered phase reference 86−68960
Collins CP-1516/ASQ automatic target handoff system, battlefield mission computer, design and performance 87−40537
Colorado springs area EMP hardening project 85−37008
commercial electronic mailboxes in Germany *(German)* 87−27936
Commodore 64 modem, design 87−2975
Commodore 64 modem construction 86−23578
communications formats for portable computers 86−54865
commutating amplifier rectifies signals 85−28339
comparison tests for dial-up modems 87−62742
complex phone/data digital telephone project *(Italian)* 87−76414
computer communications, modems 85−63427
computer communications, modems and bulletin boards, for BBC microcomputer 85−3147
computer networks, applications, improvement and development 86−30384
computer networks, topologies, equipment and standards 86−10780
computer on the phone *(German)* 87−76311
concentrator, new robust system development for Datex *(Swedish)* 87−69798
continuous phase modulation with coding, modem design 86−29703
control message transmission method for modem network 86−37191
convolutional encoder and Viterbi decoder implementation, modem appl. 88−45930
CPFSK modem for FLTSAT channels 88−28786
CPM modems, squaring loop anal. for carrier recovery 87−39595
cyclic redundancy check calculations, XCom9 modem program implementation 86−68968
Dacom Buzzbox and Pace Nightingale, review 86−17094
data, impact of digital technology 85−42346
data above voice, inside and outside the voice band 87−55882
data communication, computer, terminal and modem networking principles 86−59619
data communication, multilevel signals and trellis coding 86−10870
data communication appl. *(Japanese)* 87−69769
data communication appl., tutorial 86−55061
data communication appls. 88−9328
data communication systems equipment linking, basic techniques and equipment 85−2962
data communication techniques 88−41299
data communication via telephone network *(German)* 87−76190
data communications appl. 86−10872
data communications technology and modems 87−48752
data directed estimation technique for single-tone HFmodems 86−29704
data modem monitor for telephone lines 86−23588
data network management, automated control 86−49100
data network using modems and multiplexers 86−54870
data transmission and DATAX NCMS, techniques and equipment *(Japanese)* 87−8047
data transmission at low-speed 85−42118
data transmission by telephone, modems 85−19925
data transmission equipment and modems, utilisation *(Polish)* 85−19932
data transmission modem ccts. 87−28270
data transmission over a cellular network 88−46951
data transmission over voiceband telephone links, simplified two-stage equaliser with reduced no. of multiplications 85−14005
data transmission problems and basic concepts *(German)* 87−55836
data transmission signal level adjustment circuit for public switched network 85−3215
data transmission speed improvement on PSTN 87−55872
databases, bulletin boards and information retrieval, classroom applications 86−30299
DATAX MEDIA STAR-10 modem phone for personal computer communication *(Japanese)* 87−28255
Datex-P data packet-oriented communications system *(German)* 88−41192
Datran Modem Accelerator, add-on board and software for IBM PC and compatibles 86−64803

modems continued
DAV, data-above-voice, modems for telephone subscriber circuits 86−59714
DC convertor with common-isolated output 87−52359
DCTPSK, differentially detected controlled transition PSK 87−39586
DCTPSK for differential detection 86−16119
DDD modem, echo cancellation-based 4800 bit/s full-duplex modem 85−14004
decision-directed echo cancellation for full-duplex data transmission at 4800 bps 87−20316
decision-feedback equalisers for 9600 bit/s modem, comparison 88−53077
dedicated modem for data exchange, use by Siemens *(German)* 87−76426
defense satellite communications, new FDMA modem 87−40824
design aspects and anal. *(Czech)* 88−21844
design considerations for modems with signal processing *(German)* 87−2981
design features and connection to public network 86−37628
design techniques, leased line, dial-up and baseband circuit appls. 87−48758
detachable mobile radio units, LSIs use *(Japanese)* 87−8189
development 85−36806
development of modem with three custom ICs *(Swedish)* 88−32054
developments in modems 86−10880
developments in modems and multiplexers 88−3702
dial-up communication systems using multi-carrier modulation technology 87−62758
dial-up modem transmission protocols 85−57848
dial-up modems, market trends 88−28566
dial-up modems for high-volume data communications 87−55876
dial-up voice lines, new family of codes 85−42343
Diapason, intelligent modems *(French)* 87−20311
differentially encoded QPSK satellite modem perform., baseband predistortion effects at transmitter 88−53209
digital AGC 88−67166
digital demodulator for modem-type optoelectronic devices 88−16036
digital FDM modem realization 88−46365
digital modem-9600 for VF channels 86−37621
digital PLL AFC system based design 87−55880
digital processing design, high level approach 86−29937
digital radio modem for 100 km overwater spans *(Japanese)* 86−37620
digital radio networks using radio modem technology 87−55977
digital radio relay systems, honeycomb constellation, 90 Mbit/s 68 APSK modem 88−73747
digital satellite communication, book 85−10326
digital signal distribution bus for pooled signal processors 87−69554
digital signal processing for voiceband datatransmission 86−16488
digital signal processing use 85−47296
digital signal processor chip for fast modems *(German)* 87−8096
digital signal processor chips for fast modems *(German)* 87−7708
digital spread spectrum modem for satellite communications 88−46956
digital transmission, ionospheric channel characteris., meas. system appl. *(French)* 85−25308
digital voice modem for portable cellular applications 87−28435
digitally realized data modem design *(German)* 86−16114
direct sequence spread spectrum modem for the multipath and impulsive channel 88−28676
direct-coupled modem 85−19926
DLD03H 1200-bit/s cellular modem, review 88−3871
DLD40D 4800-bit/s cellular modem, review 88−3872
DMSK modem, 2400 bit/s for mobile satellite service 86−4390
Dowty Trailblazer 88−46782
DQSPK burst-format transmission over satellite channels, fast carrier recovery scheme 85−47485
DS3 implementation on SSB radio systems 86−55167
DSP, design for high-performance 87−39804
DSP modem techniques for radio links 87−47871
duplex acoustically coupled modem , 300 Bd *(Czech)* 88−73746
duplex modems, new family for faster data communications on DDD Network 85−42342
East German data transmission networks development *(Czech)* 86−37264
echo canceller, training algorithm appl. 85−14011
echo canceller burst mode technique, integrated solution 88−46717
echo canceller modem for ISDN basic access, charact. and performance 87−34322
Echotel/Arcotel modem and radio processor for short-wave communication *(German)* 88−35344
EHF military communications satellites, airborne test modem/processor 86−69741
eight-state trellis code for 4D modulation, modems appl. 85−51540
encoder, sixteen-state feedback convolutional device 86−55067
EPLD, 5AC312, PS/2 Programmable Option Select 88−44143
equiripple group delay digital filter sets for use in FSK modems 85−44940
Ericsson Series 7 86−43625
error correcting system for adaptive modem, theoretical and experimental results *(French)* 85−25041
error performance, nonlinear distortion measures for voiceband networks 87−33462
error-correcting cellular modems for solving data transmission problems 87−34253
Ethernet modems, running over broadband cable 86−49357
evaluation of 23 modems 87−20307
evolution 87−2971
evolution of modems 87−2979
expert modem, design with speech anal. and synthesis capabilities 86−10881
external modems 87−55873
facsimile boards for PC-based message transmission 88−46510
facsimile modem, CMOS analogue front-end for 9600 BPS type 87−62757
Fairchild single-chip 1200 b.p.s. modems 87−69785
fast echo canceller initialization method for the CCITT V32 modem 88−45731
fast-train modems in dial-up environment 87−69784
FATS public communications network, services *(German)* 85−58366
fax board for personal computers, Comwave GammaFax/Dowty MicroFax 88−15224
fax boards, buyer's guide 88−41268
fax machines from microcomputers, using fax software and compatible modem 87−27948
FDM FM and SSB analog radio systems, 1.544-Mbit/s data-in-voice modems, coded modulation appl. 87−48857
FDM group band modems for high speeds *(Japanese)* 85−25609
FFSK modem, 1200 baud, switched capacitor filters design 85−63416

modems continued
fibre optic transmission of microwave 8-phase-PSK and 16-ary QAM signals at 1.3 μm 88−35498
file transfer, HyperProtocol for high-speed modems 88−41332
FM 300/1200 baud RTTY modems 85−30764
FM modem baseband CMOS LSI for land mobile telephone radio units 85−47298
FM modem for induction transmission line, duplex capability, design and performance *(German)* 86−17096
fractionally-spaced adaptive equalisers in voice-band data modems, stable operation 87−55847
frequency hopping modem for reliable slow rate data transmission 85−30166
frequency offset compensation techniques for echo-cancellation-based modems 88−45730
frequency-hopped serial HF modem, performance study 85−25621
FSK, data transmission, Signetics NE 5080/5081 models *(Swedish)* 86−10873
FSK, digital filters appl. 85−36811
FSK and PSK modulators and demodulatorsusing a digital signal processor 85−63430
FSK chip set offers highest bit rate 86−43532
FSK modem chip set 85−54977
FSK modem implementation using digital signal processing 85−30774
FSK modem with additional voice channel, NEC 7720 DSP-based implementation 87−48765
FSK modems, digital filters design 85−52129
FSK modems, linear phase narrow-band filter for hybrid-free design *(German)* 88−28574
FSK voice-band data signals, 32 kbits/s ADPCM algorithm 88−52329
FSK-modem with LSI chip *(German)* 85−57843
Fujitsu 14.4 kbit/s speech band modem *(Dutch)* 87−55879
full duplex, high speed, echo canceler for data modem 87−62747
full duplex 1200/300 b/s single-chip CMOS modem design for QPSK/FSK operation 86−17103
full duplex 1200/300 bit/s single-chip CMOS model with Bell 212A compatibility 86−37626
full duplex echo cancelling transceiver, CMOS VLSI chip incorporating modem, 160 kb/s operation 86−10882
fully integrated analog front end LSI for 9600/4800 bps modems 88−73750
future prospects 87−40524
General Motors MAP using VLSI carrier band node 88−35095
GEnet carrier band LAN interface for stored program control systems *(German)* 88−9121
gHz band monolithic model ICs for QPSK 87−73741
GMSK modem for digital portable transceiver 85−3372
group binary data transmission using orthogonal Walsh functions, noise immunity, communication line effect 87−55875
GTX-100 Modem 85−42335
HAL Communications ST-8000 HF modem, review 87−34248
hardware realization of bandwidth/power efficient modems 87−48764
Hasler baseband modems for 64 kbit/s 88−3704
Hayes compatible modem for UK, PC-to-phone link 86−4385
Hayes modems, connecting to PDP-11 minicomputers 86−59710
Hayes Smartcom III and Smartmodem 1200 88−9148
Hayes Smartmodem 86−55063
Hayes Smartmodem 1200B 88−35269
Hayes Smartmodem 2400 87−28263
Hayes Smartmodem 2400, modem for 2.4 kilobaud communication 86−17097
Hayes Smartmodem 2400, review 86−64808
Hayes V-series Smartmodems 87−69780
Hayes-compatible internal modems in UK 86−59712
HF adaptive frequency-hopping modem, theoretical performance 86−64806
HF adaptive serial modem for 2.4 kbit/s digitally encoded speech 87−48767
HF adaptive single tone modem, design and performance 85−25622
HF band, spread-spectrum, factors affecting design and use 86−37716
HF channel, high speed serial data transmission *(French)* 85−25626
HF communication, optimal signalling rates 87−40682
HF communications, general concepts 87−40681
HF communications, modern systems, modulation and coding 87−13577
HF data communication for extremely low SNR and high interference level 88−46901
HF data rates, improvement 86−4118
HF data transmission appl. 86−64811
HF digital modem performance meas. using link simulators 88−46785
HF digital voice terminal 88−46872
HF modem performance eval. using software ionospheric channel simulator 88−46787
HF modem with adaptive fading control algorithm 85−42344
HF modems, interference tests 88−46786
HF packet network, automated robust system simulation 88−21929
HF radio, digital implementation of high speed modems 85−47422
HF radio and modem testing, wideband channel simulator 85−25728
HF radio links, voiceband, digital modems use 87−48766
HF serial modems, inverse filtering and channel estimation studies 85−30167
HF single-tone data transmission with 2.4 and 4.8 kbps modems 88−46789
HF skywave paths 2.4 kbit/s adaptive serial modems, development 88−46788
HF spectral occupancy, digital modem design 85−14109
hidden local area network (LAN) *(German)* 85−8230
high capacity QAM radio systems, new generation modems 87−34422
high performance satellite data modem using real-time digital signal processing techniques 88−53078
high speed, 9.6 Kbit/s or above, test comparison 88−67161
high speed modems, effect of PCM compandors on performance 86−55075
high speed modems, error control techniques 88−59865
high speed modems, Microcom AX/9624c and DCA Fastlink 87−40531
high speed modems, slow sales 88−59885
high speed modems for wide-area networking 85−25617
high-sensitivity DC amplifier 88−18941
high-speed, asynchronous 86−55064
high-speed data modem with protocol convertor, LAN gateway, PMD9600 *(Japanese)* 85−25615
high-speed data modems, 9600 b.p.s., symbol timing techniques *(Korean)* 85−3256
high-speed data modems, microprocessor implementation, algorithms anal. 86−17102
high-speed dial-up modems 85−19922

spectrum efficient data networking by radio, packet techniques appl. 86−49470
split-band and echo-cancelling modems, full duplex analog front-end chip set 87−20318
split-band full-duplex modems, 2400 bit/s, analog front-end LSI design 87−20310
split-band modem implementation using the TMS32010digital signal processor 87−2983
sports relay broadcasting, data transmission by NHK local stations *(Japanese)* 87−34718
spread spectrum communication modem based on SAW convolvers, synchronisation 85−30880
spread spectrum digital voice radius adaptation 86−30584
SQAM, superposed QAM modem technique 85−36174
SQAM modems, 16 state, bandwidth compressive, through saturated amplifiers 87−33722
SQAM system perform. in nonlinearly amplified multichannel interference environment 86−29701
stand-alones made to Bell standards, modem manufacture in Taiwan, Japan and Hong Kong 85−19929
stand-along general-purpose broadband modems 88−9327
standardisation *(Japanese)* 87−69767
standardisation, West German opposition *(German)* 88−41464
standardised modems, development 88−15254
standards 85−57837
standards, organisations and standards setting bodies 86−55047
standards and technology *(Spanish)* 87−62740
standards for data communication speeds *(Dutch)* 85−63423
standards selecting data communication equipment 86−49367
statistical multiplexers, modem configuration and monitoring 87−62764
super-intelligent modems using ZS8 86−59711
superhigh speed modem, 14.4 kbit/s, modulation and demodulation techniques using multiple-level QAM 87−62746
survey of 2-wire and 4-wire modems 86−17092
Swedish Telecommunications Authority competition from radio networks and satellite links *(Swedish)* 86−30252
switched capacitor filter, XR1010, applications for audio signals 88−25315
switched capacitor filter CAD program SCAD, voice-band modem appl. 86−67322
switched capacitor filter Swedish modem *(Swedish)* 88−32055
switched inverting in meas. devices, using finite weight functions 86−44232
switching modems, use in instrumentation ccts for industrial control *(French)* 87−63345
SY7110 300 BPS FSK modem chip 85−17225
synchronous and asynchronous type, configs. and operation *(Spanish)* 88−15250
synchronous autodialling techniques 88−15239
synchronous modems and dial-up lines solve applications problems 88−28363
synchronous systems and ICs to upgrade data networks 87−55683
system parameters and performance of high speed modems on analog radio 87−48895

modems continued
T1/SG data-in-voice appls. 86−23589
TA series modems from Fujitsu *(Japanese)* 88−41462
tactical AJ modem, rapid acquisition/reacquisition capability 87−40770
Tandata QCOM and Bright Star modems for Sinclair QL reviewed 85−63425
TDMA satellite communication system *(Japanese)* 88−15411
TDMA satellite network use 87−34259

technological developments 85−8238
telecommunication network management 86−4256
telecommunication network security equipment *(Japanese)* 88−15240
telecopying via IBM compatible PCs *(German)* 88−41262
telephone circuit modems specifications for highly integrated fibre-optic communications network *(Japanese)* 87−28265
telephone for modem-applied data transmission, extended appls. *(Japanese)* 88−9329
telephone line equaliser using digital signal processor for modem operation 88−21888
telephone line modems, microprocessor implementation *(Polish)* 88−50064
telephone modem on chip *(Italian)* 86−69503
telephone modems, detection of synchronisation loss in data transmission test sets 85−36618
telephone-modem interface cct. *(French)* 87−48763
telephone/packet network interface using T1-based DSP modem 88−53079
teleprocessing line speedometer 86−43626
telex computer link productivity improvement and cost savings 86−16815
terminal modems for subscriber connection to ISDN *(Swedish)* 85−36822
testing 88−59888
testing, picking real world performance modem 85−25604
testing using telephone cct. simulators, Autotest ATE *(Italian)* 86−24294
tests by British Telecom 85−169
TLC32040, DSP analog front end 88−74323
TMS32010 2400 BPS modem implementation for mobile satellite appls. 88−41573
TMS32010 implementation of HF multitone modem 88−621
TMS3 2010-based ACSSB modem for mobile satellite applications 88−46790
token local networks, FSK modern ccts. *(French)* 86−20377
tone decoder for modem, design and construction *(Spanish)* 88−70602
tone detection for auto-call systems 86−43627
tone detection in a multipoint transmission network 86−37001
Trailblazer, 9600 modem from Telebit 87−62741
Trailblazer high speed modem 88−35270
transversal digital filters, degree estimation for appl. as equaliser/Hilbert filter in data modem *(German)* 87−37469
transversal equaliser, 60 Mbit/s, for satellite communications 87−56056
trellis coding, ABCs 88−27803
trellis coding, detection processes for V32 modems 88−34563
trellis coding, real-time performance for high-speed voice band modems 85−13493
trellis coding 14.4 kb/s data modem implemented with a single-chip high-speed digital signal processor 88−44099
trellis coding and echo cancellation *(Dutch)* 85−63422
trellis-coded modulation for high data rates 86−49356
trellis-coded modulation in modems for leased lines 85−46678
trends in modem ICs 86−49362
Tritel-Zug modem-telephone set, review *(German, French)* 87−62749
TSG 7515 single chip modem for Bell 212A and CCITT V22A standards *(German)* 87−28266
turnkey bulletin-board system 86−23371
TV modem equipment for 60 MHz transmission 85−63849
TV transmission on 18/60 MHz system, filter modules design 85−63843
two dimensional adaptive equalizer for voiceband datatransmission 87−5978
two-chip modem for high speed LAN systems 87−48755
two-wire data modems, echo canceller 85−47297
two-wire full duplex modem, 9600 bit/s, development *(Japanese)* 87−62745
types/standards in modems 87−28271
UHF spread spectrum communication system, fast synchronisation modem appl. 85−25729
UK modem market and availability 86−4395
ultra high speed voice-band modems, PCM signal effects 87−33589
ultrasonic PSK modem realization 88−13645
universal modem, a DIY acoustic coupler *(German)* 86−17093
US Robotics Courier 2400, review 86−64808
V.22 bis compatibility problems 85−42336
V.22 bis modem receiver, implementation using 7720 DSP 87−62759
V.22 bis modem receiver using 7720 digital signal processor 87−62752
V.22 bis modems, CMOS design, config. and performance 87−62753
V.22/V.22bis modem, operation 88−41461
V.22bis, CCITT standard for 2.4 kbit/s modems gain credence 86−37619
v.22bis modems, analogue front-end IC implementation using 3-μm CMOS process 88−67162
V29 modem receiver, 9600 bit/s, LM32900 DSP based design 87−62760
V.29 modem signal transmission, improved ADPCM *(Japanese)* 88−28575
V.32 CCITT modem standard 87−69782
V.32 modem appls. *(Japanese)* 87−69774
V.32 modems, cost reduction using DSP techniques 88−59892
V.32 modems, echo cancelling 88−73745
V/32 technologies deliver leased-line speed at dial-line rates 87−40532
variable-rate ATC coding, bandwidth compression of voice and modem signals 87−39847
variable-speed modem with all-digital signal processing *(French)* 87−69776
variable-speed voice and data modem for medium to high speed communication line 85−19931
VHF frequency synthesizer for digital modems, low-noise design 86−8033
video modem equipment for 18 Mhz transmission 85−63842
videotex systems, buyer's guide 88−3708
videotext services and telephone-line modems for access to them 85−25396
Viterbi decoder for 8 PSK modems using Ungerboeck codes *(Japanese)* 87−27200
Viterbi decoder on HF channels 87−40536
Viterbi decoding modem using dig. PM 87−40535
VLSI medium-speed highly integrated modem *(Italian)* 87−44682
VLSI modems, review 87−2973
VLSI NMOS signal processor as modem 85−40142
VLSI technology 86−4384
VLSI/microprocessor-based design, bibliography and overview 86−23582
vocoded speech transmission over HF radio links 87−48739

modems continued
voice and data integration through modems 85−25243
voice band modems, VLSI implementation with digital signal processor 86−69506
voice digitizing IC for voice/data system over PBX 86−43624
voice-band, historical review 88−3709
voiceband, charact. 88−73748
voiceband data modem, 19.2 kb/s, based on orthogonally multiplexed QAM techniques 86−23590
voiceband data modem, all-digital timing recovery scheme 87−62750
voiceband data modem, rapid equaliser training and carrier acquisition 87−55883
voiceband data modem, V.29, high speed, TMS320C25 use, implementation 87−62751
voiceband data modem using equaliser with fractional-T spaced coeffs., rapid receiver training 88−9330
voiceband data modems, Fujitsu's R&D approach 88−41463
voiceband data transmission, adaptive cancellation of nonlinear intersymbol interference 85−13717
voiceband modems, high speed, custom VLSI chip set for digital signal processing 86−43629
VSAT terminal equipment 88−60096
Walsh signals with differential modulation, data transmission 88−46069
waveform coding of voiceband data signals 88−40789
weather image transmission by dial-line modems 86−37617
Wellcon TM-7012 CH modem, Hayes compatible *(German)* 87−48761
western European market survey 88−59890
wide area networks using modems and multiplexers 86−54869
Worldport 2400 vs. CTK Adam 2412 acoustic coupler *(German)* 88−59893
WS3000 Hayes-compatible modem, evaluation 86−23585
WS3000 multi-standard modem 86−55062
XR-212AS four chip Bell 212A type modem chip set 86−49361
XR-212AS high performance Bell 212A chip set 87−69783
YAG modulator-demodulator type microwave ferrite amplifier 88−63875
zero order adaptive equalizer 87−28267

balanced binary generalised trellis ECCs 88−34584
bandlimited channels, efficient modulation 85−13436
bandlimited digital communications, voiceband modems and digital radio trends and appls. 86−64498
bandwidth efficient quadrature overlapped squared raised-cosine modulation 85−25012
Barker-coded multipulse expts. with incoherent scatt. radars 88−53340
BER prediction in presence of impulsive noise, numerical approach using measured noise data 85−57997
binary two-thirds rate modulation code for digital magnetic recording 87−12892
biotelemetry, modulation techniques 87−20974
biphase modulated signal in Costas demodulator, power spectrum 85−30284
block division slot setting for improvement of intermodulation effects *(Japanese)* 88−72726
bond graph modelling, restrictions on constitutive laws and modulation 88−8678

modulation continued
brushless permanent magnet motors torque ripple, effect of EM design and modulation techniques 87−15683
BTSC system for TV multichannel sound 85−37278
C-MAC and D2-MAC, new colour TV standards *(Polish)* 88−67533
C-type modulation for direct satellite broadcasting systems 85−20163
cable distribution networks, vestigial-sideband modulated quaternary signals transmission *(German)* 85−63796
cable TV, broadband local networks, transmission aspects *(German)* 85−52540
capacitive quartz three-point self-excited oscillator, dynamic modulation charact. 86−21928
carrier synchronisers, four-phase, in presence of static phase error, comparative performance 86−3737
CATV, cross-modulation meas. techniques 87−49323
CATV cross modulation charact. 88−29104
CATV system BTSC stereo encoder pros and cons, modulation levels 87−20717
CB transceiver modulation meter, design and construction *(Spanish)* 85−58015
CCD photodetectors, modulation transfer correction *(Russian)* 88−39734
cellular mobile radio, spectrum efficiency of radio transmission schemes 85−20087
cellular radio, frequency assignment, optimum strategies 86−16122
cellular spread spectrum radiotelephone, efficiency 86−17274
channel coding and modulation integration, demodulation and error probability 86−36906
channel encoding with redundant modulator alphabets, theory and performance evaluation 85−41833
charge transport in fluid with electrostatic cross-field modulation 86−42728
class IV partial-response signalling above Nyquist rate 88−34551
classification based on statistical moments 87−39975
coded modulation signals detection on linear severely distorted channels 88−46044
coefficient measurement using analogue convertor *(Polish)* 85−42948
coherent multichannel signals, spectral-density distortion, modulating interference presence 87−19690
coherent optical fibre transmission for subscriber and bidirectional CATV networks 85−47501
combined coding and modulation, theory and appls., 16-PSK and 32-PSK codes 88−66292
COMFET power switch, development *(French)* 87−16853
communication channels with large-scale discrete screening nonuniformities, signal distortion anal. 85−7780
communication services via satellite, book 88−55812
communications and energy conf., Montreal, Canada (Oct. 1984) 86−38
communications conf., Kingston, Ont., Canada (June 1986) 88−43596
commutation-modulation information converters, anal. using equivalent signal *(Russian)* 87−55152
compact spectrum recording, binary process maximising use of recording channel 85−24146
compressors, energy efficiency improvement using advanced control strategies *(Italian)* 87−64985
computers and communications, conf., Scottsdale, AZ, USA, (Feb. 1987) 87−51729
continuous channel, absolute error bounds 87−75685
convolutional coding combined with continuous phase modulation 85−25027
convolutor theory and applications *(Czech)* 87−47639
cordless telephone, fully digital, 900 MHz operation 85−63559
cordless telephones, spread spectrum modulation anal. 86−55222
CPM modems, squaring loop anal. for carrier recovery 87−39595
CPMFSK generator, digital 87−23970
cross modulation meas. calibration 87−39581
CRT displays, microdeflection effect on luminance distrib. within pixel 88−16354
data communications over mains cables *(German)* 85−13895
data transmission, noise immunity anal. 85−13565
data transmission by radar 86−16768
data transmission on distribution network, harmonic parameter modulation, Volterra eqns. 86−59757
DBS, adaptive modulation system for sound broadcast 85−14152
DBS, European projects, transmission standards development *(French)* 85−25829
DBS, terrestrial networks interfacing 85−20164
DC circuit model for modulation doped FETs 87−25351
DC SQUIDs with short weak links, perfect modulation of critical currents, expt. study and appls. 87−67882
deflector-modulated EBS amplifier, design 85−11030
delay line clock regenerator, performance anal. 86−48717
depth meas. method *(Russian)* 86−24748
dial-up communication systems using multi-carrier modulation technology 87−62758
digital cellular radio, Viterbi equaliser simulation 88−15384
digital cellular subscriber channel from AT&T, field performance results 88−73845
digital chirp modulation 86−10248

maritime satellite communication channel model, modulator and coding performance 87−56050
MATS-D hybrid mobile radio system, spread spectrum appl. *(German)* 87−13609
maximum-likelihood sequence estimation, detection methods performance comparison 87−2507
MDM-type operational amplifiers, macromodelling 87−16896
meteor burst communication, digital modulation techniques comparison 88−28823
meteor burst model with time-varying bit errorrate 86−30598
microwave complex modulation testing of components and systems accomplished using new tools 87−43954
microwave digital radio, modulation techniques 87−20401
microwave links, digital modulation direct generation 88−67232
microwave oscillator, self-excited, stochastic self-modulation onset 86−46613
microwave power modulation using electron-transfer diodes 85−22726
microwave techniques applied in lightwave systems 87−49058
minimum time control theory, appl. to optical modulation 87−68947
MM wave transmission under severe multipath conditions 85−25755
mobile radio, alternative modulation methods 86−10247
mobile radio, bandwidth compressive modulation-demodulation technology, genealogy *(Japanese)* 86−55211
mobile radio, delay-spread-resistant modulation techniques 88−46938
mobile radio, high speed digital transmission *(Japanese)* 86−69644
mobile radio, signal plus noise and distortion perform. and spectrum efficiency for real zero SSB 86−69681
mobile radio channels with dig. modulation, effects of time delay spread 87−68927
mobile radio data transmission system at 9.6 kbit/s, laboratory evaluation 87−3085
mobile radio systems, digital, linear modulation scheme 86−55224
mobile radio techniques 86−10246
mobile satellite ACSSB modulation, co- and adjacent channel protection requirements 88−73837
mobile satellite communication, binary multi-h modulation for fast fading shadowed channels 87−70020
mobile/personal communication via satellite, digital modulation, computer simulation 85−57211
modems, RS232C interface, modulation techniques *(Dutch)* 85−63421
modern electrical communications, book 88−37827
modified group modulation in digital magnetic recording 87−46387
modulated signal classification: a general approach 88−45870
modulation codes in digital magnetic recording systems 87−19410
MSAT-X Mobile Satellite Experiment, modulation selection 88−3901
MTCM, multiple trellis coded modulation 87−39596
multi-level modulation radio system, multipath degradation waveform factor, anal. *(Japanese)* 85−42456
multiarea AC/DC power system, power modulation controller design using eigenvalue sensitivity 88−23394
multicarrier digital microwave system, high power amplifier linearisation 87−40719
multichannel sound modulator for USA TV *(Japanese)* 88−4175
multidimensional modulation and coding for digital transmission 85−46702
multidimensional trellis-coded modulation 88−59040
multilevel modulation radio systems, unified anal. of multipath degradation 86−69574
multilevel modulation systems, performance in presence of phase noise 86−22889
multipath signals effect on mobile/personal satellite communications, digital modulation digital simulation 87−13645
multiple access spread spectrum systems, outage probability due to autointerference 87−40672
multiple trellis coded modulation 88−45887
multiuser coding schemes, bandpass adder channel 86−10253
narrow band modulation for mobile satellite appls., implementation and performance 87−34257
narrow-band modulation for mobile-satellite and cellular systems 88−60060
noncoherent spread spectrum mobile radio, M-ary modulation scheme 86−49492
nonGaussian noise, envelope and phase statistics and error probabilities 88−34549
nonuniform quadrature modulation filter banks, nearly perfect design 88−66589
offset-binary modulation schemes, carrier and clock recovery, serial demodulation 88−2936
optical communication systems, components 88−9597
optical communications, modulation system 88−53281
optical fibre communications, modulation, detection, multiplexing, demultiplexing, future develops. 88−47174
optical generation and control of microwaves and millimeter-waves 87−73769
optical receiver, binary intensity modulated with direct signal detection, optimum performance anal. and construction *(Japanese)* 85−20215

modulation continued
optimum and sub-optimum receiver structs. for rate-line detection of digitally modulated carriers 88−73172
optimum receivers and their structure and CW interference conditions *(Japanese)* 85−19451
orthogonally polarised signals, generation, modulation and reception 86−23082
p-type substrate mass-transported diode lasers for analog and digital modulation 88−20674

parametric amplifier, discrete capacitance modulation using analogue switch 85−605
partial response signalling systems, suboptimal detection schemes 85−19479
plate-and-grid modulated selective HF amplifier, optimal design 87−59194
polarisation-maintaining fibres, alignment using nondestructive temp. modulation technique 87−53983
position and velocity finding, using sensor array and linear-period-modulated signal *(Japanese)* 87−76875
power and bandwidth efficiency achieving 87−54848
power invertors, modulation modes and computer-aided anal. of harmonics *(Spanish)* 87−5672
power systems, dynamic stabilisation by reactive power modulation 86−65617
power- and bandwidth-efficient modulation formats 87−47486
pseudonoise modulation communication on electric power distrib. circuits at 60 Hz 86−4462
quadrature modulation in digitally realized data modem design *(German)* 86−16114
quadrature-time method of simultaneous television-signal transmission 87−61565
radio links, median level depression effect on channelling arrangements 87−40722
radio relay systems in Europe, conf., Munich, Germany (Nov. '86) 87−31148
radio telemetering system for measuring water level and rainfall volume *(Chinese)* 85−8740
radio transmission modulation type, automatic recognition 88−3804
radiowave propagation meas. at 6 GHz over 51 km path in UK 88−34330
Rayleigh and Rician fading channels, diversity cutoff rate eval. 87−68913
Rayleigh-distributed two-ray multipath fading, performance comparison among digital modulation schemes 85−46568
real bandlimited signals, algorithm for complex zero location 88−34636
receiver recognition of analogue modulation types 86−64860
receivers with nonlinear transfer charact., noise immunity of different types of continuous modulation 85−36170
rectified motor harmonic EM moment reduction by current modulation *(Russian)* 86−33423
relativistic electron beam modulation by external microwave source 88−27442
relativistic klystron amplifier, electron beam modulation, theoretical and expt. study 88−50587
review of modulation, coding & speech digitisation techniques 87−27155
RF amplifiers, complementary transistor type, cross modulation compensation study 85−17182
RF filters for advanced digital modulation systems, design 87−24307
RF signal meas. setup 88−14386
RF signal modulation recogniser, microcomputer-controlled, automatic receiving system appl. 86−29872
RF signals subjected to propeller modulation, spectrum charact. *(Russian)* 88−72535
RF technology, conf., Anaheim, CA, USA (Feb. 1987) 87−36340
Rohde & Schwarz FAMA modulation-depth meter for avionics appls. 88−36640
satellite communication network design parameters and budget considerations 87−56102
satellite communication systems, development 88−3944
satellite communication systems, modulation and coding 85−8377
satellite communication systems, spectral efficient modulation techniques 86−49568
satellite communications, digital, trends *(Japanese)* 85−36986
satellite communications with small mobile earth possibilities 85−52307
satellite ground stations, small terminals, inexpensive, appl. and design, present and future 87−28511
satellite link modulation scheme evaluation, development of real-time waveform generation and capture system 88−53218
satellite links, modulation and modems 88−73877
satellite links, modulation-transfer noise effects among FM and digital signals 86−64174
satellite systems, modulation and coding 85−36968
satellites, onboard processing, systems and benefits 87−76643
SCPC satellite communications systems, state-of-the-art 85−42524
self-noise associated with suppressed carrier recovery 88−2602
sequence estimation over Gaussian channel with unknown carrier phase 88−8671
signal classification and identification, design to lower probability 88−21216
signals reception with unknown delay, modulating noise presence 87−39780
sine wave crossings, modulation methods, note 85−30144
single-sideband modulation for high power broadcasting transmitters, new Brown Boveri method 86−24039
sinusoidally modulated reactance surface, high-order wave charact. 85−30069
sound signals, signal processing *(German)* 87−69102
sound signals subjected to digital companding processes, programme-modulated noise levels, report 85−47642
space shuttle appl., digitally phase modulated signals, demodulation/remodulation performance 85−31011
spectral anal. of pulse sequence period, narrow-band random process modulated 85−63058
spread spectrum, antijam and low probability of exploitation, book 88−55811
spread spectrum communication, book 85−60648
spread spectrum communication systems bit slice microprocessor appl. 85−63528
spread spectrum for low cost satellite services 86−37830
Spread Spectrum modulation technique for cost effective multiplexing 87−2411
modulation continued
spread spectrum overlay service with forward-error-correction coding 88−47009
spread spectrum radiocommunication systems *(Czech)* 86−4475
spread spectrum synchronizing loop for spreading code modulated by code shift keying 85−42422
spread spectrum techniques, modulation, interf. and multiple access considerations *(Hungarian)* 86−4469
spread-spectrum signal processing with SAW convolvers 87−55966
SSB measurements with radiocommunication tester CMT 88−34974
SSB transparent tone-in-band techniques for mobile data communication 85−57214
stepping motor integral position transducer 85−9935
stepping motors for feedback systems appl., random number modulation/nonlinear techniques 86−51671
subcarrier measurement systems, crosstalk suppression using double modulation technique 88−35366
surface waves excitation, modulated electron beam, plasma boundary incident 87−68791
switched capacitor structs., modulation and filtering 87−883
synchronizers, lower bound tracking performance 86−64183
synchrotron orbital radiation, carrier modulation system for minimising LF noise modulation 85−20769
TCM, expurgated lower band on free Euclidean distance 88−34582
telecommunication channels, combined coding and modulation schemes, performance anal. 86−54421
telecommunication systems, trinary logic operations and circuitry 87−37240
telemetering systems, data samples reception, anomalous errors rejection 87−62575
telemetry from Chinese satellites 88−21580
terrestrial digital radio, network planning aspects using higher order modulation schemes 87−40711
terrestrial digital radio relay equipment in UK, system outage prediction model 87−34397
texture segmentation using Gabor modulation/demodulation 88−8836
three phase pulsewidth modulator for overmodulation 85−22734
Three-Gorge Hydro Project for power system interconnection, DC modulation *(Chinese)* 87−71633
three-grid Bayard-Alpert gauge, continuous sinusoidal wave modulation 86−5579
three-machine network, electromechanical oscillations, damping and dynamic stability 85−9448
thyristors, advantages of staggered firing and industrial furnace control appl. *(French)* 85−60562
time diversity modulation strategy for the satellite-mobile channel 88−45838
time encoded deltamodulation of speech signals 87−19628
train position detection and track-train datatransmission using audio frequency track circuits 86−37034
transceiver, digital, hybrid simulation incorporating multiple modulationtechniques 86−17273
transfer function *(Hungarian)* 85−25013
transmitted-signal-quality monitoring system *(German)* 88−47267
trellis coded modulation schemes using lower bound on free Euclidean distance 87−39676
trellis coded modulation using Viterbi algorithm in presence of intersymbol interf., decoding algorithms 88−45877
trellis coding with asymmetric modulations 86−54422
trellis-coded modulation *(German)* 87−68953
trellis-coded modulation for high data rates 86−49356
trellis-coded modulation in 19.2 kbit/s VLSI modem 86−55065
trellis-coded modulation using binary convolutional codes, performance anal. *(Japanese)* 88−59029
TV, optical fibre replacement for coaxial cables *(Italian)* 87−70044
TV standards, development 85−37206
two-channel video transmission, coherence modulation and multiplexing 88−47134
two-loop adaptive delta modulation system development at bit rate lower than 10 KBPS *(Chinese)* 86−54420
two-path fading equalisation, digital modulation techniques anal. 86−68781
two-tone SSB anal. 85−58723
UHF/TDM communication link for Worldwide Airborne Command Post system, feasibility study 85−8334
UK optical wideband subscriber loops for CATV and LANs 85−20227
ultracold neutron beam modulation by thin film ferromagnetic shutter 86−60505
unknown modulated signal, carrier freq., modulation type and bit rate estimation 88−8786
US parametric modulation of EM wave at water-air boundary 87−21806
valve convertors functional diagnosis, by logic anal. of control vector conditions and input/output signals *(Russian)* 85−32604
valve motor, rectified current linear modulation charact. eval. *(Russian)* 85−15991
vector modulation in a signal generator 88−29471
vector signal generation and analysis 88−27732
vehicular communications technology, conf., Philadelphia, PA, USA (June 1988) 88−69998
vehicular technology, conf., Dallas, USA (May 1986) 86−66535
vehicular technology, conf., Tampa, FL, USA (June 1987) 87−65070
VHF digital sound broadcasting, modulating methods and channel distrib. *(German)* 85−37197
VHF SSB mobile radio links, speech actuated AGC *(Spanish)* 87−69990
VHF stereophony transmission, electronic circuits anal. *(German)* 85−31144
video recorders, automatic modulation control appl. *(German)* 86−11293
video recording systems, modulated pilot tone 85−8603
VSB modulation for high-speed data transmission over narrowband channels, SW mobile radio appl. *(German)* 86−48743
VSB multilevel transmission, automatic phase control circuits using equaliser tap weights 85−13457
waiting time jitter reduction by synchronizer stuff threshold modulation 88−45853
wave evolution and modulation in distributed systems 87−490
Weaver-based direct conversion SSB systems, fading correction circuits evaluation 86−37803
wide aspect ratio TV system with full NTSC compatibility 88−41836
wideband mobile radio, channel simulator *(French)* 88−46928
wireless data communication techniques for indoorapplications, modulation techniques 86−17210
X-ray beam position tracking cct., expt. tests at DESY 85−37982

modulation continued
Si, optically induced electron-hole plasma, attenuation of ultrashort mm wave pulses using SOS waveguide 87−24459
modulation doped field effect transistors *see high electron mobility transistors*
modulation doped structures *see semiconductor superlattices*
modulation factor *see modulation*
modulation index *see modulation*
modulation spectroscopy

acousto-optic modulator, distortion function, hypersound generation by slow wave system 86−9637
acousto-optic modulator in laser plotter, PC pattern production appl. 87−66757
acousto-optic phase modulator, linearisation of modulation characteristics 88−51604
acousto-optical, nonreciprocal effects in fibre optic sensors 88−45124
AD630 modulator/demodulator chip, Hall probe and pipeline convertor appl. 85−11039
AD 630 modulator/demodulator for secure signal transmission, monolithic device config. and appls. *(German)* 88−12256
adaptive delta modulator, design 87−73371
agile modulator reliability anal. 88−67550
AM radio transmitters, pulse modulators with thyristors appl. *(German)* 88−9708
AM signal envelope harmonic factor, minimisation of quasiphase modulation effect 88−66491
amplitude modulator, nonlinear process simulation using SIMANAL program *(Spanish)* 86−52736
amplitude modulator and demodulator design based on hard limiters 87−65940
amplitude-weighted quadrature phase shift keying using SAWtechnology 86−10244
analog feedback coders dimensioning, loop delay consideration 88−21057
analogue multiplier integrated circuits developed inArgentina *(Spanish)* 85−49786
artificial line, output pulse energy characts. 85−6236
audio processing ICs, operational transconductance amplifiers 88−56488
automatic discrete freq. tuning of FM generator 85−17219
balanced modulator cct. using matched FETs 86−46626
bi-phase modulator cct., high performance, low cost 86−20382
bichromatic acoustooptic components *(French)* 85−56385
binary microwave phase modulator, design and characts. *(Polish)* 86−58044
Blumlein modulator, matching to nonlinear load 85−663
BPSK modulator, low-loss design using variable phase shifter 87−59258
BPSK modulator for 3.7 to 4.2 GHz and having high carrier rejection 87−37536
BPSK modulator for high carrier rejection at 3.7 to 4.2 GHz 88−25067
broadband QPSK reflection modulator for digital satellite communication, design using finline techniques 85−8370
CATV systems, headend noise and multiple agile modulators 87−70265
channel encoding with redundant modulator alphabets, theory and performance evaluation 85−41833
class-G power amplifiers, average efficiency 86−67049
CMOS analogue building blocks for instrumentation 87−34954
CMOS delta modulator IC, design and implementation 86−8066
CMOS double-balanced modulator, design 87−31766

modulators continued
CMOS JFET pulse density modulator for interpolative high-resolution ADC 86−34630
CMOS modulo arithmetic comb filters for sigma delta modulators 88−73015
CMOS narrowband signalling filter for FDM systems, switched-capacitor networks 85−28638
CMOS pulse density modulator for high-resolution ADC 85−28421
CMOS slope adaptive delta modulator for high-resolution voice-band ADC 87−16957
combined direct/indirect FM modulator characts 87−44700
combined freq. shift modulator/mixer cct., analysis 87−73370
compact modulator for generating flat 250 kV, 1 μsec pulses for high impedance thermionic diode 87−37080
constant factor incremental delta modulator design, step-size algorithm 86−52732
coplanar strip line-type microwave modulator usingphotoconductivity *(Japanese)* 85−55124
Crossatron gas discharge modulator switch, characts. and operation 85−23377
cryoelectronic units for infralow frequency signal amplifiers 85−46115
current control modulator for high power switching convertors, thick film cct 85−33663
current-central modulator, low-cost standardised design, high-power switching convertors, appl. 85−44873
DC drive operation with pulse ratio modulator 88−17638
delta modulators with delayed decision, simple algorithm 85−30213
delta-sigma modulators, nonlinear behaviour anal. 87−59254
delta-sigma modulators with bandlimited Gaussian inputs, anal. 88−72727
differential modulator for digital synthesis of 3-phase modulated waveforms in motor appls. 87−15684
differentiating spatial light modulator based on nematic liquid crystal, for optical preprocessing and pattern recognition 87−68218
digital adaptive delta encoder with companding, modelling 87−61566
digital data transmission over distributed electrical networks, effect of modulators and communications links parameters 87−39558
digital data transmission system, electrooptical modulator operating point drift calc. 86−49139
digital microwave signal shaper, compact spectrum constant-envelope, anal. 87−19683
digital modulator, low-bit-rate, using differential MSK, design and performance 87−24001
digital picture storage for SSTV, FAX and WEFAX 86−52740
digital pulse width modulators, US freq. range for invertor appls. 88−30879
digital signal processing quadrature modulator for FM digital and analog signals, design 88−15398
diode modulator cct. for pincushion distortion *(Polish)* 86−40975
discrete data transmission over distributed electrical networks, effects of modulator and communications channels parameters 87−39557
distributed-gain amplifiers, phase characteristics for excitation of acousto-optic modulators 88−50037
double integration delta-sigma modulator for ADC and DAC 87−66280
Dragon low impedance megavolt modulator for performing relativistic electron beam experiments 85−23349
DSB/AM signals, generation/detection study, modulator design using sine-wave crossings technique 86−52731
dual-mode, QPSK/16-QASK, cct. design, architecture 87−5725
dual-mode ferrite modulator, research 85−11114
electro-optic modulators, design and performance for microwave and MM wave fibre optic systems 86−69796
electro-optical frequency modulator as optical heterodyne, operation analysis 88−2053
electromechanical laser-beam modulator with high-frequency stability 87−19012
electronic phase modulators for analog-digital converters 88−70869
EM gun, inductive modulator circuit for energy transfer and storage 87−47128
fault protection in high power pulse modulators 87−37081
FIR switched-capacitor modulators for discrete QAM, realisation 86−62497
FM modulators, meas. technique for VCO dynamic behavior study *(German)* 85−33725
FM signal distortion in nonlinear oscillatory cct. 87−65949
FM signal generator with stable centre freq. 88−70601
FM signals demodulation using acousto-optics 85−51537
FM-AM conversion using injection-locked X-band Gunn oscillator 87−73692
four-state phase modulator for an X band digital radiolink *(Polish)* 88−25517
frequency difference generation by circuit 86−57719
FSK modulator for SCA paging 85−22720
general impedance converter circuits with time-dependantparameters, appls. *(German)* 86−20711
generation of a high-quality FM signal over a widefrequency band 86−34627
gigabit QPSK modulator 87−75702
GMSK modulator, quadrature-type, CMOS LSI single-chip baseband waveform generator, mobile radio transmission appls. 85−3375
gyrotron modulator, computer simulation versus actual performance 87−37827
hard limiters, theory and appl. 85−23053

Ka-band 180° PSK/ASK modulator, E-plane type with planer fin line cct. 88−56998
Ka-band finline mixer/modulator IC for MM-wave appls. 85−6517
kilovolt pulse modulator circuits using optically activated switches 85−22732
Ku-band continuous phase modulator with hyperabrupt varactor diode 88−50331
Lamb wave delay line oscillator, appl. in frequency modulator 85−18529
laser addressed liquid crystal light modulators for colour electronic imaging with Mead paper 88−16355
laser printers with solid-state light modulators for rapid output scanning 87−26581
light modulator for motion picture camera, field standard facilities and requirements *(Czech)* 87−68239
linear induction accelerator, compression sections and nonlinear shaping ccts. 86−5832
linear modelization of first and second order oversampled sigma-delta modulators *(French)* 88−12259
logarithmic convertor, using PWM technique 86−1331
loop-gain modulator, linear amplitude modulators 88−6701
LUEK-20 linear induction electron-ion ring accelerator, modulator-generator of accelerating pulses 88−68117
Mach-Zehnder low-loss modulator using mode coupling Y-branch waveguide 88−47129
magnetic, cascade comparator A/D comparator appl. 88−12454
magnetic, for cascade A/D convertor 87−10938
magnetic switching modulator, design considerations 85−5308
magneto-optical spatial light modulators, digital-optical matrix multiplication 88−8004
magnetron transmitter modulation using MOSFET pulse amplifier 85−61631
MESFET amplitude modulators, dual gate, optimum design 85−11115
microcomputer implementation and control systems in power electronics, conf., London, UK, (Apr. 1988) 88−55516
microwave amplitude modulator 88−71025
microwave ferrite phase modulator operation, magnetisation dynamics effect 85−62205
microwave phase modulator with nonideal elements, characts. 88−50330
microwave phase modulators 85−61167
microwave power modulation using electron-transfer diodes 85−22726
microwave single-sideband modulator 86−27572
microwave varactor-controlled oscillator-modulator circuits, linearity limits 85−61453
microwave waveguide switch for a low-noise radiometer 85−14997
miniature SSB microwave modulators, design theory 88−25447
minicomputer interface for magneto-optic spatial light modulator 88−9884
MM-wave biphase modulator in fin line, design and performance, satellite terminal appl. 87−24460
MM-wave QPSK modulator, design using fin line/IC techniques, satellite earth terminal appl. 87−6108
MMIC attenuator and vector modulator using segmented dual-gate FETs 88−32472
MOTOCONIC chip-set: complete control system for digital PWM inverter drives 88−55667
MSK signal generation using 8 PSK modulator 87−37085
multi-loop sigma-delta quantisation , spectral anal. 88−72728
multi-mode modulator, design with 8 voice/data modes and broadband operation 86−40970
multi-octave phase modulators, reflect. cct. design for microwave freqs. 85−17858
multimode pulsewidth modulator, 8085A microprocessor based 87−37001
multistage delta-sigma modulator without double integration loop, AF ADC and DAC appls. 87−16958
new universal all-digital CPM modulator 87−37073
NMOS wideband balanced modulator/amplifier using 1-μm transistors 88−32019
noninvasive pulse modulator concept for nonradiative dielectric (NRD) waveguide, construction and performance 88−25377
octave-band high precision balanced modulator, microstrip implementation for microwave freqs. 85−17857
offset-binary modulation, satellite communications appl. 85−20168
optical communication phase modulators using lithium niobate *(Swedish)* 87−76799
optical control of microwave devices, review 87−11056
optical cryostat with cooled modulator, far IR detector 86−44321
optical fibre communications, modulation, detection, multiplexing, demultiplexing, future develops. 88−47174
oversampled sigma-delta modulation 87−47470
p-i-n diodes for attenuators, switches and modulators, appls. and performance limitations 87−18078
parallel hybrid type of DC amplifier using modified magnetic modulator 87−10697
parallel hybrid type of DC amplifier using modifiedmagnetic modulator 86−20337
PCM 30, implementation on German railways, fault location and disturbance elimination *(German)* 86−10659
PCM 30 equipment use by (East) German State Railway *(German)* 85−24873
phase modulator with improved modulation-characteristic linearity 88−50062
phase-locked modulator and processor applications for cable TV 87−49325
photoreceivers for microwave and millimetre wave applications, use with optoelectronics 87−20485
PLL-FM modulator, reference freq. switched, config. and characts., mobile transceiver appls. *(Japanese)* 87−37077
PLZT electro-optic modulator, design, fabrication and performance 86−58796
polarisation state control using fibre optic techniques 87−26035
polarising optical-fiber modulators 86−2768
power modulators, IEEE conf., Arlington, VA, USA (1984) 85−22079
PSK digitally based modulation system for data transmission over telephone lines *(German)* 85−33730
PSK modulator design using CAD *(German)* 88−6700
PSM radio transmitter, SSB operation 87−13862
modulators continued
pulse modulator using MC 14528 dual monostable multivibrator 86−855
pulse step modulator, high-power, for 500 kW SW and 600 kW MW transmitters 85−61163
pulsed power for repetitively pulsed high-power discharge lasers 88−24053
PWM, offers 12-bit precision 85−54741
PWM modulator, numeric IC 88−32057
PWM modulator with bi-processor architecture, voltage adaption 87−44580
PWM modulator with digital superimposed controller for pulse pattern changes 88−70609
PWM modulator with ultra high performance, full numeric IC 88−70610
PWM phase modulator, low-cost design *(German)* 86−8058
PWM staircase modulator, digital implementation 87−65951
PWM voltage space vector concept, inverter appl. 87−43222
pWM waveform generation using microcontrollers for AC drives 88−55666
QPSK data modulation/demodulation circuits using passiveRF components, design and operation 86−20379
QPSK digital broadband reflection modulator design using finline techniques, satellite communication appl. 88−53237
QPSK high-speed modulator and demodulator with subharmonic pumping, operation and performance 88−70607
QPSK MIC exciter and modulator, microstrip implementation for 60 GHz operation 85−17870
QPSK MIC modulator and exciter, 60 GHz design for high data rates 85−23119
QPSK modulation and demodulation, Lamb wave signal processing device design *(Japanese)* 88−13652
QPSK modulator, 4 GHz, for high bit rates 86−35084
QPSK X-band waveguide modulator 88−50329
QPSK-modulators designed by CAD methods 87−31765
quadrature modulator for analog and digital FM signals, digital signal processing type, design *(Japanese)* 86−67110
quantization noise in adaptive weighting networks 85−13216
radio broadcast transmitter, modulator automatic signal level limiter 87−49241
radio broadcasting, digital, multiplexing and modulating devices, Usingen TV-SAT ground station *(German)* 86−43953
real-time spatial light modulator, photoinduced space charge fields in BSO crystals 88−2065
regenerative satellite communications system, uplink filtering 88−41587
resonant charging of modulators in linear accelerator 87−70947
RF environment simulation using simulator/modulator combination 85−58211
RF modulation device and technique for plasmaprocessing and diagnostics 86−40968
RF modulators using two power MOSFETs 86−20376
RF variable signal source, with modulator design 86−57699
ring modulator, waveform combinations 85−22724
ring modulator for electron music appls. 85−26155
S-diode nanosecond pulse generators for modulationof semiconductor generators 86−40964
Schottky diodes as FIR modulators, performance calc. 88−25492
sea, radar images, optical anal. using PRIZ modulator 87−56248
semiconductor injection laser supply, high-current pulse modulator design *(Polish)* 86−737
shear horizontal wave devices for HF-band freq. modulators and demodulators *(Japanese)* 87−38641
SHF constant-resistance ASK modulator, config. using double-sided MIC 87−73687
sHF waveguide semiconductor modulator for space radiometric systems 87−57362
short pulse modulator using asymmetrical thyristors, airport runway traffic monitoring *(French)* 85−20998
short-pulse tube modulators, effects of stray capacitance on performance *(Japanese)* 85−28424
sigma-delta type, high-order, stability anal. 86−67114
signal generation with freq. manipulation, digital method *(Bulgarian)* 87−16919
single-sideband modulator using 3 D SHF ICs 86−58059
SLAC linear collider, modulator system and power supply 87−51359
sliding regimes in analog signal encoding and delta modulation circuits 88−34554
solid state radar transmitter modulators, regulated resonant charging system 85−22730
solid-state flashlamp modulator 88−24255
solid-state transmitter/modulator for the mode select airport beacon system sensor 87−77822
SOS waveguide, optoelectronic modulation of millimetre waves 87−24459
spatial light modulators and their applications 88−2064
SSB, integrated soft substrates implementation 86−8064
SSB acousto-optic FM in single-mode birefringent fibre 86−68358
SSB modulator, cct. design for CW laboratory signal generator appl. 86−20381
strip line-type microwave modulator usingphotoconductivity 86−67463
submillimeter wave receiver technology, conf., Lake Arrowhead, CA, USA (April 1987) 88−24310
superconducting conductivity modulator for He-temp. range, small DC signal meas. appl. 86−44233
superconducting modulator for extremely sensitive voltage meas. across multifilamentary supercond. wires 87−77347
surface wave electro-optic modulator 87−46594
switched capacitor balanced-modulator cct. synthesis *(Japanese)* 87−24000
switched capacitor circuits, anal. and design *(Japanese)* 86−695
switching power supply, 1 MHz control by PWM IC 86−34523
switching power supply improvement by integrated pulse width modulators *(German)* 88−56434
switching regulators, loop gain meas. technique using digital modulator 86−50192
System A modulator for 405-line TV sets 85−37250
tamed FSK modulation for digital signal transmission, technique and cct. realisations *(German)* 85−51536
TDA 5660P, modulator circuit for TV, video and sound circuits, 48 to 860 MHz 86−14072
TDA 5660P modulator chip from Siemens *(German)* 86−27152
tetrahertz freq. performance of Schottky diodes as far-infrared modulators 88−25541
TFTR neutral ion beam source, power supply arc modulator for system protection 87−51360
three phase pulsewidth modulator for overmodulation 85−22734

modulators continued
three-phase asynchronous motor pulse width modulator designed for frequency converters *(French)* 87−36964
three-phase power frequency conversion with high efficiency and high spectral purity 85−10965
thyristor modulator of square megawatt current pulses 85−11002
TMC 2243 FIR filter IC implementation for digital SSB modulation using Hilbert transform 87−47465
transistor pulse modulator with magnetron load, transients study *(Russian)* 86−40976
tri-level delta-sigma modulation for improved SNR and ADC 87−65952
TV broadcasting, stereo sound performance *(Spanish)* 88−15741
TV IF modulator design and stereo performance 87−76997
TV IF modulator for stereo standards and sound output values meas. *(German)* 87−76964
TV modulator for several European systems *(Czech)* 86−849
TV modulator system for remote monitoring of amateur band receiver 88−59557
TV signal transmission, laser system for connection with interference modulator *(Bulgarian)* 86−11068
TV VHF/UHF modulator IC 85−659
TWT grid modulator, cct. 85−54753
universal modulator by direct digital synthesis 87−44706
UQPSK modulator, unequal power split hybrid coupler design techniques 87−17324
vacuum tubes, bootstrap driving circuit modulator using 1500 V power FET 85−23318
varactor analogue phase modulator, 35 GHz, integrating waveguide technology 86−58050
VCR, IR remote-control preamplifier and RF modulator, design *(Japanese)* 86−4872
vector modulator, output amplifier, and multiplier chain assemblies for a vector signal generator, HP 8780 A 88−29475
vector modulators, design using PIN diode attenuators 87−17284
VHF/UHF TV modulator for computer display 85−37222
VLSI ADCs and DACs with multi-stage noise shaping modulators 87−17181
wideband FM subsystem for a low-noise synthesizer module 88−29474
wideband NMOS balanced modulator/amplifier 88−590
wideband phase modulator, 1 to 30 MHz 87−65944
wideband power amplifier, LF cut-off reduction 87−52397
ZISM: a nonlinear Z-domain simulator for delta-sigma modulators 88−25065
$Bi_{12}GeO_{20}$ acousto-optical elements for spectrum analysers, limiting parameters 87−12280
GaAs MESFET MMIC double balanced SSB modulator 87−73786
GaAs S-band monolithic linear dual phase modulator 88−32457
GaAs Schottky diodes for multipliers, mixers and modulators, photolithographic fabrication 86−27606
GaAs acousto-optic modulator devices, GHz frequencies 88−26908
GaAs monolithic HF modulator IC for laser diode noise suppression 86−68600
$Hg_{1-x}Cd_xTe$ detector heterodyne evaluation at 2 GHz by resonant-cavity electro-optic laser frequency modulator 88−19377
KD_2PO_4 crystal modulator with coaxial resonator, Q-factor and losses, expt. study *(Russian)* 86−42022
KD_2PO_4 electrooptic light modulators based on longitudinal Pockels-effect 88−13943
$LiNbO_3$ guided-wave devices for single-fibre video and bidirectional voice/data transmission 88−73923
Na beams optical pumping, efficient electro-optic modulator design 87−46595
XeCl laser system, repetitively pulsed, magnetic modulator for, design and operation 85−24493

flat panel LCD assembly techniques *(French)* 88−42238
flat photovoltaic panel operating temp. calc. and expt. 86−45687
flat-plate photovoltaic module and system price projections 86−45695
Flat-Plate Solar Array Project module development and test results 86−45683
flexible module carrier direct connection package 86−35182
flush pin memory module, fabrication of substates with tapered holes 86−8656
foil-pinned module surface mounting technique 86−8599
functional reliability of an onboard memory system with considerations of cosmic ray induced soft errors *(Japanese)* 88−50148
gas turbine generator modules for Hong Kong and Shanghai Banking Corp. *(Japanese)* 86−51483
gate arrays, novice user experiences 88−32181
general purpose trigger processor, modular implementation 85−43281
gold mining stopes electronic control systems, philosophy and development 85−42920
ground support system for generic imagery processing and exploitation 88−48308
GTO thyristor modules, series-connected for economic invertors/convertors design *(German)* 85−21709
Harris Microwave Semiconductor low-current MMIC amplifier for military EW modules 88−63935
heat removal by convection in electronic equipment *(Czech)* 87−65211
hermetic chip carriers appl. in military PWBs 85−10497
hermetically sealed microwave modules, design and construction 86−53059
Hewlett Packard PC instrument system development 87−63257
HEXPAK, high power HEXFET module for control and power conversion appls. 87−52380
HEXPAK power modules with MOSFETs, 60 to 500 V, 28 A, features 86−46557
hierarchical IC artwork verification system, resistance extraction 86−28428
hierarchical interconnection technology, child and daughter boards 87−59959
hierarchical interconnection technology connector system 87−58688
high density memory module trend 85−49852
high density memory package using flexible cct. technique 85−22257
high density pinless module array connector 86−14606
high resolution fluorescent displays *(Italian)* 87−56750
high speed switching power modules *(Italian)* 87−53498
high-density packaging of main storage, memory array modules 86−8219
high-density PCBs, VLSI maintainability issues 88−19508
high-performance modules, elec. parameters meas. techniques and test hardware 88−190
high-powered IC chip molecule, forced convection liquid cooling technique 85−44515
high-powered LSI chips packaged on ceramic modules, heat removal technique 85−39555
high-speed logic modules with programmable functions, sampling and recording appls. 88−67675
high-volume assembly protection using conformal coatings 85−5760
hodoscope module with miniature photomultipliers 88−36369
housing system in plug-in technology *(German)* 87−65203
HP16500A logic analysis modular system with touch sensitive screen *(Swedish)* 88−15989
HP's MM-wave source modules 88−42258
HP 8642A/B internally modular signal generator mechanical design 86−65206
HP-MSIB Modular System Interface Bus for modular meas. systems 86−44133
HTGR, small modular unit with pebble bed reactor 85−38711
HV power supplies, market evolution 85−16109
hybrid, chip alignment templates for multichip module assembly 87−53081
hybrid clock oscillator modules as deposition monitors 88−57856
hybrid I/O module for K 1520 *(German)* 86−67276
hybrid IC non-contact bent pin detection using laser diffraction 86−62980
hybrid module, reaction between dielec. and metal substrate 86−53270
hybrid module manufacturing techniques yield improved packaging alternatives 85−34396
hybrid power amplifier modules for wideband RF operation 87−16907
hybrid RAM modules using advanced multi-layer technology 86−14746
hybrid SRAM module, 1 Mbit high-speed device, config. and packaging design 88−56632
IBM 8150 Model B processor, heat sink and cap assembly 86−52888
IBM DRAM chip, plastic surface-mount modules vol. prod. by area wire bond techniques 88−63062
IBM module airtightness testing by holographic interferometry 88−31502
IBM System/36,38 peripheral interface CMOSIC module for twinax cable data transmission *(German)* 88−56721
IC CAD, simulation methods for flexible manufacturing appls. *(Russian)* 86−46044
IC memory chips, clipped decoupled twin-carrier module 85−44517
IC modular packaging technique for elec. and mech. reliability 87−16407
IC module pin, subsurface soldered 86−34039
IC module simultaneous placement method *(German)* 85−54593
IC modules, thermal grease module cap design 87−23340
IC packaging, Pb/Sn hermetic sealing using solid-state diffusion 86−40547
IC with many pins, routing procedure, circular permutation layout problem solution 85−28304
ICs, modular combinatorial ccts, test generation 87−66089
IDN to ISDN, modular switching *(Hungarian)* 87−76485

Sharp Corp. NT131 solar module, review *(Japanese)* 86−56946
shell antennas for digital radio relay systems 87−40712
Siemens IR detector module, review *(German)* 87−49743
Siemens power supply modules for printed circuit board assembly 87−36997
signal conditioner modules for control systems 88−42016
signature analysis implementation for board fault isolation testing 88−19018
silicon compiler, optimisation subsystems 87−67452
SIMADYN D digital closed-/open-loop control system for elec. drives, hardware structure 87−16090
single ceramic substrate module implementation of processor and memory, CMOS appl. 86−20581
single-mode fibre/laser diode pigtailed modules for digital communications, Toshiba TOLD 300 series 87−40937
SITEST 110 real-time test system for modules with microprocessors 88−4287
situation analysis, role of logic analysers *(German)* 87−41443
slit crimp for thermal modules 86−34043
small, modular hydroelectric plants, cost and design study 85−4997
small-outline laser diode sub-module for IC packages 85−7333
SMD electronic modules, automatic assembly equipment *(German)* 86−62928
SMF laser diode module design using thick lens *(Japanese)* 88−8223
SMPS highly integrates power modules for compact powersupplies 86−34541
SMT based CAD saves memory module design time 85−45337
SMT connector, performance characterisation 88−71247
SMT experience, problems and solns. 86−58195
SMT modules test strategies modification, w.r.t. yields and costs 88−57144
solar cell modules, high-efficiency single-junction and multibandgap struct. design 86−19493
solar cells and modules, spectral responsivities meas. 88−17966
solar cells development, thin film technology potential 86−40101
solar photovoltaic/electrolyser with active power conditioning for solar hydrogen production 85−65440
solar power plants with quasi-paraboloidal concentrators 85−43893
solar powered hybrid sensor modules for space appls. 85−31474
SoS module as technological change *(German)* 87−48358
Space Station fault diagnosis, using communicating expert systems 87−63864
speech processing unit, high speed, microprocessor appl. 86−59240
speech synthesis module for the K1520 *(German)* 87−39697
speech synthesis modules, comparison of clarity of different modules *(German)* 86−69988
standard IC module design, decision support model 88−33332
standards for emerging avionics technologies 86−18476
strip layout: a new layout methodology for standard circuit modules 87−65709
subarray modules and automated manufacturing technology for cost reduction of phased array antennas 87−33549
surface mount design and assembly for high density complex modules 87−44004
surface mount high-density ceramic thick-film multilayer interconnect board, design and assembly 87−51864
surface mounting interconnection standards, hierarchical technology 87−37667
surface soldered pinless module connector 86−14721
surface-mountable modules, deformed pin arrangement for improved PC card/board attachment 85−45326
surface-mounted array-type plastic chip carrier 85−28785
switch mode power supply design modular approach 85−39918
switched mode power supplies using functional power modules 88−30816
switched mode power supply, semiconductor module from Brown Boveri *(German)* 87−23901
switchgear, LV, modular units, Brown Boveri *(German)* 85−21737
switchmode power supply, 120 VA 85−61068
synthesizer tuning and control systems, modular software and hardware design 85−4003
System X line modules, automated testing 86−30496
table-driven ATE models design in simulation environment 88−53557
tariff instruments, new generation *(German)* 85−48633
TEMPEST requirements, design and testing 87−7551
test equipment production, testing and performance 88−35848
test head fabrication, modular block approach 85−63967
test pattern generation for ccts. with three-state modules, improved Z-algorithm 87−24099
testing of functional modules, pin electronics architecture 87−37234
text-to-speech conversion system to develop prosodic rules 88−59079
thermal conduction module, metal piston design for improved chip cooling 86−7524
thermal conduction module, packaging technology for bipolar logic cct. chips 85−60772
thermal module, high performance, for computer packaging 88−6275
thermal module design for advanced packaging 88−6274
thermal resistance of power modules having solder voids, modelling with finite elements 88−11751
thermally conductive modules, automated pin inspection tool 87−5237
thermally enhanced multilayer flexible module carrier system using plated-through via structure 86−34044
thermoelectric cooler based on TEMO-6 and TEB-023modules, for small photodetectors 86−44320
thick film hybrid miniaturised modules improve power supply design 85−17146
thick film ignition module, laser soldering, process parameter variations effect, analytical model 87−6287
thick-film hybrid ICs, high-density packaging technology and reliability aspects *(Japanese)* 85−39558
thick-film power hybrid, wire-creep rupture problem, soln. 87−1118
thin film module package, programmable line width and ground plane technique 86−8657
thin lightweight LCD module development *(Japanese)* 87−56758
thin-film modules with matched thermal expansion 87−32188
third-generation motor driver ICs, clocked current control *(German)* 88−7645
modules continued
three-phase invertor using hybrid power modules and SMD *(French, English)* 88−38380
thyristor modules with solder contacts for high power applications 85−23766
time-scale warping algorithm and associated modules for speech parameter contours 87−61685
timing accuracy in high pin-count VLSI module test systems, calibration technique 88−19488
TLE 3102 phase control IC, motor control with electrical isolation of operator module and power unit 88−37180
training module for anal. and design of analogue and digital ccts. *(Spanish)* 85−20657
transmission networks, module oriented user interface, for electromagnetic transients program (EMTP) 85−27018
Transportation electronics, conf., Dearborn, Michigan, USA (Oct. 1984) 85−63246
TRIMOSBUS self-clocking interface, implementation and anal. 87−18191
TTL driving optical arbiter module 85−20175
twinaxial connector pluggable cable module for data displays 85−6576
U884 development module, review *(German)* 88−56687
ultraminiature 5-10 GHz, 2-W transmit module for active aperture application 88−12604
undersea fiber-optic regenerator using an integral-substrate package and flip-chip SAW mounting 85−37036
uniform circuit placement 86−21739
universal modular emulators, development *(German)* 85−33187
universal power supply module, design 88−38377
universal tone transmitter/receiver module for telephone switching design 86−10851
Unix single-card system *(French)* 87−10893
US Air Force modular ATE program 87−20892
US Army frequency agile synthesizer program 87−23986
UT10 modular digital office, field experience *(Hungarian)* 87−76460
vacuum fluorescent alphanumeric display module 85−64025
vehicle electronics including power supply, control modules, actuators and communication systems 87−51596
vertically mounted module, config. for high density printed circuitry 85−10513
VHF radio station FM-300 of system DRS-3 *(Russian)* 85−20064
VHSIC chip and module packaging status 87−10180
video display drivers module, application specific packaging and heat sink construction 87−137
video signal processor module with LSI devices 88−53587
virtual grid compaction in macro-module generators 86−20503
VLSI, mix-and-match prototyping using objects 88−20090
VLSI board and module tester improvements for high-speed functional tests 88−64069
VLSI CAD database, modular system 85−33606
VLSI circuits, minimal area power and ground nets 86−21796
VLSI design, deriving module interconnectivity from behavioral specifications and coupling a VLSI layout editor for error-free routing 87−38438
VLSI join module, associative parallel 88−32262
VLSI module selection, NEPTUNE frame-based system 87−44486
VLSI modules, anal. of timing failures due to random AC defects 86−21790
VLSI modules, temperature/humidity stress tests, air flow depend. 86−52242
VLSI multilevel representation, DIF framework 85−12344
VLSI self-timed system design 86−15236
VLSI-/370 microprocessor, hierarchical physical design system 88−70425
VLSI/VHSIC packaging, multi-chip module design 86−57212
VME-bus DMA controller module for multiprocessors *(German)* 85−28605
voice mail system for hotel business *(Japanese)* 86−43482
water cooled copper clad invar hybrid power circuit 88−1267
Wavescan buoy data acquisition module 87−56557
welded filament chip heat sink 86−40548
zero insertion force connectors, high reliability solder connection 86−14616
zero insertion force resilient connector, design for pluggable modules 85−61512
GaAs FET amplifier module, S-band, high pulsed power 85−6530
GaAs FET microwave power amplifier modules for 14-GHz band 86−14508
GaAs Ka-band monolithic FET power amplifier modules 88−63972
GaAs power FET K- and Ka-band high efficiency amplifier modules 87−73777
HgCdTe/Si IR sensor hybrid module for multispectral linear array/Landsat appls. 86−5059
Li battery modules, RAM uninterruptible power supply appls. *(German)* 85−54643
$LiNbO_3$:H,Ti integrated optic Bragg modulator modules for optical computing 88−2042
Si bifacial solar array alternative module configuration for low Earth orbit 87−78936
a-Si solar cells, consumer electronics and automotive power appls. 86−40103
Si solar photovoltaic modules, flat-plate, effect of solar concentration on performance 85−49108

modulus, Young's *see Young's modulus*

moire fringes
3 D object shape acquisition, automatic, using moire topography 88−73289
3-D machine vision, quasi-cylindrical objects inspection by phase meas. moire topography 87−49932
3-D machine vision for automatic measurements of complex shapes, industrial appls. 85−46967
advanced optical metrology at Loughborough University 88−2443
anatomical surface replicas using moire topography and computer vision *(Italian)* 85−37987
biostereometrics, conf., Cannes, France (Dec. 1985) 87−51703
body diagnosis, Moire topography system using zoom lens *(Japanese)* 85−38029
centrifugal spherical waves demonstration using OHP equipment and group of minute articles 86−66555
computer aided laser measurement techniques *(German)* 87−75293
computer-based fringe patterns differentiation, microcomputer appl. 87−63226
computer-generated holograms, plotting errors meas. using improved interferometric method 85−12979
contouring of CAD generated objects 88−53875
contouring technique, small-angle 88−52560

moire fringes continued
defect detection, holographic fringe linearisation interferometry, load desensitisation with moire technique 86−7873
deformation meas. using spatial frequency modulation of holographic interferometry, moire method *(Japanese)* 87−35192
deformation measurement using holographic interferometry and moiré fringes 87−29280
diffraction moire interferometry, dynamic regime 88−18806
diffusely scatt. objects, dynamic deform. meas. by holographic moire and speckle interferometry 87−23791
digital moire-effect processing of holographic interferograms 87−69255
displacement sensor using moire fringe techniques with multimode optical fibres 86−36203
dynamic digital memory for holography, moire and ESPI techniques 88−2413
dynamical studies by moire evaluation in holography, electronic speckle pattern interferometry improvements 86−3319
electro-optical displacement meter *(Russian)* 85−29650
engineering meas., conf., Cannes, France (Dec. 1985) 87−16248
ESPI and moire methods for deform. meas. at very high temps. 87−61265
fibre reinforced composites, optical NDT methods, book contrib. 88−12123
frequency multiplication using analog multipliers, displacement meas. appls. *(Chinese)* 85−4110
fringe patterns of interferograms, holograms, moiregrams and specklegrams, moire evaluation 88−2417
full field automatic 3D surface reconstruction from moire topograms, phase shift method 88−47669
grinding wheel form dresser, conversion to digital readout 85−3849
high-resolution encoder by multiplication of Moire fringes *(Japanese)* 88−33835
hologram, hyperbolic, Fresnel diffraction characts. 85−29947
hologram reconstruction accuracy and uniformity, moire anal. 87−2240
holographic moire inspection, calibration tests 86−15799
holographic moire projection technique 85−62682
holographic projection system, lens array, adjustment inaccuracy effect on 3-D image quality 85−13000
holography, moire evaluation techniques 88−40406
hybrid moire topography *(Japanese)* 85−37806
interferometric alignment technique using holographic configuration 86−21307
interferometric testing technology developments and appls. in Japan 88−53878
keratometer, real-time analysis, for diagnosis and meas. of corneal parameters 87−77625
linear displacement meas. using spatial phase detection of 1D periodic pattern *(Japanese)* 87−35191
lithographic exposure tools, overlay and resolution errors, moire technique 85−29249
machine vision techniques for 3-D surface formmeasurement 86−23170
measurement trends and new techniques *(Japanese)* 86−50215
mechanics meas. methods, static and dynamic, computerised optical techniques 88−20791
medical image optical and electronic processing, book contrib. 86−25223
mix and match lithographic system, moire alignment technique 88−39323
object small displacement real time meas. by high speed video camera with moire pattern 85−31590
optical methods in composites, conf., Keystone, USA (Nov. 86) 87−31136
optical-logical operation for moire pattern beat anal. 88−51637
overhead projector moire fringe patterns demonstrating centrifugal waves *(Japanese)* 85−32961
photographic films, colour, archival storage using white light processing, moire fringe pattern avoidance 85−36362
photointerrupter with high resolution encoder function moire stripe appl., Sharp GP1A35R *(Japanese)* 88−2080
photomechanical analysis of composite and other materials 88−49919
picture processing, scanning moire method, to obtain fine binary pictures 88−28005
practical holography, conf., Los Angeles, CA, USA (Jan. 1986) 87−10004
projection moire contouring using CCD cameras 87−70475
range finding, holographic, moire and fringe projection contouring 88−10133
real-time moire holography 87−12631
remote positioning sensor system using Moirefringes of two Fresnel zone plates 86−5108
sampling of halftone images, moire fringe suppression 87−19868
scanning moire method for 2 valued picture *(Japanese)* 87−7833
scanning moire topography, fringe sequence number automatic determ. *(Japanese)* 87−14239
scoliosis screening, fast digital image processing of moire topographic patterns, electronic aid 85−38132
shadow-mask picture tubes, moire considerations 88−12905
shape and vibrational mode sensing and analysis 86−10026
shearing holographic moire for strain patterns 88−40404
skin diagnostics by shadow moire topography, visibility calc. using Sinclair Spectrum computer *(Czech)* 87−8908
slope and deformation mapping grating projection technique 85−37632
spatial filtering and anal. *(Chinese)* 87−7834
spatial Moire hologram reconstruction and appls. 88−40387
straightness measurement using heterodyne moire method *(Japanese)* 86−5523
strain and curvature determ. by phase shift principle *(German)* 87−77420
strain gauge with high sensitivity 88−53661
surface finish, beam quality analysis by moire deflectometry 85−15025
surface height measurements by phase-shifting moire interferometry 86−11718
surface meas. using phase-measuring moire topography with digital image analyser 88−4647
transducer design based on moire fringes 86−44292
transducer for angular and linear displacements withseparated gratings 87−3569
video pictures taken by solid state image sensors, moire patterns *(Japanese)* 85−14423
X-ray contrast inspection of contact area of contact joints using moire method, accuracy 87−360
X-ray lithographic mask alignment using moire signals in refl. 87−63245
X-ray lithographic mask positioning technique using moire interference 87−24987
X-ray lithographic masks, automatic alignment technique using moire interf. 87−38034
moire fringes continued
X-ray lithographic masks, precision alignment technique using moire interference *(Japanese)* 86−14987
Si sheet, residual stress meas. by shadow moire interferometry 87−49960

moistening *see wetting*

moisture control
see also humidity control
capacitors, heavy duty, vacuum drying, engineering calcs. 88−44390
chip carriers, hermetic leadless type, with Ag-epoxy die attach adhesive, moisture control process 85−195
dew point sensor, heat-flux based, for high-temp. dirty drier environments 88−29360
hermetic packages true permissible leak rate, increasing by four orders of magnitude 86−40554
irrigation scheduling based on soil moisture, microcomputer control 87−70895
medical heat and moisture exchangers, technical study on efficiency *(German)* 88−16749
paper machines, closed loop moisture control using infrared heating, electrical energy considerations 85−22033
sealing glasses used in IC packaging, moisture evolution anal. 85−54146
tobacco drying process *(Japanese)* 88−16563

moisture measurement
see also humidity measurement
airborne IR roof moisture surveys 88−68093
apatite concentrates, water-content measurement system 87−29912
atmospheric moisture content, CCOPE microwave radiometry 85−59477
atmospheric vertical moisture profile retrieval from microwave radiometric obs. 86−6121
automatic super HF moisture meter for raw cotton humidity meas. *(Russian)* 87−21290
bare soil moisture, passive microwave meas. improved by active microwave scatterometry 85−64723
bushings, 132 kV, diagnostic monitoring 88−75213
cable sheath water vapour and gas diffusion meas. *(French)* 87−5264
capacitance technique for measuring moisture content using dielectric data−an immersion method 88−36188
ceramics industry continuous moisture measuring device *(Hungarian)* 87−31590
coal, heating value, determ. by discontinuous methods using radiometric transducers *(Rumanian)* 85−8988
coal, on-line moisture determ. at preparation plants 85−15008
coal quality determ. by property marks of brown, power engineering coal 87−22008
composite, microwave NDT, moisture monitoring 85−17032
computer-aided sample analysis for oil-seed plant *(French)* 85−8697
continuous moisture monitors in range 1 to 15 p.p.m. 86−5605
damp detector 86−52983
dielcometric meas. means accuracy increase 85−48066
dielcometric water-content meter, methodological error in checking by use of water content simulators 87−29369
dielcometric water-content meters, metrological characts. 87−29368
dielectric and encapsulant layers, adhesion testing, moisture detector technique using Ag ion migration effect *(Polish)* 85−35247
dielectric meas. of microwave frequencies, polymerisation process appl. 86−5487
dielectric-loss water-content meter calibration using a multiparameter model 86−11629
digital IR sensor for solid-fuel power plant appl. 87−35824
direct reading microwave moisture meters, error analysis, adjustment, calibration 88−68080
electrical capacitance and other properties for moisture measuring devices 86−31746
electrical metrology applied to biological and aqueous systems 87−57064
epoxy-glass composites, dielec. loss meas. of moisture 85−37809
fluid detector IC, LM 1830N 85−6470
gases, capacitance and optical cooled mirror sensors comparison 86−5607
grain moisture content measurement *(Polish)* 86−70254
grain moisture meas., TsV3-3 hygrometer *(Russian)* 87−29012
grain moisture measurement system *(Japanese)* 86−31160
grain products, water content meas., standard thermal vacuum system 86−11500
hair moisture meter HC-100 *(Japanese)* 86−31743
Hevea rubber later moisture content determ. using microstrip sensors 88−60984
hollow cored teflon dielectric rod resonator for moisture content measurements by microwaves *(Japanese)* 88−29615
humidity-induced failures in parylene-coated hybrids 85−11809
hybrid package thick film hermeticity monitors 85−37607
hygrometer, multiparametric microwave type of measuring moisture content *(Russian)* 85−31522
IC package moisture determ. by conductance technique 87−134
inductive-capacity moisture gauge for powder processes *(Japanese)* 87−63362
industrial environment, meas. techniques 86−55899
infrared moisture meter *(Russian)* 85−9014
IR absorption gauging, industrial appls. 87−50011
IR moisture gauge for powder processes *(Japanese)* 87−63572
IR roof moisture surveys, standard practices, ASTM status 88−14
irrigation scheduling based on soil moisture, microcomputer control 87−70895
LED moisture gauge 85−14832
linen material, raw, water-content meter 87−35250
LPE cable insulation, moisture concentration measurement 86−65306
metrological support for water content meters production, textile industry appl. 88−35927
microcomputerized neutron moisture gauge *(Chinese)* 88−36297
microelectronic packages, hermeticity meas. 88−6282
microwave, in sandstone cores, temp. effect on accuracy 85−37808
microwave, open cavity resonance sensor *(French)* 85−31635
microwave detection of nonelectrical props. in China, review 87−29266
microwave moisture measurement instrument, error analysis 88−36296
microwave transmission phase-shift measurement for moisture determination *(German)* 87−21293
MM wave moisture sounding, effect of clouds 87−63959
multiparameter electrical method appl., coal moisture content meas. 85−37400
multiple-parameter microwave moisture meter *(Russian)* 87−21287

moisture measurement continued
near-IR hygrometer, insensible perspiration meas. appl. *(Japanese)* 85−38001
neutron method, pulsed, for moisture content meas. of bulk materials in metallurgical prod. 86−26954
neutron moisture meter, data retrieval using portable microcomputer 88−16550
nuclear bulk solids analysers, continuous, for cement plant raw mix preparation systems 87−63566
nuclear wet steam turbine expansion curve determ. by radioactive tracer meas. *(Croatian)* 87−42583
optical cable splice closure addressable moisture sensor converted from pressure transducer 87−49118
ore input to grinding mill, electrical set-up 85−15092
paper, electronic moisture meter, laboratory type 86−5603
paper moisture and thickness meas. using cavity resonator *(Japanese)* 86−31611
paper sheet moisture measurement using far IR laser 85−20761
particulate solids, microwave techniques 87−56825
plywood production, moisture meas. meter for wood chips *(Russian)* 85−37814
polyimide capacitive moisture sensor design 86−55675
portable infrared moisture analyzer *(Finnish)* 86−70168
power cables, XLPE insulated, water content meas., operating experience, Norway 86−51022
power transformer hard insulation, moisture content estimation, reliability improvement *(Russian)* 87−78718
practical requirements *(German)* 86−65302
QC instruments, X-ray and optical, moisture meter *(French)* 86−57228
quasi-balanced bridge for moisture meas. in petroleum and petroleum products *(Russian)* 87−29194
radio and microwave freq. techniques for online anal. of biological materials 88−4703
radioisotopic industrial measurement techniques 86−38582
radiowave sensor for dielectric sheets props. meas., veneer moisture and mass meas. 88−16071
reference psychrometer, with double stainless-steel shield structure *(Japanese)* 86−6107
refractometric water-content meas., systematic error reduction by structural method and microcomputer 87−29367
roof moisture survey using IR testing, case history 88−68094
rot detection in tree trunks using electrical conductivity meas. *(German)* 88−74643
rubber latex, water content meas. using microstrip sensors 88−53614
sandstone cores, oil and water content meas. using microwave techniques 87−29366
sealing glasses used in IC packaging, moisture evolution anal. 85−54146
semiconductor gas systems, moisture content effects reduction 87−74169
semiconductor housings using tunable diode laser spectroscopy *(Dutch)* 88−11706
sensors for moisture content in cotton on production lines *(Russian)* 88−68092
service equipment, sensitive technique for detecting moisture ingress 86−19824
sheet material basis weight and moisture content meas. with microwave sensor 88−22812
sheet materials, basis weight and moisture content, microwave cavity measurements 87−70584
SHF, absolute-moisture hygrometer, based on dielectric method 86−55903
sHF method of measuring moisture content of materials without preliminary weighing of sample *(Russian)* 88−60983
SHF moisture meters effectiveness evaluation 86−38432
SHF wave reflection effect on moisture content meas. 86−44479
soil, density and moisture meas. by gamma-ray transmission and scattering *(Japanese)* 86−31730
soil, density and water content meas. using photon multiple scatt. 85−15089
soil field capacity meas. and empirical formula 88−4705
soil moisture, passive microwave remote sensing 85−64761
soil moisture, temp. and thermal cond. meas., portable instrument *(German)* 85−48453
soil moisture content measurement by electromagnetic method 86−18523
soil moisture content monitoring using microwave signals, feasibility study 85−20714
soil moisture correlation with airborne microwave sensor data 85−64722
soil moisture meas., remote sensing in 100 MHz-1 GHz range 87−29943
soil moisture meter 88−47629
soil water content and elec. cond. meas. method, by time domain reflectometry 88−74962
soil water content determ. by time domain reflectometry method 88−74961
solid fuel power plants, intelligent instrumentation 88−5517
standards development, analytical correlation evolution military appl. 87−56916
state-of-the-art in the 1980s *(Italian)* 85−31634
steel and cast iron manufacture *(Japanese)* 86−31157
stratum corneum moisturization meas. using skin admittance, portable device *(Japanese)* 85−38002
stripline moisture sensors, broadband measurement 85−37585
surface conductivity sensors for moisture meas. 87−3803
synthetics fibre manufacture, moisture meas. *(German)* 85−65672
thermal field calc. in tobacco leaf drying *(Russian)* 88−42310
timber moisture content meas. method, with automatic data logging, 10% to 50% w/w 87−8782
UHF water-content meters for cotton materials 87−29370
underground power cables, influence of moisture content in surrounding soil 86−56432
unsaturated fly ash landfill moisture content and pressure potential instrument evaluation 87−63920
US testing of plastics and glued joints *(German)* 86−13893
veneer sheets moisture content and mass per unit area determ., using radiowave sensor 87−70630
VLSI component dopant carrier gas dryness monitoring sensor *(German)* 88−71644
water sensors, capacitive type, design optimisation 86−44300
wet soil permittivity obs. at 3 to 37 GHz and −50° to 23°C 85−64249
wood shaving water content, acoustic meas. 87−35249

$Al_xGa_{1-x}As$ MBE layers, deep electron traps, flux ratio effects 87−5400
$Al_xGa_{1-x}As$ MBE layers, thermal conversion 88−7303
$Al_xGa_{1-x}As$ and GaAs MBE growth, phase-locked epitaxy using RHEED oscillations 85−10678
$Al_xGa_{1-x}As$, automated growth by MBE using an ion gauge flux monitor 86−431
$Al_xGa_{1-x}As$ ballistic transistors, electron beam source MBE 88−31736
$Al_xGa_{1-x}As$ grown by MBE, morphological defects 85−39731
$Al_xGa_{1-x}As$ optical devices, MBE growth *(Japanese)* 85−29851
AlGaAs:Be, MBE growth, Be redistrib. 85−34812
AlGaAs:Sb, MBE growth, Sb doping 87−1388
AlGaAs:Sb, MBE growth, elec. and optical props. 86−52464
AlGaAs:Si crystals, DX centre, MBE growth conditions independ. 86−21137
AlGaAs:Si, electrical properties, effect of coincident Pb flux during MBE growth 87−45578
AlGaAs:Si/GaAs:Si, DHLED, MBE, plane selective doped lateral p-n junction form. 87−46714
$Al_{0.3}Ga_{0.7}As$:Si, MBE growth, effect of As vapour species used on elec. props. 85−44698
$Al_{0.3}Ga_{0.7}As$:Si layers, MBE grown, elec. and optical props., annealing effect study 86−27859
$Al_xGa_{1-x}As$:Be(Si), doping in MBE, binding energies, persistent photocond. 85−41235
$Al_xGa_{1-x}As$:Si, lightly doped, MBE growth 85−22482
AlGaAs/GaAs 1K HEMT SRAM, fully operational chip 86−52833
AlGaAs/GaAs (111) heterostructs., MBE grown 86−26816
AlGaAs/GaAs DFB laser, two-step MBE growth, low threshold current 86−3129
AlGaAs/GaAs GRINSCH lasers grown by MBE, low threshold current density 88−14192
AlGaAs/GaAs HBT, novel structure for near ballistic collection 88−33169
AlGaAs/GaAs HBTs, heavily doped GaAs:Sn buffer layers 88−50817
AlGaAs/GaAs HEMT, MOVPE versus MBE growth 86−52500
AlGaAs/GaAs MBE grown on (100) GaAs substrate, slope angle influence on Si doping 87−25070
AlGaAs/GaAs MBE heterostructs., Si doping, cryst. orientation dependence 86−8973
AlGaAs/GaAs MQW reflection modulators, MBE grown on Si substrates 88−65368
AlGaAs/GaAs Si-doped MODFET, MBE grown, DLTS meas. 85−40727
AlGaAs/GaAs heterojunction bipolar transistors, MBE growth 87−45894
AlGaAs/GaAs heterojunction bipolar transistors, MBE grown, photolum. 88−39395
AlGaAs/GaAs heterojunction bipolar transistor, planar doped 2D hole base, MBE grown 88−50816
AlGaAs/GaAs heterojunction bipolar transistors with 4 W/mm power density at *X*-band 88−12608
AlGaAs/GaAs heterojunction, tunable barrier heights and band-edge discontinuities using doping interface dipoles and MBE 85−34556
n-AlGaAs/GaAs interface, 2D electron gas, MBE growth using direct-radiation substrate heating 86−436
AlGaAs/GaAs multiquantum wells, MBE growth, photolum. and magnetoabsorpt. meas. 86−66837
AlGaAs/GaAs quantum-well devices will challenge HEMTs 87−6431
AlGaAs/GaAs radiation hardened photodiodes 85−35623
AlGaAs/GaAs radiation hardened photodiodes, MBE grown, pulsed irradiation effects 85−24398
AlGaAs/GaAs, rigid waveguide DFB laser, low threshold current, CW operation 86−29127
AlGaAs/GaAs structures, MBE growth, compositional gradient control, RHEED oscills. 87−36705
AlGaAs/GaAs tandem solar cell, GaAs tunnel junction 88−43385

AlGaAs/InGaAs single-quantum-well MODFETs, MBE grown, cryogenic operation study 86−2151
AlGaAs/InGaAs/GaAs strained-layer HJBTs, MBE growth 86−41747
n-$Al_{0.27}Ga_{0.73}As/In_{0.15}Ga_{0.85}As$/n-$Al_{0.15}Ga_{085}As$ strained selectively doped DH FET, MBE grown, characts. 88−39525
$Al_{0.3}Ga_{0.7}As$/GaAs single quantum well structures, MBE growth on mis-oriented substrates 86−46313
$Al_{0.4}Ga_{0.6}As$/GaAs tandem solar cells, MBE growth 88−24127
$Al_xGa_{1-x}As/Ga_{1-y}In_yAs$/GaAs strained-layer double barrier resonant tunnelling structure 88−44735
$Al_xGa_{1-x}As$/GaA selectively doped heterostruct., high throughput high yield MBE fabrication process 86−53493
n-$Al_xGa_{1-x}As/p^+$-GaAs heterojunction diodes grown by MBE, spacer layer thickness optimisation 86−53380
AlGaAs-GaAs DFB laser grown by two-step MBE 86−63820
AlGaAs-GaAs DFB laser, low threshold current, two step MBE growth 86−36511
AlGaAs-GaAs HBTs, fabrication and charactn. 87−38209
AlGaAs-GaAs HBTs on InP substrate, MBE growth 87−45880
AlGaAs-GaAs HJBTs, MBE growth 86−15139
AlGaAs-GaAs, MBE grown structs., substrate misorientation effects 88−1374
AlGaAs-GaAs MOCVD epilayers, role of reactants on quality 87−36772
AlGaAs-GaAs MQW lasers on Si substrates, MBE grown, low threshold operation 87−68443
AlGaAs-GaAs heterointerface, MBE grown, struct. and transport props. 88−64310
AlGaAs-GaAs heterojunction MESFET with self-aligned gate, struct. and fabrication 86−58477
AlGaAs-GaAs heterojunction bipolar transistor with direct-radiation substrate heating, MBE grown 86−28291
AlGaAs-GaAs, heterostructure junction FET 87−11769
AlGaAs-GaAs heterostructure on GaAs (110), MBE growth and props. 87−36726
AlGaAs-GaAs heterostructures, MBE growth with interruption at interfaces, optical props. 87−73088
AlGaAs-GaAs laser MBE, substrate tilting effects 88−18680
AlGaAs-GaAs laser diode, inner stripe type, single-step MBE fabrication 87−39092
AlGaAs-GaAs laser diodes, MBE growth with In-free substrate mounting method *(Japanese)* 86−42569
AlGaAs-GaAs lasers grown on Si substrate by MBE, high-frequency modulation 88−34084
AlGaAs-GaAs lasers, single element fundamental mode, recent developments 87−61162
AlGaAs-GaAs low threshold lasers, MBE growth on tilted (100) GaAs substrates 88−40247
AlGaAs-GaAs modulation-doped heterostructures, MBE grown 85−34552
AlGaAs-GaAs multiple quantum well lasers 85−46385
AlGaAs-GaAs planar-doped 2D-hole-gas-base HBT, MBE growth 88−26214
AlGaAs-GaAs quantum well resonant tunnelling bipolar transistor with room temp. operation, characts. 87−45905
AlGaAs-GaAs quasiparabolic quantum well, resonant tunnelling 88−44568
AlGaAs-GaAs ridge waveguide DFB laser, MBE fabricated, low-threshold current 87−39108
AlGaAs-GaAs self-aligned HBT with non-alloyed graded-gap ohmic contacts to base/emitter 88−39419
AlGaAs-GaAs self-aligned gate MODFETs MBE grown on (100) Si substrates 87−18131
AlGaAs-GaAs single quantum well, MBE growth interruption, well width fluctuations 87−278
AlGaAs-GaAs single quantum wells with growth interrupted heterointerfaces, photoluminesc. 87−16614
AlGaAs-GaAs tandem solar cells with tunnel junction, MBE growth 88−37598
AlGaAs-GaAs tunable multilayer interference optical modulators, MBE growth 88−51561
AlGaAs-GaAs tunnelling emitter bipolar transistors, MBE grown, struct. and charactn. 88−39420
AlGaAs-GaAs-AlGaAs selectively doped DH-FET with Pd-buried gate struct., MBE growth 88−13435
AlGaAs-GaAs-AlGaAs selectively-doped double-heterojunction FET, appls. to digital ICs 88−56273
AlGaAs-InGaAs pseudomorphic modulated-doped HEMT structs., MBE growth, rapid thermal annealing 88−71603
AlGaAs-InGaAs resonant tunnelling structs., MBE growth 87−73099
$Al_{0.3}Ga_{0.7}As$-GaAS superlattices, epitaxial growth on structured substrates, TEM study 88−38181
$Al_{0.3}Ga_{0.7}As$-GaAs low-noise microwave HEMT, MBE grown, design, fabrication and characts. 87−37565
$Al_{0.3}Ga_{0.7}As$-GaAs optically-pumped multiple quantum well laser 87−2113
$Al_xGa_{1-x}As$-GaAs quantum well heterostructs. grown on Si, stable room temp. CW laser operation 87−75073
$Al_xGa_{1-x}As$-GaAs quantum well heterostructure, continuous photopumped laser operation 87−61133
$Al_xGa_{1-x}As$-GaAs quantum wells, MBE growth on GaAs (331) substrate 87−73097
$Al_xGa_{1-x}As$-GaAs selectively doped heterostruct., MBE, GaAs oval defect elimination by substrate prep. 87−36720
$Al_xGa_{1-y}As$-$Al_xGa_{1-x}As$ DH MBE lasers, substrate polishing effects 85−29848
AlGaInAs films on InP, MBE growth and characterisation 88−64262
AlGaInAs lattice matched to InP, MBE growth and characteris. 88−31747
AlGaInAs/GaInAs, double HJBT, MBE growth, characts. 87−45892
AlGaInAs-InP, MBE growth for optoelectronics appls. 88−56246
$Al_{0.4}Ga_{0.6}Sb/GaSb/AL_{0.4}Ga_{0.6}Sb$ DH lasers, optically pumped, molecular beam heteroepitaxy on Si 86−36462
$Al_{0.5}Ga_{0.5}Sb/InAs_{0.91}Sb_{0.09}/Al_{0.5}Ga_{0.5}$ Sb DH laser, optically pumped, MBE grown, 3.9 μm output 86−36461
$Al_{0.4}Ga_{0.6}Sb$-GaSb-$Al_{0.4}Ga_{0.6}Sb$ MBE strained layer DH, optically pumped laser oscill. 1.6 to 1.8 μm 87−7363
$Al_xGa_{1-x}Sb_yAs_{1-y}$ epitaxial films lattice matched to InP, MBE growth 85−33407
molecular beam epitaxial growth continued

GaAs:Si, MBE growth, Si incorporation 88−31749
GaAs:Si, MBE growth, carrier concentration, dislocation effects 87−31508
GaAs:Si, MBE growth, elec. and optical characterisation 86−20066
GaAs:Si, MBE growth on (311) substrates, elec. and optical props. 87−65505
GaAs:Si MBE, lateral p-n junction formation, cryst. plane-depend. doping 86−20032
GaAs:Si MBE layers, H_2 effects 86−52444
GaAs:Si, atomic layer molecular beam epitaxy 88−56261
GaAs:Si, δ-doping layer, magnetotransport props. 87−66918
GaAs:Si, doping from disilane in gas source MBE 87−44322
GaAs:Si, doping technique using MBE 85−12124
GaAs:Si film and MODFET layers, MBE film growth by direct free substrate heating 85−39735
GaAs:Si, gas source MBE growth, Si doping 87−65503
GaAs:Si layers, MBE grown, elec. and optical props., annealing effect study 86−27859
GaAs:Si, mechanism of doping of MBE-grown samples 86−53537
GaAs:Si, molecular beam epitaxial growth, δ-doping layer 88−56262
GaAs:Si/GaAs/$Al_{0.3}Ga_{0.7}As$ quantum well electron barrier diodes, symm. and asymm., electronic characts. 87−67204
GaAs:Si,Be, MBE, dopant interaction 87−23680
GaAs:Sn MBE grown in hydrogen presence, DLTS and photolum. 87−37890
GaAs:Sn, behaviour of Sn atoms 86−28133
GaAs:Sn, impurity incorporation by MBE, elec. charactn. and SIMS studies 88−24729
GaAs:Sn, in situ selected area doping during MBE growth 86−8990
GaAs/$(Ca,Sr)F_2$ heteroepitaxial layers, MBE grown, crystalline defects 87−58926
GaAs/Al quantum wells, MBE growth, photoluminescence and absorption linewidth studies 87−1273
GaAs/$Al_{0.3}Ga_{0.7}As$ laser diodes, MBE growth 88−33988
GaAs/$Al_{1-x}Ga_xAs$, asymmetric quantum well electron barrier diode 85−40682
GaAs/$Al_xGa_{1-x}As$ MBE grown superlattices, effect of barrier config. and interface quality on props. 87−24879
GaAs/$Al_xGa_{1-x}As$ modulated structs., MBE growth kinetics, RHEED studies 87−277
GaAs/$Al_xGa_{1-x}As$ single quantum well MBE heterostructs., optical transitions and acceptor binding energies 85−56421
GaAs/$Al_xGa_{1-x}As$ superlattice struct., MBE grown, optical props. and expt. study 85−56657
GaAs/$Al_xGa_{1-x}As$/GaAs tunnel junction, canonical four-terminal device 85−55547
GaAs/$Al_xGa_{1-x}As$(100), RHEED, probe for crystal growth dynamics, MBE 86−447

molecular beam epitaxial growth continued
GaAs/$Al_xGa_{1-x}As$(100) quantum well structs., MBE, RHEED, photolum., computer simulation 87−37941
GaAs/AlAs double-barrier resonant tunnelling structure, MBE growth on Si 88−64276
GaAs/AlAs short period superlattices, MBE grown, interface broadening, Raman scatt. 85−61715
GaAs/AlAs superlattices, artificially layered, MBE growth and δ-doping 88−18691
p^+-GaAs/AlAs/n-GaAs heterostructures, MBE grown, C-V and I-V characteristics 86−35384
GaAs/AlGaAs (100) interfaces, MBE growth, RHEED study 85−54439
GaAs/AlGaAs DH tunnelling hot electron transistors 85−50503
GaAs/AlGaAs GRIN SCH quantum well lasers, MBE growth on misoriented (111)B substrates 87−54335
GaAs/AlGaAs HEMTs, fabrication process based on electron beam lithography 87−18051
GaAs/AlGaAs HEMTs, multiple channel, MBE growth 85−50529
GaAs/AlGaAs, MBE grown on nonpolar substrates, growth and props. study 85−54454
GaAs/AlGaAs, MBE growth, substrate orientation *(Japanese)* 88−38173
GaAs/AlGaAs MODFET, MBE growth on Ge (100) substrate 85−12292
GaAs/AlGaAs MODFETs, MBE growth on (100) Si, characts. 85−6927
GaAs/AlGaAs MODFETs direct MBE growth on (100) Si substrates, charact. study 85−55856
GaAs/AlGaAs MODFETs on Si substrates, DC and microwave characts. 87−6076
GaAs/AlGaAs diode lasers on monolithic GaAs/Si substrate, room temp. operation 86−15683
